THE PROPERTY MARKET.

On the whole the week has been a dull one at the Mart, and no great properties have changed hands. Yesterday week the total of the day's sales amounted to £9,368. Reversionary interests, life policies, and gas shares formed the staple supply, only one small property figuring in the returns. Some freehold ground rents at Hampstead and Harrow were bought in, as even gilt-edged securities are not worth more than their equivalent value in gold. A three-days' sale of engravings, left by the late Hon. Ashley Ponsonby, concluded on Wednesday at Messrs. Christie's, the amount realised being £3,875. Wednesday's sales at the Mart only realised £3,875. The more important lots failed to find purchasers.

Mr. Alfred Richards has another important sale of gas and water debenture and ordinary stocks and shares, at the Mart, on Monday next. There are included in the list, stocks and shares of the Crays Gas Company, Maidenhead Gas Company, Great Yarmouth Water Works Company, Henfield Gas and Coke Company, Limited, Whitechurch and District (Hants) Gas Company, Limited, Goring and Streatley District Gas and Water Company, Portsea Island Gas Light Company.

Merry Hall, Ashtead, near Epsom Downs, a freehold property with 30 acres, for sale on the 21st inst., is recommended by Messrs. Wootton & Green, the auctioneers, as specially adapted for the rearing of racehorses. The winner of the Grand National of seven years ago was trained here.

The estate of Melsetter, with an area of about 40,971 acres, has been sold at Edinburgh for £52,000.

There is terrible distress among the peasantry of the central and south-eastern provinces of Russia. It is said to be worse than during the famine of 1891. The peasants in Tamboff are feeding their half-starved cattle on thatch from the roofs of their houses, and are ready to sell their last cow or pig for a few kopeks. "Hunger, typhus, and other illnesses are making rapid headway," says the *Times* St. Petersburg correspondent. Hunger is probably the most incurable of these "illnesses."

The Governor General of Algeria has had a tidy little bill for 2½ million francs sent in to him as the proper costs of the recent raids upon the Jews during the excitement of the Dreyfus agitation. A hundred thousand pounds, or thereabouts, is a big sum to pay for a popular outburst of splenetic rage.

93,395 oz. of gold, valued at £354,900, were exported from Western Australia during the month of January, as against 72,411 oz., of the value of £275,164, in December.

Is this a triumph of British diplomacy at Pekin? Acceding to Sir Robert Hart's request, the Tsung-li-Yamen has appointed Mr. Robert Bredon Deputy Inspector General of Customs, but with the proviso, as the *Times* Shanghai correspondent states, that the chief authority is "not to be delegated." Just so. The proviso is doubtless for the satisfaction of Russia.

The directors of the Highland Railway Company announce a further issue of £100,000 three and a half per cent. preference stock, to be offered to the ordinary shareholders at 3 per cent. premium.

It is estimated that about 250,000 people—women as well as men—will be on their way to Klondike as soon as the roads open in the spring.

Prices Quoted on the London Stock Exchange.

Throughout the INVESTORS' REVIEW middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the INVESTMENT INDEX published quarterly—January, April, July, and October—in connection with this REVIEW, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the REVIEW almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the INVESTORS' REVIEW any subscriber can follow for himself the movements of securities from week to week, and the INVESTMENT INDEX will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S.F. Snk.Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D.Stk., *debenture stock*; Pf., Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Anns., *annuities*; Cu. or Cm., *cumulative*; Gu or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Insc., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*.

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

The Investors' Review

Vol. I.—No. 7. New Series. FRIDAY, FEBRUARY 18, 1898. [Registered as a Newspaper.] Price 6d. By post, 6½d

THE

LAW GUARANTEE AND TRUST SOCIETY, LIMITED.

Capital Subscribed	£1,000,000
do. Paid-up	£100,000
do. Uncalled	£900,000
Reserve Fund	£70,000

FIDELITY GUARANTEES,
On behalf of Managers, Secretaries, Clerks, Cashiers, Collectors, &c.

DEBENTURE INSURANCE.
The advantages of such insurance are as follows:—
1. The Debentures being guaranteed by the Society can be placed at not less than par, thus saving discount.
2. A lower rate of interest is willingly accepted.
3. The Society acting as Trustee for Debenture Holders also adds to the Security.

MORTGAGE INSURANCE.

CONTINGENCY INSURANCE,
In respect of Defects in Title, Lost Documents, Missing Beneficiaries, Re-Marriage, Issue and Name and Arms Risks, &c.

LICENSE INSURANCE.
Mortgagees of Licensed Property should always insure in a substantial Insurance Society against loss they may sustain by depreciation in consequence of the license being lost.

TRUSTEESHIPS for Debenture Holders, and under Wills, Marriage Settlements, &c.

The Investors' Review.

Banking Prosperity and Market Inflation.

The half-year just passed was a good one for British banks. So say all bank chairmen at shareholders' meetings, and it is the fact. Rates for money were more favourable to the lender throughout the larger half of the six months, banks paid less for their deposits and obtained more from those who borrowed these deposits. Profits and dividends were consequently better on the average, and in some instances money saved from revenue was actually added to reserves; therefore bank shares have advanced to prices never seen before in the history of British banking. All sorts and conditions of men are gravely and persistently buying these shares for investment, with never a passing glance at the formidable liability most of them carry, and, by the law of averages which sways and evens down all human affairs, they must one day pay for their forgetfulness. In stating that profits have been good because the Money market is more favourable to the dealer therein, it should be plain to the least critical mind that the whole case is not thus comprehended. Pass outside banking business and, at most points, we fail to discover substantial grounds for this well-being. The country's trade did not expand last year, has not been expanding for years back, except on the import side—a side which may either indicate increasing national wealth, or increasing national thriftlessness, according as it represents increased returns from money invested abroad, or increased sales of foreign investments formerly held here. If the excess of imports, in other words, do not represent increased profits on exported merchandise or the increased command of British capital over foreign

sources of production, then they must be paid for by the export of some portion of our already accumulated capital.

We believe that the nation is, and for some considerable time back has been, spending or wasting part of its accumulated capital, but this injurious proceeding may, while it lasts, be a stimulus to banking business, and a source of profit to the banks. Grant that it is so, and the fact remains that our trade, whether foreign or domestic, has not in itself been sufficiently expansive to demand important additional assistance from banking credit in carrying it on. And the decline in agriculture is too well known to require to be dwelt upon. The sources of recent extraordinary banking prosperity must therefore be found outside commerce, and it is so found as we shall proceed to explain. In order to be able to follow what we have to say, the reader must first make himself master of the following summary table compiled from the December balance-sheets of a number of London and country English Banks, the smallest of whose aggregate liabilities to shareholders and the public—and therefore aggregate assets—amount to three millions and upwards. The list is not complete partly because completeness is not necessary for the purpose in view, partly because some of the country banks have not yet sufficiently recognised the Investors' Review to send it their reports.

Name of Bank.	Cash in hand and at the Bank of England.	Bills of Exchange.	Percentage of Cash and Bills to total amount.	Advances and Loans.	Total assets.	Percentage of advances and loans to total assets.	Contingent liabilities on acceptances.

* Includes call money with London banks. † Includes call and notice money.
‡ Liability on inter-circulation in Ireland, £1,077,000.
§ Bills and advances in one item.

A few years ago such a table as the above could scarcely have been compiled, so imperfect were the balance-sheets bank boards thought fit to lay before shareholders. And even now there is a residuum of banks which adhere to the old fashion, so that in the case of the London and Westminster, the London Joint Stock, the National Provincial, and some others, we have had to leave the cash and bills column blank. Even the statutory returns hung up in their offices do not give bills separately as they used to do. Why they cannot put the figures in their half-yearly or yearly balance sheets is one of those oddities of the directorial mind which it is useless to discuss. But, assuming that the proportion of bills to advances held by these banks represents about the average, we find that in no single instance do bills and cash in hand and at the Bank of England represent 50 per cent. of the assets. In bills alone the total held is not seldom below 10 per cent. of the aggregate assets. On the other hand, the proportion of advances and loans, exclusive of the money lent at call and short notice in the market, ranges between 30 and 60 per cent. of the total assets, and is usually nearer the higher percentage than the lower. Out of the total assets amounting to about £370,000,000 shown by the above table, at a very liberal estimate not £30,000,000 is represented by bills of exchange.

This fact surely has an important bearing on the point now under discussion. We do not wish to push the inference too far, and to allege roundly that all these advances represent loans granted for more or less lengthened fixed periods on the security of stocks and shares, for this would not be true. Banking business in most districts may, and frequently does, consist of a multitude of small advances to traders and financiers, made either on specific securities lodged, mortgages, and so on, or on personal guarantees; and business of this kind has always been held to be legitimate for the banker. But, allowing for everything of this kind, the inference is none the less fair that the higher profitableness of the banking business of the three kingdoms has arisen to an increasing extent of late from the enlargement of their more or less direct business with the Stock Exchange. Some of these banks, indeed, openly state that this is so in their balance-sheets, or at least put the matter in a way which makes this a fair and reasonable inference.

But the statement does not rest on inference alone. Invite the testimony of any experienced member of the Stock Exchange, and he will tell you that the method of conducting speculative business has completely changed there within the present generation. Formerly, the speculative account, as it is called, was carried on mainly within the Exchange itself. Jobbers there, and brokers in command of capital, lent money to the speculative buyers of securities from fortnight to fortnight, and by doing so knew not only the extent of the speculative account open in any particular security, but the quality of it as well. Prudent men with this knowledge could protect themselves when they saw some particular movement becoming dangerous. To-day the Stock Exchange has neither this knowledge nor the business on which it was based. It may have itself to blame for the change, and to some extent has, for it is in great need of an overhaul and reform; but, if its own bad methods and want of proper government gave the opportunity, the banks undoubtedly were eager to take it, and the business which was the market's is now in great part theirs.

When a man possessed of any means or credit at all now buys a stock to hold for the rise, he arranges with his banker to pay for it, and it is at once lifted off the market. So long as it is a rising market, as it has in the main been for the past seven years, all goes beautifully, the buyer is richer, the banker is doing an excellent business. But reverse the process, and what then? Then the banks will stand in the breach where the Stock Exchange used to stand in times of crisis, and with nothing to lean upon except the capacity of the individual customer to make losses good. This is a very different position from the old one, where the jobber and the broker and the client, all three, stood

between the bank and loss, and it is made worse by the fact that the extent of the speculative account open in any class of security is now altogether unascertainable. No one banker knows what his neighbour is doing. The "advances" set down in our table tell us nothing definite. To put 50, 100, or 200 millions of them down to Stock Exchange commitments would be mere guess work. But the changed position of the banker and his own absolute ignorance are plain enough. For many years back the banks have been busy, "letting each other in and out" of commitments on the Stock Exchange speculatively entered into, and the rising markets have made the trade thus done profitable to them all.

Concurrently with this gradual change in the relation of banks to the Stock Market we have had an unprecedented development in the art of company-mongering, in the creation of new "marketable securities." How far have the banks, in their eagerness to make high profits, committed their resources to this kind of business? Again we cannot say. We can only infer that the extravagant capitalisation of new or transmogrified businesses with which the past few years have made us familiar, and the extreme prices to which securities of all descriptions have risen, have not come about without the help of credit. Bank deposits and advances mount concurrently, lagging trade and low prices for raw and manufactured products notwithstanding, in a way which suggests inflation, for the simple reason that only through the extension of their business in the direction of the Stock Exchange could anything of the kind have come about. And if there be inflation, if banks have been drawn into partnership with loan syndicates, with company promoters, with speculators for the rise of every hue and degree, what will be their position, the position of their shareholders and creditors, when the inevitable reaction comes? This is a subject worth pondering over, and we shall leave those most interested to meditate on it for the present.

Shipping Bounties and Shipping "Rings."

From time to time a grumble arises in the newspapers over the charges of the shipping companies conducting our trade between India and the Far East and the Australasian Colonies. These die away, producing no result. What may be called a conspiracy of silence is maintained on the part of all shipping interests, and there is no redress. We propose to let a little daylight in upon this dark place.

Perhaps our Indian dependency suffers more than any other part of the Empire from this scourge; but at present we have not sufficient facts about the Indian trade to go into the matter in detail. Many months ago we gave some particulars of the way passengers were overcharged and roughly fed on the steamers of the P. and O. Company, but we are still without particulars in regard to the freight charges of the shipping firms composing the Eastern ring. We trust, however, that some public-spirited merchants, with the genuine interests of the Empire at heart, will come forward with the particulars, now that they know these columns are open to them. In the meantime the following complaint from Singapore, which the *Financial News* copied from the *Straits Times*, will give some idea of the feeling prevalent in trade circles :—

A correspondent of the *Straits Times* complains bitterly of the action of the shipping ring, the leading spirit of which, he says, is the P. and O. Company, from whose offices the business of the ring is transacted. The action of the ring in keeping up freights, he declares, is giving both Belgian and German merchants undue advantages in trade with the Straits Settlements.

"An instance may be given," he writes, "where a firm, last year, had an order for a quantity of iron for shipment to Java. It was found that if the order were executed from the Continent the rate of freight would be 14s. 2d. per ton, although the cargo would have to be loaded at Amsterdam, then brought to Birkenhead, and there transhipped to the Java steamer. If, on the other hand, the iron were got from England, the rate of freight by the same steamer would be 25s. and 10 per cent., and this in spite of the fact that the Amsterdam to Birkenhead voyage would be saved, and also the consequent transhipment. Inquiries made a few months ago showed that very much the same condition of affairs still prevailed, the freight asked from Amsterdam being 20s., and that from Liverpool 30s. per ton.

"It may be asked why the British merchant does not ship his goods by outside steamers or by any line which will accept a reasonable rate of freight. The reply to that is that, half-yearly or annually, the Shipping Conference make a return of 10 per cent. on freights paid to all merchants who make a declaration that they have not during such period shipped by any steamer outside of the Conference. Besides, opportunities of shipment by tramp steamers are very infrequent now, the Conference having succeeded in practically driving off all competition. Were the case otherwise, and were there any competition to speak of, it is unlikely that the Conference would be able to do as they have succeeded in doing during the last few weeks. A notification was issued by the chairman of the Conference in Singapore, intimating an advance in homeward rates of freight, the advance in some cases amounting to as much as 75 per cent. No reasonable person would complain of a material advance in freights if these were at the figure ruling about eighteen months ago, when ordinary Singapore bag goods could be shipped hence to London at about 5s. per ton. But up till a few weeks ago the Conference had their rates fixed on a scale which must have allowed ample remuneration to steamers, and it is this scale which has now been so enormously and so unreasonably enhanced.

"The result of this most recent action of the Conference can hardly fail to be disastrous to Singapore merchants. Indeed, it looks as if the object in view were to do all the harm possible to the trade of the colony. There are certain articles of produce shipped from the Straits Settlements which only find an outlet in European markets by reason of their cheapness. Some of these articles are very low-priced, the freight forming a good share of the cost to those on the other side, and this cheapness, which almost alone enables them to sell, will very largely disappear when high rates of freights have to be paid. Nor will merchants be able to take advantage of cheaper opportunities of shipping by sailing vessels; for it is in contemplation by the Conference to exclude from the benefit of any rebate all those who ship by a sailer instead of by a Conference steamer."

The correspondent suggests that something may be done in the way of limiting the action of the ring by Straits and British merchants approaching the Imperial Government with a demand that all subsidies should be withdrawn from the P. and O. Company.

This correspondent points to the true source of the mischief. It lies in the subsidies, the monstrously high subsidies, bestowed upon certain shipping companies, which, to all appearance, can do with the Post Office what they please, and over whose excessive bounties Parliament has no more real control than the writer of this article. According to the *Finance Accounts of the United Kingdom* for the year ended March 31, last, the public revenue of the United Kingdom was charged with £726,607 for "packet services." Of this money nearly one-half is admittedly dead loss to the British revenue. On this Eastern trade for instance, the loss last year was to us alone £165,000. The total amount of the subsidies bestowed upon the P. and O. Company for

carrying these eastern mails was £265,000, of which India paid £60,600, Ceylon £1,400, the Strait Settlements £6,000, and Hong Kong £6,000, but the total receipts from postage came to less than £30,000, so the entire loss came to more than £200,000, assuming the postages from our dependencies home to be as large as that from England out. The service is therefore a monstrous loss to the Home Government and to the British dependencies sharing with us the burden of these iniquitous subsidies. Our trade with North America is much larger than with all the East put together, at any rate the receipts from American postage were fully £8,000 more last year than those from the whole postage of the East, and yet the charge for carrying these American mails was little more than £100,000, and the loss on this service only £62,500. This, of course, is exclusive of the Canada and China service, which can only be described as a disgusting job, perpetrated in the interests of sham Imperialists possessed of a fine eye to the main chance. We pay £60,000 per annum subsidy for that Pacific-China service, £15,000 of it coming from Canada, and the net receipts of the postage on that service in 1896-7, the last year for which we have figures, were estimated at £1,900. The actual loss, therefore, to the British Government on this job was over £43,000. Except to maintain shipping combinations by which the trade of the country can be throttled there is no reason whatever for the payment of such monstrous sums for any part of the over-sea mail service of the Empire. They are pernicious bounties which have done mischief in all directions, and not least in stimulating foreign nations to pay still heavier subsidies to their mercantile marine in order that they might enter into closer competition with us.

But let us see how the thing works; and, in order to clear the way, we ask the readers to peruse the following notices issued by the firms and companies composing the ring, together with the stipulations as to rebate circulated to shippers by the German companies who have been coerced into joining the combination. These documents are rather long, but they give the key to the system under which the trader is bound hand and foot, and totally unable to help himself :—

AUSTRALIAN REBATES.

For the Six Months ending June 30, 1897.

January 1, 1898.

To Messrs.

Annexed we beg to hand you a list of our shipments by the steamers and sailers loaded by you during the six months ending June 30, 1897, and we hereby declare that, with the exception of shipments by the British India Company's steamers to Queensland, and by the sailing ships loaded by the Australian Mutual Shipping Company, Limited, to Melbourne, Sydney, and Newcastle, neither we nor those for whom we have acted have, during the twelve months ending December 31, 1897, shipped or been interested, directly or indirectly, in any shipments, by steamers or sailers, direct or by transhipment, from the United Kingdom to ports in New South Wales, Victoria, South Australia, and Queensland, other than those loaded by—

The Peninsular & Oriental Co.
The Orient Steam Navigation Co., Limited.
The Messageries Maritimes.
Messrs. Anderson, Anderson, & Co.
" Aitken, Lilburn, & Co.
" Bethell, Gwyn, & Co.
" Birt, Potter, & Hughes.
The Colonial Line.
Messrs. Devitt & Moore.
" J. Dowie & Co.
" Gracie Beazley & Co.
" F. Green & Co.
" Houlder Brothers & Co.
Messrs. Ismay, Imrie, & Co.
" Thos. Law & Co.
" McIlwraith, McEacharn, & Co., Limited.
" Marwood & Christian.
" Wm. Milburn & Co.
" Geo. Thompson & Co.
" Trinder, Anderson, & Co.

and that neither we, nor those for whom we have acted, have as yet returned or allowed any portion in any shape or form, either directly or indirectly, of the rebates claimed under this declaration.

This declaration must be signed by a partner of the firm claiming the rebate, or by some one holding the firm's procuration. *Signature* _____ *Address* _____

This claim is only valid if presented within three months of the date when the rebate falls due.

This declaration to be made out for each line of vessels separately, and to be sent in to the respective agents.

A similar "contract" is in our hands relative to the Western Australian trade, but we need only give the names of the companies and firms constituting the "ring" by which this contract is enforced :—

The Peninsular & Oriental Co.
The Orient Steam Navigation Co., Limited.
West Australian Steam Navigation Co., Limited, viâ Singapore.
Trinder, Anderson, & Co.
Bethell, Gwyn, & Co.
W. Marden.
Anderson, Anderson, & Co.
Birt, Potter, & Hughes.
T. Law & Co., from Glasgow.
James Dowie & Co. } from Liverpool.
Marwood & Christian }

Now comes the most important document of all—made in Germany. It is a circular emitted by the Norddeutscher Lloyd and the Deutsch-Australische Dampfschiffe-Gesellschaft, and contains the stipulations regulating the gracious concession of rebates to all shippers who obey the mandate and constitute themselves perpetual slaves of the "ring" :—

NOTICE TO SHIPPERS.

Shippers to all ports of Australasia are hereby informed that as from January 1, 1897, and until further notice, and subject to the conditions and terms set out herein, the undersigned will pay to the shippers by the Norddeutscher Lloyd, Bremen, the Deutsch-Australische Dampfschiffs-Gesellschaft, and by sailing vessels put on the berth and or approved in writing by Rob. M. Sloman, jun., Hamburg, a rebate of 10 per cent. on the net freight (*i.e.*, exclusive of primage) received by them from such shippers.

The said rebate to be computed every six months up to June 30 and December 31 in each year, and to be payable six months after such respective dates to those shippers only who, until the date at which the rebate shall become payable, shall have made their shipments from the Continent between Hamburg and Havre, both inclusive, exclusively by steamers despatched by the said companies and (or by sailing vessels put on the berth and) or approved in writing by Rob. M. Sloman, jun.; and provided that such shippers, either as principals or as agents, have not directly or indirectly made or been interested in any shipments to any of the aforesaid ports by steamers or sailing ships other than those set forth herein, and also provided that the statement of claim for such rebate shall be made in the annexed form within twelve months of the date of shipment to the undernamed firms.

If required, the firm claiming rebate has to declare whether they are acting for own account or on instructions and for account of others; in the latter case, the signature of the principals resp. the firm owning the goods can be asked for.

Shipments to other ports of Australasia than South Australia, Victoria, and New South Wales by steamers (and or sailing vessels which do not load on the Continent) limits as above and sailing vessels despatched from Antwerp by Mr. C. W. Twelves for Australia will not invalidate, claims for the above rebate. The circular dated June, 1896, referring to Western Australia to remain in force.

Norddeutscher Lloyd.
Deutsch-Australische Dampfschiffs-Gesellschaft.
Rob. M. Sloman, jr.

The reader will observe that the key to the position lies in the rebate system, and this system has been evolved out of the long struggle carried on intermittently by ship-broker after ship-broker, and by strong ship-owning firms, against the combination, backed by subsidies or bounties, which in the case of the P. & O. Company alone amounted last year to £376,750. The strong members of the ring are able always to coerce the interloper. The P. & O. Company itself can carry goods at freights which yield no profit at all, and still pay large dividends out of its grants from the various Governments tributary to it. Being strong through these grants, it simply orders freights down, when any competitor enters the field, to a point which causes the said competitor to run his vessels at a loss. Then, when the bold interloper has been well trounced, if it be worth while, the would-be independent rival is admitted into the combination, and allowed to share in what plunder can be extracted out of the unfortunate shipper. We use the word "plunder" advisedly, for nothing could savour more of the legendary robbers of the Rhine than the rebate system, under which freights are now levied by monopolists whose power rests upon the unwarrantable bounties paid by the British Government.

It is not enough, of course, to merely coerce the ship-owner; the trader must also be brought to heel, and this is done effectually by the rebate system. All the shipping firms in the "ring" carry the goods consigned to them at identical charges, and bind those who ship these goods to send nothing by any outside channel. Whatever member of the "ring" a shipper trades with is of small matter, but it is war to the knife and destruction to any man who ventures to go to any ship not within the combination. Swift punishment then falls upon him. He is deprived of his 10 per cent. discount on all goods shipped for the previous six, ten, it might even be twelve months. The rebate, in other words, is not deducted and paid over on each shipment. On the contrary, as the interesting notice to shippers which we print shows, it is computed for six months up to June 30 and December 31 each year, and it is not payable until six months after each half-year has expired. Often it is not paid even then, and as we have said, should any trader be found guilty of sending goods by an independent channel he stands to lose the whole of the rebates due to him on the business of at least six months previous, and he might be fined for any period of time up to twelve months. That such a system should be permitted to exist at the end of this nineteenth century, with its boasted progress in "liberty," and so on, is a startling fact; but it does exist, and the British Parliament, by its weakness, its readiness to do the bidding of the permanent officials, its subservience to shipowners, and its general helplessness, is mainly responsible for the evil. It is an evil which is garotting our foreign trade; above all, our trade with India and the further East, and with Australasia. But you will find the men most responsible for its institution and maintenance the loudest, usually, in boasting about the "greatness of the Empire," "the necessity for British interests to be supreme in the world," and so on, and so on. And the cloudy-headed multitude thinks them "first-class patriots." To doubt the wisdom or expediency of paying the shamefully excessive bounties we have mentioned is to be in the language of these ardent Imperialists, "a Little Englander." But they share with the Germans, these same immaculate Imperial patriots, and where they cannot do that they allow our trade to escape us and pass to the foreigner. Oh, British public, what an ass you are!

How Rand Deep Levels are Financed.

We now propose to investigate the financial and mining prospects of the most important of the deep level trust companies, especially in relation to the prices at which their shares now stand. But before doing so it may be as well to briefly review the conclusions arrived at in the two previous papers. It has been seen that to pay dividends of 8 per cent. on the present market valuations of the seventeen leading Rand deep levels would require an annual sum of £4,080,000, to earn which would necessitate the employment of at least 4,300 stamps. That this task is impossible of accomplishment is shown—(1) by the fact that these companies only contemplate erecting 2,200 stamps, the majority of which will not be crushing for two or three years; (2) by a comparison with the outcrops. In 1897 the fifty-five producing outcrop mines, under which the deeps are situated, only distributed dividends amounting to £2,500,000. From this it is evident that the prices ruling for deep levels are most absurdly inflated. The reader has likewise been warned against the ingenious devices being utilised to induce the unwary to buy these shares at high figures, and the remarkable difference between the gold contents for outcrop and deep level claims has been commented upon.

We have expressed a very strong belief that in the case of those deep levels now crushing, in order to show high returns, the "rich eyes" of the mines are being picked out; while, by actual reference to the published reports of at least one company, it has been proved that even the accounts are manipulated to show larger profits than are being earned. That we do not stand alone in the view that the mines are being picked is shown by some of the Johannesburg exchanges which arrived by last mail. One of them speaks of a "growing suspicion locally that the Rose Deep returns are being unduly forced," while a correspondent from the same quarter writes that he has "corroborated this idea in a very well-informed quarter." Even the *South African Mining Journal*, an organ of the deep level group, offers unconscious testimony in the same direction. In a note on the Rose Deep it states that the ore is being "drawn from six different levels." Why should this be done to supply only 100 stamps, unless a rich "chute" is being followed down from one level to another?

It now only remains to show why these very questionable tactics to rig the shares and delude outsiders are being adopted; and the reason is not far to seek. With the groups who control the deep levels it is probably a matter of dire necessity—a matter of financial life or death. The truth is that these mines have cost a great deal more to open up and equip than was ever anticipated. The engineers' estimates in nearly every case have proved greatly at fault. There is hardly a deep level which, in addition to its already enormous capitalisation, is not deeply in debt and heavily loaded with debentures. Even such a company as the Rose Deep, which recently raised an additional £200,000 working capital, is said to be still in debt to the tune of £150,000, and requires more money. The Simmer and Jack has spent about £1,000,000, and has had to sacrifice its

subsidiary shares to meet its engagements. The Simmer East has a debenture charge of £500,000; the Knights Deep, £400,000; the Robinson Deep £300,000; the Durban Deep, Witwatersrand Deep, and Vogelstruis Deep, each £200,000; the Geldenhuis Deep, £160,000; while many other companies are plunged in debt to the extent of several hundred thousand pounds. These facts are carefully hidden from view. A contemporary recently estimated that close on £10,000,000 sterling will be wanted to bring all the deep levels of the Rand to the producing stage. Where is all this money to be obtained?

The public, so far, has certainly shown no disposition to provide it, and therefore the controlling groups and deep level trust companies have had to fall back on their own resources. This is why a year ago the Gold Fields was compelled to double its ordinary capital, and the Rand Mines to raise £1,000,000 by debentures. These, however, are merely flea-bites to what is to come. The credit of the Goldfields group is now pledged up to the hilt; for a company, which in 1897 was only able to pay a scrip dividend, and has no better prospects for the coming year, can hardly hope to place a further issue of debentures or shares on anything like reasonable terms. But the money has to be found, and the only apparent method of salvation left is to obtain it by selling some of the shares in the more advanced "deeps" at the highest possible prices. That is why it is that "pools" have been formed to keep up the market, that is why the "eyes" of the mines are being picked out, the profits manipulated, and the praises of deep levels sung in the vampire press far and wide. The fool is asked, nay begged, to buy deep levels. But the trick is too obvious, and has been badly managed, prices were rushed up too fast, and big outputs and profits have been followed too quickly by share and debenture creations. So the attempt has obviously failed, and the result is absolute stagnation in the "Kaffir Circus." The manipulators have for once overreached themselves; they were too greedy.

Now let us turn to some of these trust companies and see how they stand examination individually. The two principal deep level manufacturing groups are the Rand Mines, Limited, and the Consolidated Gold Fields of South Africa, which, together, hold an autocratic sway over fully 80 per cent. of the mines. These groups float a deep level company, provide its working capital and auditors, act as its bankers, secretaries, engineers, machinery suppliers, agents and directors; advertise its merits in their own financial and so-called social press, and finally endeavour to sell its shares to the public at immense profits to themselves. They are as much manufacturers and vendors of deep levels as the "Pears" Company is a manufacturer and vendor of soap; and they advertise their wares on an even more lavish scale. There are many ramifications of the Gold Fields group; there is the parent, the Consolidated Gold Fields of South Africa—to give it its full title—and several subsidiary or baby concerns, such as the South African Gold Trust, Gold Fields Deep, Belgian Mining Trust, and Trust Français, all managed, directly or indirectly, by the same people. The two groups, Rand Mines and Gold Fields, own together about 70 per cent. of the shares of the entire deep levels of the Central Rand, and how all these mines are severally and jointly interested is shown by a table which we have compiled, giving the particulars of each company's holdings.

A TABLE
SHOWING
THE DEEP LEVEL HOLDINGS OF THE SOUTH AFRICAN TRUST COMPANIES.

	Central Nigel Deep.	Crown Deep.	Durban Roodepoort Deep.	Geldenhuis Deep.	Glen Deep.	Jumpers Deep.	Jupiter.	Knights Central.	Knights Deep.	Langlaagte Deep.	Nigel Deep.	Nourse Deep.	Rand Victoria.	Robinson Deep.	Rose Deep.	Simmer and Jack.	Simmer and Jack East.	Simmer and Jack West.	South Rand Mine.	Witwatersrand Deep.
Barnato Mines																				
Belgian Mining Trust																				
Consolidated Deep Levels																				
Consolidated Goldfields of South Africa	68,500																			
Goldfields Deep		194,050																		
Rand Mines			59,000	114,763																
Simmer and Jack Proprietary																				
South African Gold Trust	5,000																			
Trust Français	20,000																			
Total Shares	93,500	194,050	59,000	114,763	477,661	401,861	314,470	97,000	411,761	64,700	128,000	290,382	480,774	305,000	261,117	266,500	345,574	280,941	283,500	19,260
Capitals of Companies in Shares	200,000	a 250,000	300,000	114,763	b 500,000	467,461	467,000	412,749	411,761	65,000	d 200,000	c 71,034	630,000	400,000	e 155,000	694,000	a 550,000	300,000	300,000	351,000

a Since issued 50,000 additional shares. b Since issued 75,066 additional shares. c £5 shares.
d Since reconstructed. e Since issued 45,000 additional shares.

Another 15 per cent. of these shares is held by private individuals and syndicates connected with the same groups, leaving, at the outside, only 15 per cent. distributed amongst the public. With such a large controlling interest in the mines it will be understood how it has been possible to manipulate and maintain prices at their present level. Indeed, to "sell a bear" would be to play as much into the hands of these houses as to actually buy the shares. The only safe course is to leave them entirely alone.

Not only, however, do these Trust Companies possess large interests in the deep levels, but they hold each other's shares to a remarkable extent. For instance, the Consolidated Gold Fields holds half the Gold Fields Deep capital, which company in its turn owns three-quarters of the Robinson Deep mine. The Gold Fields holds shares in the Trust Français and Trust Belgian; the Trust Français holds shares in the Gold Fields, Gold Fields Deep, and Trust Belgian; the Trust Belgian holds shares in the Trust Français, Gold Fields, and Gold Fields Deep; the Gold Trust holds shares in the Gold Fields Deep and Consolidated Gold Fields, and so on. In fact, the whole fabric is a most complicated one, and unless by some miraculous means it can be placed on a satisfactory financial footing it will one day come tumbling to the ground like a pack of cards.

Trust Companies.	Holdings.			
	Belgian Mining Trust.	Consolidated Gold Fields.	Gold Fields Deep.	Trust Français.
Belgian Mining Trust	—	20,000	18,000	27,557
Consolidated Gold Fields of South Africa.....	21,000	—	322,500	105,000
South African Gold Trust	—	100,000	50,000	—
Trust Français	—	19,000	30,000	—

As all these concerns are public companies, and the shareholders expect a return on their money, it is not only necessary from time to time to dispose of some of the shareholdings in the mines to provide for the capital calls of less developed properties, but funds have to be regularly found to pay dividends, and thus prevent the whole structure from collapsing. It is, consequently, vital to the existence of these trusts that such conditions shall be created as will enable them to sell their portions of their assets at big profits, and that endeavours are being made to induce the public to become the receptacle is evident from what has been said. There are not wanting signs that an energetic campaign is shortly to be entered upon with that object. The public mind is being prepared by means of inflated outputs, fictitious profits, and dividends paid partly out of capital; while the Press organs of the groups scattered throughout England and the Continent are engaged in singing pæans of praise on the deep levels. The market is supported by carefully conducted "pools," and prices have been worked up to a giddy height. In three or four months' time several other deep levels will commence crushing; and, the result, as we have shown, with their enormous ore reserves, can be made to exhibit apparently large profits, at any rate for a period. Deep level dividends will be declared, marvellously rich strikes announced, and a certain amount of activity created in the market to induce the public to bite. But will it do so? A hard lesson was learned in 1894 and 1895; which has surely not yet been forgotten? So far the voice of temptation has not been listened to, but there are many fools in the world, and time is a blurrer of memory as well as of grief. With a large section of the English Press at the command of these Deep Level magnates—and our readers would open their eyes wide if they knew some of those we include in this category—it is hoped to work wonders. A raid is now being prepared on the pockets of the English and Continental speculating public, beside which previous exploits will pale into insignificance.

The London and Globe Juggle.

The almost forgotten Mr. Barnato does not fail in humble imitators, and it is now becoming a rule of mining finance, when in difficulty "play an amalgamation." Modest arrangements of this kind often take place, but the proposal of the London and Globe Corporation in respect of its subsidiary companies is something above the ordinary kind. For one thing the capital involved is £2,000,000, and it is a striking fact that out of the twelve mining companies issued by this Corporation everyone is a failure, and yet the Corporation itself has apparently waxed fat and opulent in a market sense. The poor unfortunate subsidiary concerns having come to an end, or practically so, of their minute working capitals, the London and Globe says, "amalgamate into one big company at a composition of 10s. in the £, find £500,000 more capital, and we will run the show again." In other words, it has asked the shareholders of thirteen companies to amalgamate into one, called "the Standard Exploration," the exchange being made on the basis of one new share for every two old shares. Fresh capital to the extent of £500,000 is to be raised, of which £250,000 is to be guaranteed by the London and Globe, but this benefit is hedged with the proviso that the new concern must take £200,000 capital of the British America Corporation — the latest monstrosity perpetrated by this London and Globe affair itself. Now there are remarkable differences in the positions of the thirteen companies thus invited into the new "blind pool." The shares of six of them are held largely, if not wholly, by the public, those of six more are held almost exclusively by the London and Globe Corporation, its creatures, and allies, and the capital of the odd one is probably held half-and-half by the "insides" and the "out." The names and capitals of these companies are as follows:—

Held by Public.	Nom. capital. £	Held by Promoters.	Nom. capital. £
Golden Crown.....	100,000	Wealth of Nations Extended ..	175,000
Mainland Consols	150,000	Duke Gold Mine.....	150,000
Wealth of Nations.....	200,000	Hannan's Golden Dream	150,000
Paddington Consols	175,000	Paddington South	150,000
Hannan's Golden Group.....	175,000	Mahara Royal	150,000
Hannan's Golden Treasure ...	150,000	Karaka	150,000

Austin Friars Syndicate.....£105,000.

Of course the separation here made is not absolute, and possibly some of the public may have Wealth of Nations Extended, while the promoters may have some Mainland Consols, but the general position is as described. Now for one thing, the Austin Friars Syndicate is a finance company, and what has that to do with the working of a number of mines? Then the Mahara Royal and Karaka own properties in New Zealand, while the rest are in Western Australia, so that the two gorgeously named companies are a poor acquisition to the group from a mere business point of view.

The gravest objection to the scheme, however, lies in the fact that through the proposed new Standard Exploration Company, the London and Globe Corporation, will be able to unload its otherwise unmarketable scrip upon the public. If the scheme went through, the quotation on the new shares, product of the fusion and confusion, would cover all these wretched productions that the public would not touch even in the height of its folly. It would be just the same then as with the shares held by Americans in the Anaconda mine. These were quoted with the rest, and can be sold on this side under the protection of the moderate amount originally offered to, and to some extent held, by, the British public. For a nice profitable chance of this kind the London and Globe Corporation pays nothing at all. But as a matter of simple business morality, the scheme ought not to be allowed to go through. One has only to refer to the Barnato amalgamation to see the effect of such an arrangement. Prior to that operation, which allowed Barnato Brothers and their friends to unload unsavoury holdings upon the public, Johannesburg Consolidated Investment shares stood at 4; they are now 1⅞ with every prospect of slipping lower.

But, of course, something must be done, for here are a number of companies that have run out of cash, and whose precarious position, owing to the small acreage and problematic nature of their grounds, requires every form of economy that could be obtained by amalgamation. To amalgamate in some form is better than to reconstruct singly, and therefore we think the shareholders of those companies in which the public have a large interest would do well to coalesce and act together after each has examined its position as to debts and working capital in hand, if any. But in doing this, the London and Globe should be given the go-by along with its precious British America Corporation. Owing to its gross mismanagement and extravagance the companies it has launched, or tried to, have been brought to this pass, and it will be far better to be rid of the pack of market operators who surround it and start clear with possibly a fair chance of doing some sound mining work. To those who only look to the market, such advice will be foolishness, but if the public coolly sits down to further endow those who have lost its money with power to strip it of more, then it will only have itself to blame should the financier wax more and more rapacious.

Economic and Financial Notes and Correspondence.

The Indian Debate in the Commons.

It is not possible to compliment the House of Commons on its Indian debate. An excuse may perhaps be found for the poor display made in the terms of Mr. Lawson-Walton's amendment, but that does not justify the exhibition made of themselves by the present and the late Secretary of State for India. These two gentlemen, Lord George Hamilton and Sir Henry Fowler, brought the discussion down to the level of a squabble between two guinea-pig directors, quarrelling over a subject of which neither had more than a perfunctory or superficial knowledge. It is pitiable to think that India should be perishing while such men, in essaying to play the *rôle* of statesmen, literally slang each other and come down to the level of draymen shouting to each other, "You did," "I did not," "It was you." This display went on, amazing mankind, and plague is spreading in India, and her finances rapidly getting into a tangle from which a composition in bankruptcy will alone release them.

Except as a manifestation of the most inveterate bungling on the part of the prominent officials and military party, now together destroying our Indian Empire, this frontier war is, in itself, a matter of secondary importance. The true question which ought to be to the front about India is the position of her finances, but directly these are touched upon, the inquirer is always diverted from his purpose and involved, if possible, in a despicable wrangle about "standards of value"; "Shall India have a gold standard?" "Ought the mints to be re-opened again?" and so on, mostly idiotic drivel. Such discussions are, in their way, quite as useful, though, to the bureaucrats as a fireworks display like the debate on Mr. Walton's amendment; they obscure the real question at issue and prevent the British public from realising the imminent danger threatening our greatest dependency.

Sir William Harcourt did for a brief period lift the debate to a considerable extent above the low level to which it was dragged down by Lord George Hamilton, and his denunciaton of Sir George White for coming forward and interfering in his capacity as Commander-in-Chief with the Civil Government of India was thoroughly well deserved. As we have often declared it is the dominance of this pestilent military spirit in the Government of India which is at the root of the mischief. The substance of the Indian people has been thereby wasted to an extent no man can measure. Year by year the masses of them fall into more abject poverty. Every few years millions die of hunger, and still this policy of military activity, of wars indulged in like games of chess, is blindly followed. Strategic railways and useless fortifications, built with borrowed money, the interest on which India is unable to pay, are multiplied on any pretext or none, until no thinking man can do other than tremble at the prospect before the nation. But Mr. Balfour, the leader of the Government in the House of Commons, knows nothing of this any more than his colleague, Lord George Hamilton, any more than Mr. H. Fowler. On that matter the ignorance he displayed on Tuesday night is enough to make the heart sick. What can come to a great, and, as we boast, Imperial people, when such flippant amateurs as Mr. Balfour lead in the counsels of the State.

An Indian Administrative Scandal.

By way of calling attention to the kind of thing that goes on in India at the present time without the slightest attention being paid to it either by Parliament or the British public, we mention a correspondence which has taken place between Sir William Wedderburn, M.P., and Lord George Hamilton, the Secretary of State for India. From this correspondence we learn that two native gentlemen of Poona, the Sirdar brothers Natu, were imprisoned about the middle of last year and have been kept in prison ever since without trial. Sir William drew Lord George Hamilton's attention to this scandalous proceeding, and points out that it was unwarranted by law, and that the Bombay Government had taken possession of a large amount of valuable personal property belonging to the Natu family, and asks for attach-

ments to be removed and this property restored. Of course he gets no satisfaction, his first letter is dated November 4, 1897, and on January 5 last he writes again to point out that he has had no reply to his first letter, and that the brothers had then been in custody for about six months. The usual official acknowledgment reaches him on January 11, and at length on February 8 he gets a reply from which we make the following extract.

2. You are no doubt aware that the regulation under which Sirdar B. K. Natu and his brother are detained, for the reasons of State specified in the Preamble, can only be put in force as regards "individuals against whom there may not be sufficient ground to institute any judicial proceedings, or when such proceeding may not be adapted to the nature of the case, or may for other reasons be unadvisable or improper."

The Government of Bombay, therefore, by putting the regulation in force against the brothers Natu, have clearly indicated the view which they take of the advisability of instituting judicial proceedings against them; and I am to inform you, in reply to your question, that there is no present intention of bringing them to trial.

3. As regards the grounds on which Sirdar B. R. Natu and his brother are detained, I am directed to inform you that they have no relevancy whatever to the correspondence mentioned in your letter. The Government of Bombay are in possession of information which has convinced them that such detention is necessary in order to secure her Majesty's dominions from internal commotion, and that it must, in the opinion of the Government, be continued until they are satisfied that the public tranquility would not be endangered by the release of the brothers Natu.

4. Finally, you represent that Regulation XXV of 1827 gives no power to attach the personal effects of persons detained under its provisions. On this point the Government of Bombay has taken legal advice, and has issued orders for the release of such items in the list of property attached as cannot legally be dealt with under the Regulation.

This scarcely appears to be the conduct of a Government which is sure of its position. What on earth are the officials afraid of if the brothers Natu had nothing, and it is perfectly well-known that they had nothing, to do with the murder of Mr. Rand?

A Wail from Sydney.

Rather gloomy views are expressed by the Sydney *Daily Telegraph* about the trade of New South Wales for 1897, and about the prospects for the current year. At least they would be called "gloomy" and "pessimistic," and all the rest of it, if first uttered by us. Both imports and exports of merchandise for the year showed increases—imports being £606,362 larger at £15,283,824, and exports £472,441 larger at £11,999,191, but "practically the whole of the increase in the exports of merchandise has been in re-exports, leaving the exports of domestic produce in 1897 very much at the same level as in 1896." This is sad, and we are not much exhilarated in mind by the information that the imports of gold were only £85,028, against an export of £907,145. Adding the net exports of gold to the exports of merchandise, we find that last year the colony still imported nearly 2½ millions worth more than it exported.

Herein lies the seriousness of the position. This colony, like all its neighbours, has to remit a large sum every year to meet its debt charges in London. On the public debt alone the annual charge is now over 2½ millions, most of which is due here, and there are numerous interest and dividend charges payable on company debentures, and on share capital held here. How in the world can these charges, amounting, say, to three millions altogether, be covered at the same time that the export trade of the colony, all told, is insufficient in value to pay for current imports? We advise colonial statisticians to set their wits to work to solve this conundrum. To our dull, plain mind there appears but one sure method of solving the difficulty—borrowing more money in London. If the colonists can show us another way, we shall rejoice to be educated.

Bavarian Trade and United States Tariffs.

Bavarian trade, generally prosperous in 1896 and 1897, has suffered considerably in one respect. Hitherto the United States has been one of the chief outlets for Bavarian manufactures; but now it is closed to her owing to the highly protective tariffs to which our transatlantic cousins submit with so much humility. Hence some loss to Bavarian trade; but the Bavarians do not clamour for a war of tariffs in order to punish these short-sighted Americans; they prefer peace and the search for new markets. As one result, the trade with England and her colonies has considerably increased; arrangements have been made with Spain for a minimum tariff for German goods; and a commercial treaty has been concluded with Japan. Before Kiao-Chau was probably heard of, German merchants had combined to send a commercial mission to the Far East to discover what articles of German manufacture are most in demand there. Better this enterprise, surely, than the querulous cry to Government for "countervailing duties" to which we have become so uncomfortably accustomed. It is not all prosperity, however, even in Bavaria. The textile trade has suffered greatly from depression, and speculative building has been so feverishly active in the Munich district for some time that, unless it is promptly checked, a crisis is feared which may prove serious. One other fact is worthy of note. Although there is a tendency to a reduction of hours in factories, and in some cases the fifty-four hours week has been adopted, the general day's work is from ten to eleven hours, and in handwork establishments eleven to twelve hours. It is worthy of note, too, that Sunday rest is now enforced by the State, without any of the harm to industry which its opponents prophesied.

Trade in Chile.

1897 opened badly for trade in Chile; how it may have ended we do not yet know, as the report sent by the British Consul at Valparaiso only deals with the first six months of the year. During this period imports fell £949,665 below the same period of 1896—£5,071,840 against £6,021,505. The largest portion of this decrease is claimed by Valparaiso, but most of the ports are sufferers; indeed, there are only four which show a slight increase. Nor is this decline altogether owing to bad trade. In the sugar trade, for example, the decrease is mostly owing to the development of native sugar refineries, which are proving so successful that the decline in the imports of refined sugar must continue, and will steadily become more marked. So with the imports of timber. Though partially owing to depression in the building trade, it is largely due to the development of the native industry; and as the years pass by, the decline in timber imports is sure to grow greater. Still, trade in Chile was undoubtedly bad in the first half of last year. It is also shown by the diminution in the exports from £6,185,868 in the first half of 1896 to £4,270,346 in the opening six months of 1897. The decrease has been

especially notable in nitrates and wheat. There was, however, an increase in the exports of coal, wool, and gold bars; while the exports of tanned hides were more than doubled in the six months referred to. It would thus seem that, probably, Chilian trade is only temporarily and not very seriously afflicted. As to the imports in 1896, it seems that Great Britain obtained 40·83 per cent. of them, Germany coming next with 27·10 per cent. But there is this significant contrast between the two: while Britain stood at the top, her percentage of the trade was 5·72 less than in 1895, while Germany had increased her shipments from £2,739,015 in 1895 to £3,179,483 in 1896. The trade with the United States also showed a marked increase in 1896, though her percentage of the whole was only 9·18. Thus, though Great Britain is still far ahead of her chief rivals, it would almost seem that she has got on the "down-grade" unless she can in some way win back her lost ground. That is not much as yet; but if she goes on losing, even by inches, while her rivals win by half-inches, Great Britain's supremacy is doomed all the same.

Dublin United Tramways Company (1896) Limited.

Mr. Chas. Eason, jun., and the Hon. Mr. Nugent expressed strong dissatisfaction with the management and accounts of this company at the meeting of shareholders held in Dublin on the 8th inst. They seem to us to have had good reason. The report and accounts are not clear, and, as regards the latter, it is to be noted that the auditors give a most guarded certificate, very different from the one the same men gave to the old Dublin United Tramways Company in July, 1896. Of course the pretext is that this new company only deals with the moneys received from the two old companies it has bought up, and has itself no details to supply. This is the line taken by the English companies which bought up American Breweries, and shareholders in such have acquired painful experience as to its cogency. "Legally," the chairman said "we are not bound to give this information," and they thought it might place the directors "in a great difficulty" with the Corporation "if they showed their hand too freely." This is nonsense if the business is being fairly and squarely conducted, but in law the board is, we fear, unassailable. If its articles of association permit it to cover up its operation and to issue a skeleton balance sheet, shareholders are powerless. But we doubt whether the law allows any limited company to conceal its share list from scrutiny whatever its deed of incorporation may authorise. It seems no share list has been filed with the Registrar of Joint Stock Companies. The attention of the Board of Trade ought to be drawn to this, as it seems to us, violation of the statute.

The United States and Spain.

It almost seemed for a day or two this week as if only war could soothe the offended dignity of the United States, stung by some indiscreet and indefensible comments made by the Spanish Ambassador at Washington in a letter to Senor Canalejas. The letter, no doubt, was a private one, but it was somehow obtained and published by an enemy; and, as it contained some severe strictures on President McKinley, Senor Dupuy de Lôme at once acknowledged the serious nature of his error by tendering his resignation, which was immediately accepted by the Spanish Cabinet. This, however, did not satisfy American Jingoes. They insisted that the Spanish Government ought to make an ample apology for what they declared to be a national insult offered to the United States. If apology was refused, they "would know the reason why," and the American Government was urged to prompt and decisive action in the matter. The object of the Jingoes was, of course, to force on war on any pretext in the interests of Cuba. Fortunately, however, President McKinley was not to be forced in the matter. He has already warned Spain of the danger lurking in the continuance of the war in Cuba. The Spanish authorities will do well to heed this warning. There is in America a strong financial as well as political interest in the Cuban question. An influential syndicate is ready for the exploitation of the island, and if its pacification is not secured soon, the time may come more quickly than is expected when the Executive Government will be unable to resist the pressure put upon them for intervention in Cuba, perhaps for its immediate purchase or annexation.

Lloyd's Bank, Limited.

As we owe this bank an *amende* for having twice blundered over its reports, and because the facts are interesting in themselves, we print the following extract from the speech of Mr. Thomas Salt, the retiring chairman, delivered at the fortieth shareholders' general meeting held in Birmingham on Monday last:—

> Referring to the changes of the last ten years, Mr. Salt expressed a hope that first-class banks would, while maintaining a courteous rivalry, not resort to vulgar competition, but work together in friendship and harmony. In announcing his retirement from the chairmanship, on account of age and infirmity, he quoted the figures of the first balance-sheet he signed in 1886, in comparison with those of the last report, showing that in those eleven years the capital had advanced from £750,000 to £2,040,000, the reserve fund from £360,000 to £1,200,000, and the total assets from eleven millions to forty millions, or nearly quadrupled.

Openings in Hudson's Bay Territory.

We must revise our notions about Hudson's Bay Territory. It is not a bit cut out of the Arctic regions. Moose Bay is in a latitude further south than London, and even the more northern portion is not colder than the north of Scotland. What more is wanted? The bay does not freeze across in winter, and there is free navigation during five months of the year, or thereabouts. The Hudson Bay route would bring the North-West as near to Europe as to Quebec. It offers the best route to the goldfields there. There is gold in various parts of the territory; gipsum, iron, copper, silver, and lead are believed to be not uncommon. "No end" of good land is available for tillage. In one area as large as England a Scotchman—not the one of Polar fame—and a few dozen Indian families have the land to themselves. Why are they left undisturbed in their solitude? What is the Hudson's Bay Company thinking about? Is there not room for a spring rush there as well as to Klondike?

The French Mercantile Navy.

Even lavish Government subventions have failed in placing the French Mercantile Marine in a healthy condition. Since 1881, about £24,000,000 have been paid by Government in shipping subventions—more than the

total value of the French Merchant Navy—yet the child thus carefully nurtured continues puny and stunted. It grows, but it is steadily falling further behind its vigorous English and German rivals in strength and activity. Ten years ago, the French Mercantile Marine was next—though at a long distance—to the British. But in 1895—the latest period for which we have official figures—Germany had completely outstripped France. During those ten years France had only increased her tonnage by 142,346 tons, while Great Britain's was improved by 3,391,784 tons, and Germany's by 678,475 tons. Even Norway showed a far more sturdy growth, for her tonnage increase was considerably more than double that of France. During last year French yards turned out only two large steamers of a total tonnage of 6,500, while Germany turned out thirty-three steamers of an aggregate of 63,000 tons. It is thus that protective duties—call them by what name you will—throw blight on every trade to which they are applied. Frenchmen are beginning to appreciate this in connection with the sugar bounties; when will they show a like appreciation of the fact that an expenditure of £24,000,000 in subventions has not encouraged native shipbuilding, but rather dwarfed and stunted its growth, and must end in so enfeebling it that it will probably not have energy enough to continue the struggle for existence?

It appears, however, that French ships can compete, with some seeming success, with British vessels in the carrying trade to French ports. In Rouen, for instance, our Consul points out that, since 1892, when a more protective French tariff was enforced, British shipping frequenting that port has declined both in number of ships and in total registered tonnage. In the three years previous to 1892 the British flag was represented at Rouen by a yearly average of 1,000 ships, the tonnage of which reached close upon 450,000 registered tons. Since 1892 there has been a gradual decline, until last year the figures fell to 700 British ships of 363,627 tons. Though much of this decline is attributed to the French protective tariff, yet there are other causes at work. There is more international competition in the sea-carrying trade. Swedish and Norwegian ships are supplanting British ships in the timber trade. It is the same in the wine trade to Rouen; British vessels hardly take any part in it now, while Swedish and Norwegian ships engaged in it have increased in number. But the French themselves have been the chief gainers. French ships are also entering into competition with British in conveying English coal to Rouen. Our Consul thinks it is only the navigation bounty that enables the French to engage in this competition, and even with that aid they find it difficult. They are now clamouring for increased bounties. If they succeed in this agitation, they may possibly supplant a few more English colliers, but the inevitable process of enervation will again set in, and their last state will be worse than their first. There is never much energy in the begging trader.

The Value of State Railways.

Prussia seems to find her railways a paying speculation. For their construction she had incurred a debt of £351,183,539, but this debt has been reduced to £261,500,000 out of profits earned. But that is not all. In the 13 years from 1882 to 1895 the excess of receipts over expenditure had been £198,368,576. After paying interest on the debt, and devoting £600,000 to meeting deficits in the State expenditure, there was a surplus of £77,560,332, of which sum £47,359,000 was applied to general State purposes, and £26,138,000 in paying off the State debt. As to passenger traffic, the Prussian experience seems to be similar to our own; the cheapest class produces the largest revenue. The first class gives 18 per cent. of the total, the second 23·93 per cent., and the third 40·25 per cent. But a fourth class has been introduced in recent years, and, although it is not yet universal, it is rapidly gaining upon the third class. Last year it supplied 23·93 per cent. of the income from passengers. Altogether Prussia makes a very good thing out of her railways. The danger is that Governments may come to dip too often and too deeply into their teeming coffers to make up deficits caused by reckless State expenditure. It would not be surprising if, at a push, they were made to contribute towards building up the Imperial Navy, or in paying the cost of an unpopular war.

Mr. Sutherst Again!

From the rôle of a libelled company promoter, bringing his action for words imputing falsification of facts in a prospectus, to a bankrupt moving to expunge proofs against his estate, is, indeed, a far cry, but Mr. Sutherst has within the short space of five days played both these parts, and both unsuccessfully. We noted that in his cross-examination in the libel suit he estimated his assets at £395,875. We can imagine the hopes of his present creditors rising high at this information, only cruelly to be dashed to the ground on learning that that amount consisted entirely of shares and interests in companies, presumably of his own promotion.

Simmering Crete.

The European Concert seems at last to have given up Crete as hopeless. They cannot get the six Powers to agree on anything, so the latest suggestion is that the business may be relegated to a committee of two Powers to choose some temporary governor for the island; or, if even two cannot come to an agreement on this terribly knotty point, that they may patch up "some semblance" of an autonomous régime, as the *Standard's* Constantinople correspondent puts it. It is said that the ambassadors have arranged to meet again soon for the discussion of this notable suggestion. The story may be true or it may not. It is impossible to say. Anything may happen in Crete, and at any moment. But the fact that such a suggestion has been put forward, even in the shape of a rumour, in Constantinople, is surely very fair evidence of the futility of the Concert's action throughout. There is nothing to indicate that Russia has definitively withdrawn the candidature of Prince George of Greece; but there are some signs that Russian diplomatists would not be disappointed if the Cretans were once more to take their fate in their hands and inaugurate a revolution. It would probably be successful. A *coup d'état* would find Prince George ready to land; and the distracted Powers that could not agree to anything while peace reigned might be promptly brought to accept an arrangement made in spite of them, at the cost of more fighting and further loss of life. Strange that this European Areopagus should only be brought into harmony by revolution!

Industrial Revolution in Sweden.

A kind of industrial revolution has been going on in Sweden during the last few years. She is giving up the export of raw material, and taking to manufacturing instead. In some things the Swede has already almost a monopoly. Of such are bicycle tubes, which are exported all over the world; steel bands rolled by cold process, umbrella frames, steel bones for corsets, and other things. The value of Swedish iron and steel is well known; but a few years ago it would have seemed absurd to speak of Sweden as a competitor with England in its manufacture. But a total change has come about in this respect: Sweden is a manufacturing competitor of England, and a tolerably successful one too. Good technical teaching has greatly helped in the development of the Swedish metal industry. It has a large supply of excellent skilled labour at a wage rate of from 3½d. to 5d. an hour. Few strikes occur, and the average hours of labour are sixty a week. Another notable thing remarked in the Foreign Office report is that, while Great Britain does the largest trade of any nation with Sweden, it imports from that country £8,000,000 worth of goods, and sends back only £5,500,000 worth; thus a balance of £2,500,000 stands against Great Britain in the transaction. Germany, on the other hand, imports £2,500,000 worth from Sweden, but returns goods worth no less than £6,500,000, thus leaving a balance of £4,000,000 in Germany's favour. More than that, about half the goods imported from Sweden to Britain were sent over in Swedish or Norwegian ships. England is therefore twice hit in the transaction; while in Sweden, as everywhere else, the German commercial traveller is ubiquitous, and the English ditto almost non-existent. British merchants and manufacturers will have to look to it, or suffer more.

A Long Expected Amalgamation.

This is a week of amalgamation proposals, but no one will be surprised that it is suggested the London and Northern Assets Corporation and the London and Northern Debenture Corporation should combine. Both have the same people on the board, both have the same office and secretary, and both have had misfortune. It is now proposed that the Debenture Company buy up the Assets Company by giving £13 in its shares for every £15 in shares of the Assets Company. The founders are to be practically extinguished by bonuses which perhaps are generous, but at the same time do not amount to much in the total.

As the one company is slightly better off than the other the arrangement seems a fair one, if the assets are identical in both cases. Of this, however, we cannot be sure, and it would be just as well if the character of these investments were disclosed. No list of them has ever been furnished to our knowledge, and only occasionally allusion is made to them by name, when necessity, generally a liquidation, compels the delicate matter to be touched upon. In the Board we have no faith, for Sir J. W. Maclure, Mr. J. M. Maclean, and Sir Joseph Renals, are not amongst those who, in our opinion, bring strength to a directorate. Therefore, now that this board has confessed to its failings, it ought to go a step further and show the nature of the assets remaining to these unfortunate concerns. Otherwise, how can the shareholders put that faith in the future they are expected to hold?

Mr. Bottomley's Amalgamation.

Envious of the London and Globe display of financial sleight of share-juggling, Mr. Bottomley is preparing to charm the world of mining finance with a tip-top amalgamation of his own. Having in the course of a few years formed four company-distilling corporations—the Associated Gold Mines, the Associated Southern, the North-West Associated, and the Auxiliary Associated—and these having produced on an average about one mine company a-piece, the distinguished originator of them all now proposes that they amalgamate into one "big concern." Is it not magnificent? To talk about the Duke of York and his 20,000 men is nothing beside this. The only sad point is that the amalgamation did not come off before the companies were floated, or it may be that Mr. Bottomley, with his *fin de siècle* methods, hopes, in the future, to even excel his present proposal. To the man who can put up the pieces of paper known as Northern Territories shares to 3¼ a-piece, everything is possible, in a market sense, until he is found out. After that the tale may be rather different, as the Barnatos, and others of their kind, found out not so very many months ago.

The Gold Production of North America.

According to Mr. John J. Valentine, the able President of the Wells, Fargo Express Company, the total output of gold in the States and Territories west of the Missouri River, including British Columbia, was last year $69,830,599, and of silver $37,184,034, say £14,000,000 of the one, and £7,450,000 of the other. To these totals Mexico added about £1,800,000 in gold and £12,145,000 in silver = $8,500,000 and $60,683,000 respectively. The Mexican production of silver, therefore, more than made good the decline in the United States and Canadian output of the same metal. But the North American production of gold, as Mr. Valentine points out, was last year the largest in its history. If his estimate of the world's production for the same period, which he puts at the "surprisingly large" total of approximately 240 million dollars, about £49,000,000, is correct, then the United States and British Columbian properties of the total, was about 29·590. This year it is to be presumed the British Columbian contribution will be larger, and, of course, there is Klondike. Ontario also yields a little gold now and may yield more. What shall we do with all the yellow metal? Dissipate it in wars, or what?

The Salt Union, Limited.

The dismal announcement is made that no dividend will be paid on the ordinary shares for the past year, and that holders of seven per cent. preference shares will get only 1¼ per cent., while a year ago the full interest was paid on the preference capital, and 1 per cent. on the ordinary shares. It is impossible to judge the true position until the directors' report and accounts are issued, but there is no getting away from the fact that whereas last year £90,000 was distributed in dividends, on this occasion the company divides only £12,500, which is actually less than the balance carried forward a year ago. We have for several years past called attention annually to the crisis gathering around the Company's affairs, and have been scoffed at for our pains. However, here it is, and the position of the debenture stock holders is serious. Altogether the share capital of the concern amounts

to £3,000,000, and the A and B Debenture Stocks to £1,200,0000, while, on the other side, the properties, works, plant, and goodwill stood in the last balance-sheet at £3,439,952; but owing to the wretched earning power of the undertaking no proper allowance has been possible for depreciation, and we doubt if the real value of this item is much more than half its present figure. A reconstruction scheme is inevitable, and the more severe it is the more hope there will be for the future. Indeed, well done, it may put new life in the company, which has had to work too much under thrall of the vendors by whom it was created.

Crystal Palace Re-organisation Scheme.

According to the *Daily Mail* of yesterday the proposal is to reduce the present capital of this unfortunate company, amounting to £1,591,000, to a total of £605,000, of which £250,000 will be in 3½ per cent. debentures, £150,000 in 4½ B shares, £105,000 in 5 per cent. accumulative preference shares, £95,000 in preferred ordinary, and £5,000 in deferred ordinary shares. This looks needlessly elaborate, but of course there are a variety of interests to be considered. The old capital embracing no less than three descriptions of debenture stocks besides an ordinary stock, and a B stock which does not represent anything, but whose nominal amount is £802,140. The main object of the proposed re-organisation is, apparently, to find fresh working capital to the amount of £100,000. It would seem that Messrs. J. Lyons & Co., Limited, who are to be appointed the caterers to the new company, and Messrs. Ind, Coope & Co., the brewers, are to take "a substantial interest" in the new scheme, and, really, we do not see why they should not find the new money. No share or debenture-holder in the old company has any motive to provide a penny of it. The history of the company has been one long monotony of disappointment, and the promise for the future is not appreciably better than for the past. But if refreshment caterers and brewers think they can put new life into a decaying concern they ought to be made welcome to try.

A Sham Council of "Foreign Bondholders."

Subjoined is a letter on this subject. It was impossible for us to make distinctions in printing the names, but none the less is this disclaimer of any "friendship" for Sir John Lubbock, *qua* Chairman of the Council, valuable. The suggestion made is also pertinent :—

To the Editor.

London, February 16, 1898.

Sir,—In a note at the foot of your article on the above subject in last week's Review, you publish the names of recent purchasers of Certificates in the Council of Foreign Bondholders who have been put upon the register since February, 1897, and remark that "the great majority appear to be those of personal friends of Sir John Lubbock." You further say, "Why were these certificates not sold openly to foreign bondholders and to the highest bidder?"

On behalf of several members of the Stock Exchange, including myself, whose names appear in the list you have published, it is only fair to your readers to acquaint them with our intentions in obtaining possession, not through the medium of the secretary to the corporation, of some of those certificates.

Among the names you have quoted, including one member at least of the original founders of the corporation, may be seen those of gentlemen whose only object in obtaining certificates at some cost and considerable trouble has been to rescue this corporation from becoming a by-word to investors in foreign bonds for all time. Members of the Stock Exchange who are certificate holders have voluntarily subscribed a large sum of money among themselves, to oppose the present Bill before Parliament. We do so on public grounds: we live by the public, and are prepared to defend their interests in times like the present at our own cost. Our action at the present crisis is sufficient evidence that our monetary interest in the corporation and its future is altogether laid aside. Speaking personally, I can only trust that Parliament will appoint a small commission to enquire into the whole position and status of the corporation. In that case I feel assured that the funds accumulated by this institution would never be handed over in the form of an "open cheque" to a self-elected and irresponsible body of mutual friends, calling themselves a Council of Foreign Bondholders.—Yours faithfully,

[I enclose my card.]. "Stock Exchange."

Critical Index to New Investments.

Marshall & Snelgrove, Limited.

For family reasons the business is turned into a private limited company, the whole of the issued share capital, £500,000, being taken by the late and former partners. But the public is asked to subscribe for an issue of £225,000 first mortgage 4½ per cent. debenture stock, part of a total of £300,000, at 106 per cent. Interest is due February and August, and the stock is repayable at par on February 20, 1948, but it can be paid off at 110 in 1911 on six months' notice given. This famous old business dates from 1837, and the assets and goodwill are acquired by the company for £625,000, payable as to £125,000 in cash, and the whole of the share capital. Apart from goodwill the security for the debenture stock consists of leases, London and Scarborough, £130,000; horses, carts, fittings, &c., £32,596; stock £283,086 and debtors, cash and bills receivable, £318,195, making a total of £763,878, from which £101,823 has to be deducted, representing trade and other creditors, so that the total security is valued at £662,055. There is no freehold property, but the main London premises are held on leases for terms of sixty years from Lady-day next; the period of the Scarborough lease is not stated, and the lease of the premises at Leeds is about to expire, the business being transferred to the Scarborough branch. It is clear, too, from the figures that a very large proportion of the firm's business must be carried on on credit. It is not considered necessary to disclose the figures of the profits, but accountants certify that in each of the last nineteen years the profits have been sufficient to pay the interest on the present issue of debenture stock more than four times over. The company will maintain a policy with the Law Life Assurance Society to repay the amount of the stock at the end of fifty years, but we nevertheless consider the security offered for the debenture issue is not so good as it looks, though, of course, there should be no fear about the payment of interest while the business keeps up at its present level.

Shropshire Brewery Company, Limited.

The share capital of this company is £140,000, in £10 shares, of which 9,000 are five per cent. cumulative preference, and the rest ordinary. There is also an issue of £140,000 four per cent. irredeemable first mortgage debenture stock, which with 7,850 preference shares, is offered for subscription at par. The balance of the preference shares are held in reserve for future issue, while the whole of the ordinary are taken by the directors, tenants, and customers. Company is formed to purchase and enlarge the business of Wm. Hall & Co., brewers, maltsters, and wine and spirit merchants of Wem and Shrewsbury, there being besides the breweries, forty-nine freehold and fourteen leasehold houses, with forty freehold shops and houses. Profits for last three years are certified at £11,704, £11,749, and £14,355. Nothing has been written off for depreciation, because it is claimed that properties and plant have been maintained out of revenue. The entire properties are valued at £239,631 and there are book debts due to the business, and guaranteed by vendors, amounting to £11,000, while the purchase price is £253,500, including all the ordinary shares and £203,500 in cash, which is more than twenty years purchase of the average profits of the previous three years, and seems a pretty stiff figure. Against these average profits of £12,603 for the three years debenture stock interest and preference dividend stand for £9,525 which leaves a very fair margin. But this is not the time for the prudent investor to place his money in brewery issues, and, looking to the future, we can only regard the stock and shares offered as second-class investments.

Leeds and Batley Breweries, Limited.

This company acquires as going concerns the businesses of R. H. Sykes & Co., Limited, at the Soothill Brewery, Batley, with which was recently incorporated the Atlas Brewery, Batley, and Cutler's

Saville Green Brewery, Leeds, the total number of licensed houses being 74, of which 61 are freehold. The share capital is £225,000 in £1 shares, including 100,000 ordinary and 125,000 5½ per cent cumulative preference, all of which are offered for subscription, with an issue of £200,000 4½ per cent. irredeemable first mortgage. debenture stock, the price asked for the latter being 105. Interest is due January and July. Profits of both breweries for three years are given separately, and show steady progress, and last year's profits with rents from various "publics" and cottages came to £15,031, while the value of the properties and assets is certified at £341,397. From the additional houses acquired by the company a further profit of £11,450 per annum is expected to be earned, making a total of £26,481, of which the debenture interest and preference dividend will require £15,875. Assuming these profits are earned there will be a surplus of £10,606 for the ordinary shares, administration, &c., so that on this estimate the debenture stock and preference shares appear to be a fair risk, always bearing in mind that we consider the best of the time is over for brewery investments. The purchase price is high—£414,000 in addition to the premium on the debenture stock, which together represents sixteen years' purchase on the actual and estimated additional profit. We notice too that the middle-men, who style themselves the Sykes and Cutler Reconstruction Syndicate, and who, of course, are selling at a profit, take all this money in cash.

AUSTRALASIAN UNITED STEAM NAVIGATION COMPANY.

For the purpose of retiring existing five per cent. terminable debentures and loans, and to provide for the cost of new steamers the company is endeavouring to issue £300,000 four per cent. debenture stock at par. It is repayable at par July 1, 1928, or may be redeemed on six months' notice at 105 any time after July 1, 1908. The stock is secured upon freehold wharves, offices, and warehouse property at Brisbane at cost £122,102 ; leasehold wharf properties £47,179, and steamers of the value of £280,719, which three items fit into the round sum of £450,000. These steamers cost the company £468,271, and have been written down at 7 per cent. per annum, which appears a fair allowance for depreciation, though whether sufficient it is not possible to say. The value of the security is always to exceed by 50 per cent. the amount of the debenture stock from time to time outstanding, and the stock is to be a general floating charge over the remaining fleet and assets, except the uncalled capital, which is probably the best security the company possesses. The undertaking was formed in 1887 to amalgamate two companies engaged in the Australian coasting trade, and of the subscribed capital of £445,200, there is uncalled £101,580. The value of the fleet, properties, &c., is £570,408, while the entire debts, including terminable debentures and cost of two new steamers just delivered, amount to £252,600. Not a figure is given showing what profits have been in the past, and the accountant's certificate, after mentioning that in 1893 and 1894 losses were made owing to competition, makes the general statement that average profits have been greatly in excess of the amount required to pay the interest on the proposed issue. This we should imagine will not attract investors.

AVONDALE HOTEL AND RESTAURANT, AND HATCHETT'S RESTAURANT, LIMITED.

The vendor having purchased the hotel and restaurant for a sum not mentioned is willing to turn them over to the public for £205,000 in cash and £75,000 in ordinary shares. The freehold premises are valued by Douglas Young & Co., at £198,500 ; and the furniture, fittings and stock at £12,500, making a total of £211,000. The profits of Hatchett's, we are told, have varied but little during the three years ended June 30th, 1897, and therefore they are given in the lump sum of £9,303, and as to the Avondale we are only told that during the 6½ months to October 31st, last, the business done amounted to £8,804. There are also three shops included in the purchase, the rents of which amount to £1,900. The share capital is £200,000 in £5 shares, one half being ordinary and the other 6 per cent. cumulative preference, and there is an issue of £125,000 4 per cent. first mortgage debenture stock, which, with the preference shares, is offered at par. Three-fourths of the ordinary shares go to the vendor, and the balance is held for future issue. The debenture stock is redeemable on six months' notice at 110, and the interest is payable January and July, while the preference dividend is due quarterly from April 5. In subscribing for the preference shares or debenture stock there seems some risk ; better wait awhile until it is seen what sort of a business can be worked up.

AMAZONAS RUBBER ESTATES, LIMITED.

The object of this Company is to acquire and develop an India-rubber estate in Teffé, in the State of Amazonas, Brazil, covering about 137 English square miles. Estate is held in perpetuity, and some highly-coloured reports about the property accompany prospectus. Demand for rubber is said to have increased enormously during the last few years, and a table is supplied giving the exports from Para for thirty years, but it only brings us down to 1895. We should have preferred to have seen the figures for the last two years. The capital is £300,000 in £1 shares, comprising 150,000 ordinary and 150,000 7 per cent. cumulative preference shares, entitled to 25 per cent. of the balance of net profits after 10 per cent. has been paid on the ordinary shares. An estimated net profit of £105,000 is ventured upon, of which the preference interest would require only £10,500. The purchase price is £250,000, of which three-fifths is to be cash. It is impossible to judge of such a concern as this over here. All we can say is that the names of the directors inspire confidence, that the concern is highly speculative, and that those who care to take shares, must do so on their own responsibility. But we may point out that the cycle industry, which has so largely increased the demand for rubber, is now in a very depressed condition.

Company Reports and Balance-Sheets.

London and North Western Railway Company.—Gross receipts £6,697,578, expenses £3,812,364, ratio of expenses to receipts nearly 57 per cent. For the half-year the income was £191,984 larger, and the working expenses £262,826 larger, therefore the result of the heavier business done was a decrease of nearly £71,000, or, taking in miscellaneous receipts, of over £69,000 in the net income. A larger balance, however, had been brought forward so that the net decrease in the amount available for dividends was only £57,221, so stockholders will receive a dividend at the rate of 7¾ per cent. per annum, as against 8 per cent. a year ago. This, surely, is a most disappointing result but it is only what other reports have exhibited in a more or less marked way for the last half of 1897. In traffic expenses alone this company spent £116,000 more last half-year than in the corresponding half of 1896. Locomotive power cost about £70,000 more, maintenance of way about £18,000 more, carriage and waggon repairs about £38,000 more and compensation for accident and loss on passengers and goods, which reached the very heavy figure of £49,215, was £4,000 larger than in the December half of the preceding year. Fixed charges also tend to advance, although not at a rapid pace, and altogether the causes of the decrease in the dividends are not by any means occult. Capital expenditure within the half-year was only £482,891, of which £125,000 was on working stock ; but the future estimates under this head amount to £4,324,541, of which £600,000 is estimated to be spent in the current half-year—£150,000 of it on additional working stock. More than half the future expenditure is to be on lines open for traffic, and the company has several Bills before Parliament involving considerable fresh capital expenditure. Great, rich, and powerful as this company is, we think its stockholders should take note of the tendency of a continuance of these two influences, growing working expenses and considerable capital outlay, to reduce the return upon their investments. The dividend is payable on the 25th inst.

Midland Railway Company.—Gross receipts for December half of 1897, £5,349,476 ; working expenses, £2,978,305 ; ratio of expenses to receipts, 57·59 per cent. The increase in the receipts was £153,448, and in the expenses £224,537, so that here, likewise, the net income available for dividends was less in spite of the large increase in gross income. As, at the same time, there was more stock to pay dividends upon, it followed that the ordinary stockholder got less by ½ per cent than in the corresponding half of 1896—6½ per cent. per annum against 7. The preference charges have risen about £18,000 within the year, and there has also been an increase of nearly £600,000 in the amount of ordinary stock to pay upon—we do not mean in the duplicated stock but the old ordinary stock. Expenses have risen on the same lines with this company as with its neighbours. Maintenance of way, &c., cost about £44,000 more, locomotive power about £70,000 more, traffic expenses about £100,000 more, and compensation about £5,500 more. This last was a large increase upon a total of less than £21,000 for the second half of 1896. As usual, the capital expenditure of this company continues rather high, and amounted to £1,036,930 in the half-year just closed—£121,000 of it on working stock, and £730,000 of it on lines open for traffic. The estimated future expenditure is under £3,000,000, and for the current half-year only £650,000, but this company, like its neighbours, must go on boring its way into new districts, and we have no doubt at all that future years will see fresh capital powers secured, and fresh additions made to the capital account. The dividend will be payable on the 26th inst.

National Provident Institution.—In our notice of this company's report in the last number of the Investor's Review, by the misplacement of a comma it read as if the expenses, exclusive instead of inclusive of commission, were a little more than 11·3 per cent. It should have read, "expenses and commission, exclusive of income tax," &c.

London and Northern Debenture Corporation.—Retrenchment is at last the word in regard to this concern, and in order to save expenses, it proposes to swallow up its twin—the London and Northern Assets Corporation. Before doing this a kind of "spring-clean" has been conducted, which results in a statement that the securities show a depreciation of £17,985. To

partly fill this void the board takes the £5,132 credited as net revenue for the past year, the reserve of £6,550, and the £835 brought in, and after allowing £301 received for forfeited shares, the net deficiency is set forth as £5,165. There is of course no dividend, and the only suggestion is that this company absorbs its partner, and thus saves expenses in the future.

London and Northern Assets Corporation.—In view of absorption by its twin brother, the board of this concern has been trying to put its affairs in order. First it works out a profit of £5,020 upon revenue, and then proceeds to value the assets, and in this operation produces a considerable deficiency. Accordingly £1,061 is written off leasehold property, £16,432 off investments, and £202 off office furniture, or a total of £17,695. To partly meet this sum the net revenue of £5,026, the balance brought in of £575, and the reserve of £4,100 are absorbed, leaving a debit balance of £7,993. Of course, no dividend is paid, and shareholders can only look forward to the future.

South London Tramways.—The steady policy of allowing substantial sums for depreciation and repairs and renewals out of revenue has gradually caused this company to work at a better profit. In the half-year ended December 31, the gross receipts amounted to £46,361, and after working expenses had been met, including £6,777 for repairs and renewals, and £1,129 for depreciation, the net revenue came to £9,385. Adding £2,258 brought forward, the free balance permitted of £1,000 being put to reserve, a dividend of 5s. per share, making 4 per cent. for the year, and the carrying forward of a balance of £1,485. It is not a brilliant result after all, but the balance-sheet and capital account show distinct improvement compared with some years back.

Empire Palace, Limited.—For a company of this kind the report is particularly good. The profit and loss account gives a fair statement of the expenses, and the balance-sheet shows that properties are lightly capitalised. With a paid-up share capital of £31,250, the net profits of the past year came to £21,282, after allowing £8,029 for depreciation, £3,181 for renewals and repairs, and £430 for leasehold redemption. The board were therefore able to distribute 10s. 6d. per 15s. share, and 7s. per 10s. share in dividends, or very nearly 70 per cent. Such a result is only due to good management and the liberal way in which depreciation and repairs are allowed for out of revenue. Still, the business is by its nature speculative, and we should like to see some kind of a reserve created. The sinking fund is certainly invested, but that is ear-marked for leasehold redemption, and otherwise, when the dividends are paid, the company seems to be in debt, for £10,479 owing to creditors will only have about £4,000 of liquid assets against it.

British Land Company.—By steady repayments this company has reduced its debenture debt to practically vanishing point, for only £900 is outstanding. Deposits have also been reduced, so that only £2,185 of these exist, bearing interest at 2½ per cent. The whole of the property, therefore, belongs to the £300,000 of share capital, and the balance-sheet looks remarkably well. The chief assets consist of £160,605 in freehold land, buildings, leasehold offices, and ground rents; £71,211 as balance unpaid on land sold; £30,538 in advances on buildings; and £55,000 in India stock and on deposit at bank. Apparently, there is no reserve, but the percentage of liquid assets is particularly good. The profit in the past year amounted to £16,144 which allowed of a dividend of 5 per cent., and the carrying of a slightly larger balance. This is a vast improvement on the results of a few years back.

Wharncliffe Dwellings Company.—Last year this company earned a net profit of £7,136, which, after paying debenture and preference interest, allowed of a dividend of 3 per cent. on the deferred or ordinary shares, the placing of £500 to reserve, and the carrying forward of £266. The concern was not in possession of its properties for the whole of last year, and at the same time the debenture charge was only £850, as against £3,000 in the current twelve months. It is, therefore, difficult to give an opinion about its results. At the same time the amount of information supplied is very meagre, and we might refer the board to the East End Dwellings Company if they are in difficulty to know how to start improvement.

Southampton Tramways Company.—In the past half-year the company earned a net revenue of £2,436, or about the same as in the corresponding period. Out of this £1,000 was written off reconstruction account, and a dividend of 5s. per share declared. The Corporation have given notice of their desire to purchase the undertaking, and offered the sum of £40,000. The directors considered this quite inadequate, and declined the offer, so that the matter will now go to arbitration. If this price was for the whole undertaking as it stands, the proposed payment would have left very little for the ordinary shareholders, as there are £16,650 of debentures and £15,000 of preference shares.

John Moir & Son, Limited.—With larger sales the profit of this company diminished, owing to the higher price of raw material, and the net revenue of £5,319, compares with £6,195 a year ago, although only £1,000 had been reserved for depreciation as against £2,000 in 1896. The balance for 1897, however, permits of a dividend of 10 per cent., or the same as last year, the placing of £276 to reserve, and the carrying forward of £2,323. Thus, the prudent policy of last year has been fully endorsed, and with less profits the company pays the same dividend, and increases its amount forward slightly. The reserve will now amount to £14,000, and the depreciation fund to £22,000, but they are both in the business, although they make the liquid assets good.

Charing Cross and Strand Electricity Supply Corporation.—This company last year increased its lamps connected by 53·7 per cent. and the output in units from the stations was larger by 33½ per cent. than in 1896. Net earnings came to £18,907, and after paying interest, 7 per cent. in dividend was paid upon the ordinary shares, the amount forward being increased slightly to £3,014. The sum of £5,247 was added to the depreciation fund, and after deducting a little for leasehold depreciation, that fund stands at £13,000. There is also a share premium account of £9,608, which makes the reserves £22,608, and the employment of this money has enabled the company to carry out works of the value of £357,770, although only £324,000 of capital has been raised. It is in this way that solid concerns are formed, and shareholders will learn to bless the Legislature that forced the Official Auditor and his inquisitive ways upon the electric-lighting companies.

Cannon Brewery Company.—With £360,000 more of money employed, this company's profit of £115,958 for last year was £6,661 less than in 1896. Debenture and deposit interest required about the same amount as a year ago, but preference interest was £4,698 more, and consequently the available balance was only £59,250, as against £71,376 a year ago. In spite of this heavy reduction the dividend of 16 per cent. was maintained, and the allocation to reserve was reduced to the paltry sum of £3,000, only £250 being carried forward. The reserve therefore amounts to £46,796, against £1,854,000 of share capital, £1,200,000 of debenture stock, and £541,370 of deposits, loans and trade creditors. Verily a morsel of bread to a cataract of sack.

Spencer, Turner, & Boldero, Limited.—Like most of the other companies of this class, the firm earned less profit last year, the total being £40,110 against £45,862 in the preceding twelve months, and £52,014 in 1895. No special cause is assigned in the report for the serious falling off in profit. A dividend of 8 per cent. for the year is declared, £10,000 is placed to general reserve, and £17,532 is carried forward. The reserve will then amount to £35,000, and with the balance forward, forms a substantial fund for contingencies. It is rather ominous, however, to find the stock up £10,000 in view of the poor results of the last two years.

Perry & Company, Limited—The huge watering of the capital of this concern does not seem to have limited its power to distribute dividends. After paying preference and debenture interest, a dividend and bonus equivalent to 7½ per cent. is declared upon the ordinary shares, £10,000 is placed to reserve, and £6,161 is carried forward. The debentures only amount to £10,500, and are being steadily redeemed. The amount of liquid assets is good.

Furness Railway Company.—Gross receipts for the December half of the year, £251,806; working expenses, £125,599; increase in receipts, £10,619; increase in expenses, about £8,000; proportion of expenses to receipts, 50·2 per cent. Unlike some of its great neighbours, this little railway has been able to retain nearly £2,500 of the increase in its receipts as net revenue, but it is not in a position to pay a larger dividend on its ordinary stock. The rate is again 2 per cent. per annum, for the half-year, but the balance carried forward is about £2,500 more than that left from the second half of 1896. Nothing in the accounts of the company calls for particular remark. There has been very little expenditure on capital account, less than £37,000 within the six months, and future commitments are small. In their report the directors complain that the Boness Urban District Council has prevented the enlargement of the company's pier at Boness, on Windermere, and the grumble appears to be justified. The dividend warrants will be posted on February 25.

London General Omnibus Company, Limited.—One year with another the characteristics of this company are wonderfully stereotyped. There is the same curious expansion in the capital account the same droll certificate from the chartered accountants, and much the same slenderness of net income. In the half year ended December 31, 1897, the company's gross receipts were £541,261, an increase of £42,390. Expenses, however, amounted to £493,438, which was £50,587 more than in the corresponding half year, and consequently the net revenue was really less. Working expenses, in fact, took 94·45 per cent. of the gross income. Still the directors were able to declare a dividend at the rate of 8 per cent. per annum, and a bonus of 25s. per share, making the total distribution equal to 10½ per cent. per annum; and they had £15,054 left to carry forward. When we turn to the accounts this result does not look quite so pleasant. To be sure these accounts are, as we have said, quite of the usual kind, but their significance is none the less serious because that is so. For example, we find that going back two years leaseholds, &c., have been written up about £96,000. Of this freehold property accounts for nearly £39,000. We should very much like to know what justification there is for this continuous increase. It is extremely unusual, not to say unprecedented, for leasehold property to increase in value, especially short leasehold property, as the great bulk of that possessed by this company is. Then, along with this peculiar expansion in the capital value of freeholds and leaseholds—or the extremely rapid acquisition of further properties, we cannot say which, the report giving not the slightest information—we have to note a decline in the company's investments. At the end of 1896 these amounted to £183,034, and at the end of last year to £152,757, so that there is a decrease of nearly £30,000 on this head, the company having sold within the year some of its India stock, not an imprudent step perhaps. But what has been done with the money? Has it been used to buy new freehold and leasehold properties, or what? We ask these questions but do not for a moment imagine that any intelligible answer is likely to be forthcoming. But stockholders, however, get good dividends and are quite happy. The warrants for the present dividends will be posted on March 2.

Maryport and Carlisle Railway Company.—Gross receipts for the December half-year, £54,123; expenses, £26,859; proportion of expenses to receipts, 50·54 per cent. The gross revenue was £2,653 larger, and the expenditure about £870 larger. The net revenue was £27,265, exclusive of £1,446 brought forward, which enables the directors to pay a dividend at the rate 6½ per cent., leaving £1,528 to be carried forward. The company only spent £1,000 on capital account in the half-year, and appears to contemplate no further outlay under this head.

Brecon and Merthyr Tydfil Junction Railway Company.—Gross receipts for the December half-year, £46,426; expenditure, £26,352; proportion of expenses to receipts, 56·05 per cent. These figures show an increase of £2,487 in the income, and of £1,823 in the expenses so that £664 was left as net gain. On the extra traffic the total of the net revenue came to £20,097, which is sufficient to pay all fixed charges including full interest on the debenture stocks, and to write £1,013 off the debit balance brought forward from the previous half year.

Holborn and Frascati, Limited.—The net profits of this company for 1897, after payment of debenture interest, directors' fees, and all other expenses, amounted to £32,419. Adding the balance brought forward, the amount available for a distribution is £35,039, out of which the preference dividend has been met and a dividend of 8 per cent., together with a bonus of 2 per cent. has been paid on the ordinary shares, £5,000 has been transferred to a reserve fund and £7,539 is left to carry forward. This is a very good result for a company so heavily capitalized as this is, and we notice that another £1,900 has been added to the leasehold redemption fund, together with the interest on a like sum previously invested in the company's own 4 per cent. perpetual debenture stock.

The Brewers' Sugar Company, Limited.—After deducting the cost of all repairs, directors' fees, management salaries, and all other expenses, this company made a net profit in 1897 of £28,180. This enables the directors to pay the preference dividend, a dividend of 7 per cent. upon the ordinary shares, to place £2,500 to depreciation account, £5,000 to reserve, still leaving £7,071 to be carried forward. The balance sheet looks well, and if the reserve and depreciation funds continue to be added to in a similar manner the company should have a long career of prosperity.

The Mines and Banking Corporation, Limited.—This is a small company with a capital of £86,000 only, and borrowed money amounting to £27,696. On these limited resources a gross profit of fully £10,500 was made last year. Adding £2,000 brought forward the company had £12,535 available, out of which all expenses have been paid, and a dividend of 5 per cent. for the year upon the ordinary shares. This leaves £4,410 to be carried forward, which might be made the nucleus of a reserve.

The Merchants' Trust, Limited.—The net revenue of this company for the year 1897, after placing £7,292 to reserve account, came to £41,505, to the £27,793 brought forward has to be added. This gives £69,298 all told of net, of which both the preference and ordinary stocks have received 4 per cent. for the year, leaving £30,131 to go to the new year. The board has written £45,537 off the cost of investments, which leaves the reserve fund at £50,000, which, they significantly add, "can be similarly appropriated hereafter if necessary."

Millwall Dock Company.—The present position of the company is not particularly promising. The number of vessels entering the docks during the past half-year was twelve more than in 1896, but the tonnage was less by 27,884 tons due entirely to the continued reduction in grain imports from Russia. The net receipts, however, increased by £385, and a dividend at the rate of 3¾ per cent. is declared on the ordinary stock. The company is heavily weighted with prior charges, and out of the £46,405 divided as much as £35,161 is absorbed in paying debenture and preference interest, so the prospect for the ordinary stockholder is none too good. The most satisfactory feature in the half-year's business is an increase of 54 per cent. in the American arrivals, which has largely offset the continued falling off in the Russian business. This has now gone on so long that the directors are becoming convinced it will be permanent, and it is thought that American oats will take the place of those from Russia. Unfortunately for the Millwall, its interest in American imports is very much less than in those from Russia as the former are brought in the large liners, which are so big that they have to use the docks lower down the river. Consequently, the company is looking out for fresh business.

Maple & Co., Limited.—Still another issue of capital is announced by this company, and we may as well say frankly that we do not like it. Only the other day a paltry £100,000, in preference shares was emitted, and realised a premium of 10s. per share, which premium, amounting to £50,000, was added to the company's reserve. Now the proposal is to create an additional £250,000 ordinary £1 shares, to be called "C" shares, which existing ordinary shareholders shall have the right, for a month after the confirmatory meeting, to subscribe for at par in the proportion of one new share for every two existing shares. Then, in order to enable the said shareholders to pay for this new issue, a quarter of a million is to be drawn from the general reserve fund, and given to them by way of a bonus of 10s. per share. No balance-sheet has as yet been issued by this company, but in the circular announcing the dividend of 10½ per cent. for the second half of 1897, completing the year, and making the total dividend for the past twelve months 15½ per cent, it is stated that the total reserve stands at £303,594, with the £50,000 added to it from premiums obtained on the preference share issue. All this is thoroughly vicious finance, and augurs no good for the future of the company, great and apparently prosperous though its business now is.

The Produce Markets.

GRAIN.

There has been no great stir in the market during the week, but the outlook is more cheerful, and at Mark-lane on Wednesday English wheat was held for 6d. advance, which was partially paid. There was a similar rise in foreign, and it was obtained in some cases, though buyers were not eager. There was little doing in flour. Maize was in fair demand at 3d. more money—American mixed, 16s. 3d., ex ship; old, 17s., ex quay; and Galatz-Bessarabian at 18s. Barley was slow at unaltered rates—Odessa-Nikolaieff, ex ship, 16s. 6d. to 16s. 9d.; and Danubian at 16s. 3d. to 16s. 6d. Oats 3d. dearer—mixed American, 15s. 9d. to 16s., ex ship; and Canadian white at 17s., ex quay. Spot parcels at Liverpool were firmly held for full prices to a further advance of ½d. Red American futures opened on Wednesday without change, but improved on free buying, but receding somewhat when the demand had been satisfied. Afterwards the market again hardened, and closed firm, at a rise of ½d. to ⅝d. Sales, 450,000 centals. March, 8s. to 8s. 0⅝d.; May, 7s. 6d. to 7s. 6½d.; July, 7s. 2¼d. to 7s. 1⅜d.; September, 6s. 7d. to 6s. 7½d.; December, 7s. East Indian shipments steady but quiet. Wheat cargoes continue firm, but the demand is quiet. Walla-Walla off coast, 37s. 9d. bid, but holders are not offering. Californian due, 27s. 9d., sellers. London cargo market quiet on the whole, but on Wednesday opened steady on American advices, and prices occasionally 3d. better. Trade, however, was not active, though the close was firm on stronger cables. Walla Walla shipping was sold at 35s.; also two steamers, about 2,200-2,500 tons each. Rosario-Santa Fé, February-March shipment changed hands on the Continent at 35s. 6d. and 35s. 9d. For 2,750 tons loading 36s. 3d. is asked. Californian September, is obtainable at 38s. 9d. to 39s., and for prompt shipment at 36s. 9d, Wheat options irregular. Maize firm. Barley rather slow. Oats 3d. higher.

Official Closing Values (100 lb. deliveries—February 16).

	March.	May.	July.	Sept.
Red American Wheat	8·0¼	7·6⅝	7·2¼	6·7½

In New York the wheat market ruled rather easy in the beginning of the week, but gradually hardened. On Wednesday it opened ½ c. dearer for May, with "bears" eager to cover, partly owing to the news that twenty-nine boat loads had been sold to Lisbon late day, and that the Portuguese import duty on wheat had been reduced. After the initial spurt trading became erratic, and consisted mostly of "scalping" business, and in the afternoon the market became quiet. Local feeling is generally "bearish," and the "short" party is restrained from aggressive operations only by the fear of being caught by Chicago manipulators. Late in the session the market became again active and rising, partly owing to reports that Liverpool "short" sellers were buying No. 2 red winter wheat for early shipment. The closing tone was strong and prices 1 c. to 2⅛ c. dearer. On the kerb buying continued, and a further advance of 1 c. was paid, May delivery touching $1·00¼. Sales, 5,500,000 bushels. The close in maize was firm, at a rise of ⅝ c. to ¾ c. Flour in moderate request, but firm.

COTTON.

The spot market was firm in end of last week, and on Monday there was an easier feeling but fair activity. Tuesday was quieter, but on Wednesday there was a revival and holders were less easy to deal with. American in fair request at hardening rates. Brazilian ruled dull and Egyptian quiet at steady prices. Surats continued idle at late values. Futures opened 1½ point higher, and sellers were more reserved; business was chiefly covering, and the market was quiet with but little variation in the course of the forenoon. American opening cables coming lower, offerings increased, and under considerable realizations receded 1 to 1½ point, the close being quiet but steady at ½ to 1 point net gain. Wednesday's tenders at the Clearing-house were 400 bales American on new dockets. In New York the tendency, early in the week, was towards higher rates, but the improvement did not last, and on Wednesday the market, 1 to 4 points lower, declined further under disappointing cables, heavy interior receipts, and active local selling. The market, however, closed steady generally 5 points lower. Spot easy. Middling upland, 6¼c. Sales, 117,500 bales.

New York Closing Values.

	Spot.	Feb.	Mar.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.
Feb. 16 ..	6¼	5·93	5·95	5·98	6·02	6·05	6·03	6·12	6·10	6·10	6·12

WOOL.

The market has been rather unsettled. In consequence of local failures, operations in Bradford were conducted with caution. Staplers were at first content to wait, keeping up prices in the meantime, but this was found impossible, and on Monday sales of higher qualities of crossbreds were reported at very near the lowest point yet touched. There was, however, a fair demand. In the London wool market a good inquiry exists on home and Continental account, and some fair sized parcels have changed hands at late rates. Arrivals to date for the second series (commencing March 15th) are as follows:—New South Wales, 59,381 bales; Queensland, 7,654; Victoria, 39,240; South Australia, 1,371; West Australia, 502; New Zealand, 12,130; Cape and Natal, 20,419—total, 140,717 bales, of which about 48,000 (34,000 Australasian and 14,000 Cape) have been forwarded direct. The week's imports total 28,964 bales, and comprise Sydney, 10,074; Melbourne, 4,374; Queensland, 1,392; Adelaide, 400; New Zealand, 6,003; Cape and Natal, 3,598; Buenos Ayres, 73; Marseilles, 457; Batum, 224; Basra, 2,155; and sundries, 214. Messrs. Schwartze & Co. will probably offer on the 28th inst. about 2,700 bales of damaged China sheep's wool, salved ex *Cromarty*, and probably about 700 bales sound China wool out of same ship on the above date.

METALS AND COAL.

There has been great activity and firmness in the copper market throughout the week, and a sustained advance in price. On Tuesday £50 per ton was paid at the opening for three months' delivery, a figure that has not been recorded for nearly a year past. On Wednesday, however, the tendency was more easy, and values closed 1s. 3d. lower than the previous day for cash, and 2s. 6d. to 3s. 9d. for three months. About 700 tons sold during the morning—cash at £49 10s. and £49 11s. 3d., one week and mid-March £49 11s. 3d., March 10 £49 12s. 6d., April 18 and 24 £49 15s., and three months £49 17s. 6d., £49 16s. 3d.; while in the afternoon cash realized £49 10s., and three months £49 15s. and 16s. 3d. combined, and £49 15s. The mid-monthly copper statistics showed further diminution in the visible supply of copper, which has dropped from 29,145 to 29,076 tons, while the price since the 31st of last month has improved 12s. 6d. per ton. The shipments from America declined very considerably in January, as also those from Spain and Portugal, and the total supplies for the month were about 500 tons less than in January last year. The falling off in the supplies was, however, counteracted by a decline of nearly 1,000 tons in the deliveries. The demand for copper in the near future is likely to be considerably greater.

SETTLEMENT PRICES.

Copper ..	49 10 0	49 5 0	49 2 6	48 17 6	49 5 0	48 17 6

The pig-iron market has been very active. There have been good ship-building and engineers' trade reports, and though several attempts were made to break the rise in price, they were unsuccessful. On Wednesday, 30,000 tons changed hands. Scotch maintained previous price; Cleveland rose 1d.

SETTLEMENT PRICES.

	Feb. 16.	Feb. 9.	Feb. 2.	Jan. 26.	Jan. 19.	Jan. 12.
	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.
Scotch	45 7½	45 7½	45 7½	46 0	46 0	45 9
Cleveland ..	40 7½	40 4½	40 6	40 10½	40 10½	40 7½
Hematite ..	48 9	48 7½	48 6	47 0	48 10½	48 9

Hardly any business is doing in coal. The recent improvement in the outlook has almost entirely disappeared, and from those who are unable to accept them there are frequent complaints of the existence of special prices in all departments of the trade. For seaborne coal the demand was decidedly inactive, only one cargo being offered, which is not to be loaded until the end of the week; but no transactions were reported, and apparently it would not be possible to effect sales except at easy rates. The official quotations continue at 17s. and 16s., usual terms in the pool for Hetton Wallsend and Lyons respectively.

SUGAR.

Cane sugar has been steady throughout the week, with a tendency to increase in price. British cubes and pieces quiet for the most part, but had an increased demand on Wednesday, when speculative beetroot advanced ½d. Crystals have a good inquiry for yellows, and white is in fair request at late quotations—Tate's cubes, No. 1, 14s. 9d.; No. 2, 13s. 10½d.; crushed, No. 1, 13s.; No. 2, 12s. 6d.; granulated, 13s. 3d.; yellow crystals, 12s. 1½d.; Lyle's crystals, No. 1, 13s.; No. 3, 12s. 3d.; granulated No. 1 13s.; No. 2, 12s. 3d.; white, A, 12s. 9d.; B, 12s.; yellow crystallised, O and P, 12s. Foreign.—Granulated firm, with a good business at ¾d. advance.

Mr. Czarynkow says the unsatisfactory feature in United Kingdom remains the continuous low values of refined, but as the spring advance this will doubtless adjust itself. In the States, also, there were complaints of the slow sale of refiners' produce, which is, after all, nothing unusual at this period of the year, and must in a few weeks be succeeded by more activity.

TEA AND COFFEE.

There was good competition at the tea auction during the week, 23,200 packages Indian sold on Monday. On Tuesday 23,000 packages Ceylon were offered, and nearly all sold, buyers easily supplying their wants at last week's prices. Pekoes about 6d.—occasionally ruled ¼d. cheaper. Terminals continue dull, Messrs. Gow, Wilson & Stanton state, that "the quantity of Ceylon tea exported direct to markets other than the United Kingdom continues year by year to substantially increase. The expansion which has taken place during the last seven years is shown in the following table:—

1897.	1896.	1895.	1894.	1893.	1892.	1891.
lb.	lb.	lb.	lb.	lb.	lb.	lb.
17,124,508	14,205,051	12,186,532	9,243,070	18,905,987	6,338,582	4,529,433

Another week of small auctions has added strength to the Indian tea market, an improved tone being shown for all descriptions and prices generally marking a distinct advance. Although the auction of Ceylon tea was lighter, prices were irregular and frequently slightly lower; the quality of offerings continues poor."

There has been a steady business in coffee, and good sorts sold at auction brought full prices. Other sorts slow. Costa Rica fine medium to fine bold bright hard blue, 105s. 6d. to 108s. 6d.; fair small mixed, 55s. 6d.; peaberry, 117s. Columbian good to fine bold blue, 85s. to 93s. 6d.; low middling hard faded gray to good middling colouring, 63s. to 86s.; low middling to middling mottled pale, 60s. to 66s. 6d.; small mixed, 41s. to 45s. 6d.; peaberry, 80s. to 101s. Futures steady at 3d. advance.

Messrs. W. J. & H. Thompson state that Java and China teas were very quiet, with only small transactions. About 200 packages of Natal tea sold in auction at 5½d. to 7½d. per lb.

HEMP AND JUTE.

Hemp firm throughout the week. At auction on Wednesday 80 bales fine quality sold at £22 10s. and 70 bales third Quillot were bought in at £27. To arrive, 500 bales F.C. December-January steamer, sold at £19; 500 February-April, sailer, £19 2s. 6d.; 500 March-May, £19 5s.; 1,000 May-July, £19 7s. 6d.; 1,000 good seconds, February-March, steamer, at £17 10s. Jute dull, prices generally unaltered. For shipment 1,000 bales first marks, February-April, steamer, London, sold at £9 15s.; 500 Pal P.N. group, January-March, steamer, Hamburg, £10 15s. The "entries" at Calcutta to date were 225,000 bales.

THE PROPERTY MARKET.

A good deal more business has been done at the Mart this week, though mainly in the disposal of bricks and mortar. Even these, however, were greatly superseded on Monday by gas and water stocks and shares, offered by Mr. Alfred Richards, which account for £12,088 out of the £14,813 total for the day. £3,500 new ordinary stock, Grays Gas, went for £4,255; £2,500 4 per cent. debenture stocks of the Great Yarmouth Water Company brought £3,038; 179 £10 shares of Whitchurch and District (Hunts.) Gas brought £2,198, and seventy-five £10 new ordinary shares Great Yarmouth brought £995.

The Bijou Theatre and Concert Hall at Llandudno, known as the St. George's Hall, was sold a few days ago, by Messrs. M. Dew & Sons, for £7,000.

A freehold residence, known as Shortlands, at Ash, Surrey, with stabling, pleasure grounds, paddock, &c., the whole covering an area of about 3¼ acres, has been sold by Messrs. Nash & Son, at Farnham, for £2,020.

Mr. Alfred Richards announces for Monday next at the London Mart, sales of freehold and leasehold properties in Wood Green, Hornsey, and South Hackney.

£47,370 was the handsome total of the sales at the Mart on Tuesday. There was an unusually good lot of securities offered, and the demand for them was encouraging. Messrs. Debenham, Tewson, & Company sold some freehold ground rents in Moor-lane, City, for £5,650. Another lot of theirs consisted of freehold premises in Drury-lane, with an area of 1,500 ft., which went at £3,050. Three acres of building land in Hartington-road, Chiswick, were bought at £2,500, or about £830 an acre. Messrs. Green & Son, of Hammersmith, disposed of a number of freehold ground rents at good prices, the principal lot being £168 15s. per annum, secured on property in Muriel-street, Caledonian-road, with reversion in twenty-three and a half years, which realised £8,600. Mr. Joseph Stower was successful with all his lots, save one; and Messrs. Brodie, Timbs, & Company made a clear book, with one very small exception. Freehold houses in Soho, offered by Messrs. Robins, Snell, & Gore, changed hands at satisfactory prices. It was altogether a good day's work.

There were also large sales at Mason's Hall Tavern. The free lease and goodwill of a well-known house in the south of London, the Alfred's Head, in Newington-causeway, with a term of fifty-five years at the annual rent of £300, was sold, after brisk competition, by Mr. W. Rolfe for £50,000; and the Camden Head, Islington Green, held on a lease for nineteen years at £100 per annum, was disposed of by Messrs. Belton & Sons for £12,010. Local Veto does not seem to have yet affected the market value of public-houses.

The Mart was very animated on Wednesday, and the value of the sales reached the high total of £92,710. The main inducement attracting buyers was Messrs. Debenham, Tewson & Co.'s sale of the first portion of the properties of the Land Securities Company, in liquidation, comprising houses, shops, and building land at Wimbledon. One lot of leasehold houses in Cromwell-road, with a ground rent of £201 10s. went for £8,070. Another, consisting of freehold houses in the same road, fetched £8,060; a third lot in the same road brought £9,160; and a fourth, leasehold, £8,120. The houses 276 to 288 Haydon's-road, went for £2,510; houses 292 to 308, Haydon's-road, brought £4,980; houses 42 to 74, Haydon's-park-road went for £3,700; and 13 to 47 odd, in same road, fetched £4,750. A lot of leasehold houses in Gap-road brought £7,200; and 7 a. 3 r. 12 p. freehold building land sold at £5,500. The ninety lots offered sold for a total of £68,890. Some landed estate lots at Worplesdon, Surrey, were sold by Messrs. Daniel Smith, Son & Oakley at excellent prices—Hurst Farm, consisting of rather over seventy acres, freehold, going at £3,100.

MINING RETURNS.

CROWN REEF.—Crushed by 120-stamp mill, 15,971 tons, yield 7,919 oz. smelted gold; from cyanide 3,643 oz.; from slimes (for December and January) 548 oz.

LE CHAMP D'OR.—Crushed 5,359 tons in 29 days, yield 225 oz.; cyanide, 3,630 tons treated, yielding 968 oz.

MOODIE'S GOLD MINING AND EXPLORATION. — Tons crushed, 1,100; yield, 660 oz.

NATAL COLLIERIES AND DURBAN COALING STATION.—Output for December, 2,020 tons.

PALMAREJO.—Crushed 1,950 tons; panned 1,750 tons, producing $43,500.

PRINCESS ESTATE.—For January: Crushed 5,025 tons, producing 1,905 oz.; 932 oz. from tailings.

VILLAGE MAIN REEF.—Crushed 5,370 tons, yielding 3,098 oz. gold from battery.

LAKE VIEW CONSOLS.—Clear-up for January:—40 stamps (new mill-working 650 hours crushed 5,026 tons, yielding 4,576 oz. of gold; tail

ings assay 14 dwt. per ton. Cyanide return.—3,527 tons treated, yielding 2,607 oz. of gold; tailings assay, 2 dwt. per ton; concentrates, 20 tons, value 371 oz of gold.

West Rand.—Crushed 3,815 tons, yielded 1,076 oz.; cyanide treated 3,064 tons, yielded 813 oz.

Windsor Gold.—3,930 tons yielded 1,271 oz. from plates; 671 oz. from cyanide treatment.

York.—For January: crushed 5,163 tons, yielding 2,302 oz.

Buffelsdoorn.—Production for January, 3,007 oz.

Bonanza.—From mill: crushed 6,102 tons, obtained 5,161 oz. gold. From cyanide and slimes: treated 5,525 tons, yielding 2,875 oz. gold.

Village Main Reef.—5,370 tons, yielding 3,098 oz.; cyanide process portion of tailings: 1,140 tons produced 401 oz.

Geldenhuis crushed 16,823 tons; yield from mill 6,392 oz., from concentrates by cyanide, 935 oz., from tailings, 2,126 oz., and from slimes, 635 oz. gold.

Geldenhuis Main Reef.—January returns:—3,634 tons crushed, yield 751 oz.; 2,100 tons treated by cyanide, yield 559 oz. Profit for month, £566.

Alaska Mexican.—Bullion shipment, $30,940; ore milled, 14,936 tons; sulphurets treated, 275 tons; bullion from sulphurets, $8,376.

Block B Langlaagte.—Ore crushed, 12,213 tons of 2,000 lb.; gold retorted, 3,182 oz. Tailings, cyanide process, 6,750 tons yield 1,185 oz. Concentrates, cyanide process, 166 tons, yield 342 oz.

City and Suburban.—Last month's crushings yielded 11,032 oz.

Langlaagte.—Production for January:—Mill.—Ore crushed, 22,195 tons of 2,000 lb.; gold retorted, 5,754 oz. Tailings, cyanide process.—Tons treated, 14,850 of 2,000 lb.; gold recovered, 1,472 oz. Concentrates, cyanide process.—Tons treated, 650 of 2,000 lb.; gold recovered, 1,466 oz. Total gold recovered, 8,692 oz.

Langlaagte Star.—Production for January:—Mill.—Ore crushed, 5,292 tons of 2,000 lb.; gold retorted, 3,097 oz. Tailings, cyanide process.—Tons treated, 4,381 of 2,000 lb.; gold recovered, 934 oz. Total gold recovered, 4,031 oz.

North Randfontein.—Production for January:—Mill.—Ore crushed, 5,856 tons of 2,000 lb.; gold retorted, 1,223 oz. Tailings, cyanide process.—Tons treated, 3,840 of 2,000 lb.; gold recovered, 518 oz. Concentrates, cyanide process.—Tons treated, 105 of 2,000 lb.; gold recovered, 203 oz.

Nourse Deep.—Results for January: Tons crushed by 60 stamps, 7,350; yield in smelted gold, 3,780 oz.; tons of sands and concentrates treated by cyanide works, 5,673 oz.; yield in smelted gold, 1,619 oz.

Paarl Central Gold Exploration.—Results for January:—From mill.—Crushed 5,520 tons, yielding 1,653 oz. From cyanide works.—Treated 4,084 tons, yielding 882 oz.

Porges Randfontein.—Production for January:—Mill.—Ore crushed, 6,655 tons of 2,000 lb.; gold retorted, 2,807 oz. Tailings, cyanide process.—Tons treated, 4,950 of 2,000 lb.; gold recovered, 714 oz. Concentrates, cyanide process.—Tons treated, 87 of 2,000 lb.; gold recovered, 480 oz.

Robinson Randfontein.—For January:—Mill.—Ore crushed, 5,242 tons of 2,000 lb.; gold retorted, 2,632 oz. Tailings, cyanide process.—Tons treated, 4,410 of 2,000 lb.; gold recovered, 570 oz. Concentrates, cyanide process. Tons treated, 48 of 2,000 lb.; gold recovered, 139 oz.

Transvaal.—For January:—Mill—Crushed 9,027 tons, obtained 3,934 oz. of fine gold. From cyanide works—Treated, 5,005 tons; yield (for December as well as January), 2,666 oz.

Wolhuter.—Result for January, 7,559 oz. gold.

May Consolidated.—During January 14,069 tons crushed; yield, 4,213 oz. Cyanide—8,380 tons; yield, 2,290 oz.

Wassan.—For December:—Ore crushed, 488 tons, producing 608 oz. bar gold, equal 634 oz. standard gold, which, together with 174 oz. from skimmings, realised £2,545. Returns for January:—736 oz. bar gold from 503 tons of ore.

Sons of Gwalia.—January:—Crushed, 1,260 tons; yield, 1,577 oz.; tailings, 25 dwt.

Paarl Central.—5,520 tons crushed, yielding 1,635 oz. gold. Cyanide—4,084 tons treated, yielding 882 oz. gold. Total value, £8,322. (Note.—The mill only ran twenty-three days.)

St. Augustine.—541 loads yielded 36 carats.

Transvaal Coal Trust.—Output 12,700 tons. Profit £500.

Crescent.—For past month 600 tons, 66 oz.

St. John del Rey.—For ten days of February, £3,245 gold produce; yield per ton ·42 of an oz. troy.

Waihi.—3,900 tons treated; bullion produced £14,750.

Mount Macolm.—Crushed 470 tons for 444 oz; tailings 13 dwt.

Great Boulder.—For fortnight, 30 stamps crushed 1,428 tons of ore; yield, 3,293 oz. gold.

Cassel Coal.—Output for January, 20,600 tons; profit, £3,000.

Caylloma Silver.—17,550 oz., troy, silver in export ore; 17,500 oz., troy, silver in bullion.

New Australian Broken Hill Consols.—Two tons, 3,500 oz. silver.

New Zealand Crown.—For January, 1,400 tons mined; 1,481 tons crushed; value of bullion, £3,041.

Robinson.—For January, mill crushed 14,940 tons; yield in smelted gold, 10,029 oz.; from concentrates (by chlorination), 1,503 oz.; from tailings (cyanide), 3,117 oz.; from slimes, 925 oz.; from own ore, 15,574 oz.; from concentrates bought, 1,396 oz.; total gold recovered, 16,970 oz.

Wentworth Goldfields.—Five weeks' return, 840 tons of ore crushed; yield, 845 oz.

Eaglehawk Consolidated.—Trial crushing, 30 tons, yielded 1 oz. 9 dwt. per ton.

Melbourne Democrat.—Crushed 18 tons first-class ore for 75 oz.; 530 tons mullock for 145 oz.

Frank Smith Diamond.—3,050 loads washed producing 189 carats.

Leicester Consolidated Diamond.—From the mine 2,000 loads, and from floors 5,500 loads, washed producing 213 carats.

Anglo-Mexican.—Crushed 1,630 tons, $28,973 (U.S. gold), 27 days run. Cyanide—tons treated, 1,035, $10,569 (U.S. gold).

Brilliant and St. George.—2,121 tons of quartz crushed for 3,630 oz. of gold; approximate value, £12,500.

Great Boulder Perseverance.—Milled 1,040 tons, yielding 933 oz.

Hannan's Oroya.—Crushed 832 tons of ore, yielded 374 oz. gold. Mill worked 25 days.

Westralia and Eastern Extension.—Twenty stamps running 615 hours crushed 1,882 tons. Yield of smelted gold, 1,236 oz.

Geldenhuis Deep.—Return for month of January:—190 stamps crushed 20,700 tons, yielding 7,201 oz. of gold. Treated by cyanide 15,190 tons, yielding 4,042 oz. Yield in smelted gold from slimes 250 oz. Total, 11,493 oz. of gold.

Next Week's Meetings.

Monday, February 21.

Aberdeen and Glasgow Steam Shipping	Birmingham, 2 p.m.
Anglo Foreign Banking (Gen.)	2, Bishopsgate-street, noon.
British Yukon Mining and Trading	53, Old Broad-street, 11.30 a.m.
Charing Cross and Strand Electricity Supply	15, Maiden-lane, W.C.
Dublin, Wicklow, and Wexford Railway	Dublin, 1 p.m.
Inter-oceanic of Mexico Railway	Winchester House, 2 p.m.
Kay & Company	Worcester, 1 p.m.
Municipal Trust (Ex. Gen.)	2, Great Winchester-street, noon.
National Temperance Land and Building (Gen.)	Guildhall Tavern, 7 p.m.
Prairie Cattle	Edinburgh, noon.
West India and Pacific Steamship	Liverpool.
Wharncliffe Dwellings	16, Great George-street, S.W., 1 p.m.

Tuesday, February 22.

Atlantic 1st Leased Lines	Winchester House, 2 p.m.
Australian Agricultural (Spec.)	" " 1 p.m.
Cork, Blackrock, and Passage Ry.	Cork, 2.30 p.m.
Glasgow Cotton Spinning	Glasgow, 2 p.m.
John Moir & Son	Winchester House, 1.30 p.m.
London and County Banking	21, Lombard-street, 1 p.m.
London and North Western Railway (Spec.)	Euston Station, 1 p.m.

Mr. Curzon stated in the House of Commons on Monday that Government proposed to advise Parliament to grant £75,000 to meet expenses in connection with the British section of the Paris Exhibition of 1900.

Washington is still a little disturbed about Germany's exclusion of American beef, fruits, and horses. The House of Representatives on Monday passed a resolution calling for the official correspondence with Germany on the subject.

Railway Traffic Returns.

CLEATOR AND WORKINGTON.—Gross receipts for the week ending February 12 amounted to £984, a decrease of £93. Total receipts from January 1, £6,122, a decrease of £323.

COCKERMOUTH, KESWICK, AND PENRITH.—Gross receipts for the week ending February 12 amounted to £830, an increase of £42. Total receipts for six weeks £5,156, an increase of £598.

ROHILKUND AND KUMAON RAILWAY.—Traffic for week ended January 15, Rs. 6,312; decrease, Rs. 654. Aggregate from January 1, Rs. 12,220; decrease, Rs. 959.

BURMA RAILWAYS.—Receipts for week ending January 15, Rs. 1,88,195; decrease, Rs. 35,363. Aggregate from January 1, Rs. 3,96,361; decrease, Rs. 94,706.

WEST OF INDIA PORTUGUESE RAILWAY.—Week ending January 22, Rs. 4,283; increase, Rs. 1,842.

BENGAL CENTRAL RAILWAY.—Traffic for week ending January 22, Rs. 20,373; increase, Rs. 2,200. Total from January 1, Rs. 56,401; decrease, Rs. 670.

BENGAL DOOARS RAILWAY COMPANY.—Traffic receipts for week ending January 15, Rs. 3,610, against Rs. 4,886.

H. H. THE NIZAM'S GUARANTEED STATE RAILWAYS COMPANY.—Traffic for seven days ending January 22, Rs. 79,723, increase, Rs. 4,980. Total from January 1, Rs. 229,005; increase, Rs. 4,140.

GREAT NORTHERN RAILWAY OF MINNESOTA.—Traffic receipts for month of January, $1,307,000; increase, $335,500.

QUEBEC CENTRAL RAILWAY.—Receipts for third week of January, $7,492; increase $943. Aggregate from January 1, $16,074; increase $499.

MOBILE AND BIRMINGHAM RAILROAD.—Traffic for third week of January, $10,933; increase, $3,240. Aggregate from July 1, $207,741; decrease, $20,390.

DOMINION ATLANTIC RAILWAY.—Receipts for month of January, $32,409; decrease, $789.

BALTIMORE AND NORTH-WESTERN RAILWAY.—Return for week ended January 31, $146,488; decrease, $7,620.

ATLANTIC AND DANVILLE RAILWAY.—Return for month of January, $43,660; increase, $2,796.

BALTIMORE AND OHIO SOUTH-WESTERN RAILWAY.—Traffic for fourth week of January, $146,488; decrease, $7,620. Aggregate from July 1, $3,974,763; increase, $378,947.

ALABAMA GREAT SOUTHERN RAILWAY COMPANY.—Traffic receipts for month of December, $177,000; increase, $12,000.

CINCINNATI SOUTHERN RAILWAY COMPANY.—Traffic return for month of December, $340,000; increase, $36,000.

VICKSBURG, SHREVEPORT, AND PACIFIC RAILWAY.—Gross receipts for month of January, $67,000; increase, $15,000.

ALGECIRAS (GIBRALTAR) RAILWAY.—Traffic for week ended January 29, Ps. 18,600; increase, Ps. 2,335. Aggregate from July 1, Ps. 620,110; increase, Ps. 10,728.

WESTERN RAILWAY OF HAVANA.—Receipts for week ended February 5, £2,000; increase, £210. Aggregate from July 1, £55,405 increase, £5,873.

PERUVIAN CORPORATION RAILWAYS.—Receipts for January, $276,325; increase, $16,250.

MANILA RAILWAY.—Traffic receipts for week ended February 12, $20,339; increase, $5,239. Aggregate from January 1, $100,229; increase, $30,402.

NORTH-WESTERN OF URUGUAY RAILWAY.—Receipts for month of January, $13,200; increase, $1,793.

BILBAO RIVER AND CANTABRIAN RAILWAY.—Receipts for January, £9,050; increase, £337.

VILLA MARIA AND RUFINO RAILWAY.—Traffic for week ending February 12, $5,237; decrease, $950. Aggregate from January 1, $23,153; decrease, $3,628.

CENTRAL URUGUAY NORTHERN EXTENSION RAILWAY.—Week ending February 5, £1,570; increase, £144. Aggregate from July 1, £36,837; increase, £2,129.

CENTRAL URUGUAY EASTERN EXTENSION RAILWAY.—Traffic for week ending February 5, £493; decrease, £131. Aggregate from July 1, £20,130; decrease, £1,747.

SAN PAULO BRAZILIAN RAILWAY.—Gross receipts for the three weeks ended January 16, £29,990; decrease, £7,066.

WEST FLANDERS RAILWAY.—Gross receipts for week ending February 13, £1,891; increase, £83. Total from January 1, £12,503; increase, £481.

GREAT WESTERN OF BRAZIL RAILWAY.—Traffic for week ending January 8th, $44,127; increase, $2,817. Aggregate receipts to date $76,260; increase, $7,506.

TRAMWAY AND OMNIBUS RECEIPTS.

Increases for past week:—Belfast, £79; Croydon, £64; Glasgow, £139; Lea Bridge, £98; London & Deptford, £40; London Southern, £87; London General Omnibus, £1,037; London Road Car, £403; Metropolitan, £513; North Staffordshire, £28; Provincial, £63; South London, £69; Wolverhampton, £10; Woolwich & S. E. London, £7.

Decrease for past week:—Bordeaux, £51; Calais, £2; Southampton, £2.

Anglo-Argentine, week ending January 17, £114 increase; Vienna Omnibus, week ending February 5, £291 increase.

The success of the spring crops in Northern and Central India are said to have been assured by an excellent rainfall. It is pleasant to hear of the success of anything besides official blundering being assured in India.

Answers to Correspondents.

Questions about public securities, and on all points in company law, will be answered week by week, in the REVIEW, on the following terms and conditions:—

A fee of FIVE shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of FIVE shillings must be sent to cover the cost of such letter, the fee then being TEN shillings for one query only, and FIVE shillings for every subsequent one in the same letter. While making this concession the EDITOR will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus:—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway?"

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The EDITOR has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market manipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The EDITOR further respectfully requests that merely speculative questions should as far as possible be avoided. He by no means sets himself up as a market prophet, and can only undertake to provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the INVESTORS' REVIEW, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

"A BONDHOLDER."—Will the writer of the letters signed thus in Nos. 2 and 3 (January 14 and 21) kindly forward his address. I regret it has been mislaid.

EXPRESS.—1. I will write you in reply to this question. 2. A fair second-class bond, but the finances of the guaranteeing company are complicated and rather mysterious. This guarantor is a kind of trust which controls several roads in the north-western part of the country. There are signs of considerable activity in that region, so these companies are likely to do well. 3. I never like to recommend this class of share as a permanent investment; the huge capital liability must not be forgotten. The yield is liable to considerable fluctuations in bad times. 4. The amount of capital behind these debentures is small, and the dividend on the ordinary shares was reduced last year from 10 per cent. to 8 per cent.

H. G.—1. Very speculative. Present price seems much inflated, and the market is certainly manipulated. 2. Yes.

Y. F.—So far the Government has paid its guarantee, which is the company's sole source of income. The road does not pay its working expenses. Bonds are bought, not drawn, the money coming from the guarantee. How long interest will be paid depends entirely on the ability or desire of the Government to meet its engagements. I do not think there is much chance of an improvement in the immediate future.

W. A. C.—You have a disagreeable loss at present prices, and I do not like to urge you to sell, but I have never had a high opinion of the management of the company. Generally the market is in a spiritless condition, and prices threaten to drag. On the other hand, a large mill is at work, and the monthly profits declared have been very fair. Should any activity show itself in the market a rise in your shares might be engineered, but that will not happen just yet. My own feeling is that you should not hold long.

A.N.Y.—Company is said to own some very promising properties, but the whole business is very speculative. Those controlling it are clever, but you must be prepared for a loss if you buy. There is no possibility of calculating the "worth" of the shares.

J. H. S.—I am sorry I have not been able to forward your letter yet owing to the loss of the "copy," but I hope to receive the address shortly.

A Special Commission is now sitting in St. Petersburg to consider the question as to the importation of foreign goods into Siberia by the Kara Sea duty free. It was so before, and the Siberian merchants and traders urge that it should be so again, as by the abolition of the privilege they had lost a valuable market for the export of their cereals, which were taken by British vessels trading with Siberian ports when their goods were admitted free of duty. The Moscow Exchange, however, oppose this arrangement, which they consider detrimental to Russian commerce. Russia herself, these enlightened gentlemen contend, can supply all essential requisites for the people of Siberia. Poor Siberia!

It is stated that the Admiralty contemplate the immediate commissioning of the first-class cruiser *Terrible* for service with the Chinese fleet.

CLEMENT WILSON'S PUBLICATIONS.

Crown 8vo, cloth, price 7s. 6d.

TOURGUENEFF

AND HIS FRENCH CIRCLE:

A Series of Letters to Flaubert, George Sand, Emile Zola, Guy de Maupassant, Gambetta, and others.

Edited by H. HALPERINE-KAMINSKY, and Translated, with Preface, by Miss ETHEL ARNOLD.

THE TIMES.

"The work has been admirably translated into English by Miss Ethel Arnold. . . . The preface contains much sound criticism very felicitously expressed. . . . The merit of the rendering is attested by the easy and idiomatic flow, and by the close correspondence it establishes between the style and man. . . . In a word, Miss Arnold has treated the book exactly in the right spirit."

THE SCOTSMAN.

"The English version is well done. . . . It is likely to be read with interest by a wide circle."

THE DAILY MAIL.

"They are well and spiritedly translated."

NOW READY.

MY LIFE IN TWO HEMISPHERES.

By Sir CHARLES GAVAN DUFFY.

In 2 vols. with a Photogravure Portrait to each. price 32s.

*** This work contains letters from John Stuart Mill, Cardinal Newman, Thomas Carlyle, Mrs. Carlyle, Richard Cobden, Father Mathew, Leigh Hunt, John Bright, Robert Lowe (Lord Sherbrooke), Sir Emerson Tennant, Sir Arthur Helps, H. E. Childers, John Forster, William Allingham, Clarence Mangan, and from eminent Political Men in Ireland and Australia too numerous to specify.

The Daily News.—"These volumes may serve for a history, not only of a man and of a movement, but of a whole nation in one of its most stirring periods . . . Sir Charles Duffy surveys the entire field of Imperial Politics, and there are few men of the first importance whom he is not able to estimate as personal forces."

The Daily Chronicle.—"A bright, refreshing narrative, full of valuable information, replete with admirable stories, and abounding in thoughtful and suggestive reflections."

The Newcastle Daily Leader.—"We commend Sir C. Duffy's graphic and vigorous pages to all who are sincerely desirous to know the ins and outs of the Irish questions."

NOW READY.

THE GLADSTONE COLONY: an Unwritten Chapter of Australian History.

By JAMES FRANCIS HOGAN, M.P., Author of "The Irish in Australia," "The Australian in London," "Robert Lowe, Viscount Sherbrooke," &c. With a Prefatory Note by the Right Hon. W. E. GLADSTONE. Demy 8vo, cloth, 7s. 6d.

ABRIDGED CONTENTS.—Prefatory Note; The Genesis of the Gladstone Colony; Some Preliminary Proposals; Constitution of the New Colony; Mr. Gladstone Enunciates his Land Property; The Founding of the Colony; The Veto of Earl Grey; The Vindication of Colonel Barney; The Growth and Development of Gladstone; Experiences of a Pioneer Squatter; The Great Gold Rush; The Correspondence of Sir Maurice O'Connell; A Grievous Error of the Gladstones; Major De Winton; Oldest Living Gladstonian; The Gladstone of To-day; Mr. Gladstone's "True Principles of Colonisation"; Mr. Gladstone and the Colonies; A Couple of Colonial Lectures.

SIR THOMAS MAITLAND. By W. FREWEN LORD. (Vol. 2 of "Builders of Greater Britain.") Frontispiece and Maps, cloth, 5s.

The Pall Mall Gazette.—"Written in a bright and spirited style, this study of Sir Thomas Maitland furnishes a fascinating chapter in the history of the making of the empire."

SIR JAMES Y. SIMPSON. By H. LAING GORDON. (Vol. 3 of "Masters of Medicine.") Illustrated, cloth, 3s. 6d.

The Glasgow Herald.—"The book, we repeat, should be widely read, and especially by Scotsmen."

London: T. FISHER UNWIN, Paternoster Square, E.C.

Notice to Subscribers.

Complaints are continually reaching us that the INVESTORS' REVIEW cannot be obtained at this and the other railway bookstall, that it does not reach Scotch and Irish cities till Monday, and that it is not delivered in the City till Saturday morning.

We publish on Friday in time for the REVIEW to be at all Metropolitan bookstalls by at latest 4 p.m., and we believe that it is there then, having no doubt that Messrs. W. H. Smith & Son do their best, but they have such a mass of papers to handle every day that a fresh one may well look almost like a personal enemy and be kept in short supply unless the reading public shows unmistakably that it is wanted. A little perseverance, therefore, in asking for the INVESTORS' REVIEW is all that should be required to remedy this defect.

All London newsagents can be in a position to distribute the paper on Friday afternoon if they please, and here also the only remedy is for subscribers to insist upon having it as soon as published. Arrangements have been made that all our direct City subscribers shall have their copies before 4 p.m. on Friday. As for the provinces, we can only say that the paper is delivered to the forwarding agents in ample time to be in every English and Scotch town, and in Dublin and Belfast, likewise, early on Saturday morning. Those despatched by post from this office can be delivered by the first London mail on Saturday in every part of the United Kingdom.

Cheques and Postal Orders should be made payable to CLEMENT WILSON.

The INVESTORS' REVIEW can be obtained in Paris of Messrs. BOYVEAU ET CHEVILLET, 22, Rue de la Banque.

ADVERTISEMENTS.

All Advertisements are received subject to approval, and should be sent in not later than 5 p.m. on Thursdays.

For tariff and particulars of positions open apply to the Advertisement Manager, Norfolk House, Norfolk-street, W.C.

The Investment Index,

A Quarterly Supplement to the "Investors' Review."

Price 2s. net. 8s. 6d. per annum, post free.

THE INVESTMENT INDEX is an indispensable supplement to the Investors' Review. A file of it enables investors to follow the ups and downs of markets, and each number gives the return obtainable on all classes of securities at recent prices, arranged in a most convenient form for reference. Appended to its tables of figures are criticisms on company balance sheets, State Budgets, &c., similar to those in the Investors' Review.

Regarding it, the *Specker* says: "The Quarterly 'Investment Index' is probably the handiest and fullest, as it is certainly the safest, of guides to the investor."

"The compilation of securities is particularly valuable."—*Pall Mall Gazette.*

"Its carefully classified list of securities will be found very valuable."—*Globe.*

"At no time has such a list of securities been more valuable than at the present."—*Star.*

"The invaluable 'Investors' Index.'"—*Sketch.*

"A most valuable compilation."—*Glasgow Herald.*

Subscription to the "Investors' Review" and "Investment Index," 36s. per annum, post free.

To Correspondents.

The EDITOR cannot undertake to return rejected communications. Letters from correspondents must, in every case, be authenticated by the name and address of the writer.

The Investors' Review.

The Week's Money Market.

Poor Money Market! it has been living from hand to mouth during the past seven days. Each day has seen fair sums maturing for repayment at the Bank of England, and the market has endeavoured to meet these so far as its resources would permit, but never got free. Some days it paid-off half the amount falling due, on others it had to re-borrow the whole, and in the end the reduction of its indebtedness to the fountain of credit was not very important. At the same time the payment of the railway dividends caused a little dislocation of funds, and one or two "calls" of importance fell due in the week. Day to day money has accordingly kept tight at $2\frac{3}{4}$ to 3 per cent. during the greater part of the time, and loans for seven days have ruled about $2\frac{3}{4}$ per cent.

The sudden break in the quotation for gold from 77s. $10\frac{3}{4}$d. to just a trifle over the Bank's buying price of 77s. 9d. per oz., has naturally brought an easier tone to the discount market. We have good reason for stating that the great demand on account of the Continent has ceased, whether permanently or temporarily it is yet too early to say, but there are signs that the diminution in the bidding arises from causes likely to be permanent. Austria and Russia have each accumulated a large sum in gold at a costly price—a price that must have been a great strain upon their exchequers, and they must now have every reason to hold their hands. Even if another Japanese Loan is raised here, the sum obtained will only prevent gold filtering away from that country; while, if an internal loan is floated in Japan, as is spoken of in some quarters, that measure will only intensify the exports of gold from Japan. Probably, therefore, our market will have to face no drain of importance during the current six months, and, in this case, gold will soon begin to accumulate at the Bank of England once again. Such a prospect would have caused a sharp decline in discount rates, if the news had come at any other season, but, at the moment, the Government has in its Treasury more of the resources of the market than it can afford to spare, and, consequently, it is bound to act with caution. The discount rate for three months choice bills has, therefore, only declined to $2\frac{5}{8}$ to $2\frac{11}{16}$ per cent., as against $2\frac{1}{1}^{1}$ to $2\frac{3}{4}$ per cent. a week ago, but longer dated paper is weak at $2\frac{1}{2}$ to $2\frac{5}{8}$ per cent. When Government disbursements on a large scale will take place it is hard to say. Some money may easily come out at the next Consols settlement, and when it does occur, the market will become much easier, very likely suddenly easier. It seems a pity that the action of the collector of the taxes on the Money Market should be so oppressive as it often is at the beginning of the year, but we must put up with it. This year the lock-up of credit in the Government balances has been much worse than usual.

No relief has yet come to the Money Market by the release of Government balances. On the contrary, the Bank Return published yesterday disclosed a further increase of £1,431,000 in the "public" deposits which contain the whole of the Treasury and departmental moneys, and the total now amounts to £16,878,000. It is quite possible that this accumulation may be continued for several weeks longer, for in 1896 it went on until the third week in March, when the total attained the rare height of £19,175,000. Should no relief come at the end of the present month by the payment of accounts by the Government, then the market has a very unpleasant prospect before it, because it is becoming steadily poorer This week the "other" deposits, which comprise the

balances of other banks, are again less by £838,000, at £35,123,000, and although the Reserve has increased £632,000 to £23,878,000 through the return of coin and notes from circulation, the market actually owes £5,453 more on "other" securities than it did last week. The total of these "other" securities is still £32,329,000 as against less than £27,000,000 in the first week of December last, and £28,635,000 in the third week of February last year. The Market is, therefore, heavily in the Bank's debt still and cannot escape from this position until the taxes now piled up to such an unusual amount begin to be paid out again.

SILVER.

A weak tone has prevailed in this market since we last wrote. The wearing away of the over-sold account is shown by the fact that the "spot" price now rules only $\frac{3}{16}$d. above that for delivery two months ahead. The normal divergence between the two quotations is about ¼d., so that matters are almost in equilibrium, and, the market has therefore lost all the support it has obtained during the past four or five months from its over-sold condition. Perhaps, partly on account of this fact, buyers have been reluctant throughout, and, after some days of waiting, sellers had to break the price by ¼d. per oz. to 25$\frac{13}{16}$d. per oz. for "spot" in order to find a purchaser. At this price a little reaction occurred to 25$\frac{7}{8}$d. per oz., based to a slight degree upon a cable from New York, stating that a movement is on foot to combine the silver smelters in the States. Efforts in this direction have been made before, and if this movement should have a better result than the others, the American silver-mine owners will earn the thanks of producers in Australasia, Mexico, and other places, at severe cost to themselves. The India Council allotment must be considered poor for this time of year, the applications being only 4 lacs above the 40 lacs offered, while allotments were made at $\frac{1}{32}$d. lower than a week ago. Chinese exchanges have fallen ¼d. to ½d. during the week.

BANK OF ENGLAND.

Stock Market Notes and Comments.

There is really not a great deal to say this week about the Stock Exchange; most departments of it remain in a somewhat paralysed condition. The public is not doing anything except to invest its savings, and not a great deal even of that. Such speculation as goes on is either between the London Market and foreign markets or between the leaders of the often-mentioned groups and combinations who make a show of business, anxious to get the public to come and buy their wares. Only one interesting point has to be noted in regard to investment stocks, and that is the selling of Colonial securities and of Home railway debenture and preference stocks by some of the banks,—at least it is inferred that the banks have been selling their own stock, not throwing out stock pawned with them by those who have been living on interest "margins." It has not been extensive selling, but just enough to indicate what a real and prolonged pressure for money would bring about. On most of what has been sold the sellers ought to have realised handsome profits, but small as the total business of this kind has been, it is singular how it has weakened the Market and made jobbers shy of dealing.

Regarding the great departments of the Stock Exchange, Home Railway ordinary stocks, United States and Canadian Railroad securities, and the miscellaneous market we can really say nothing fresh.

Up to the present the disappointing yields of English railway ordinary stocks for the past half-year, have not had much influence upon prices. Buying has merely stopped; the speculator has no motive to purchase for the rise nor has the investor any temptation to put money into securities which a year hence may not, at current prices, yield 3 per cent. The speculation in American railroad shares also has paused on account of the difficulties which have again arisen between the United States and Spain about Cuba. The source of the latest squabble was the publication of a brutally frank private letter of the Spanish minister at Washington, and we really cannot see that anything serious ought to arise out of this doubtless regrettable incident. Had President McKinley been a magnanimous man, he would have passed the matter over without notice of any kind, seeing that the letter was in no sense official. Being, however, essentially a small and commonplace man, a sort of quarrel has arisen which has given alarmists plenty of scope for inflammatory writing, and offers such a splendid opportunity to disseminate lies more or less grotesque, that even the lamentable accident to the United States cruiser *Maine* in Havana Harbour, was made use of to depress the market. In the result, the buying which was spreading on this side has paused, if not stopped altogether, and we must wait for the little tempest of doubts to blow over before this market resumes activity.

Of Foreign Government stocks we have also no particulars of an interesting kind to give, they are still so very little dealt in between London and Paris, as London will not buy most of these stocks on any terms, and Paris has lost taste for them since its inhabitants have seen red-handed revolution raising its head in their midst over this scandalous Dreyfus miscarriage of justice, and the still more scandalous behaviour of the Administration and the military faction. Well may M. Guyot dub M. Méline "Father Ruin." What is going to happen in France no man can forecast, but prudent men will be inclined to prepare for the worst, and in the tempest which seems brewing, surely the man who deserves sympathy far more than execration is the Jew. His wealth mainly consists in mortgages upon human labour, of one kind or another, the value of which would be extremely likely to disappear when the forces of disorder gain the upper hand. That he himself would receive maltreatment is a matter of no doubt at all, so little has the world progressed.

After all, however, this French question does not immediately and directly touch us. The most interesting, because most dangerous, section of our Stock Markets just now is the "Kaffir Circus." We hardly know what is going to happen there, but it is plain enough that it cannot remain in its present torpid condition without producing disastrous consequences in some directions. That the public will lose, and lose heavily, when the shares of Transvaal "outcrop" mining companies sink to their true level is unquestionable; but we are inclined to think that the financiers now stand to lose more even than the public, and the thought is comforting. In all our long experience of the City, we have never known any gigantic imposture carried through with more ruthlessness, with a greater disregard to every consideration, not merely of morality, but of business fair-play, than the "rig" of this South African Market. For some years the men engaged in developing it, and in enticing the British public to buy their wares at extravagant prices had everything their own way. The public went mad about "gold in the Transvaal"; sober citizens of all degrees of wealth lost their heads in the furore, and obscure and needy adventures by the dozen sprang suddenly into the position of millionaires possessing untold wealth. For the last eighteen months now at least the stream has been been running rather the other way, and it is a consolation

to think that when the balance is ultimately struck a good deal of the wealth acquired in the days of the nation's madness, by men unscrupulous enough often to rob their own mothers, will have gone back again into the hands of some at least of those from whom it was originally drawn. In other words, since the public ceased to buy South African shares the occupation of these millionaires of yesterday has consisted in what is called "supporting the market." They have had to be the buyers in order to sustain prices, and in this position they have been obliged to take back again at high figures large numbers of the shares they had previously parted with. Being wealthy they have been able to do this up to now with considerable success; indications, however, now point to the conclusion that they think they have had enough of it and for some time the market has been dwindling, without life.

In our opinion it must continue to dwindle unless the speculative British public is foolish enough to take to selling "bears." That, as we point out elsewhere in reference to the Deep Level shares not yet placed with the public, would, indeed, be madness, and playing the game of the financier to perfection. To sell what a man has not got is nineteen cases out of twenty a profitless operation, even when the security sold may not be worth one-tenth of its quoted price. Still, where a market is large and free the bear now and again may "make a haul" if he follows the market downwards, and knows when to stop. The African Market, however, is not "free" by any means, and the prudent man who loves peace of mind with his crust will give it the go-by.

Were a large "bear" account to be opened in these South African mine shares prices would immediately be put up against the bear, and he would have to buy back at a loss, his money going into the pockets of the manipulators behind the market to enable them to write down the cost of the shares in their books, and, on a rising market, it is certain that a proportion of new buyers would come forward, so that the houses now loaded to the ceiling with unsaleable scrip might escape with the bulk of their ill-gotten gains. The only thing for the public to do, then, is to do nothing. Those who possess these South African shares ought, in our opinion, to sell them when they get an opportunity,—quietly, steadily, never in fevered haste. Those who do not possess them should neither buy nor sell. Let the market be left completely to itself.

We quite believe that this advice may occasionally seem bad, because there is plenty of strength still with those who have made this market, so far as outcrop mines go, and they can put prices up somewhat, if they like, but ultimately, we have no doubt whatever, our opinion will be amply justified. Even in regard to the very best looking properties in all the Rand there is not one which can be called reasonable in price, measured by the quotation for its shares on the market to-day. Every advance in price, however, ought to be taken advantage of by holders to escape.

Just look at the position of the "Chartered" Company; its shares are quoted at 3 and have remained comparatively steady in spite of the absence of all accounts for three years now, and in spite of the depressing opinions enunciated by Mr. Cecil Rhodes. The "vamosing" of two directors has had no appreciable influence, nor yet the intimation that the Colonial Office intends to take over the administration of the country while leaving the Company responsible for the finances. There can be but one explanation of this market indifference, and it is that large masses of the shares are in the hands of finance houses who dare not sell. Doubtless, the public also possesses immense quantities, but the public is mostly "in" at much higher prices, and holders in that unfortunate position never sell unless forced to. They hug their losses and groan. The movements of the market are, therefore, governed by the action of the groups which have flourished in the past by playing upon it, and since these groups, judging by the stagnation of prices, cannot now operate, we may be quite sure that evil is on the way, not good. They cannot effect an advance, these worthies, and they dare not allow a fall. In our opinion there will be no real healthy activity in any part of the Stock Markets until all the great mass of rubbish accumulated in the South African part of it has been cleared away. At every other point speculation is spasmodic. It flutters up, now in one security, now in another, to die away again, exhausted before its energy has been half developed. There is no more anxious business to be found in the United Kingdom at the present time than that of the Stock Exchange jobber.

The Week's Stock Markets.

General dulness and an all-round absence of business have been the chief characteristics of the past week on the Stock Exchange, but it was not until after the news arrived of the loss of the United States cruiser, *Maine*, in Cuban waters that falls assumed any very serious dimensions. Markets then became very weak, but the actual transactions were not considerable. Consols advanced steadily, and touched 113 on Saturday, due partly to purchases by the Government broker for Sinking Fund purposes, followed by a certain amount of "bear" closing. The price has since slipped back under the influence of a hardening tendency in the "short" money market.

The Home Railway market was firm at the close of last week, and prices advanced for several days on end but the flatness of the American market had an unfavourable effect on Home Railways, and the latest quotations show an almost general shrinkage on the week. Traffic returns were good, that of the Midland Company especially, the big increase shown in that company's takings this week giving them a balance on the right side for the half-year up to date. The stocks of the Southern lines and Great Northern issues have been the weakest in the whole list, but on the other hand there has again been a good inquiry for Central London shares. City and South London stock drooped when a new issue of ordinary stock, to the extent of about £225,000, was announced. There has been a steady decline in the preference and debenture stocks of the leading lines.

United States Railroad shares, after several ups and downs, finally show nothing but falls on the week. The resignation of the Spanish Ambassador at Washington led to a good deal of selling, but speculative purchases by professional operators again raised prices

All previous advances were, however, soon lost, when the semi-official statement appeared that President McKinley was going to communicate with Congress on Cuban affairs; and the mysterious blowing-up of the United States ironclad *Maine* in Cuban waters on Wednesday was the excuse for the general slump which immediately followed. One or two items of interest have to be noticed, one being that the Louisville Company has sold $12,500,000 of Collateral Trust Gold bonds to retire the 7 per cents. maturing in April. It is stated that Northern Pacific stockholders will receive rights to subscribe to the new securities of the syndicate about to be formed to purchase that company's lands. At the foreclosure sale of the Kansas Pacific line, the Union Pacific Reorganisation Committee's bid of $6,303,000 was accepted.

Canadian Railway stocks have presented a very lively appearance all the week, the negotiations between the management of the Canadian Pacific and Grand Trunk Railways regarding the disputed rates having had an unsatisfactory ending, but this has been partly off set by the publication of a very favourable half-yearly statement by the latter company. The Canadian Pacific dividend of 2½ per cent. (making 4 per cent. for the year, against 2 per cent. last year) was what the market had looked for, and the traffic returns were also up to expectations; but the latest quotations are lower than those ruling at the end of last week, in sympathy with the general dulness.

Business has been on a small scale in the Foreign Market owing to the existence of political difficulties, and speculators are unwilling to increase their commitments. Among South American issues the feature has been the rise in Uruguayan bonds, the *coup d'état* in Monte Video being looked upon as an improvement in the political situation.

Argentine descriptions also hardened up, but a rather sharp rise in the gold premium at Buenos Ayres has since had a weakening effect. Brazilian bonds are also easier, and Guatemala 4 per cent. fell on the news of the assassination of the President. Among "internationals" Spanish Fours gave way owing to the strained relations between Spain and the United States, and sales from Paris have also taken place. Greek bonds have shown great strength, the formal notification of assent to the scheme of arrangement with the bondholders being expected within the next few days from all the Powers. Egyptian issues have registered a considerable rise during the week, and Russian 4 per cent. and 3½ per cent. are higher on influential Paris buying. The rise in the latter case was due to rumours of a new Russian loan, or at any rate the conversion of existing loans, and the belief is also gaining ground that the proposed tax on Foreign Government Securities has been abandoned.

Among foreign railways, Buenos Ayres and Ensenada issues have risen sharply, but heavy sales of Central Argentine stock have depressed the price of that security. A good traffic return was responsible for a slight advance in Mexican issues and Interoceanic of Mexico debentures have been inquired for.

In the Miscellaneous market, Allsopp Brewery Stock has been very much to the front. The price rose sharply when the interim dividend was announced at the rate of 7 per cent., but most of the rise has since been lost, and a fresh issue of capital is now talked of. Guinness rose 10 one day, only to fall as much the next, the market evidently being very limited, and North Worcestershire Brewery debentures have had a sharp relapse. There has been a shake out in Salt Union issues, the directors' announcement of a paltry 1¼ per cent. dividend on the preference shares, when at least the full dividend had been looked for, causing a good deal of surprise. Last year the ordinary received 2 per cent., so that things have pretty rapidly gone from bad to worse. General Hydraulic Power stock has moved up another 10 points, and a batch of satisfactory reports has helped to raise the prices of most of the leading trust companies. The scheme formulated by the directors of the Crystal Palace Company, has not been favourably received, and holders of the junior debentures have been throwing their stock on the market. Spiers & Pond shares show some recovery from last week's fall, and it is now announced that the company has succeeded in renewing their contract with the Chatham and Dover Railway, but only at an increased figure. The tale that they were going to enter the field against the companies now engaged in the light refreshment business, has been promptly denied by the directors. Hudson's Bay shares have had a set back, as there has been no confirmatory news regarding the reported gold discoveries in the company's territory. Electric lighting companies have again attracted buyers, the dividend of 10 per cent. announced by the City of London directors giving an additional fillip to this section of the market.

Mining and Finance Companies.

The daily report from the South African market has been little or nothing doing, and a dull tendency, and prices accordingly show only slightly irregular movements. The resignation of the chairman of the South African Gold Trust, when the shareholders declined to sanction the proposal for increasing the directors' fees, was followed by a drop in the price of the shares. As regards Western Australian ventures, rises or falls from day to day have generally been limited to about $\frac{1}{16}$ or $\frac{1}{8}$, and the net result is to leave prices in about the same position as at the end of last week. The "Bottomley" group has been much talked about, but apart from the engineering of a rise in Northern Territories, not much has happened. Copper shares have risen in sympathy with an advance in the price of the metal, and the statistics for the past fortnight showed that deliveries were again in excess of supplies. Indian shares have hardly moved.

Just at the last there was a partial recovery in United States Railroad shares on New York and provincial buying, but there is still an unbroken list of falls compared with last week. Home Railway stocks also closed slightly firmer, notably Lancashire and Yorkshire and Great Eastern, but Great Central issues left off weak. Among Foreign Government stocks a recovery is apparent in Spanish and Italian, but South American descriptions were again pressed for sale. Consols and Indian Government Securities eventually established a slight rise on the week, but a further set back in Bank of England stock has taken place.

THE BRITISH LINEN TRADE.

Belfast rejoices in the possession of an excellent institution whose object is the encouragement of flax cultivation in Ireland. Its name is the Flax Supply Association, and its members include practically all the important spinners and manufacturers in Ulster. The association has worked strenuously during more than a quarter of a century to fulfil the purpose of its being by the grant to farmers of high-class seed, by the dissemination of useful knowledge, by the offer of prizes, and by other similar works. In spite, however, of its best endeavours, the acreage under flax is gradually contracting. In 1880, the land under this crop in Ireland was 157,534 acres. In 1893, it was as low as 67,487 acres. When, in the following year, there was a sudden increase (due to a good return and high prices) to 101,081 acres, it was thought that matters had reached their worst, and were beginning to mend again. But in the following year the acreage fell to 95,203 acres; in 1896 it was only 72,253 acres; and last year only about 60,000 acres were in cultivation.

Flax is a notoriously unstable, as well as unpleasant crop, but its cultivation, taken one year with another, is highly profitable. The Irish article ranks next in quality after Belgian and Dutch, and one might suppose that it would be sure of its market and its full average price by virtue of production in the centre of the largest linen manufacturing district in the world. Such an assumption, it seems, would be erroneous. What with large imports of the cheap flax of Russia, and growing imports of the high grade flax of Belgium, the Irish fibre no longer commands the respectful attention of buyers. The average Ulster yield in 1896 was 24 stones per acre, which compares with nearly 33 stones in Austria-Hungary, 30 stones in Belgium, 43 stones in France, 37 stones in Germany, 32 stones in Holland, 22 stones in Italy, and about 17 stones in Russia. It is somewhat singular that in Leinster, Connaught and Munster, which now grow less than 500 acres among them, this crop does not make progress, for each of these provinces is good for a steady yield of from 30 to 38 stones.

The number of flax spindles in operation in the United Kingdom, including doubling spindles, is about 1,200,000, compared with 1,473,000 in 1875 and 1,588,000 in 1868. The decrease, it may be observed, has been most noticeable in England and Wales, where the number has fallen away from 440,000 to about 100,000; but Ireland also shows a decrease from 894,000 in 1868, to 869,000 in 1897. A diminution in the actual number of spindles does not, however, argue of itself a decline in productive capacity. A falling off in spindles may, on the contrary, go hand in hand with an enhanced output. The spindles in existence to-day are probably capable of an output as large as the total of 1868. The better part of our annual production is for export, and having regard to all the circumstances, it would not be unreasonable to look for a present foreign trade at least equal to, if not greater than, that of twenty or thirty years ago. Last year we shipped abroad 18,364,200 lbs. of linen yarn of the declared value of £976,658. For 1876, the quantity was 22,278,259 lbs., valued at £1,449,513; for 1866, 33,608,171 lbs., valued at £2,374,132; and for 1864, 40,177,150 lbs., valued at £2,991,969. But perhaps compensation for diminished shipments of linen yarn is to be found in increased shipments of linen cloth? We are the more entitled to ask this as—apart from their improved capacity—the number of power looms in work to-day is 31,484 compared with 24,300 in 1885, and 20,152 in 1875. Piece goods exports in 1865 amounted to 247,186,459 yards, of the value of £9,156,990; in 1875 to 204,573,172 yards, value £7,272,920; in 1885 to 149,468, 600 yards value £4,961,093; in 1895, 203,587,600 yards value £5,351,025; in 1896, 174,208,000 yards value £5,030,966; and in 1897, 164,574,600 yards value £4,774,310. The values, it should be stated, include linen thread, which cannot be expressed in the same terms as piece goods. These figures show that while we have improved in regard to linen manufactures in recent years, we are still behind the averages of two or three decades ago; and it is apparent that our trade under this head offers no consolation for the falling off in yarns.

The most striking feature of our linen industry is the heavy volume of yarn imports. We have seen that the average annual shipment for the six years 1891–6 was 16,278,300 lbs. Our annual average import in the same time was as high as 20,106,510 lbs. Last year saw a decrease as compared with the two previous years, the figures being 15,907,161 lbs. for 1897, 20,069,122 lbs. for 1896, and 25,658,917 lbs. for 1895. There has, on this basis, been a very commendable decrease since 1895, when high-water mark was reached, while imports from other countries—Germany, France, and Holland—have diminished again, our receipts from Belgium have gone up steadily. In 1877 the figure stood at 4,942,785 lbs.; in 1886 it was 5,864,748 lbs.; in 1890, 12,485,017 lbs.; and in 1896, 16,517,027 lbs. For manufactured linens we do not trouble the foreigner much. The value of our imports of this commodity in 1896 was no more than £381,930 against £432,556 in 1890, and £308,022 in 1886, but such as the obligation is, we are indebted again in a large measure to Belgium, which sends us nearly one half of the whole, Germany being second with about one fourth. We are enabled, in fact, to supply practically all our home and foreign demand for piece goods by the aid of our own looms. But in the matter of yarns, it seems that we send abroad nearly all we make, and go to the Continent for what we need for our own consumption. The same anomaly may be observed by any one who chooses to take a glance at our woollen trade.

EAST AND WEST INDIA DOCKS.

The new scheme prepared under the Railway Companies Act, 1867, by the East and West India Dock Company has been confirmed in the Chancery Division before Mr. Justice Romer. Under the proposed scheme power is given to issue £750,000 Three per Cent. Prior Lien Debenture stock, of which £462,024 would be absorbed by being substituted for £94,700 existing Three and a Half per Cent. Debentures for £323,600 existing Three and a Half per Cent. First Mortgage certificates, leaving a balance of £287,976 available for further issue for the purposes of advances to the joint committee on account of new works. In the place of the present Four per Cent. Debenture stock, amounting to £2,297,980, £3 per Cent. Consolidated Debenture stock of a like amount, and £620,456 Four per Cent. Preference stock are to be issued. For the mortgages of 1885, £593,600 Consolidated Debenture stock, and for £293,896 Deferred Debenture Stock, £317,408 Four per Cent. Preference stock are to be provided.

Lord William Nevill pleaded guilty at the Central Criminal Court on Tuesday to a charge of unlawfully and fraudulently inducing Mr. Spender Clay to affix his name to certain promissory notes, to be dealt with as valuable securities. He was sentenced to five years' penal servitude.

The receipts on account of revenue from April 1, 1897, when there was a balance of £9,867,133, to February 12, 1898, were £88,825,114, against £86,973,541 in the corresponding period of the preceding financial year, which began with a balance of £8,975,201. The net expenditure was £86,315,451, against £85,638,806 to the same date in the previous year.

The Sugar Tax was discussed in the German Reichstag on Tuesday. It is noteworthy that every speaker expressed himself favourable to the abolition of the sugar bounties and the repeal of the consumption tax. Then why should Germany not act independently and at once rid herself of these stupid fiscal burdens?

Dividends Announced.

MISCELLANEOUS.

WEST AUSTRALIAN MARKET TRUST, LIMITED.—Interim dividend at the rate of 15 per cent. per annum for the six months ended January 30.

MERCHANTS' TRUST, LIMITED.—Dividend for the past half-year at the rate of 4 per cent. per annum on the preferred, and at the same rate on the ordinary stock, making 4 per cent. for the year ended January 31. £30,311 carried forward, as against £27,793 last year.

SPENCER, TURNER, & BOLDERO.—Dividend at the rate of 9 per cent. per annum, less tax, for the half-year ended January 15, making 8 per cent. for the year on the ordinary shares. Warrants will be posted on March 3.

BRUSH ELECTRICAL ENGINEERING.—Interim dividend at the rate of 6 per cent. on the preference shares for the half-year ended December 31 last, payable March 15.

MERCANTILE INVESTMENT AND GENERAL TRUST COMPANY.—Dividends at the rate of 5 per cent. per annum on the preferred stock, and at the rate of 3 per cent. per annum on the deferred, for the half-year ended January 31. £5,000 to be transferred to reserve fund, and a balance carried forward of about £8,800.

INDIA RUBBER, GUTTA PERCHA, AND TELEGRAPH WORKS.—Dividend recommended of 15s. per share, making 10 per cent. for the year, and leaving £13,173 to be carried forward.

SILVERTON TRAMWAY COMPANY. — 2s. per share has been declared payable on March 1.

SOUTH STAFFORDSHIRE BLUE BRICK COMPANY.—Dividend at the rate of 10 per cent. per annum for the year ended December 31.

MORGAN & COMPANY.—Payment of 6 per cent. per annum for the year 1897. £3,000 carried forward.

BORDEAUX TRAMWAYS AND OMNIBUS COMPANY.—10s. per share, free of tax, on the ordinary shares, payable on March 10.

SALT UNION, LIMITED.—1¼ per cent. for the past year on the 7 per cent. preferred stock.

CAR TRUST INVESTMENT COMPANY, LIMITED.—Interim dividends at the rate of 5 per cent. per annum on the preference stock and 7 per cent. per annum on the ordinary shares.

W. B. FORDHAM & SONS, LIMITED.—Final dividend at the rate of 12½ per cent. per annum for the half-year ended December 31, making with the interim dividend 10 per cent. for the year.

CITY OF LONDON ELECTRIC LIGHTING COMPANY, LIMITED.—Payment of the following dividends:—On ordinary shares Nos. 40,001 to 80,000 £1 per share for the year, and on ordinary shares Nos. 80,001 to 90,000 10s. 7d. per share for the year, being a distribution at the rate of 10 per cent. for the year ended December 31.

MINES INVESTMENT CORPORATION, LIMITED.—Warrants for the dividend of 15 per cent. on the ordinary shares have been posted.

BROKEN HILL PROPRIETARY BLOCK 10 COMPANY, LIMITED.—Warrants for dividend No. 56 of 2s. per share have been posted.

ROBERT ROBERTS & COMPANY, LIMITED.—Six per cent. on the ordinary shares recommended.

BRILLIANT AND ST. GEORGE UNITED GOLD MINING COMPANY.—One shilling per share dividend payable on Tuesday, 22nd inst.

FIFE COAL.—Six per cent. for the half-year ended December 31, which, with the interim dividend of 3¾ per cent. paid for the first half-year, makes 10 per cent. per annum.

BARNET DISTRICT GAS AND WATER COMPANY.—Dividends at the rate of 9 per cent. per annum on the "A" and "C" stocks, 8 per cent. per annum on the "B" stock, and £6 6s. per cent. on the "D" capital gas and water stocks.

NEW PRIMROSE GOLD MINING COMPANY, LIMITED.—Warrants for dividend, No. 15, 6s. per share less tax, have been posted.

COUNTY OF LONDON AND BRUSH PROVINCIAL ELECTRIC LIGHTING.—For the six months ended December 31, a dividend is declared at the rate of 6 per cent. per annum on the preference shares, carrying forward £10,000 to next account.

ARGUS PRINTING COMPANY.—Dividend of 8 per cent. is declared for the year, carrying forward £1,529.

REVERSION PURCHASE COMPANY.—Dividend on the old shares at the rate of 5 per cent. per annum.

BREWERIES.

SAMUEL ALLSOPP & SONS, LIMITED.—Interim dividend for the past half-year at the rate of 7 per cent. per annum, as against 6 per cent. at the last half of 1896.

WASHINGTON COMPANY, LIMITED.—Interim dividends at the rate of 8 per cent. per annum on the preference shares, and 6 per cent. per annum on the ordinary shares for the half-ended December 31. Payable March 1.

RAILWAYS.

COCKERMOUTH, KESWICK, AND PENRITH.—Dividend at the rate of 5 per cent. per annum for the half-year ended December 31.

CANADIAN PACIFIC.—2½ per cent. on the common stock and 2 per cent. on the preferred for the second half of 1897.

By 176 votes to 55 the Italian Chamber of Deputies has adopted the Bill guaranteeing the circulation of the banks of issue.

China has paid up promptly the pecuniary claim made by France for the kidnapped Tonquinois. No doubt France expected "better things."

There is a possible rival to Klondike; and in Nova Scotia too! Gold mining has been carried on there with success for years; but a discovery just made near Whycocomagh promises more remarkable results than any yet seen in the colony.

Prices of Mine and Mining Finance Companies' Shares.

Shares £1 each, except where otherwise stated.

a For two months. *b* Mill restarted January 7. *c* Exclusive of yield from Concentrates bought—3,835 oz. in December and 1,396 oz. in January.

SOUTH AFRICAN CRUSHINGS.

For the first time the output for January embraces the whole of the South African Republic, and amounts to 336,577 oz. The Rand output itself is 313,826 oz., or 3,114 oz. more than the December yield, which, however, is not particularly satisfactory, and for this reason. After a rest of nearly three years the Village Main Reef Company has resumed working, and a crushing of 5,370 tons gave a return of 3,098 oz. of gold. Cyanide work also proceeded, but the result has not been yet disclosed. Another addition to the companies producing is the Consolidated Main Reef, which obtained 1,288 oz. Now, if these two yields are deducted from the total output there is an actual decrease compared with the December crushings. In a few instances, too, more stamps were in use, and in such cases an increased yield was obtained, especially in the case of the Simmer and Jack. The Lancaster again did well, and fair increases were shown by the Geldenhuis Deep and Knight's Companies, but the Crown Deep and Ferreira yields fell off distinctly, and the heavy reduction in the Sheba output is explained by a footnote that low grade ore was crushed. In the return of the Transvaal Gold Mining Estates Company, the yield from the central cyanide works was for December as well as for January. Complaint of shortage of native labour is again made by some of the companies.

Gold found on the United States side of the Yukon territory! Those preparing for the rush to Klondike had better slacken their pace and consider whether it may not be wiser to cross the boundary. A certain Mr. Fritz Behnson announced to his brother that in one day in the rock crevices he picked up $50,000 worth in coarse gold. The brother is invited to go thither quickly, and with unspeakable generosity takes time before starting to tell the world, through the newspapers, of the great find!

The Colonial Office report for 1896-97 will rather surprise those who have heard of Basutoland only in connection with tribal disputes and rinderpest. For the twelve months ending March 31 last year dutiable goods were imported to the value of £135,560, against £104,858 in the previous year, an increase of £30,702. The figures of exports are only given to December 31, 1896, and for the twelve months ending then amounted to £160,277, against £139,496 in the previous year. But in these returns the period of the rinderpest devastation is not included, and so we cannot realise yet the economic results of the loss sustained. But the High Commissioner, considering the disturbing effect of the cattle plague on the native mind, thinks Sir Godfrey Lagden and his assistants may be congratulated on having got through the trying time without more serious trouble than they have had.

The Companies Bill, an old visitor to the House of Lords, was read a second time by that august assembly on Monday night, and then referred to a Select Committee. Mr. Faithfull Begg is now engaged in drafting a Bill on this subject, not caring, apparently, to trust in the House of Lords and its Select Committee.

LOANS TO LOCAL BODIES.

As, from a question put by Mr. Arthur O'Connor in the House of Commons on Monday, there seems to be some uncertainty as to the rates for local loans, it may be as well to give the information the Secretary to the Treasury conveyed to the House in his reply. Mr. Hanbury stated that loans in respect of allotments, burial grounds, lunatic asylums, and small holdings were advanced on the security of local rates, and the rates of interest were accordingly those prescribed by the Treasury minute under the Public Works Loan Act of last year—namely, where the period of repayment does not exceed thirty years, 2¾ per cent.; where the period exceeds thirty but does not exceed forty years, 3 per cent; where the period exceeds forty but does not exceed fifty years, 3¼ per cent. The advances by the Public Works Loan Commissioners at 2¾ per cent. interest from the passing of the Public Works Loan Act of last year, up to the 31st ult.. amounted in England and Wales to £505,328, and in Scotland to £17,830, a total of £523,158.

The "Farmer Party" in Natal have been snubbed by the Upper House of the legislature. They coerced the Government into presenting a Bill imposing duties on imported frozen meat. The Lower House passed the measure, the Upper Chamber threw it out.

MAIL SUBSIDIES IN GERMANY.

Germany is well satisfied with the results of her mail subsidies. In the discussion of the Subsidy Bill in the Reichstag on Tuesday, Herr von Podbielski, Secretary of State in the Department of Railways, Posts, and Telegraphs, pointed out that Germany had already advanced from the fourth to the second place in the carrying trade of the world. It would be rather unfortunate for the Government, however, if they accept it as proved that this advance is mainly owing to subventions. It was natural that the significance of the occupation of Kiao-Chau should be dwelt upon, as well as the prominent position held by Germany in the Postal Union, for the maintenance of which, it was urged, the present mail connections were inadequate. According to Herr Freze, the competition of the Siberian Railway would affect Western Europe but little so long as the mail steamers offered a sufficiently fast and frequent service.

Shanghai, it seems, is feeling considerable alarm at the breaking off of the loan negotiations at Pekin. In Shanghai they would give China perfect assurance of protection if she would place herself unreservedly in Great Britain's hands.

The West Australian Government Geologist has been visiting the goldfields there, and has returned to Perth enthusiastic. He reports that the possibilities of deep alluvial mining are very great, and that there is abundance of promisingly rich unoccupied ground outside leases available for alluvial workers.

ENGLISH RAILWAYS.

* Statements of gross traffic.

Prices Quoted on the London Stock Exchange.

Throughout the INVESTORS' REVIEW middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the INVESTMENT INDEX published quarterly—January, April, July, and October—in connection with this REVIEW, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the REVIEW almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the INVESTORS' REVIEW any subscriber can follow for himself the movements of securities from week to week, and the INVESTMENT INDEX will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S. F. Snk. Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D.Stk., *debenture stock*; Pf., Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Ans., *annuities*; Cu. or Cm., *cumulative*; Gu or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Insc., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*.

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

The Investors' Review

EDITED BY A. J. WILSON.

Vol. I.—No. 8. New Series. FRIDAY, FEBRUARY 25, 1898. [Registered as a Newspaper.] Price 6d. By post, 6½d

The Investment Index,

A Quarterly Supplement to the "Investors' Review."

Price 2s. net. 8s. 6d. per annum, post free.

THE INVESTMENT INDEX is an indispensable supplement to the Investors' Review. A file of it enables investors to follow the ups and downs of markets, and each number gives the return obtainable on all classes of securities at recent prices, arranged in a most convenient form for reference. Appended to its tables of figures are criticisms on company balance sheets, State Budgets, &c., similar to those in the Investors' Review.

Regarding it, the *Specker* says: "The Quarterly 'Investment Index' is probably the handiest and fullest, as it is certainly the safest, of guides to the investor."

"The compilation of securities is particularly valuable."—*Pall Mall Gazette.*

"Its carefully classified list of securities will be found very valuable."—*Globe.*

"At no time has such a list of securities been more valuable than at the present."—*Star.*

"The invaluable 'Investors' Index.'"—*Sketch.*

"A most valuable compilation"—*Glasgow Herald.*

Subscription to the "Investors' Review" and "Investment Index," 36s. per annum, post free.

CALEDONIAN
INSURANCE COMPANY.

The Oldest Scottish Insurance Office.

LIFE ASSURANCE WITH AND WITHOUT MEDICAL EXAMINATION ON EXCEPTIONALLY LIBERAL TERMS.

Example of the Company's Threefold Option Investment Policy.

Entrant at age 26 may secure in return for an Annual Premium of only £30 the following benefits—

A. An Assurance of £1,000, payable if death occur before age 65;

B. An Endowment of £2,000 on attainment of age 65; or in lieu of **B.** one of the following options:

C. A paid-up Assurance of £2,800, commencing at age 65; or,

D. An Annuity after 65 of £106 : 11 8,* with a paid-up Assurance of £1,400 commencing at 65; or

E. An Annuity after 65 of £213 : 3 : 4,* without any paid-up Assurance.

* The Annuities quoted are for males, and are dependent on the present prices being still in force when age 65 is reached.

Fire Insurance at moderate rates and on good security.

Head Office: 19, GEORGE ST., EDINBURGH.

When the weekly issue of this REVIEW *was originally decided upon it was considered expedient to withdraw the Editor's name, and make the paper altogether anonymous. This course was most agreeable to the Editor, who has no desire for personal notoriety, and appeared to be most consonant with journalistic usages.*

Unfortunately, the INVESTORS' REVIEW *has not an exclusive use of either of the words composing its name, and consequently quite a number of papers—many of them mere "bucket-shop" circulars, others ephemera of the mining markets—have taken the words "investor," "investment," and employed them to form titles colourably like the* INVESTORS' REVIEW. *For this reason principally it has been decided to restore the Editor's name to the cover and title of the paper, where it will henceforth appear as formerly on the monthly issue.*

The Investors' Review.

The Opening of China.

The news from China during the last few days has been the best we have heard for a long time. At last a loan has been definitely arranged for. It is to amount to £16,000,000, and will be issued conjointly by the Hong Kong and Shanghai Banking Corporation and the German Asiatic Bank. Germany has, therefore, succeeded in her endeavour to become partaker with England in the financial affairs of the Chinese Empire. We can have no objection to this. If Germany has the the capital to embark in this loan, and in the many Chinese enterprises which are bound to follow it, we shall be rejoiced to have her company, so long as she plays fair and seeks no exclusive advantage. In another respect this loan is much better arranged than any of those projected under the guarantee of one or more of the European Powers. It is to have no European

guarantee, but will be issued on the security of taxes to be collected under new arrangements, whereby China will be bound up much more fully to European traders. The present Maritime Customs receipts allow no free balance for the service of any further loan; hence China had either to open up her territory to foreign trade, in order to secure further resources, or the loan had to be issued by the endorsement of a European Power or Powers, who, in return for affording the needed security, would have demanded exclusive privileges. China has chosen the better way, and we congratulate her Government upon having done so. The great resources of the Empire will now stand a chance to be developed for the good of the Chinese themselves.

Following this assertion of independence, the Chinese Government has decided to open inland ports at an early date, and this is a far more advantageous concession to England than the right to build a railway through Yun-nan, valuable though that may be in time. Most valuable of all is the promise made—which we trust will be duly ratified by a formal treaty—that no portion of the Yang-taze Valley shall ever be alienated to any other Power. We ought to be supreme as merchants in that valley, whatever comes, and if the ominous phrase, "sphere of influence," is going to become the fashion with the Powers who are bent on subdividing the Chinese Empire for their trade, if not for their governing, our "sphere" should emphatically be the territory drained by this immense river. Of immediate practical importance is the news that all the inland waters of China shall be open to navigation by steamers, whether foreign or native owned, within four months from now. Should this mean, as we hope it does, that the vexatious local dues and arbitrary "squeezes" of the provincial Governments are to be done away with, so that steamers may trade in any part of the Empire they can reach without restriction or the payment of duties other than those enforced in the treaty ports, then, indeed, an immense expansion in our business with the Far East should be at hand. We may very well leave the Russians to exploit Manchuria, and Germany to dredge and fortify Kiau-Chou; the heart of the Empire is henceforward open to our enterprise, and to that of the whole world.

It would, however, be best for us to assume no attitude of jealousy or rivalry towards any other Power. There is enough in China for all, and there ought to be no "land-grabbing" of any sort. Heaven knows we have enough of the earth on our hands without China, or any part of it, to administer. And it should be sufficient for us there to be insured, as we now are, that so long as our trade overtops that of any other European nation, an Englishman shall preside over the administration of the Imperial Maritime Customs Service. This also we have, it seems, secured, and altogether Lord Salisbury and his Minister in Pekin have come well out of this business. While to us, who knew only the floating rumours of the day, all seemed as good as lost, England was holding her own, and winning, winning, too, by ways of peace, not by shaking "the mailed fist." So may it always be.

We must not leave the subject without a good word for the Hong-Kong and Shanghai Bank. It is by this powerful institution that the loan has really been obtained. The Chinese know it and have had its help on many occasions, and they feel that they have always been honourably dealt with by it. What new candidates for their favour might do, or give, they cannot be sure of, but they can trust the Hong-Kong Bank. Had it, pleased, therefore, we believe it might have kept the loan to itself, but its managers have shown wisdom in allowing the Germans to have a share in the issue. If the Russians and the French desire to participate and have any money, there is no particular reason why they should not do so. Certainly their absence ought to give rise to no jealousy, for not one of these countries, nor all of them together, could have done what the Hong-Kong and Shanghai Bank has undertaken. Russia's terms and demands probably helped to cast the Chinese into our hands, and it is best so for all concerned.

West Africa and Jingo Folly.

The Marquis of Salisbury must have felt considerably annoyed at the irrepressible efforts of his restless colleague in the Colonial Office to keep himself advertised, and hence his snub to that gentleman in the House of Lords on Tuesday. On Friday night last a little comedy seems to have been arranged between Mr. Chamberlain and his friend Sir Charles Dilke, the effect of which might have been to seriously embroil this country with France. Mr. Chamberlain, in the small hours of the morning, read two telegrams he had received from the Governor of Lagos and the Acting-Governor of the Gold Coast, which set forth that some encroachment on what was claimed to be British territory, appeared to have been made by no less than a French-led tremendous Singalese army of thirty men. In themselves these telegrams were perfectly trumpery so far as information went, and bearing in mind the still undetermined frontier separating the British from the French territory in an ill-known region. Read as they were, however, at the close of a long sitting of the House, they bore the aspect of important news and produced quite a flutter in the City next day. Paris kept its head and remained undisturbed, and now the whole thing turns out to be either a mistake or a Gold Coast rumour of no worth. At the very worst it was not a matter of importance enough to go to war about or to threaten war upon.

We are quite prepared to believe that the officials, both French and British, away in the upper regions of the Niger have been endeavouring to checkmate each other, and that the French in particular are now trying an aggressive policy, partly with the view to divert attention from the critical state of affairs at home. It is not, however, to be for a moment supposed that these marchings and sparrings will be allowed to go so far as to bring the two Powers into open conflict, and we must never be too ready to believe all the rumours arriving from that far-off country. The French deny that they are in Sokoto, or anywhere near it with troops, and it may well be that all we hear about the "occupation" of this place and that is wild exaggeration. It must not be forgotten that the Royal Niger Company, whose conquests and responsibilities the nation is apparently about to take over and pay an enormous price for, has not been particularly scrupulous in the past. It, too, has been stealing a march here and there, annexing, making treaties with ignorant savages, and so on. The fault is thus not all on one side by any means, unless we are to believe that a divine mission

has been given to us to steal all those parts of the world unable to defend themselves against our aggression. At all events, let us keep cool and not be led away by the screamings of the evening Press in particular. It, as usual, is busy degrading journalism by its outrageous sensationalism. From this sweeping assertion, though, we must emphatically exempt the *Westminster Gazette*, which has not only kept its reason but given to the public (on Wednesday last) an admirably sensible, temperate and conciliatory statement of the French side of the case, written by the London correspondent of the *Figaro*.

If nothing else will sober us, let the people who have money to lose consider for a moment what the effect would be upon their investments were war really to break out between England and France. How would holders of bank shares stand, for instance? In all probability before the war had been carried on for a month the strain upon the finances of this country would be so severe that large loans would have to be issued which could only be placed were other securities sold. But there is no one to buy these other securities. We English no longer hold foreign bonds to any extent, which might be sent abroad to neutral countries to raise money. Our wealth consists in domestic, and what may be called Imperial, securities. There are none of these that the Continent or America would buy to any large extent. Foreigners would not take our Colonial stocks nor our Indian, and only our Home Railway securities, perhaps, could go abroad in volume. But wherever we sold, and whatever, prices would have to be much lower than they are now, perhaps 20 per cent. lower on an average. Where would our banks be with such an all-round depreciation to reckon with? They lend on these stocks on margins of from 5 per cent. to 10 per cent., and most of those who borrow would, in a crisis, be quite unable to increase this margin. Depositors, in the general decline, would be sure to take alarm about one bank or another, and on the top of a Stock Exchange crisis we should have a bank panic. This is not the language of exaggeration, it is simply a common-sense inference from the facts surrounding a very inflated position. Well may the Marquis of Salisbury be a man of peace. No responsible statesman would venture to act so as to provoke a declaration of war against us by any great Power, with such prospects immediately ahead of him. It may be all very well to indulge in little wars in all the ends of the earth, and to waste our surplus in conquering territories which we cannot keep or utilise for any good purpose; or in subduing tribes which we can never hope to govern. But a great war is another matter. We have given a bond, with heavy penalties attached, to engage in no such war. That being so, had we not better moderate our transports and deal with such miserable disputes as this about the Niger Hinterland like sensible men of business instead of blood-thirsty fanatics?

American Life Offices:—More "Brilliant Results."

The British agents of the Equitable Life Assurance Society of the United States—the only one of the American companies known here which has a share capital, such share capital amounting to only $100,000, in $100 shares, which sell now and then at prices exceeding $1,000 each—have recently favoured us with its figures for 1897, showing total assets of £49,349,321, no less than £10,508,995 of which is called "surplus." Of course, these figures for 1897 display a large increase on those for 1896, and, equally of course, there is an increase in the total income. It is not difficult either to produce handsome surpluses by the American method when the returns published in the United States show that nearly 37 per cent. of each year's business never comes to maturity in any form, and that upwards of 60 per cent. of the policies taken out in any one year appear either to lapse altogether, or to be surrendered in exchange for new paid-up policies, generally representing but a miserable fragment of the original contract. Little more than 13½ per cent. of this office's new business, for example, appears to live to become "claims." Under such circumstances it is easy to appear flourishing, or ought to be. As a matter of fact, however, in spite of their enormous advantages in such directions none of these American companies are really doing well, or fulfilling their promises.

We have recently had put into our hands a careful analysis of the estimates and results published by, or obtained from, this company, drawn up by the Scottish Widows' Fund Office. That office was apparently compelled to enter the lists against this foreign concern in self-defence, and it would have been a good thing for British insurants if more of our Home offices had followed its example. Before dealing with the figures contained in this document, it may be well to give the following quotation extracted from the returns made by the Equitable Company of the United States to the Board of Trade in 1892:—

> The Society has not agreed in any of its policies to give cash surrender values—the law of the State of New York favouring a continuance of assurances rather than their termination—but it definitely agrees in most of its policies (not Tontine) to give paid-up policies (if applied for within a reasonable time after lapse), provided three annual premiums have been paid, and the amount of the paid-up policy, in case the original policy is on the ordinary whole-life plan with continuing premiums, is never less than two-thirds of the amount which the full net value of the original policy, taken as a net single premium, would buy. . . . In the case of limited-premium policies for the whole of life, and generally in the case of endowment assurance policies, the amount of the paid-up policy is represented by that proportion of the sum orginally assured which the number of full annual premiums paid bears to the number of annual payments, or their equivalent originally stipulated for.
>
> In the case of full Tontine policies no cash or paid-up values are given, until the Tontine period has been completed. In the case of semi-Tontine and free Tontine policies, paid-up assurance is given during the Tontine period, the same as to a corresponding non-Tontine policy, without reversionary additions.

To this it may be useful to add the following extract from the pleadings of the company in an action against it, heard in 1881:—

> The policy holder is not a partner, he is not a creditor, he is not a member of the company; he is a person who holds an agreement to receive a certain sum on a certain day. The fund produced by the payment of all the premiums does not in any sense belong to the policy holders, but belongs exclusively to the company.

This attitude and these claims of the American company cannot be too widely known because they make it perfectly plain to all policy-holders, and especially to all British policy-holders, that there is no redress whatever for them should anything happen to prevent such claims as do mature from being promptly paid. Of the capacity of all these companies to maintain their solvency we shall have more to say another day when we come to deal with the character of their investments. Let us now give some figures of the

same description as those published by us some weeks back in reference to the Mutual Society of New York. Here, to begin with, is a table showing the estimates "in 1873, 1879, and 1884-5, of cash surplus on Tontine Assurances of £1,000 taken at the ordinary life rate"; together with "figures from 'tables to illustrate the advantages of Tontine policies based on the results of Tontine policies maturing in 1889' and later years."

Year when published.	Age at Entry, 25.		Age at Entry, 35.		Age at Entry, 45.	
	Tontine Period.		Tontine Period.		Tontine Period.	
	15 years.	20 years.	15 years.	20 years.	15 years.	20 years.
	£	£	£	£	£	£
1873	277	538	385	764	591	1,254
1879	208	403	289	573	433	940
1884-5	154	336	210	474	323	777
1889	140	302	191	427	294	699
1890	140	282	191	398	294	652
1891	126	282	172	398	264	652
1892	112	252	152	356	235	584
1893	112	247	152	349	235	571
1894	105	233	143	329	220	538
1895	98	215	134	304	205	497

These figures, as the compiler of the Scottish Widows' Fund circular points out, reveal to us how small and beautifully less the yield upon the "Tontine" policies of this company have been growing. The figures for 1889 and later years, with the exception of those for the twenty years' period opposite 1889 and 1890, "are believed to be actual results, as they correspond with known assurances maturing in those years." They were supplied to agents, "and by them used as estimates, notwithstanding—or shall we say in consequence of—a prefatory note, from which the following is extracted and, in part, italicised":—

Calculations based on the experience of the past under policies which have matured in the Society's general class of Tontine assurance issued chiefly in the United States, show approximately the surplus profits which would be payable with such policies, *if they had been issued in the past and matured to-day*. While the results of the future must necessarily depend upon the experience of the future, *figures based on past experience furnish the best attainable data upon which to judge of the management of the Society and the value of its policies.*

Just so, and most true, though not perhaps quite in the sense we are expected to receive the truth. To illustrate still further, here is a table illustrating the "progress" of this equitable company, with another class of policy issued by it, viz.: the ordinary "whole life" policy. It displays exactly similar characteristics to the "Tontine," or fixed term of years table; and "the 'Contribution System,' by which the dividends of this company are settled, produces curious results. For instance, in 1886 a life which had entered at thirty, five years previously, got 7s. 10d. less than a life of the same age and standing in 1883, while the ten-year-old policy-holder got within a penny as much as he of 1883, and the policy-holder of fifteen and twenty years standing got more."

Reversionary Bonus Addition on Ordinary Life Policies for £100.

Year of Valuation.	Age at Entry, 30.				Age at Entry, 40.			
	Age of Policy.				Age of Policy.			
	5 years.	10 years.	15 years.	20 years.	5 years.	10 years.	15 years.	20 years.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1876	1 10 0	1 17 10	1 19 0	—	1 13 8	2 2 0	2 3 5	—
1880	1 7 10	1 12 1	1 13 1	1 12 8	1 10 10	1 15 7	1 10 5	1 16 1
1883	1 7 10	1 12 1	1 11 9	1 11 3	1 10 10	1 15 7	1 15 3	1 15 0
1886	1 0 0	1 12 0	1 12 0	1 12 0	1 2 0	1 12 0	1 12 0	1 10 0
1889	0 18 0	1 4 0	1 10 0	1 8 0	1 0 0	1 6 0	1 12 0	1 12 0
1892	0 17 10	1 2 6	1 6 4	1 7 10	0 19 9	1 4 9	1 9 0	1 11 2

This declining scale, as exhibited in the above table, is tolerably rapid, if capricious; but in the case of whole term assurances at the ordinary life rate, with a fifteen year Tontine period attached, the results, always, be it noted, on the descending scale are even more capricious and rapid, as the subjoined table will make plain enough:—

Whole Term Assurances at the Ordinary Life Rate—Fifteen Years Tontine Period.

Year of Entry.	Number, Name, or Authority.	Age at Entry.	Sum originally Assured.	Cash Values at end of Period.				
				Assurance and Surplus.		Surplus only.		
				Estimate.	Result.	Estimate.	Result.	Per cent of estimate.
			£	£	£	£	£	
1869	Policy No. 40,603	38	1,000	663	490	430	257	59·8
1871	Policy No. 63,699	41	5,000	3,735	2,644	2,426	1,337	55·1
1873	P. Matthew	48	1,500	1,539	1,018	1,040	540	51·9
1874	Policy No. 91,178	28	1,000	458	305	305	152	49·8
1875	J. E. (Glasgow)	32	1,000	1,170	710	730	366	50·1
1876	Policy No. 201,017	41	500	374	240	243	109	45·0
1878	Dundee Telegraph	48	800	821	487	554	221	40·0

It seems only necessary to add to this the following caustic observation contained in the circular before us:—

Mr. Peter Matthew, of Dundee, an agent of the company, was so delighted with the result of his venture that he wrote a letter, which was published by the company, contrasting it, *not with the estimate of 1873* (done above for him), but with the surrender value of an ordinary policy of the "Scottish Widows' Fund," which, unlike a Tontine policy, had all along a cash surrender value, and for ten of the fifteen years had carried a larger amount of assurance. The owner of Policy No. 91,178, also a Dundee man, gave a letter which bears a strong family likeness to other letters published by the company. When he signed it, can he have known that the cash value offered him for the assurance and surplus exactly corresponded with the 1874 estimate of surplus alone?

Getting such poor results, results continually and swiftly diminishing, one might suppose that the funds of the society would mount with unusual rapidity, but they do nothing of the kind; nor is this surprising when we note that at least one-fourth of the premium income is absorbed in the current expenditure of the company. If unwarrantable promises are made at the same time that expenses run to an excessive figure, and if the yield upon good investments is declining, the result can only be one thing—increasing poverty; and that this company is becoming poorer, in spite of its parade of £49,000,000 odd of assets, is demonstrated by the fact that in all the years of its existence—and it was established originally in 1859—it has only accumulated funds equal to between six and seven years' premium income to meet liabilities, which expand at a far more rapid pace, notwithstanding "sheddings-off" of all kinds. The last figures we have, as was shown in the second edition of "Plain Advice about Life Insurance," namely those for 1896, indicated that exactly six and a half years' premium income was in hand. This is miserable poverty compared with the position of English and Scotch Insurance Offices of good standing. Not one of these home offices have less than eight or nine years' premium income in hand. Many have from twelve to fifteen or sixteen years' premium income in hand, and some more than that. The consequence is that their strength grows on the whole in proportion to their liabilities, while each large increase in the liabilities of American concerns, such as this, results in a diminished capacity on the part of the contracting company or society to fulfil its promises. In order to live, these concerns must resort to

subterfuges unworthy of honourable corporations, let alone of individuals with any shred of righteousness in them as between man and man.

Before leaving the subject for this week, might we venture to impress upon the home offices the necessity of being up and doing against these alien corporations. Surely they cannot be unaware of the fact that should anything happen to an American life office or to a British office conducted on the same lines, life insurance business of all descriptions would suffer to an extent impossible to estimate. And in this connection one might ask, what are British offices doing with their insurance Press? It is a large Press, and it is, for the most part, a prostituted Press, ready to sell its praises for a fee—shameless in its venality. Happily, in one sense, it is a Press of which the public which takes out policies, or which is invited to take policies out, knows nothing. With one or two exceptions it might, so far as the "general reader" is concerned, just as well be written in Chinese as in English, but what it is in its turpitude and impotence the insurance offices have made it—at a heavy outlay per annum to themselves. They act towards it as if they all had something to conceal, and which blackmailers must be paid not to disclose; or as if they could not get on without hired eulogists and defamers. Is this degrading position worthy of the wealthiest corporations of the kind in the world? If a collapse comes among unscrupulous, weak and extravagant institutions will it not be in the power of the public, which has lost, to turn and say, "You never warned us; you have behaved as if all were tarred with the same brush?"

The Grosvenor Hotel Case.

The action brought against the directors, manager of the Grosvenor Hotel, and Mr. Richard Collins Drew, for damages for fraudulent conspiracy, has at length terminated, after a protracted hearing of nine days, in a verdict for the plaintiffs. The evidence went to show that for years fraud and corruption had reigned supreme in the management of that hotel, and the jury indicated by their verdict that they believed that evidence, except the charge against Drew of falsifying weights, which they held "not proven."

The charges were, shortly, as follows: (1) That the directors, William C. Hale, J. T. Drew, Owen Reynolds, and E. J. Newitt were the mere nominees of R. C. Drew; (2) that the goods bought for the hotel were obtained, without tenders, from firms associated with and nominated by R. C. Drew; and (3) that by buying up shares R. C. Drew had secured the control of the company, and in fact "bossed the whole show."

The history of the case is quite Gilbertian in its way The hotel was incorporated in 1858 with a capital of £130,000 in shares of £10, and up to February, 1896. £111,220 had been issued and paid in full. In 1878, R. C. Drew began to buy shares in this company and managed to secure a large number at a low price. Now this gentleman up to September, 1890, was the owner of a half share in a butcher's business carried on under the name of Cowell & Drew, and from that date to July, 1896, he was the sole owner. In June, 1892, he bought the businesses of Craft & Co., poultrymen, and Grimmond & Co., grocers and fuel merchants, having in November, 1887, acquired that of Rush & Co., laundrymen. In passing it may be said that in July, 1896, he sold these four businesses to one J. Jervis, and these two gentlemen brought out the company of Cowell, Craft, & Co., to take these undertakings over, with a capital of £150,000. Mr. Drew is the managing director of this concern.

The next move was to secure a complacent directorate. Mr. Hale was appointed a director in 1878, Drew supplying the qualifying shares, and three days after his election was appointed chairman at £200 a year. This gentleman held his post till January this year. In 1881 Newitt was elected to the board, and "has been unanimously elected ever since." For this director, too, the beneficent Drew found the shares. This impartial and independent gentleman admitted he had never had a sixpence in the company himself, and that he knew Drew had a preponderating influence to carry what he wanted at the general meetings. The same year another valuable addition was made to the board in the person of one Owen Reynolds, Drew's brother-in-law. Needless to say the kindly Drew found for this gentleman also his qualifying shares. In 1892 the remaining member of this board commenced to take his seat in the person of J. T. Drew, a nephew of R. C. Drew. This gentleman, owing to differences with his fond uncle, was dismissed from his employment, and did not appear at the trial. His shares, needless to say, were found by his uncle.

These were the four directors who were to safeguard the interests of the minority of the shareholde. Between June, 1879, and December, 1895, the hotel paid to Cowell & Drew some £110,565 for meat; to Craft & Co., £35,798 for provisions; and £23,743 to Rush & Co. for laundry work. From 1882 to 1895 about £52,977 was paid to Grimmond & Co. for coa and grocery. The tales of the sweetbreads and bullocks heads must be present to the minds of all readers of the daily papers, and they were quite on a par with the coal and laundry transactions. Grimmond & Co. bought Welsh coal at 22s. per ton in 1890, and passed it in, in the fulness of their hearts, to the hotel at 28s. 6d., and other coals at a proportionate figure! Then, to assist the hotel, Rush & Co. took 60s. per thousand for the washing lest it should go elsewhere and pay 40s. And so the merry game went on, and we were not astonished to read that the profits of the hotel began to dwindle, and, instead of a profit of £91,134, which is the usual 40 per cent. profit on provisions set against the cost, on £227,811 expended during the last twelve years there was a considerable loss.

It will not be out of place to consider shortly the connection of this happy little family with some other places of public refreshment. Hale, until a year ago, was chairman and director of the St. James's Hotel, Drew finding the shares. Then comes Newitt, company director by profession, who is a gentleman certainly not devoid of humour. "A director should not be a shareholder. It is, in my opinion, wrong that he should be." Thus testified Mr. Newitt in the witness box. He lately brought a libel action against Mr. Spokes, the plaintiff in this action, and in his evidence stated he was a director also in the Agricultural Hotel Company, the Star and Garter Hotel Company, the Tavistock Hotel Company, the Royal Hotel, Southend, Company, and the London and County Hotels Company. We should much like to know whether he has a sixpence of interest in any of those companies, barring, of course

his director's fees. We are inclined to think not. What lucky hotels to have such a director. Till a week or two ago he was director of the Salisbury Hotel also, but failed to be re-elected by one vote. We condole with the Salisbury. For Owen Reynolds we feel something akin to pity. Besides being a director of the Grosvenor he held shares for Drew in the Salisbury, Long's, and the St. James's Hotels, but was not quite sure about the Star and Garter. On it being suggested to him that he was a mere puppet in Drew's hands, all he could reply was, "I do not care what you choose to call me." There is something really pathetic in that answer.

One word for the cheery-hearted auditor, John Steer Wills. He really could not remember when he was appointed auditor, or how long he had held the post. He could remember nothing, except that he also audited the books of Cowell & Drew, Grimmond & Co., and Rush & Co.

Such was the body of gentlemen who "safeguarded" the interests of Richard Collins Drew and the other shareholders. By the verdict of the jury they have been found guilty of fraudulent conspiracy with R. C. Drew, and the various charges of fraud which have been brought against them; though the manager Zeder, who received a £100 Christmas-box from Drew, and in return presented Mrs. Drew with a piece of plate, valued at about £25, at the festive season, has only been found guilty of fraudulent conspiracy to "a far lesser degree." We sincerely hope that this matter will not be allowed to remain where it is, and that in the public interest further proceedings will be taken. If we are not greatly mistaken, this hotel is not the only victim of corruption. There are certain others we could name where an investigation such as has just taken place would bring kindred facts to light. Next week we shall deal further with one or two concerns of Mr. Richard Collins Drew.

Economic and Financial Notes and Correspondence.

The Sad Plight of France.

One does not know what to be most amazed at in this Dreyfus-Esterhazy-Zola business; the overbearing insolence of the soldiers, the grovelling subserviency of the Civil Authorities, or the open contempt for justice—or fair play in any shape—exhibited by the judge in Court. The result of the trial was a foregone conclusion, given the conditions, but if there be any manliness left in the French people the monstrous travesty of justice which has ended in the sentence of M. Zola to a year's imprisonment is the beginning of the end for a good many impostures in France.

First to go, we trust, will be the pernicious military legend which, created under the brigand Napoleon, has poisoned the minds of Frenchmen for three generations. They now have revealed to them what militarism means in all its hideousness—contempt for law, brutal disregard of the common rights of citizenship, a clannishness which admits neither of criticism nor of interference from outside the uniformed and trained hordes of man-slayers. This kind of diseased self-importance is becoming more and more rampant among the soldiers of all countries—we ourselves are falling more and more under its domination, and in Germany the "mere civilian"—the man by whose labours the sword and gun owner is furnished and, sustained—is as dirt beneath the feet of the military caste. Will France, after the illustration of this spirit she has just received, arise and cast the demon forth, earning the gratitude of mankind? Alas, not yet. *La Gloire* still fascinates her fools and makes them an easy prey.

Next to the revelation of the soldier's notions of duty and obedience to the laws, France has witnessed the impotence of her so-called Government before these soldiers; and worse still, if that be possible, before the lawless mobs who have been stirred up to persecute the Jews, and to threaten the lives of all who ventured to stand up for even-handed dealing, as between man and man. To such an excess has the weakness of M. Mélines Ministry gone that certain miserable fanatics, clearly priest-driven, have been allowed to come from Algiers, fresh from murder and outrage, their handiwork though not done by their hands, to stir up in Paris race hatred and "a second St. Bartholomew against the Jews." "You cannot believe it?" It is true, nevertheless, and as infamous as true.

Can the just, intelligent, and thoughtful Frenchman—he forms the majority of the nation even now—do ought to sweep this impotence aside, and secure for the country a Government strong enough to put down alike military and mob lawlessness—they are really at bottom the same thing—with a firm hand? The coming elections will perhaps answer, but we regretfully confess that we do not look forward to them with any large measure of hope. The immediate future seems to be much more bodeful of revolution than of regeneration—revolution ending in one more military dictatorship and the triumph of fanatical clericalism, with, possibly enough, an expulsion of the Jews. No nation can retain its honour and self-respect and tolerate even, let alone condone, a trampling under foot of the liberties of its citizens such as the Zola trial has laid bare to the gaze of mankind.

The Great Nile Reservoirs.

No more pleasant news has been published for a long time than that which told the British public of the signing of the contract for the construction of a great dam across the Nile at Assouan. The terms of this contract are honourable alike to the Egyptian Government and to British enterprise. Of all firms in the world probably Messrs. John Aird & Co. alone have the means and power to carry out such a work satisfactorily. This firm is to build a great barrage across the Nile at Philæ, taking care of the ruins there, and also apparently a lesser dam at Assiout; and will complete the work in five years without asking the Egyptian Government in the meantime for one penny towards the cost.

As readers of Sir Alfred Milner's interesting and valuable book on "England in Egypt" may remember, works of this description have been urged upon the Egyptian Government for many years, and since the English took control of that country repeated surveys have been made and schemes formulated, all of which have been baulked by the obstinate opposition of the French. There is money lying idle in the Egyptian Treasury, the surpluses of many Budgets, which might

have been most profitably employed in building these great reservoirs, in which it is calculated that nearly twenty million millions of cubic metres of water will be stored, capable of irrigating and bringing into a high state of fertility enormous areas of land now sandy desert, and therefore of increasing the revenue of the State by three or four hundred thousand pounds per annum, at least. To all proposals, however, that the accumulated revenue surplus should be used in this way the French have opposed an emphatic negative.

Now an English firm of contractors comes forward and offers to build these dams for a deferred payment extending over thirty years, the first instalment to become due when the works have been completed, not before. How much will have to be spent on this great undertaking we do not yet know. Sir Alfred Milner put £5,000,000 down as the possible cost of the works he sketched out, but then, if we remember aright, his plan embraced even larger areas than those the Assouan reservoir will fertilise. It is quite possible, however, that before both barrages are finished Messrs. John Aird & Co. will be £1,500,000 or £2,000,000 out of pocket. We congratulate them on the magnificent enterprise which has prompted them to enter into such obligations. These are the triumphs that outweigh a thousand military victories and bring benefit to mankind. But we trust that the passion for conquests now so dominant with all civilising powers may not in the meantime so load the Egyptian people with burdensome obligations as to neutralise the benefit this great work is sure to convey to hundreds and thousands of labouring men.

The Increase in the Army.

Many times have we warned the British public that it would have to pay dearly for its Imperialism, and the bill is now beginning to come in. The new Army Estimates are out for 1898-9, and they show an increase of fully £2,000,000 on those for this year, now almost ended. As usual, the figures are mixed up and disguised, so that it is difficult to discover the truth, but an excellent summary of the totals appeared in last Monday's *Daily News*. The writer of that summary points out that the increase is not £880,000, as it appears to be in the bulky Yellow Book misleadingly called "Army Estimates for 1898-9." It is not even £1,646,000, as Lord Lansdowne's memorandum on the Estimates admits it would be but for an arrangement which casts £766,000 into a supplementary estimate for 1897-8.

The net original estimates for 1897-8, including the supplementary estimate of £200,000 for South Africa, was £18,340,500, but the original estimates and supplementary estimates for the year ending in March next, including the above-mentioned £766,000, Volunteer pay allowances, &c., in all £1,290,000, plus the estimates for the coming year, amount together to £38,851,000. Deduct the above-mentioned net estimate for 1897-8 from the total of the two years and the difference is £20,510,500. This is the real amount of the increased expenditure at present provided for the coming year, only part of it is to be thrown on this year's revenue, and it is the highest total in time of peace of this generation. In normal years the expenditure on the Army was from £14,500,000 to £18,000,000, with rare exceptions, any time since 1872 and down to 1896. Before that date it was occasionally under £14,000,000. Judging by the new programme now laid before Parliament, we may look upon £20,000,000 in the future as the minimum, for the Army is about to be increased by, ultimately, 25,000 men. A year ago a modest 9,000 extra was all that was demanded. Already the needs of Empire require 16,000 to be added to this. Next year we may see the estimate again enlarged—must see it, in fact, if we are going to continue our policy of little wars in Asia and Africa—and, after a few years, we shall probably have conscription in some form established.

Once again we say we hope the country likes the prospect. For the present the conscription policy has apparently been dropped in regard to the regular forces, but an agitation for applying it to the militia has been started, and, in one form or other, compulsory military service is inevitable in the near future if continent-swallowing Imperialism is to be the prevailing policy of our Government. For the present we shall say no more, for it is useless to go into the question of the cost of this army, measured by its size and strength. Unless the accounts presented to Parliament are re-modelled in an intelligent manner by conscientious men it will remain impossible for any human being to say how much of the money patiently found every year by the helpless taxpayer is made away with, giving no return whatever to the nation. We may say, however, that this costly unreformed and unreformable army of ours, with the wars its establishment and maintenance render a necessity if its existence is to be justified at all, will mean to the Home taxpayer at no distant date a shilling income tax in time of profound peace. What it may mean in time of war no man can forecast. But it is a subject that will have to be meditated upon, how far this nation—with its stagnant industries, fed from the Exchequer more than from foreign expansion, with its unprofitable agriculture, dependent as it is upon continual additions to the debt of its dependencies—would be able to stand an annual expenditure of twice the present amount for three years running. If, in short, the nation is exhausting its reserve financial strength in time of peace, how is it going to encounter a great conflict such as many among us now talk of waging against France?

Rand Deep Levels.

We print the following eulogy on the Wernher-Beit group of Deep Levels, because it is fair that both sides should be heard. Readers, however, will note that it contains assertion and prophesy, not facts and analyses, as our articles did. An experienced public, too, should know that nothing is so delusive and ensnaring as high and advancing market prices for shares in mining enterprises not yet at maturity. The market argument is always "You cannot possibly buy this magnificent property too dear." Common sense answers, "The purchase of the unknown and unknowable is, generally speaking, too costly at any price." We know very well that the Rand Mines group of Deep Levels has been incomparably better financed than the Goldfields group, and have often said as much. This does not alter the fact that the financiers of the Rand Mines group now desire the public to purchase on their own valuation, as expressed in market prices created by them, shares in mines whose day of performance is more or less distant. All we say to the public is "wait and see." Nothing

can be lost by doing this ; much may be saved. Men with the faith of Mr. Hicks will surely be most delighted to hold "Rose Deeps," at present or higher prices, until the dividends bring them their money back with usury :—

To the Editor.

Dear Sir,—In view of the fact that the above mines are now coming so much to the front, and your articles dealing with their prospects being so interesting, I have no doubt you will open your valuable paper to fair criticism on this subject. As one who has been interested in Transvaal mining for some years, it seems to me a mistake to deal with, say, twenty mines at once, and strike an average from the results. We all know by now which part of the Rand is richest.

You surely would not in dealing with outcrop mines add the profit, say, of the Henry Nourse and Knight's, together and then point out that the profit on the total capital of the two mines is very small ; then why put the Nourse Deep and Knight's Deep in the same category. The Deep Levels must be classified, just as are the outcrops, *i.e.*, rich, medium grade, or poor. Of the twenty Deep Levels mentioned in your plan last week, four are not marketable and need not be dealt with ; of the others eight, in my opinion, should be put in Class I., and eight in Class II. Class I. would comprise :—

	Group.
Crown Deep	Rand Mines.
Durban ditto	Ditto.
Geldenhuis ditto	Ditto.
Glen ditto	Ditto.
Jumper ditto	Ditto.
Nourse ditto	Ditto.
Robinson ditto	Goldfields.
Rose ditto	Rand Mines.
Class II.	Group.
Knight's Central	Goldfields.
Knight's Deep	Ditto.
Langlaate ditto	Rand Mines.
Niger ditto	Goldfields.
Simmer and Jack...	Ditto.
Simmer East	Ditto.
Simmer West	Ditto.
Witwatersand Deep	

Now, sir, on examining these lists, it will be at once seen that in Class I. the Rand Mines control seven mines, and the Goldfields one ; but in Class II. the latter group control no less than six companies to the one by the Rand Mines, and this mine, the Langlaate Deep, will, according to latest information, prove to be a first-class mine.

My object in pointing out the difference in these mines (and this classification on a broad basis can scarcely be disputed) is to point out the difference between the Rand Mines and the Goldfields groups. These corporations cannot well be compared, and that you should write of them jointly is indeed surprising.

The Rand Mines practically control every good deep level mine except the Robinson Deep.

The Goldfields were interested in Rose Deep and Glen Deep, but have been selling their interest as fast as possible.

I quite agree with your remarks as applied to the Goldfields group, and if it were not for the Robinson Deep, which mine will probably save them, "the whole fabric might come tumbling to the ground like a pack of cards," as you suggest. The finance of the Rand Mine group is, on the other hand, in my opinion, magnificent. The way in which each of these huge concerns is financed and brought to the crushing and profit-earning stage is very fine, and that, sir, without the help of the public in nearly every case.

It seems a pity that your readers in these days of difficulty in finding remunerative investments should be frightened from taking an interest in some of the finest mines in the world, which will, beyond doubt, or anything that can be brought forward to the contrary, yield at present prices a very handsome rate of interest. By all means keep people from buying shares like those in Class II. (except as a speculation), which cannot be dividend-paying, in nearly every case, for three or four years. A great deal has been written of late on this subject. The *Financial Times*, for instance, had a slashing article against Rose Deep when they stood at 5⅛ No doubt the readers of such nonsense as was then written left these shares alone, only to see them advance steadily to 7¼. Messrs Wernher, Beit & Co. have given us good dividend-paying out-crops in the past, and I am confident that they will repeat this in their Deep Levels, and my advice, Mr. Editor, although it differs a little from yours, is to invest (not gamble) without hesitation in any of the mines in Class I.—Apologising for the length of this letter, I remain, yours faithfully,

Alfred Hicks.

The Stock Exchange,
February 21, 1898.

British Insurance Companies in Argentina.

A law has recently been passed by the Argentine Congress, in virtue of which every insurance company doing business in the Republic must make a deposit—in the case of a fire company of $300,000, and in that of marine or life office of $150,000—which money must be invested in a bond of a new internal loan to be taken at the price of 80, such loan, we understand, to bear only 3½ per cent. interest. At this price the bonds are quite 15 per cent. above the value they would fetch in the open market. The project is therefore one of robbery or blackmail unworthy of a civilised Government. The law ought to be protested against, not only by the insurance offices acting in concert, but by the British Minister in Buenos Ayres. It is really too bad that English capital invested abroad should be subjected to unprincipled raids of this kind on the part of needy and unscrupulous Governments. The opinion of lawyers in River Plate seems to be that the new law is unconstitutional, and the view is also expressed here that it is contrary to existing treaties between England and Argentina. What the constitutional aspect of the question may be is not of much importance. When a foreigner is to be plundered it is easy for Argentine politicians to strain the constitution or ignore it. If, however, we have treaty rights that enable us to prevent an imposition of this sort they ought to be at once put in force. Unless something is done, and done promptly, British insurance companies and offices will have seriously to consider whether it would not be advisable for them to take steps to withdraw altogether from the Argentine Republic.

The Pushing Electric Light.

The London Electric Supply Corporation has been mentioned by us in previous articles on this subject as working in certain West-end districts. It is not generally known, however, that its central station for years has been at Deptford, and that the company possesses the right to supply the light in many of the South London parishes through which its mains pass. Although the oldest company in London, it has not hitherto attempted to serve these districts to any important extent, doubtless in consequence of the low charges of the great gas company that works there. The production of energy has cheapened of late years, and, as other electric lighting companies are turning their attention to South London, the old-established company has begun to move.

Of course it was essential to tariff the charge for energy upon as moderate a scale as possible in order to compete with the 2s. 3d. per 1,000 feet charged by the South Metropolitan Gas Company for its illuminant. Accordingly it is proposed that the ordinary rate shall be 6d. per unit, with a sliding-scale of rebates to 5d. per unit, presumably granted to large consumers. Such a rate works well North of the Thames, as it is practically equivalent to the high charge of the Gas Light and Coke Company ; but evidently it is doubted whether canny shopkeepers and householders in South London

will think the light cheap enough at this rate, and so what may be termed a fancy tariff has been evolved in order to attract consumers. They can take the energy under a sliding scale based upon their maximum demand, which is calculated, not upon the number of lamps installed, but upon the maximum number in use simultaneously. Upon this basis, the reduction will take the form of a discount or rebate to those consumers whose use of the electric light exceeds a two-hours' daily average of their maximum demand throughout the year; all excess current so used by them will be charged at half-price, that is, 3d. per unit. The arrangement seems involved, but is certainly better than others on the same lines, which were based upon the number of lamps installed. The same company has also made arrangements whereby wires and fittings can be supplied and installed by the National Electric Free Wiring Company, at a rental of ¾d. per unit. This last innovation is a great step in advance, and will lead to the introduction of the new illuminant into many houses and places of business where the initial cost of installation would have prevented its use.

The Imperial Institute.

Trouble seems gathering round the Imperial Institute. Some of the colonies are getting tired of contributing to its support, and Victoria now refuses to continue its annual subscription. Such a reaction was bound to come. The Institute has from the first been much more of a show place or a club, than a business establishment. Sir Walter Peace, the Agent-General for Natal, complains that the Institute is in no sense of the word Imperial, while the colonial exhibits in it are not arranged on a business basis. Who ever thinks of visiting the Institute for the purpose of acquiring information about the colonies or of examining the "exhibits" there laid out? It has not become a centre of interest for people connected with the colonies; they seem to avoid it. It is more a lounge for idlers—and even they are not numerous, except at the occasional evening entertainments—than an attraction to busy men of commerce. We do not see what can be done to save the Institute. If the other colonies cease their contributions, it must perforce be shut up. Victoria, New South Wales, and South Australia are in favour of renting a large building in the City for the display and distribution of colonial samples; and such a place would be infinitely more useful to the colonies than the establishment known as the Imperial Institute. It is too far from the City, and useless for business purposes.

Klondike Promotions.

That the unscrupulous company promoter is always ready with his schemes to catch the public fancy was amply demonstrated by the late Jubilee promotions. Now it appears that Klondike is the name to conjure with, and to extract money by from the pockets of a gullible public. One of these delightful schemes, called the Central Klondike Gold Mining and Trading Company, Limited, has been described by the chairman, the Senior Official Receiver in Company Winding-up, at the meeting of its shareholders and creditors, as one of the most sordid cases of downright fraud that had ever come under his notice. We abstain from any comment on this concern as yet, as we understand that it is to become the subject of further enquiry, but we shall await the issue with interest.

The Report of the Council of Foreign Bondholders.

This has just appeared for the year 1897, but in a very defective shape, inasmuch as it is minus the appendices giving details of the dealing of the Council with the various defaulting States it is supposed to have in charge. Why these appendices should not come out now, as formerly, along with the report we do not understand. The date of their appearance has been gradually receding until it reached August last year; by and by at this pace they need not come out at all, and perhaps that is the intention. A deal of expense would be saved by their suppression and also much troublesome criticism.

Little can be said about the accounts which accompany the present report, but we think one curious feature ought to be explained to the shareholders in the Corporation at the meeting, and that is, why advances made in prosecuting claims, &c., have declined at the same time that reserves against those advances have gone up. In 1895 these advances amounted to £6,700, in 1896 to £7,700, and in 1897 to only £5,050. To an ordinary person this seems the reverse of what should have happened, considering the cost of dealing with slippery Governments. But if advances have fallen off reserves have mounted; they were only £9,000 in 1894, and are now £14,800, nearly three times the apparent sum risked. It will be very interesting to know how this has happened.

Space does not allow us to comment at length on the discrepancies in the report; but some of them should be mentioned. Why does the Council give itself airs about Argentina? The Rothschild Committee that deals with the debts of that Republic is not a Committee of the Council, and, so far as we know, never asked the Council's opinion or advice. In regard to the Buenos Ayres loans, the Council occupies even a more humiliating position, for it has not only failed to protect bondholders, but it has acted all along as the humble and obedient servant of the firms that issued these loans, and by whom the interests of creditors have been shamefully and systematically neglected. It has, in short, played into the debtors' hands and ignored the creditors. As to Ecuador, again, we might repeat what has been said in this Review on former occasions: no service has been rendered to the bondholders by the Committee the Council has set up to watch over Ecuador bondholders' interests—unless it be a service to have obligingly assisted Ecuador to get rid of its debt through successive defaults. The story of Costa Rica is also well known—£26,662 10s. to Mr. Kattengall and £5,000 to the Council, proceeds of approving an unjust debt settlement, against which we protested strongly at the time; no cash left for the bondholders who have been induced to accept 50 per cent. on the "B" bond and 60 per cent. on the "A," with interest cut down by one-half as well. No wonder the Costa Rica Government can boast of a surplus of a million dollars. It is the same story throughout, and we think it too monotonously sad to be prolonged. On another occasion we hope to say something more about Sir John Lubbock's Bill now before Parliament.

More Indian Finance.

Lord George Hamilton, in the debate raised on the motion of Mr. Samuel Smith last Tuesday, made a state-

ment with regard to the present state of Indian finance which deserves to be put on record as the first official version of the truth. Truth has many stages of elaboration in Indian affairs, and five or ten years hence it may be possible, by piecing this fragment and that together, to reach an intelligible whole. But the subjoined fragment will some day possess a certain historical interest. Quoth the noble lord :—

We received in the month of December a six months' estimate, that is, of course, for the present year 1897-98. Taking the exchange at 1s. 3d. per rupee it shows a deficit of six crores, 63 lakhs of rupees. The figures include 361 lakhs in addition to some sterling expenditure on account of the expeditions to the frontier ; 180 lakhs excess expenditure in relief works, and various items which balance one another. Of course a deficit of 663 lakhs is a very large deficit, but unsatisfactory as it is as regards the year to which it relates it is in one sense not unsatisfactory as regards the future. The famine expenditure, which is an extraordinary expenditure, is estimated at 540 lakhs, and taking the frontier war at 400 lakhs and other extraordinary expenditure at 12 lakhs, we get a total of 952 lakhs. But the total deficit is only 663 lakhs. The normal revenue, therefore, will meet 289 lakhs of the expenditure of this particular year of abnormal expenditure ; or, in other words, in a normal year there will probably be a considerable surplus of income over expenditure. Having got these figures we telegraphed to the Indian Government to get more accurate information as regarded the past. We sent the following telegram :—"Your telegram of December 7. Budget forecast. Please let me know by telegram for the information of her Majesty's Government whether the present financial condition of India and prospects for coming year are such as to justify anticipation that all necessary expenditure can be met without additional taxation or unduly increasing the indebtedness." To this we received the following reply :—"Financial position. Twenty years' accounts up to March, 1898, show a surplus of ordinary revenue amounting to 45 crores, against extraordinary expenditure on war of 21 crores, famine relief 8½ crores, railway construction, charged to revenue, 13½ crores ; showing a net surplus for the twenty years, after meeting these charges, of two crores." They go on to say, without committing themselves to figures, that they are fully confident that a substantial surplus can be forecasted for the next ensuing year, that no additional taxation will be imposed, but that as the examination of the figures both of revenue and expenditure is not complete they do not wish to commit themselves to it. In addition we got this further information from the Indian Government :—"Official telegram to-day succinctly states the facts bearing on the financial position, and warrants our considering external assistance unnecessary." Why, therefore, should we override the Indian Government and force this assistance upon them? There are most conclusive reasons why we should not do so.

No reason in the world why we should help India provided India can pay her way. But she cannot, and all this talk about "surpluses," past and to come, is —Lord George must really bear with the expression— so much juggling with words. Most of the figures he was given by the Indian Government to reel off for the discomfiture of its critics were figures built upon the foundation of an artificial and unreal rate of exchange. How is it that the rupee is kept at 1s. 3d. or 1s. 4d. or any neighbouring figure? Simply by suspending in part the payment of the home charges for which the Indian Government is liable. Not two-thirds of these charges are provided for this financial year. Lay them in full any year on the trade of India, without counterpoise in the shape of large fresh loans raised here on Indian account, and the rupee could not long be kept from declining to 6d. or less. What is the use of gabbling about "surpluses," "growth," or "recovery" of revenue and so forth before a position like this?

Some Notable English Railway Statistics for 1897.

These figures should really have been in last week. Also they ought to be more elaborate, as we used to make them in the monthly. But elaborate tables are not required to point our moral, which is that capital expenditure and working expenditure are together slowly undermining the productiveness of the ordinary stock to investors. We have brought this point before readers in almost every railway company's report analysed by us during the past month, and the following table merely serves to bring our conclusions before the eye in a concrete fashion. Over thirteen millions sterling of new capital was spent by these fourteen railways last year, and an increase of nearly two a half millions in gross income gave little more than £200,000 more net. At the same time additional preferential dividend and interest charges took £164,000 more, and another £27,000 is now required to maintain the dividends on ordinary stocks. These figures, be it noted, are for the whole year. Had those for the second half of it only been taken the outcome would have been much worse :—

	Capital expenditure in 1897.	Increase or decrease in gross revenue.	Increase or decrease in working expenses.	Increase or decrease in prior charges and interest.	Increase in amount required to pay 1 p. on ord. stock.

Good News for "Chartered" Shareholders.

It is not of much present importance whether Rhodesia is to have one Administrative Council, or two, or a score, under Mr. Chamberlain's new plan ; nor yet whether the Commander of the Forces of the Crown is to cease to be a "Deputy Commissioner." The form of the new Government is quite secondary to the fact that the proposal as a whole means, if carried through, the incorporation of the Chartered Company's estate into a dominion of the Crown at no distant date. A continuance of a "board of directors," with nothing to direct except mining claims and licences, not likely to be profitable in the majority of instances, is nothing short of absurd, if not highly dangerous. This board will first grumble at the expense the company is put to on Government account, and then begin to agitate and to formulate claims with a view to being bought out at the highest possible price by the British taxpayer.

How any responsible British Minister could propose, apparently in all seriousness, to enter into intimate relations with such a company as this—a bubble of the worst type throughout its history, a thing conceived in cruelty and fraud and carried out from first to last in cold-blooded indifference to everything except the personal enrichment of the group that organised it—baffles our comprehension. But we have no doubt at all that the scheme will be allowed to pass the present Parliament, the worst the country has had since 1832, and that within a very few years we shall be told that from ten or fifteen millions must be found to buy out "vested interests" created in the first instance by the simple process of manufacturing shares and distributing them gratis. Is the scheme to be forced through with-

out so much as a disclosure of the present financial position of the Company?

The Terms and Security of the New Chinese Loan.

Neither seems to be absolutely fixed. We believe, however, that the loan will be a 4½ per cent. one, issued probably about 90, with the usual provision for redemption by sinking fund. Half of it may be offered in Germany and half here, and the underwriting of it is already completed, the subscribers receiving 2 per cent. commission. The loan has, of course, been taken in taels by the Hong-Kong Bank. As regards security, it seems that there is still a surplus of about three to four hundred thousand pounds left over from the Customs revenue after providing for the loans already issued. This is taking the Haikwan tael at 2s. 9d., which is about its present exchange value. Were silver to fall much further in price this surplus might disappear, but for the present it goes some way towards meeting the fresh charge imposed by the new loan. Then there will be the Salt Dues and some portion of the Li-Kin, or Inland Customs Dues, which are to be henceforth collected direct by Europeans. Should difficulty be experienced with the one or the other, then the Pekin Government will have to hurry forward the opening of fresh ports so as to increase the income from the Maritime Customs. Until we are sure that the security is ample, the new loan will be regarded as rather inferior to the ones now in the hands of the public, but there is no reason to doubt that, by one channel or another, it will be amply provided for.

Bush Fires in Australia.

No special correspondent or news agency has thought it worth while to tell us anything of the terrible devastation wrought in several districts of the Colony of Victoria by a series of bush fires unprecedented in extent and length of duration. They broke out in the end of last year and the beginning of this, and when the mail left about January 16 they were still burning in parts where anything was left to consume. The fires seem to have first made their appearance in Thorpdale, an important agricultural centre, a good day's journey distant from Melbourne. Here there were about fifty homesteads, and every one of these have been destroyed, with every bit of furniture the two hundred inhabitants owned. No human lives have been lost, but scarcely a horse or cow or pig has been left in the district: they have all been roasted. The produce of the recent harvest—a very abundant one—has been swept clean away. Scarcely a blade of grass has been left; so that where here and there cattle have escaped destruction, they are being sold because there is nothing with which to feed them.

The land for probably fifty miles or so has been laid waste. It consisted of prosperous farms for the most part, with a number of "selections" which were being brought under cultivation, and large areas of forest trees. These fed the flames, and kept them travelling for miles, spreading destruction everywhere around. At one township only a fowl-house was left; at another men and women by persistent effort kept the fire at bay for three weeks, only to be foiled in the end by a sudden change of wind throwing the flames back upon them, and compelling them to seek safety in flight. Scenes more strangely weird we have rarely read of. The roads are everywhere blocked, and it is impossible to attempt their clearance until the fires have burned out. The Government have sent a number of tents for the houseless inhabitants. Hurried arrangements were being made when the mail left to send food as well; for of that there was little or none. Grass seed will have to be supplied also; for there is now only a blackened desert where, a month or two ago, there were only fruitful farms. Many an industrious colonist will have to begin life anew with diminished strength, his capital gone, and with the abiding dread that a like visitation may be repeated any summer just as he has garnered his crops, and is waiting for transport to the nearest markets.

The Dublin United Tramways Company, Limited.

The following refers to a matter of public importance. It is a shame that bills of the kind here described are allowed to slip through Parliament and become law:—

Sir,—I enclose a copy of a letter of mine which appears in the Dublin papers of to-day, and also a memorandum relating to the tramways compiled from the Return just issued by the Board of Trade. I thank you for your notice in your paper of last week—there is just one slight error in it, arising from the similarity of the names of the Old and New Dublin Tramway Company. The Dublin United Tramways Company (1896) has filed its list of shareholders. It was the Dublin United Tramways Company, which by a clause in its Act of Parliament was exempted from the obligation to furnish a list of shareholders to the registrar of Joint Stock Companies, and I think it is the duty of the Board of Trade to examine Tramway Bills, and see that no such clause is inserted, as I presume we all agree it is a matter of public importance that the list of shareholders should be accessible in this way.

Yours faithfully,
Charles Eason (junior).

The National Telephone Company.

"Create a monopoly and go and hang yourself" is a saying the truth of which appears to be well illustrated by the action of the National Telephone Company in the City. It has a most oppressive tariff therein for the use of its instruments, viz., £20 each, but it is graciously pleased to reduce this tariff by 15 per cent. to £17 if its customers will consent to sign a hard-and-fast agreement with it for five years.

Those who will neither sign away their freedom thus nor pay the higher scale are threatened with the loss of the service, and in one instance known to us the wires were actually disconnected. It would be highly interesting to learn the motive for these oppressive ongoings. Does the company expect to make a hard bargain with the nation for its business, or to entrench itself against the County Council, or what?

City of London Electric Company.

Unlike other electric lighting companies, this company has a sliding scale fixed in the Act of Parliament which regulates its working. The clause reads as follows:—

If the balance of receipts over expenditure shown by the undertakers' annual accounts for any year ending December 31, ... exceeded a cumulative profit of 10 per cent. on the amount of the capital for the time being employed in the undertaking, the price

of energy to private consumers charged otherwise than by agreement should be reduced for the year ensuing after the next following 25th day of March, at the rate of one halfpenny per unit for each 1 per cent. over the 10 per cent. so shown by the accounts.

This seems to imply that when dividends exceed 10 per cent. the price of energy must be reduced, but a good deal of importance lies in the reading of the word "cumulative." If that means that dividends in past years below 10 per cent. can be made up before the price of energy is reduced, the company will have yet some time before the sliding scale comes into force, as there is a considerable balance in favour of the company on account of dividends distributed below 10 per cent., but its exact percentage cannot easily be stated owing to the differing amounts of capital in existence.

A Little Hotel Issue.

A curious commentary upon the Grosvenor Hotel case is furnished by the share list of the Hans Crescent Hotel Company, issued in July, 1896. The only share list furnished at Somerset House contains the following as the largest shareholders :—

	No. of Shares. Pref.	Ord.
Belgravia Estate, Limited	5,433	1,151
D. H. Evans	680	200
Hans Place Hotel Company, Limited	800	17,393
S. Marler	1,600	—
New Imperial Investment	1,358	—
S. J. Waring	500	—
Stephens, Bastow, & Company, Limited	1,000	—
Total	11,371	18,774
Total share capital	16,000	20,000

Now, the whole of the ordinary shares and one-third of the preference went to the vendors as part payment, and apparently the first-named holdings come within this category. Messrs. S. J. Waring & Sons furnished the hotel, and Stephens, Bastow, & Company built it, so that the public who hold the balance of shares cannot have much influence compared with the insiders. At the same time the poor subscription accounts for the weakness in the market price. Ought such a company to have gone to allotment?

The Salt Union, Limited.

Various reasons are put forward in the directors' report to account for the further drop in profits. The continued decline in the demand for manufactured salt in the chemical and allied industries, and the imposition and reimposition of fiscal duties in countries to which British salt is exported increased the competition amongst salt manufacturers in the United Kingdom, rendering decrease in tonnage coincident with decrease in price. The rise in the rates of freight for sea-borne salt continued, and further limited the profits derivable from the sale and consignment of salt; the effect of which was particularly noticeable in the Indian market, which was also adversely affected by war, famine, and plague. Finally, the fishing on the East coast of Scotland, and on various parts of the English coast, was much less successful than usual, causing considerable decline in the quantity of salt used for fish-curing purposes. All this is, of course, very unfortunate, but the company is not suffering only from one year's bad trade, for it has been going downhill right away from the start, and, as will be seen from the following figures, the decline has been pretty rapid :—

Year.	Salt Delivered.	Gross Revenue.	Net Profits.	Dividend on Ordinary Shares.
	Tons.	£	£	Per Cent.
1889	1,770,000	562,968	368,512	10
1890	1,629,000	524,200	306,447	7
1891	1,472,000	435,799	243,911	5
1892	1,354,000	384,774	215,919	5
1893	1,240,000	256,292	176,860	3
1894	1,284,000	319,527	140,482	2½
1895	1,217,000	314,208	162,154	2
1896	1,066,000	295,868	145,292	1
1897	1,014,000	210,489	66,823	0

The past year has of course been disastrous, and not only is there nothing for the ordinary shareholders, but only 1¼ per cent. for holders of 7 per cent. preference shares, so that the long impending crisis in the company's affairs may be said to have been reached. Unfortunately it is not only loss of profit that has to be lamented, but the financial position of the concern calls for immediate attention. Over-capitalisation was the chief initial fault, and in 1895 an issue of £200,000 "B" debenture stock increased the prior charges, while all the time profits were diminishing. In 1892 the company had a reserve fund of £117,500, of which only £60,333 was represented by investments, but although the reserve still stands in the balance-sheet for the same amount, investments have fallen to £21,564, and this money is in the company's own debenture stocks

The worst item, however, is that relating to properties and works, plant, and goodwill which stood in the 1890 accounts at £3,365,498, and beyond a small appropriation out of profits has had nothing written off from it by way of depreciation; on the contrary, it has been written up to £3,457,364. Then we find surplus freehold estates have risen in the seven years from £90,830 to £106,297; and shares in other salt trading companies from £116,128 to £138,168, which we should think is a very questionable valuation. The item steamers, barges, flats and appliances, has certainly been reduced from £183,639 to £163,791 since 1890, but rolling stock figures for £130,697 against £132,170, stocks of salt at £81,677 against £51,069, and stocks of fuel and material at £50,683 against £47,957. The balance-sheet wants thorough overhauling, so that it can be seen how the company really stands.

We are not disposed to blame the present directors for the present condition of affairs; the blame is due to the vendors and the original directors, many of whom have disappeared from the board, who saddled or crippled the undertaking at the start with heavy encumbrances. For instance, the balance-sheet shows that so far £135,035 has been spent in the acquisition of distribution agencies and covenants with vendors, but this does not seem to have helped profits much, nor has the steady expenditure every year on new works. Neither are we disposed to support the persons who have come forward as a shareholders' committee and would no doubt like to get a footing in the management. The existing directors should bring forward a scheme of reconstruction and be given another opportunity of making the affair a success before outsiders are called in. But the position must be faced at once as the margin between profits and debenture interest is vanishing.

Critical Index to New Investments.

ALBION (BURTON-ON-TRENT) BREWERY, LIMITED.

Issue of £110,000 four per cent. perpetual mortgage "A" debenture stock at par; interest due May and November. Share capital is £140,000 all issued to the vendors, except eighty-seven shares, and there is in existence an issue of £180,000 four and a-half per cent. perpetual first mortgage debenture stock, standing at about 115. By the present issue the company will have twice as much debenture stock as share capital, but it must be admitted that it is an exceptional undertaking. It was formed in 1896 to acquire the brewery, with 153 licensed houses, 121 unlicensed houses, stores, and cottages, and about 119 acres of freehold and long leasehold building and other land. The whole of the licensed houses are now leased for twenty-one years to Thomas Salt & Co., Limited; the brewery is let on favourable terms for seventy-nine years, and the whole of the company's other property is let to produce a good rental. With a view to further increasing its income contracts have been entered into for the acquisition of fifty-five additional licensed houses which are to be leased to Ind Coope & Co., Limited, for twenty-one years, and it is to complete the purchase of these properties that the present issue of debenture stock is made. It is secured by an absolute specific first mortgage on properties valued at £101,607; and a fixed charge after the existing debenture stock on the brewery and general undertaking valued at £149,143 net. The rents and royalties receivable from the two large firms and other tenants are calculated to produce £20,170 per annum, of which the first debenture stock interest will absorb £8,100, and the stock now offered £4,400, so that the margin of £7,670 per annum should make the stock a fair investment.

SCHIBAIEFF PETROLEUM COMPANY, LIMITED.

Share capital is £750,000 in 75,000 6 per cent. cumulative preference shares of £5 each, and 375,000 ordinary shares of £1 each. The object of this company is to buy all the shares as from

March 31 last in a petroleum business carried on at Baku, Moscow, and elsewhere by a Russian private limited liability company known as Messrs. S. M. Schibaieff & Co. The Russian company was established in 1884, and has a share capital of about £265,000. Mr. Redwood supplies a well-varnished report on the properties to be taken over, and Turquand, Youngs & Co. say that the balance-sheets and profit and loss accounts, as given to them, show net profits of £29,032 for 1894-5; of £59,523 for 1895-6; and of £55,501 for 1896-7. It is claimed that besides the capital some £300,000 has been spent out of profits on the construction and development of the business and there are other assets amounting to £116,000. Even so we fail to see why the capital is to be blown out to such an extent, nor do we learn why the concern is to be sold. Are these Russian companies being got rid of because of the efforts being made over here to raise the flash point? The vendors, who are the promoters, and are selling at a profit—this we can well understand—have fixed the purchase price at £640,000, of which only £20,000 is to be in shares. Is this, then, their measure of belief in the future of the undertaking? For the three years dealt with by Turquand, Youngs, the average profits are £48,019, but, assuming that the net profits of £55,500 for the last of the three years are maintained, we much doubt if, after paying directors' fees and London office expenses, they would show more than 7 per cent. on the ordinary shares, which is certainly not in our opinion, a return commensurate with the risks run.

THE "ERA" INCANDESCENT OIL LAMP COMPANY LIMITED.

Company is formed to acquire British, foreign and colonial letters patent for Graetz's Incandescent Oil Lamp. The inventions acquired by the Company enable the Welsbach system of incandescent lighting to be used in connection with oil lamps burning ordinary petroleum just in the same manner as it is now used with gas. We were under the impression that the Welsbach company made out that it was the owner of this patent, but this is evidently not so. The connection lies in the fact that the "Era" lamp has been fully tested by the Incandescent Gas Light Company, now being amalgamated with the Welsbach Company, and it has taken an exclusive licence from this country for Great Britain at a rate of royalty not stated, but under this licence it has had manufactured 20,000 "Era" lamps, which will shortly be placed on the market. The capital of the company is £60,000 in £1 shares, which seems moderate, but the purchase price is £50,000, of which £10,000 will be in shares. As an investment, it is early to judge of the merits of the concern, but there is always a certain risk run in taking shares in a company dependent only on a patent.

PREMIER TRAWLING AND FISH-CARRYING COMPANY, LIMITED.

The idea of this venture is to buy ten steam trawlers belonging to Richard Simpson & Co., Limited, and the benefit and advantage (or otherwise) of contracts entered into for the construction of thirty-four more steam fishing vessels. For the twelve months commencing November, 1896, the profits of this firm are certified at £8,259, but the valuation of A. & W. Dudgeon (we presume the name is spelt right) counts for little, because the value of the vessels in use, and under construction are all piled up together with goodwill and various other items. It will probably come as a surprise that the share capital is £200,000 in £1 shares, half ordinary and half 6 per cent cumulative preference, besides an issue at par of £150,000 4½ per cent. first mortgage debenture stock, redeemable in 1910 at 105. And the surprise will, no doubt, be increased by the fact that the vendors, the Fisheries Syndicate, Limited, who are the promoters, and, it is needless to say, are selling at a profit—substantial, we should imagine—are asking £170,000 as the purchase price, including £103,334 in cash. Not satisfied with this, the company is to pay £161,800 for the new boats, besides paying extra for fishing gear. The proposal seems to have some flavour of fish, and it would pay the vendors splendidly.

Company Reports and Balance-Sheets.

MERCANTILE INVESTMENT AND GENERAL TRUST.—A further improvement is seen in the position of this concern. Revenue increased but slightly, so that the net income of £82,009 was only £1,776 above that of 1896. This permitted of the payment of preference and debenture interest, and a dividend of 3 per cent. upon the deferred stock. In addition, £5,000 was placed to reserve, and the balance carried forward was £4,500 higher. The reserve also benefited by the net result from realisations of investments to the tune of £48,073, against which £19,683 was absorbed by writing down the value of certain securities which were permanently depreciated. Its total, therefore, amounts to £103,892, and it is specially invested in high-class securities. The securities, which have a cost value in the books of £3,113,149, are too numerous for a careful analysis, but they contain many stocks and shares which are improving in value. Further realisations of bank shares (the weak point of the trust) have been effected, and two hopeless affairs, £2,000 of David Martineau & Sons' debentures and £5,000 of Standard Bank of Australia shares, have been written clean off. The trust issue a statement of securities purchased and sold in the year, and we must say that a perusal of these does not heighten our sense of the prudence of the management.

LONDON AND AUSTRALASIAN DEBENTURE CORPORATION.—In some ways the affairs of this company show improvement. The terminal debentures have been wiped out, the loan against securities reduced to £1,100, and the investment reserve raised to £2,625 by additions from profit on sales. Revenue also improved, and after payment of a dividend of 2½ per cent., the balance forward was increased by £1,400 to £2,961. All this appears favourable for a company whose share capital amounts to £100,700, and whose debenture debt is £50,000, especially as it is stated that the valuation of the company's *quoted* (we presume officially quoted) investments shows a considerable appreciation upon the figures at which they stand in the books. Unfortuuately, however, the whole of this pretty picture is blurred by the fact that the company has a lock-up of £52,318 in shares of the Australian Cities Investment Corporation, and a further liability on account of these shares of £22,422. The Australian company is in difficulties, and has had to make terms with its creditors, and some scheme of rearrangement seems to lie in the future. The whole character of the balance-sheet which only runs into £165,571, is rendered uncertain by the anxieties which surround this one investment, and we are afraid that all the hard work of late years in putting the affairs of this concern into order may be rendered migratory by the bad results of this one *coup*.

TEMPERANCE PERMANENT BUILDING SOCIETY.—This society keeps up its high record, and with £921,354 invested in mortgages on house property, no less than £630,000 is in mortgages which do not exceed £500 a piece. Another £153,000 is in mortgages between £500 and £1,000 a piece, so that only £140,000 is left for larger mortgages which partake of a financial character. Thus the main object of the society is well adhered to, and the wisdom of this policy is seen in the small amount of properties in possession, for these only number four, which stand in the books for £15,890. Even these are a source of profit, for they yield a net income equal to 9¾ per cent. upon the money advanced, and the larger portion of this income is being used to write down their capital value. The profits on working the society allowed of the usual dividend of 5½ per cent. on the original shares, and the carrying of £2,977 to reserve, raising that fund to £61,554. It is a pity, however, that liquid assets are not accumulated to a greater extent, for there is only £20,377 of consols and Staffordshire County stock, against £237,674 of deposits, and it looks as if most of the cash will be dissipated in the dividends. A strong society like this ought to have its reserve invested outside its business.

SCOTTISH AMERICAN INVESTMENT COMPANY.—A company with a prosperous record, but which seems to divide its profits well up to the hilt. Even profit on securities sold is treated as ordinary revenue, and of the net revenue of £50,609, no less than £50,000 is absorbed in paying the dividend of 10 per cent., leaving only the odd £609 to be carried forward. At the same time the company must be well managed, for with investments to the value of £2,696,008 in the balance-sheet, it is stated that the market value is considerably above that amount. There is also a reserve fund of £300,000. But nothing whatever is set forth in the report that difcloses the character or nature of those investments. Clearly real estate mortgages form a part of its business, and yet there is nothing said about property held as a result of foreclosure. Yet the debentures and debenture stock of the concern amount to £1,933,000, as against £516,799 of paid-up share capital, and the amount required for interest last year was £74,191, or three-fifths of the sum received in interest on investments. Altogether a company of mysterious silences that do not encourage prudent folk to touch it.

CITY OF LONDON ELECTRIC LIGHTING COMPANY.—The progress of this company goes on at a remarkably rapid pace. With a capital expenditure of £1,283,720, or only £82,000 more than the preceding year, the gross revenue of 1897 was £186,836, or £38,300 more than in 1896. This shows that past outlays have by no means borne their full fruit. Expenditure came to £81,685, so that the net revenue was £105,151, as compared with £79,527 in 1896. The growth of gross revenue was therefore 20 per cent., while that of net was no less than 32 per cent., as against increased capital outlay of less than 7 per cent. Out of the net income the board set aside £17,000 for depreciation, £3,528 for reserve, and £1,338 towards the wiping out of a small suspense account. The balance, after meeting fixed charges, permitted of a dividend on the ordinary shares of 10 per cent., as compared with 7 per cent. in the preceding twelve months. Unfortunately, the company continues its confusing system of using proceeds of premiums to meet a part of the depreciation charges, and in this way keeps down its working charges at an artificially low level. The increase in the number of customers and lamps connected last year were well up to the level of the two preceding years, but the number applied for and waiting connection, was, not unnaturally, less than a year ago.

CIVIL SERVICE SUPPLY ASSOCIATION.—In spite of the granting of permanent tickets to subscribers of five years' standing, this association turned over a little less last year than in the preceding twelve months. The profit for the second half of the year was just

a trifle lower at £129,011, which allowed of the usual dividend of 12s. per £10 of capital, the placing of £2,000 to reserve, and the carrying forward of £4,942. The sum of 9d. per £10 of capital is returned as interest upon the reserve. Repairs and depreciation are allowed for on a liberal scale, and rather more is written off premises as these have been considerably added to in the year.

Cambrian Railways Company.—Gross receipts for half-year ended December 31, £161,293, expenses £98,326, proportion of expenses to receipts, 60·8 per cent. The income for the half-year rose £5,196, but the expenditure was £6,705 greater, therefore the net revenue is £1,508 less than in the corresponding period of 1896. The company, however, is able to pay full interest on the A, B, C, and D debenture stocks, and a sum of £3,979 is left to carry forward. During the six months £17,908 was spent on capital account, £11,820 of it on working expenses stock. Interest warrants will be posted on the 28th inst.

Cockermouth, Keswick and Penrith Railway.—Gross receipts for second half of 1897, £26,029, working expenses £15,288, proportion of expenses to receipts 57·7 per cent. The traffic gave an increase of £1,769, and expenses rose only £1,004. The net revenue therefore benefited to a small extent, and the directors were able to declare a dividend at the rate of 5 per cent. on the ordinary stock, leaving £178 to carry to the new half year. Only £405 was spent on capital account during the half-year and this little company appears to be in quite a comfortable position.

West Clare Railway Company, Limited.—Gross receipts were £6,814 in the half-year ended October 31 last, and expenses came to £6,197, this left only £617 as net revenue, as against £1,286 in October 1896, so the net revenue is down about £669. The traffic appears to be sadly non-progressive, and is smaller than in the corresponding half of either of the two previous years.

South Clare Railway Company, Limited.—Gross receipts for the half-year ended October 31, £3,804; expenses, £3,585; net revenue, £219. Here also the figures are lower than those of the corresponding half of 1896 and 1895. Expenses have also been reduced slightly compared with 1896, but are higher than those of the half-year ended October 1895. Passenger traffic has fallen off most conspicuously, and live stock traffic is also less. Both these little companies justify eloquently to the depressed condition of the districts they serve. Pity it does not attract the English tourist more, for County Clare is full of beauty.

Kensington & Knightsbridge Electric Lighting Company.—Small as the area of this company is, it has shown considerable expansion in business during the year. The number of customers increased from 1,325 to 1,620, and the number of lamps connected from 119,955 of 8 c.p. to 137,953 of 8 c.p. Net revenue during the year amounted to £14,647, and after paying debenture and preference interest the balance permits of the distribution of 10 per cent. upon the ordinary shares, as against 7 per cent. for the preceding year. The sum of £8,061 is placed to the renewal fund, which is increased thereby to £20,497, and there is also a depreciation fund account for works on leasehold account which now amounts to £1,435. Of the sum of £2,079 received in premiums upon new capital, £558 has been devoted towards wiping out the balance of cost of conversion of debentures, and the remainder has been written off the purchase price of a small electrical undertaking bought up some time ago. The company therefore grows in strength each year, and has already expended £22,707 upon the undertaking in excess of capital raised.

H. E. Randall, Limited.—This bootselling company earned last year a gross profit of £11,628, including £604 from profit on Jubilee windows. The sum of £1,400 is allowed for depreciation, and £739 is devoted to wiping off balance of preliminary expenses, and after debenture interest and other charges have been met, the sum of £7,461 remains, but of this the preference interest required £2,400, and the ordinary shares receive distributions equal to 10 per cent. for the year, which absorb £3,000, leaving £2,178 to be carried forward. It is a good showing in a way, but the auditors can only sign their report "subject to any necessary provision being made against the expiration of leases of shops." That seems to imply that no provision has been made for such a contingency, which is an important one for the company. We also note that the indebtedness of the concern is very large. In addition to £30,000 of debentures, there was £18,390 owing to sundry creditors, and £4,382 for bills payable. These for a business which is eminently of a ready-money character seems unduly large.

The Prudential Assurance Company, Limited.—A "valuation report" issued by this company—we have not seen its full accounts yet: they come to hand shyly—for the year 1897, states that the result is a surplus of £811,663, including £213,568 brought forward. This is on the "ordinary" life and annuity businesses, both of which have attained large proportions with great rapidity. In the industrial, or burial money branch, the business continues tremendous, and there is a valuation surplus at the end of the year amounting to £870,162 notwithstanding the fact that the company has granted free policies for £1,600,000 in lieu of discontinued assurances, "and to provide for the increase in the sums assured given to industrial policy holders." This is only just, and the company is well able to go still further in the same direction, for its industrial fund now amounts to £13,668,034, and its ordinary life and annuities funds, £15,134,804, or together, £28,802,838, a magnificent total.

The County Fire Office.—Deducting re-insurance, the net premium income of this company for 1897 was £274,631, an increase of £3,321 on 1896. Losses by fire took £99,828, or about 36·4 per cent. of the net premium income; and expenses and commission, £91,419, or about 33·3 per cent. Adding interest and dividends, £20,698, the balance left to be carried forward is £103,662. The company has a paid-up capital of £254,560, and upon this a dividend of £12 per share, or 15 per cent., has been paid for the year—£3 of it in September last, and £9 now. This will leave £28,478 to be added to the reserve fund, which will, therefore, now stand at £366,430.

Law Life Assurance Society.—At the seventy-fourth annual general meeting of this society, held on the 23rd inst., Mr. Charles Stewart in the chair, the report was presented, and showed that 504 new policies, assuring £690,378, or, deducting re-assurances, £526,561, had been effected during the year. The total net premium income for the year was £248,472, the net renewal premium income showing an increase for the sixth year in succession. The expenses of management (including commission) were £11 16s. 4d. per cent. of the total net premium income. The net claims by death amounted to £294,429, which amount was about £77,000 less than the expected amount, and the total funds at the end of the year amounted to £4,918,288, an increase of £108,360. Interest on the society's invested funds averaged £4 1s. 4d. per cent., without deducting income-tax. The society has a well-distributed and first-class list of investments.

The Telegraph Construction and Maintenance Company has not done so well as in the preceding year, and its profits are not so good as they used to be. Last year they came to £61,131 against £88,300 in 1896, £32,589 in 1895, and £91,921 in 1894. The amount brought forward is, however, £21,000 larger, so that the available total is only £6,000 less. The dividend of 15 per cent., to which it was lowered in 1895, is repeated, and the substantial balance of £33,841 carried forward. The company's works are said to have been actively employed, and, therefore, it may be presumed from the smaller profits that the work done has been less remunerative. The figures of the balance-sheet are of the usual heavy description. Property, plant, stocks, and leases have been further written down to £329,163; but debts owing by the company, £586,814, debts owing to the company, £379,053, and sundry securities, £539,633, all show increases compared with a year ago. Of what real value these sundry securities are we know not, but we notice they have increased by £69,000 since 1893, and probably they are not very marketable.

Bergvik Company.—Further recovery appears to have been made during the past year, though in the absence of a balance sheet from the Swedish Company, it is impossible to be too sure. This company, we are told, wrote £11,321 off cost of buildings and works, against only £5,263 a year ago, when, however, it also wrote £2,676 off the pulp factory. It has also added £10,000 to reserve, raising it to £30,000, and has redeemed £3,611 of its 4½ per cent. debentures, which are thus reduced to £33,333. After doing all this by way of strengthening itself, it hands over £50,000 to the English undertaking, being the amount of dividend declared by the Swedish Company, and with this sum the directors over here wipe out the balance of £7,600, representing bonuses on debentures redeemed under the conversion scheme, and set aside £6,200 for redemption of debentures; while from the remainder they pay the 6 per cent. preference shares, and increase the dividend on the deferred shares from 10s. to 12s., or from 5 to 6 per cent. The company has benefited from the strength of the wood market, and now that nothing will be required in future for redemption of debenture bonuses, it would be a good opportunity to start a reserve fund.

John Oakey & Sons, Limited, make knife polish, and became a public company nearly five years ago, with a share capital of £225,000 in £10 shares, 10,000 being 6 per cent. preference, now fetching 16, and 12,500 ordinary, which are dealt in above 31. We do not remember to have seen a copy of the directors' report before, but have obtained one for the past year which discloses a most satisfactory position. The company has a capital reserve of £3,734, and a general reserve of £22,500, the whole of which is in Consols and Colonial Government securities. Sundry creditors do not stand for more than £13,056, while debtors represent £35,185. Stocks on hand figure at the moderate total of £28,531, and plant, &c., at £19,751. Freehold land and buildings are down for £60,748, and goodwill for £82,455. Another £5,000 is to be now added to reserve and invested, but in the absence of a working account we do not know what amount is allowed for depreciation, or whether anything is being written off goodwill. The net profits for the past year were £27,317, of which the ordinary shareholders get £15,625 in the shape of a dividend of 10 per cent, and a bonus of 2½ per cent., which is the same distribution as was made a year ago. At their present price the return on the shares is very moderate.

New Explosives Company.—There is little reason for elation over the result of the year's working, the profit being only £2,601, compared with £4,155, and under these circumstances the dividend is lowered from 4 to 2½ per cent. There is no cause to complain of the amount of business, the output in tonnage exceeding that of 1896 by 25 per cent., but the increased trade had to be done at a reduced rate of profit. The new factory, the completion of which was delayed by a local strike and the lock-out in the engineering trade, has at length been completed, and now that the whole of the debentures have been placed, practically with members of the company, the concern should be in a more comfortable position, and be able to render a better account of itself next year.

Bank of British North America.—The report for the past half-year shows a gratifying improvement, the profits, with £8,323 brought forward, being £39,435, as compared with £26,018 a year ago, when £5,252 was brought in. The dividend is therefore raised from 20s. to 25s. a share, and £10,000 is added to the reserve, raising to £285,000. Deposits and current accounts have recovered from £2,066,000 to £2,310,000.

The Produce Markets.

GRAIN.

The week opened firmly, with a general advance in the price of wheat of 6d. to 1s. The strength and activity of the American markets, of course, greatly influenced the English. By Tuesday, however, business had become more dull, and at Mark-lane on Wednesday buyers held off, but sellers were firm, and Monday's advance was maintained. Flour was unaltered in value, but the movement was slow. Maize was in poor demand at unchanged rates; mixed American, ex ship, 16s. to 16s. 3d.; old crop, 17s., ex quay; and Galatz-Bessarabian at 18s. Barley had a quiet sale; Odessa-Nikolaieff, 16s. to 16s. 9d., ex ship; and Danubian at 16s. 3d. to 16s. 6d. Oats were disappointing in the demand. Mixed American, ex ship, are obtainable at 15s. 7½d. to 15s. 9d. Arrivals:—Wheat, 22,340 qr.; maize, 27,510 qr.; flour, 24,960 sacks; and oats, 27,510 qr. At Liverpool the course of the market was somewhat similar, with a good spot demand in the early part of the week; but on Wednesday, though rates were maintained, the tendency was in buyers' favour. Red American futures, which opened the week at a slight rise, receded on Wednesday ¼d. to ⅜d.; but the decline was checked in the afternoon by firmer advices from Paris. The market closed steady ⅜d. to 1½d. cental lower. Sales, 350,000 centals, comprising March, 8s. 0½d. to 7s. 11⅝d.; May, 7s. 7½d. to 7s. 6⅜d.; July, 7s. 3⅝d. to 7s. 3½d.; September, 6s. 7⅝d. to 6s. 7½d.; December, 6s. 6½d. to 6s. 6d. East Indian shipments:—Cargoes quiet and easier. Walla Walla, February, sold at 36s., and La Plata, February-March, sailer, at the same price. The London cargo market has not been very brisk, and there has been little fluctuation. On Wednesday near-at-hand cargoes were not pressed for sale, while for distant shipments there is little or no inquiry. The break in the American option market has produced an uncertain feeling, and the close is quiet and easy. Options were ¼d. to ⅜d. down with business for March, June, and September. Maize ⅜d. to ½d. lower. Barley firm, but not much offering. Oats quiet. Beans unaltered.

Official Closing Values (100 lb. deliveries—February 23).

	March.	May.	July.	Sept.	Dec.
Red American Wheat	7'11⅜	7'6⅝	7'3¼	6'7¼	6'6½

In New York the wheat market has been rather easy throughout the week. On Wednesday it opened 1⅜ c. lower, recovered a little later, but closed ¾ c. to 1¼ c. down. Spot easy. *Bradstreet's* figures show decrease in supplies East Rockies of 989,000 bushels on week. Spring, 115⅜ c.; winter, 108½. Sales: futures, 4,100,000 bushels; spot, 120,000 bushels. Receipts: Atlantic (two days), 217,000 bushels; last year (three days), 227,000 bushels. This season, 45,643,000 bushels; last season, 31,847,000 bushels. Clearances (two days), 275,000 bushels; last year (three days), 246,000 bushels. This season, 46,433,000 bushels; lost season, 27,324,000 bushels. Flour steady.

COTTON.

The spot market at Liverpool has ruled rather dull during the week, though on Tuesday and Wednesday there was rather more activity at steady prices. On Wednesday a fair business was done in American at firmer rates. Brazilian and Surats quiet at late rates. Egyptians were in limited request at steady prices. Futures opened unchanged and with little offering, and, "bears" covering, hardened 2 points in the forenoon. Subsequently there was little change of note, and, after a small business, the close was steady at a rise of 2½ to 3 points.

In New York cotton ruled dull, with prices generally down until Wednesday, when market opened firmer, 10 to 11 points higher on better cables, light interior receipts, more peaceful political situation abroad, active covering, and investment buying. Advance was partially lost later under liquidation, and market closed quiet, 7 to 9 points up. Spot dull. Middling upland, 6¼c. Sales, 197,500 bales.

New York Closing Values.

	Spot.	Feb.	Mar.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.

WOOL.

No decided improvement is reported in the wool markets; but dealers believe that prices have touched their lowest level, and hold out for some advance. But buyers do not respond, and the consequence is that the volume of the business remains small. At the London Wool Exchange the attendance at the low wool sales was good, but the bidding was dull, and but little was sold at a fall of ½d. per lb. on Tuesday, and another ½d. to ⅝d. on Wednesday. German houses were the principal buyers, and a few lots here and there fell to home account. The China camels' hair and sheep's wool experienced a particularly slow sale, a few parcels selling at about unchanged rates, but the cashmere was all withdrawn. Spanish black unwashed wools, after bids of 3½d., were taken in, but the seven bales of super Cape mohair sold well at 12½d. to 15½d.

METALS AND COAL.

There has been great activity in copper during the week, and prices have gone up daily until there was an increase on the week of 7s. to 10s. On Wednesday about 800 tons were disposed of, and throughout the day the tone was extremely firm. Cash realised £49 17s. 6d., March dates up to the 14th £49 17s. 6d. and £49 18s. 9d.; May 10 and three months, £50 2s. 6d., and four months £50 3s. 9d. and £50 5s. The market was quieter during the afternoon, when an additional 300 tons changed hands. Cash and early dates £49 17s. 6d. and £49 18s. 9d.; three months and June 2 at £50 3s. 9d.

Copper ..	49 17 6	49 10 0	49 5 0	49 2 6	48 17 6	49 5 0

Tin has also shown considerable activity, with several rises in price. Card sales on Wednesday, at £64 1s. 3d.; March dates up to the middle of the month at £64 2s. 6d. and 64s. 5s. The pig-iron market has been strong in tone on the whole, with ocassional hesitation in consequence of unsustained war rumours. On Tuesday Scotch rose 3½d., and Cleveland 2d.; but on Wednesday there was a downward tendency, though the market closed 1½d. higher on the day.

SUGAR.

There has been a decided improvement in the tone of the market, stocks are firmly held, and the tendency has been rather upward if anything. Refined British cubes were on Wednesday in better demand at full values; crushed 3d. dearer; in pieces a good trade was done at steady rates, and crystals have a moderate enquiry; prices unchanged. Quotations—Tate's cubes, No. 1, 14s. 10½d.; No. 2, 14s.; crushed, No. 1, 13s. 6d.; No. 2, 13s.; granulated, 13s.; yellow crystals, 12s. 3d.; Lyle's crystals, No. 1, 13s. 3d.; No. 2, 12s. 6d.; granulated, No. 1, 13s.; No. 2, 12s. 3d.; whites, A, 12s. 9d.; B, 12s.; yellow crystallised, O and P, 12s. 3d. Foreign.—Granulated opened firm at ⅛d. advance, but closed quieter with the improvement partially lost. Ready G D and Groningen sold at 11s. 1½d.; Z R M, 11s. 0⅜d. March, first marks, 11s. 0⅜d.; April, 11s. 1½d. and sellers; May-August, 11s. 4½d. to 11s. 3¾d. and buyers, f.o.b. Hamburg. Cubes—F M S, prompt, sold at 12s. 1½d.; Meyer, 12s. 9d.; Hansa, 12s. 1½d., sellers, f.o.b. Hamburg; W S R, prompt, held for 13s. 1½d.; S and T, 12s. 10½d.; A S R and cut loaf, 12s. 9d., f.o.b. Amsterdam. Cane kinds steady but quiet. Beet futures firm at ½d. to ¾d. advance.

TEA AND COFFEE.

Messrs. Gow, Wilson, & Stanton state in their tea report that "exports from Calcutta direct to consuming countries show encouraging increases, those to Australia and New Zealand being particularly hopeful. It is evident that this important market is gradually following the example of Great Britain in displacing its China consumption by teas grown in India and Ceylon. Under the influence of continued moderate auctions the Indian market has been gradually gaining strength, and the improved tone noticed last week was fully maintained for all grades. The auction of Ceylon tea comprised 17,280 packages, but passed without any improvement in quotations, which were irregular and sometimes below those reported last week. During the last few weeks some invoices of garden tea have been brought forward from Natal; the teas were of fair make in leaf, but rather thin in cup, and consequently only low average prices were realised. Java was not represented. 202 packages are catalogued for the next fortnight."

The coffee auctions have been well attended, and there was a keen competition at full rates for all good to fine sorts. On Wednesday the auctions comprised 3,194 packages, more than half consisting of East India, which met with a good demand and realised firm prices; Ceylon sold steadily; Guatemala easy; Colombian about steady; and Jamaica again lower. Ceylon—low middling to bold green, 92s. to 115s.; peaberry, 102s. East India—bold common dull grey to fine dull coloury, 95s. to 112s.; low middling to good middling, 74s. to 94s. 6d.; smalls common to bold, 51s. to 75s.; peaberry, 91s. to 109s. Guatemala—good middling soft blue mixed, 81s. Colombian—bold rough faded grey, 72s. to 73s.; low middling to bold faded green mixed, 59s. to 67s. 6d. Jamaica—middling to bold dull grey, 71s. 6d. to 86s.; common medium to bold brownish mixed, 57s. to 72s.; good ordinary, mixed broken to very fine ordinary greenish, 37s. to 51s. 6d.; peaberry brownish, 68s.

HEMP AND JUTE.

Up to Monday, hemp remained firm, with good demand and sparingly offered, but on that day there were large receipts, and the market eased considerably; Manila, F. C., February-April, sailer, £19 5s., and May-July, £19 7s. 6d., sellers. Imports during past week, 3,250 bales. Jute dull for the most part, with rather a downward tendency. First marks, according to group, February-March steamer, £19 12s. 6d. to £19 15s. sellers.

Mr. William Tuke, a director of the West Australian Eldorado Syndicate, shot himself through the head at his office in Gracechurch-street a few days ago. He seemed in his usual health on arriving at the office, and no suspicion of anything wrong was entertained until a shot was heard in his private room. He was removed to Guy's Hospital, where he died without regaining consciousness.

An amended offer has been sent by the London Syndicate to the Canadian Government for the construction of the Yukon railway. It proposes to build from Pyramid Harbour to Rink Rapids, a distance of 288 miles, for a land grant in alternate sections of one mile square for a distance of ten miles on each side of the railway from the boundary to the Rapids, a total of 1,248,000 acres, or it will build from the Stickeen to Teslin Lake for 1,000,000, or 2,750,000 acres less than Messrs. Mackenzie & Mann claims.

The Afrikander Bond Congress at Cape Town have come to the conclusion that there ought to be a tax on foreign dividends. Surely they should rather insist on the Government ceasing to borrow.

The Transvaal revenue for January last amounted to £84,000, as compared with £117,000 for January, 1897.

Notice to Subscribers.

Complaints are continually reaching us that the Investors Review cannot be obtained at this and the other railway bookstall, that it does not reach Scotch and Irish cities till Monday, and that it is not delivered in the City till Saturday morning.

We publish on Friday in time for the Review to be at all Metropolitan bookstalls by at latest 4 p.m., and we believe that it is there then, having no doubt that Messrs. W. H. Smith & Son do their best, but they have such a mass of papers to handle every day that a fresh one may well look almost like a personal enemy and be kept in short supply unless the reading public shows unmistakably that it is wanted. A little perseverance, therefore, in asking for the Investors' Review is all that should be required to remedy this defect.

All London newsagents can be in a position to distribute the paper on Friday afternoon if they please, and here also the only remedy is for subscribers to insist upon having it as soon as published. Arrangements have been made that all our direct City subscribers shall have their copies before 4 p.m. on Friday. As for the provinces, we can only say that the paper is delivered to the forwarding agents in ample time to be in every English and Scotch town, and in Dublin and Belfast, likewise, early on Saturday morning. Those despatched by post from this office can be delivered by the first London mail on Saturday in every part of the United Kingdom.

Cheques and Postal Orders should be made payable to Clement Wilson.

The Investors' Review can be obtained in Paris of Messrs. Boyveau et Chevillet, 22, Rue de la Banque.

ADVERTISEMENTS.

All Advertisements are received subject to approval, and should be sent in not later than 5 p.m. on Thursdays.

For tariff and particulars of positions open apply to the Advertisement Manager, Norfolk House, Norfolk-street, W.C.

The Investors' Review.

The Week's Money Market.

The Money Market has had a worse time during the past seven days than in the preceding week. Not only have all loans from the Bank of England been renewed upon maturity, but a large sum has been borrowed in addition, as is indicated by the increase of £2,711,000 in the "other securities" of the Bank Return. The pressure has been in a measure accentuated by the payment of the railway dividends which have occasioned considerable transfers of cash; but the large borrowings from the Bank have probably left balances over in places, for, in spite of yesterday being Stock Exchange "Pay Day," there was a little more money about. Day to day loans, therefore, closed about 2½ to 3 per cent., although on most other days the higher rate was usual. Seven day market loans have moved up to the same quotation.

Discount rates have hardened in spite of the cessation of the Continental demand for gold, for although the last shipment was taken, that arriving to-morrow will go into the Bank. The market, indeed, has been swept so completely clear of floating balances, that it could no longer continue to discount at terms distinctly below what money was costing it. The upward movement was further accentuated by the rather unexpected announcement that an Anglo-German Loan for £16,000,000 has been arranged with China. The operation, however satisfactory from a financial and diplomatic point of view, comes at an awkward time for the market, for the desire to pay off Japan quickly must force on the issue almost at once. On the other hand, the market does not know when it will get back any large percentage of the eight millions, or so, of its usual balances now held by the Government, while its indebtedness to the Bank of England harasses its actions from day to day. It is urged that the Loan may cause shipments of gold from Berlin to this side, and the sharp advance of late in the German exchanges supports this view, but the last big Chinese loan did not see Berlin's quota taken up, and payment for what was subscribed was spread over a considerable time by dint of credits raised in London. Bankers and bill brokers have, therefore, declined to work upon the old terms, and three months' short bills are quoted 2⅜ to 2⅞ per cent. as against 2⅝ to 2 11/16 a week ago. Longer dated paper, however, keeps dulls at about 2⅝ per cent.

Although the Stock Exchange settlement disclosed a rather lighter account open, loans to the "House" were quoted hard at 3½ to 3¾, with most business doing at the higher figure. The issue of Treasury bills for £1,500,000 to be tendered for to-day, only replaces a like amount maturing, but such bills of late have been found to be owned chiefly by the Government departments. Competition is not, therefore, likely to be keen on the part of the market, and it will not be surprising if the bulk again falls into official hands. The Bank of England displeased some people yesterday by granting loans into March. It would only discount bills running over the end of the month, and brokers are loth to part with bills on its terms.

The Bank return issued yesterday revealed very heavy borrowings at the Bank, whose advances on "other" deposits have gone up £2,711,361 to £35,046,076. Thanks to the money thus procured, and to £605,941

added to the reserve of the banking department through the return of coins and a few notes from circulation, the market has been able to add £1,639,507 to the "other" deposits, notwithstanding the increase of £1,716,363 in the "public" deposits, which now amount to £18,594,790—a most unusual total at this time of year. The market has had to procure cash to pay railway dividends, and at the same time to meet the drain set up by the tax collector. No wonder, then, that money has been "tight" all the week; but the extreme height to which the "public" deposits have now mounted must imply Government disbursements at an early date. On March 19, 1896, the Government balances reached a total of £19,175,000. With the exception of the four Wednesdays of that month, the aggregate has never been so high as it is now.

SILVER.

The practical disappearance of the "bear" position in this market has been signalised by a further drop of ½d. in the "spot" price to 25 11/16d. per ounce. Although Indian exchanges have risen 1/16d. to ⅛d. in the week, the movement is solely the result of tighter money markets there which resulted in a rise in the Bank rates by 1 per cent. to 12 per cent. for Bengal, and 13 per cent. for Bombay; and so the fall in the "bazaar" price of silver has neutralised the change. Sellers of the white metal have therefore had to reduce their price, and at the lower level the tone is none too good. The two months' forward rice has ruled about ½d. below the "spot" price. The announcement about the Chinese loan did not have any effect, as it is known that no silver will be taken on its account. Japan, which will receive the great bulk of the issue, if disposed to ship bullion would certainly take gold, while, if any balance remains over for China, it will be cheapest to use it to meet interest requirements in Europe. The monetary stringency in India enabled the India Council to sell its drafts freely, and it has sold without being too ready to raise its price. By this policy it has disposed of no less than seventy lacs yesterday and to-day. With the Bank of Bombay rate at the record level of 13 per cent., the strain upon traders must be very great.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7 and 8 Vict., cap. 32, for the Week ending on Wednesday, February 23, 1898.

Stock Market Notes and Comments.

The past week has been rather lively on the Stock Exchange. Markets generally are interesting when "bears" are having innings, and thanks to Mr. Chamberlain and two or three American railroad bosses, they had a fine time of it in the end of last and beginning of the present week. It is not often that two scares come together, as they have done on the present occasion. The Secretary of State for the Colonies did his best to terrify everybody last Saturday by the portentous manner in which he foreshadowed a possible row with France over territory in West Africa, territory, it is pretty certain, quite useless to either country. He really, we may surmise, thought only of "dishing Salisbury." Last week too, we had formidable telegrams from Montreal announcing a tremendous outbreak of hostilities between the Canadian Pacific and Grand Trunk Railways; and from New York came messages telling us that the entire railway system of the North-West was practically in a state of hostility. Rates were being "cut" not only for the Klondike traffic so-called, but for local traffic also. As by magic, the whole prospect had suddenly changed. They are really very funny fellows these American railroad managers. Being quite free from any control by shareholders or boards of directors, either in America or here, they make war or peace in all probability according as it suits their bets on the Stock Exchange. Not many weeks ago all the news from across the water was of peace and abundance. Such a thing as "rate cutting" was never to be heard of again; prophecies of coming dividends were freely given forth, and we were told that a long era of prosperity lay before the United States, and, therefore, before any one who bought their depreciated railroad securities. Having succeeded by these flowery statements in drawing speculative people, both in America and here, into considerable purchases of such securities, and having probably unloaded very freely to these purchasers, the railroad bosses suddenly resolved to have "a fight." No sooner said than done. A "desperate conflict" immediately arose by cable, and prices went tumbling down faster than they had risen. How much those behind the working of this system of market plundering may have made in this latest raid it is impossible to estimate; but in a general way it is known that no surer path to the millionaire's heaven can be found than that of the management of a big American railroad. What the rights or the wrongs are of the present dispute it is hardly worth while to ask. Who began the struggle it is equally useless to know. The North-Western roads of the States, by the voice of their controllers, say the Canadian Pacific started the cutting, and the Canadian Pacific managers retort that it was begun by the Grand Trunk, and by others of its neighbours. On the other hand, Grand Trunk poses as a victim of the overbearing tendencies of its great rival and insists that the dispute is essentially insignificant and local. Of the three classes of virtuous protesters we are on the whole inclined to believe the Grand Trunk. It has too often been "put upon" of late years not to seem fair game still, but, being now well managed, it should be able to give a better account of itself in the fight than it has hitherto done. The rise in its stocks though must have been an irresistible temptation, and we are told that Montreal "went bear," before the last news came, for more than it was worth.

Of more importance to the British holder of the securties involved in this struggle is the question how long will it last? That, we suppose, will depend to a considerable extent on how far the "bear" account opened before the conflict broke out has been closed. It is not in the nature of 'bear" accounts such as this to be kept open, very long, and we consequently believe that the struggle will be as brief as it may be sharp. Within the next two or three weeks, in all probability, the whole thing will be over, and markets run full tide upwards again. This, however, is merely an outsider's view. We watch the play and try to discover the influences at work, but have no inside experience or knowledge of it whatsoever. It interests us much as watching a gaming-table does, and the opinion we express is only valuable as being the result of many years' observation. Times and again this sort of thing has occurred, the general mass of players have lost their money, and the few have become rich.

Whether the limit of time we have ventured to give will see the end of this episode or not, holders of United States and Canadian railroad securities may be quite sure of one thing; the present is not the right time for them to sell. They should never yield to manufactured scares whose almost avowed object it is to get them to throw away their securities. Those who play for a small profit ought rather to be buyers than sellers now, and what has taken place is a testimony to the prudence of the advice given by us week after week in this column—not to go for large profits in these securities, however true it may be that the broad, general tendency of the market for them is upward. Breaks of the kind witnessed this week are sure to

occur at more or less frequent intervals, as speculators in control of the railroads, or in touch with the management, see their chance of gathering in a few more million dollars at the expense of the weak "bull." No man, consequently, ought to buy more of any of these securities than he can hold on to through the severest of such spasms. The man who buys more than he can carry in a storm invariably ends by losing what money he may have, and very often loses a great deal more than he can afford. It is the height of folly to put the hand out further than it can be drawn back.

The political and railroad flurries had comparatively little effect upon the settlement which was successfully concluded last night, with rather fewer messes than might have been expected. There would have been more but for the customary patchings-up; but, after all, the market stood up to its losses very well. Naturally, the differences to be paid by the operators for the rise have been heavier in all departments, but the fall was not so severe as might have been expected, because the public is not widely committed in a speculative way at present on the Exchange itself. A certain amount of weakly-held stock was flung on the market and absorbed without difficulty, and the way is now open for a fresh rise, or nearly so. The settlement in mines was the hardest—harder even than an American or Canadian railway—because of the high rates for money, and the steady decline in the price of "Kaffir" shares. Even this, however, passed off without apparent strain, and prices were put up again at once in the mechanical way which indicates a market still well in the grasp of the financiers by whom it has been brought to its present position. Home securities have not fallen much because there is no account in them carried over fortnight by fortnight in the Stock Exchange; at least, none of any importance. Even Consols dropped less than ten shillings on Mr. Chamberlain's lugubrious utterance, a fact which ought to disappoint him as a lover of theatrical effect.

The chief trouble of the settlement, apart from the differences which had been found on American railroad shares, and on South African mines, has been the dearness of money. That, however, will not last much longer. Perhaps by the middle of March our own Government's payments will be going out sufficiently fast to send rates of interest down and make borrowing more easy. By the end of next month at the longest there is every appearance of cheaper money. No doubt, should both an Indian and a Chinese loan be issued next month, or early in April, they would do something to sustain rates, but they would not control credit in the effective way the Government now does by holding the taxes. Short of fresh scares, however, the prospect is by no means a bad one for holders of securities, but scares are things that come unawares, like measles, mumps, and whooping-cough.

The Week's Stock Markets.

The feeling of uneasiness produced by the aspect of affairs in West Africa caused a dull tone to prevail in Stock Markets towards the close of last week, but it was not until Saturday that a "slump" really occurred. Mr. Chamberlain's statement in the House of Commons on Friday night caused so much uneasiness that prices came down with a run. A partial rally occurred on Tuesday in all departments, due to the bears repurchasing, and it was soon found that the public was not throwing stock on the market. Heavy sales on the part of Wall-street operators then caused a collapse in United States Railroad shares, the forced closing of weak accounts being the principal reason for the decline, but Wall-street operators evidently intend waiting the outcome of the Cuban business before in any way increasing their commitments. The "war of rates" between the Canadian Pacific and other roads also helped to further depress prices, and a dull tone spread to all markets. The settlement of the account has absorbed a good deal of attention, but it was easily arranged, although one or two failures are rather looked for in the "Kaffir Circus," and several operators will want helping over.

Consols were but little affected by the political "scare," and remained remarkably steady through it all, and the appearance of the Government broker as a buyer finally caused a sharp upward movement; but the latest price is not quite the highest of the week. The Indian sterling loans have been rather pressed for sale (the weakness being due to rumours of an approaching loan), and the dull tone has also spread to Colonial Government securities.

Home Railway stocks suffered more than any other by the political scare, and prices dropped heavily, more especially for Brighton "A," Metropolitan, South-Eastern deferred, and the Scotch stocks. Those that gave way most, however, took the lead in the subsequent advance, and in several cases more than recovered the amount of the fall. Continuation rates at the settlement were about the same as last time, Midland, North Eastern, and South Eastern deferred being continued at ⅛ to ¼, Metropolitan and Great Western at ¼, London and North Western at 5/16, and Brighton deferred at ⅜ to ½ per cent. Great Eastern stock was again scarce for delivery, the rate varying from ⅛ "backwardation" to "even." There has been a steady and continuous fall in the premier securities of the leading companies. Traffic returns were all satisfactory, comparing as they do with large takings last year.

United States Railroad shares were rather firmer in price for a brief period, but suffered in common with all other departments last Saturday. The various rumours current respecting the *Maine* disaster, and the rate war between the Canadian Pacific, Northern Pacific, and Great Northern roads, have been quite enough in themselves to knock prices down all round, and, despite one or two short-lived rallies, the result of the week's operations is that quotations leave off generally lower. Tuesday being Washington's birthday, did not tend to help matters, Wall-street operators closing their commitments before the holiday, and home realisations in view of the settlement here also helped to depress prices. The account was easily arranged, and stock was more plentiful than a fortnight ago, but rates reached a slightly higher level, viz., 4½ to 5½ per cent. The telegrams from Montreal, on Saturday, announcing further "rate cutting" by the Canadian Pacific Company, were followed by heavy selling orders, and Canadian Pacific shares fell about $7,

but recovered a little of the lost ground afterwards. The Grand Trunk Company being also implicated, although only to a minor extent, that company's stocks declined somewhat sharply, and then a partial rally followed.

In the Foreign market prices were marked down steadily day after day, during the earlier part of the week, but the firmness of the foreign Bourses was finally reflected on the London market and a more cheerful tone prevailed. The various Chinese loans advanced on the news from Berlin that a loan for £16,000,000 sterling had been arranged. Spanish 4 per cent. have been pressed for sale, chiefly on Paris account, due to the vague notification by the Bank of Spain to the effect that the April coupons would be paid as usual, but that the bank could not pledge itself as to the future. Greek bonds have been fairly steady, and Italian rentes, after being very weak, rallied. Among South American issues Argentine descriptions fell sharply, and partly recovered; but Uruguayan 3½ per cents. have exhibited great strength on the announcement of a remittance for the debt service, coupled with the general improvement in the political situation at Monte Video. Continuation rates were slightly firmer than on the last occasion Argentine stocks being carried over at from 3 to 5 per cent., and other South American issues at from 4 to 6 per cent., the general rate ranging from 3¾ to 4¼ per cent.

Foreign Railway stocks shared in the general weakness, and the publication of a batch of good traffic returns only acted as a temporary check to the downward trend of prices. Argentine issues have been the principal sufferers, but the Mexican, Mexican Central, and Interoceanic companies have also lost ground considerably.

The Miscellaneous market has been the firmest in the Stock Exchange, although some of the leading favourites have been adversely affected by the weakness in other departments. Electric Lighting companies have again attracted buyers, several more satisfactory reports coming to hand, and Notting Hill shares were especially firm on the publication of a dividend of 6 per cent. Russian Petroleum ordinary marks a further substantial rise, but Salt Union issues have again declined heavily. Hudson Bay shares dropped several points and then recovered, despite a contango of 1s. 9d. Welsbach Gas stocks have met with little or no support, and a small amount of profit taking was quite enough to put down the price several points. Allsopp ordinary stock jumped from 160 to 164 and back again, otherwise few changes have occurred in brewery issues. Several insurance companies' shares mark declines. Among telegraph companies Cuba Submarine has slipped back a little. A feature in gas stocks was a big rise in Croydon "A" and "B."

Heavy selling of United States railroad shares was the principal feature at the close of the week, various wild rumours about the *Maine* disaster being circulated, and stock was almost unsaleable for a time, but the last prices are ½ to 3 dollars above the lowest of the week. Canadian railway issues closed dull in sympathy, and the Grand Trunk traffic return was looked upon as unsatisfactory. Home railway stocks left off fairly steady, and Mexican railway issues registered a rise just before the close. Among foreign government bonds Spanish 4 per cents. closed very weak, and Argentine and Uruguay bonds also fell sharply.

Mining and Finance Companies.

South African ventures have been very depressed all the week, the action of President Kruger in dismissing Chief Justice Kotze being looked upon as an unsatisfactory sort of start to his new term of office. Towards the close there has been a slight rise owing to Paris taking a few shares off the London market, but the difficulties of several operators disclosed at the settlement have tended to check any very decided rally. In Western Australian companies, Lady Shenton and Northern Territories have attracted most attention, but there has been very little real business. Continuation rates were about as usual, 7 to 9 per cent. on "Kaffirs," and from that up to 12 per cent. on "Westralians." Indian and copper shares show a slightly harder tendency towards the last, after dragging heavily for days.

Mr. Labouchere is to move, in Committee on the Army Estimates, to reduce the number of the men by 13,367.

Japan, having pressed China to renew a previous assurance that Russia would withdraw from Port Arthur after the winter, the Chinese Government appealed to the Russian Government, and the latter explained that the warships would have to remain longer than was at first proposed. The Chinese look upon this as an intimation that the Russian occupation is meant to be permanent. Of course. Did anybody suppose it was meant to be anything else?

Dividends Announced.

MISCELLANEOUS.

JOHN OAKEY & SONS, LIMITED.—Final dividend on the ordinary shares of 5 per cent. for the half-year ended December 31, together with a bonus of 2½ per cent. making 12½ per cent. for the year.

COUNTY OF LONDON AND BRUSH PROVINCIAL ELECTRIC LIGHTING COMPANY.—Dividend on the preference shares for the six months ended December 31 at the rate of 6 per cent. per annum. £10,000 carried forward.

LONDON STREET TRAMWAYS COMPANY.—Distribution of 12s. 6d. per share out of the amount standing to the credit of revenue account from the making of the company to October 14, and from the revenue reserves.

PLANET BUILDING SOCIETY.—3½ per cent. has been declared.

ARGUS PRINTING COMPANY, LIMITED.—Dividend at the rate of 8 per cent. has been declared, £1,250 being placed to a special reserve account, and £1,529 carried forward.

JOHN HUNTER, WILTSHIRE & Co.—5s. 6d. per share tax free, being at the rate of 11 per cent. per annum for the six months ended December 31, making, with the interim dividend paid in August, 8 per cent. for the year. £700 to be placed reserve fund; £1,000 to be written off business purchase account; and £1,316 carried forward.

LIBERTY & Co.—Dividend at the rate of 12 per cent. per annum on the ordinary shares for the year ended January 31.

DRURY-LANE THEATRE ROYAL.—Interim of 10 per cent. on the paid-up capital.

INTERNATIONAL INVESTMENT TRUST.—Usual dividend at the rate of 4½ per cent. per annum on the preferred stock for the half-year ended January 31.

E. & S. JAY, LIMITED, GRENOBLE.—Dividend declared for the year 1897 at the rate of 6 per cent. per annum on the preference and ordinary shares.

CIVIL SERVICE SUPPLY ASSOCIATION.—A distribution at the rate of 12s. in respect of every ten £1 shares. £2,000 placed to reserve, and £4,942 carried forward.

BRILLIANT GOLD MINING COMPANY.—6d. per share has been declared.

HART & LEVY, LIMITED.—Final dividend on the ordinary shares at the rate of 8 per cent. per annum for the half-year ended December 31. £1,500 to reserve and £588 carried forward.

AFRICAN CITY PROPERTIES' TRUST, LIMITED.—Dividend of 1s. 6d. per share on the ordinary shares, which, with the interim dividend paid in September last, makes 2s. 6d. per share, or 12½ per cent. for the year. £5,800 placed to reserve and balance forward of £6,896.

KAFFIRS CONSOLIDATED INVESTMENT AND LAND COMPANY, LIMITED.—Warrants for the usual monthly dividend of 3d. per share have been posted.

H. E. RANDALL, LIMITED.—From an available balance of £7,461, the preference dividends are paid and a further dividend recommended at the rate of 12 per cent. on the ordinary shares, making 10 per cent for the year and leaving £2,178 to be carried forward.

CASSELL & Co., LIMITED.—5 per cent. for the half-year, making, with the interim dividend paid in September last, a distribution for 1897 of 7½ per cent.

BOLCKOW, VAUGHAN, & Co.—Dividend at the rate of 5 per cent. per annum for the year ended December 31st last, less the interim dividend paid in September; £25,000 to be placed to reserve, £43,500 to be spent on new plant, and £60,800 carried forward.

GLASGOW EVENING NEWS.—A dividend of 12½ per cent. has been paid for the past year and a large sum carried to reserve.

SURREY COMMERCIAL DOCK COMPANY.—Directors recommend a dividend of £2 10s. per cent. on the ordinary stock, and on the preference stock "A," making, with the interim dividend alreadty paid, 5 per cent. for the year, and in addition a bonus of £1 per cen.

STATE FIRE INSURANCE.—Dividend declared at the rate of 5 per cent. per annum.

EAST LONDON WATERWORKS.—A dividend at the rate of 8 pe cent. per annum is declared for the past half-year, leaving a balance of £19,627 to be carried forward.

MOUNT LYELL MINING AND RAILWAY COMPANY.—Dividend is declared of 4s. per share.

BANKS.

ANGLO-CALIFORNIAN.—Further dividend of 6s. per share, making, with interim dividend paid in September last, 6 per cent. for the year. £9,252 to be carried forward.

CREDIT ANSTALT.—Dividend of 17 florins per share, 250,000 florins to be placed to reserve and 275,000 florins to be distributed as bonus to directors and staff.

ANGLO-FOREIGN, LIMITED.—Share warrant coupon No. 50 will be payable at 5s. per share on and after Monday 28th inst.

BANK OF AFRICA.—Distribution to be recommended of £31,500 for dividend and bonus (equal to 12 per cent. per annum), £10,000 to reserve fund, £1,500 to pension fund, and about £9,500 to be carried forward.

RAILWAYS.

NEATH AND BRECON.—After payment in full of the first "A 1" and debentures there is sufficient to pay a dividend for the year of £2 5s. on the "A 2" debentures. This compares with £1 5s. in 1896 on the latter.

GREAT NORTH OF SCOTLAND.—Dividend on the ordinary stock for the half-year to January 31 will be at the rate of 4 per cent. per annum, carrying forward £3,000. For corresponding period of 1896-7 the distribution was at the rate of 3½ per cent. with £2,791 forward.

BREWERIES.

COLCHESTER BREWING COMPANY, LIMITED.—Usual interim dividend of 3s. 6d. per share on the preference shares, and an interim dividend of 2s. per share on the ordinary shares for the half-year ended December 31.

INDEMNITY MUTUAL MARINE ASSURANCE.—A dividend of 6s. per share is recommended.

MINING RETURNS.

PAHANG CORPORATION.—Jeram Lumpong: 1,235 tons of stone crushed, producing 70 tons of black tin. Jeram Batang: 1,110 tons crushed, producing 10 tons of black tin.

WILD HERCULES.—200 tons of ore yielded 135 oz. retorted gold.

HIGHLAND CHIEF.—Crushed 275 tons, yield 109 oz. of retorted gold.

OTTOO KOPJE DIAMOND.—5,921 loads washed, 180 carats won, including one stone each of 11½ and 9½ carats.

BRILLIANT BLOCK.—Crushed during month, 1,153 tons of quartz, for a yield of 455 oz. gold.

LAKE GEORGE MINES.—A shipment is announced of 140 tons of matter, containing 182 oz. of gold, 11,235 oz. of silver, and 42 tons of copper.

ROYAL SOVEREIGN.—73 tons of ore crushed, yielding 168 oz. of gold.

CONSOLIDATED MURCHISON.—Crushed, 481 tons; obtained, 493 oz.

CROWN DEEP.—For January:—Tons crushed by stamps, 22,082; yield in smelted gold, 6,869 oz.; tons of sands and concentrates treated by cyanide 20,180; yield in smelted gold 6,560 oz.—total, 13,429 oz.

MYSORE WEST AND MYSORE-WYNAAD CONSOLIDATED.—1898:—The mill ran 788 hours, crushed 1,500 tons, and yielded 516 oz. of bar gold.

NOURSE DEEP.—For January:—Tons crushed by stamps, 7,350; yield in smelted gold from mill, 3,780 oz.; tons of sands and concentrates treated by cyanide, 5,673; yield in smelted gold, 1,619 oz.—total, 5,399 oz.

ROSE DEEP.—For January:—Tons crushed by stamps, 14,706; yield in smelted gold, 5,955 oz.; tons of sands and concentrates treated by cyanide, 12,352; yield in smelted gold, 3,711 oz.—total, 9,666 oz.

LADY SHENTON.—Tons crushed 552. Yield, 1,518 ozs. smelted gold.

IVANHOE.—Clean up for two weeks, 1,354 ozs. of gold from 793 tons of ore crushed. Tailings assay 17 dwts. per ton.

MOUNT LYELL MINING AND RAILWAY COMPANY.—From January 13 to February 9 inclusive a total quantity of 8,873 tons of ore has been treated, 7,259 tons from open cuts assaying before treatment:—copper, 3·32 per cent.; silver, 4·24 oz. per ton; gold, ·237 oz. per ton—1,613 tons from No. 4 tunnel assaying before treatment:—copper, 7·41 per cent.; silver, 10·07 oz. per ton; gold, ·067 oz. per ton. The converters have produced during the same period 366 tons blister copper containing:—copper, 361 tons; silver, 37,217 oz.; gold, 1,740 oz.

DAY DAWN BLOCK AND WYNDHAM GOLD.—Result for fortnight ended February 19:—Tons crushed, 1,290; yield of gold, 1,602 oz., including tailings.

BURBANK'S BIRTHDAY GIFT.—Crushed, 373 tons; yield, 505 oz. free gold, exclusive of tailings.

VICTORY, CHARTERS TOWERS.—Crushed for the fortnight from No. 3 shaft, 119 tons for 495 oz. of gold. Approximate value, £1,650. Profit, £900.

OURO PRETO.—5,466 tons of ore produced 1,425 oz. of gold.

HYDERABAD (DECCAN).—The output of coal from the Singareni Collieries for the four weeks ended January 29, was 29,992 tons. The output for 1897 gave an average per month of 28,042 tons.

NEW AUSTRALIAN BROKEN HILL CONSOLS.—One ton, three cwts., containing 4,200 oz. of silver.

JUBILEE.—Quartz mined, 15,253 tons; development, 862½ ft. Tons crushed, 13,109. Cyanide works.—Bullion recovered, 1,969 oz., 14 dwts. Ore reserve.—Ore at grass, 1,993 tons. Cash profit per quarter, £10,098. Expenditure on capital account, £1,546.

FRANK SMITH DIAMOND.—3,900 loads washed, producing 180 carats, including one stone of 34 carats.

ST. AUGUSTINE.—1,450 loads washed yielded 66 carats, value £120.

ST. JOHN DEL REY.—Gold produce 11th to 19th February £3,100. Yield per ton ·40 of an oz. troy.

GREAT BOULDER PROPRIETARY.—The West Australian Bank has shipped 3,293 oz. of gold per steamer *Oceana*, estimated value, £13,500.

According to the *Frankfürter Zeitung*, the Sultan has explained to the German Ambassador at Constantinople that he takes a favourable view of the proposal that two Powers—presumably France and Italy—should undertake the pacification of Crete by the instrumentality of their own officials. No doubt; all the more if, as is stated, his Majesty believes that such a step would remove the burning question of the governorship from troubling him for a long time. But *would* it remove this burning question?

The Attorney-General of Queensland has ordered the prosecution of the late directors and auditors of the Queensland National Bank.

WEALTH OF NATIONS.

A very condensed report of the meeting held on the 11th inst. has been sent to the shareholders in this company. None of the hostile criticism has been printed. Doubtless the chairman was prudent in himself moving the motion for a committee after the result of the meetings of other companies in the proposed group, and it is to be hoped the gentlemen chosen will get some good reasons for the proposed absorption of their company. Accounts to September 30, 1897, are also published, showing a cash balance of over £20,000. This, we gather from the chairman, has since been reduced to £16,000. With this money in hand, if amalgamation is decided upon, they ought to have more equitable treatment. It seems cool that shares in this company with some cash left should be offered on exactly the same terms as shares in another concern with a large debt. Whether amalgamation should be accepted is a question for the committee. If the property is as good as the directors believe, would it not be better to keep clear of the London & Globe scheme? One point we would emphasise—the amalgamation, if agreed to, should not include companies which have had no existence outside the offices of their promoters.

Railway Traffic Returns.

Algeciras (Gibraltar) Railway.—Traffic for week ended February 12, Ps. 21,780; increase, Ps. 1,940. Aggregate from July 1 Ps. 661,409; increase, Ps. 11,703.

Bengal Central Railway.—Traffic for week ending January 29, Rs. 30,266; increase, Rs. 12,132. Total from January 1, Rs. 86,667; increase, Rs. 11,462.

Bengal Dooars Railway Company.—Traffic receipts for week ending January 15, Rs. 3,610, against Rs. 4,886.

Burma Railways.—Receipts for week ending January 22, Rs. 2,01,858; decrease, Rs. 32,494. Aggregate from January 1, Rs. 598,219; decrease, Rs. 127,200.

Cleator and Workington.—Gross receipts for the week ending February 19 amounted to £998, a decrease of £180. Total receipts from January 1, £7,120, a decrease of £503.

Anglo-Argentine, week ending January 24, £257 increase; Vienna Omnibus, week ending February 5, £291 increase.

City of Buenos Ayres, week ending January 24, £664 increase,

Answers to Correspondents.

Questions about public securities, and on all points in company law, will be answered week by week, in the Review, on the following terms and conditions:—

A fee of five shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of five shillings must be sent to cover the cost of such letter, the fee then being ten shillings for one query only, and five shillings for every subsequent one in the same letter. While making this concession the Editor will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus:—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway?"

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The Editor has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market manipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The Editor further respectfully requests that merely speculative questions should as far as possible be avoided. He by no means sets himself up as a market prophet, and can only undertake to provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the Investors' Review, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

J. H. S.—Your letter was forwarded on the 23rd inst.

E. H. W.—I have received your letter, and will endeavour to send some suggestions.

C. J.—Divide the money among several banks—Scotch or English, avoiding any that offer exceptionally large rates of interest, which is never a good sign. Bank of England notes are legal tender under all circumstances.

Next Week's Meetings.

Monday, February 28.

Holborn and Frascati Restaurant ...	Holborn Restaurant, 3 p.m.
Rossendale Valley Tramways ...	61, Gracechurch-street, 3.30 p.m.
Scottish Employers' Liability Insurance	Aberdeen, 1 p.m.
South Yorkshire Junction Railway...	23, Queen Victoria-street, 3 p.m.
Tunbridge Wells Gas...	Tunbridge Wells, 7 p.m.

Tuesday, March 1.

Bank of British North America ...	3, Clement's-lane, 12.30 p.m.
Crescent Gold Mining Company ...	6, Queen-street-place, 3 p.m.
Hull, Barnsley, and West Riding Junction Railway (Spec.)	Winchester House, 2 p.m.
John Oakey & Sons	Albion Tav., Aldersgate-st., 12.30 p.m.
Junior Army and Navy Stores ...	St. Martin's Town Hall, 2.30 p.m.
Legal and General Life Assurance ...	10, Fleet-street, 2 p.m.
Marbella Iron Ore	78, Queen Victoria-street, 2 p.m.
M. B. Foster & Sons	242, Marylebone-road, 11 a.m.

Wednesday, March 2.

Barcelona Tramways...	Winchester House, noon
City of London Electric Lighting ...	Ditto, 2.30 p.m.
London and Australasian Deb. Corp.	Ditto, 2 p.m.
Nine Reefs Company	6, Queen-street-place, 11.30 a.m.
Oriental Gold Mining of India ...	Ditto. 12.30 p.m.

Thursday, March 3.

International Bank of London ...	Winchester House, noon.
Kensington and Knightsbridge Electric	1, Gt. George-street, S.W., 5 p.m.
London Street Tramways	Cannon-street Hotel, 1 p.m.

Friday, March 4.

Pontypool Gas and Water (Gen.) ...	Pontypool, 2.30 p.m
Scottish Temperance Life Assurance	Glasgow, 1 p.m.

Saturday, March 5.

Town and County Bank	Aberdeen, 12.30 p.m.

The Select Committee on Money Lending has resumed its sittings at Westminster. Mr. T. W. Russell has been re-elected chairman. It is now to concentrate its attention upon legal points and possible remedies.

To those about to leave for Klondike. Do not apply to Canadian insurance offices for life insurance. They will refuse it.

GOVERNMENT AND THE CHARTERED COMPANY.

Mr. Chamberlain's memoranda of proposed alterations in the administrative powers of the Chartered Company were published yesterday. Their effect seems to be that all administrative work will be carried through or controlled by the Crown and its own officers. No responsibility toward the debenture or share holder will be assumed by the Crown : that is to remain with the board of directors. Life directors are to be withdrawn, and the whole board elected by the shareholders. Any director or official may be removed from office by the Secretary of State, and is not eligible for re-election without his consent.

Financially, the company does not seem to benefit much, as the greater part of the cost of administration is to be borne by it.

THE PROPERTY MARKET.

The animation of last week—which closed with a total of sales of £189,858, as compared with £94,787 in the same week last year—at the London Mart has been continued during the present. On Monday the day's sales amounted to £36,087. The chief feature of the day, however, seemed to be the unpopularity of big breweries. The Biggleswade Brewery, with 109 tied houses, was put in at £80,000, and the biddings rose to £132,500, when, as no further offer was made, the auctioneer withdrew the property at £160,000. The Wolverhampton Brewery, with fifty-three licensed houses attached, was withdrawn at £76,000. The Old Lion Brewery, at Tipton, with its following of twenty-three public and beer-houses, did, however, find a purchaser at £27,500. Mr. Alfred Thomas was the auctioneer. Other properties offered were of minor interest, but the bidding was brisk. Two freehold houses in Blythwood-road, Crouch Hill, went for £1,500, while another freehold property at Kingston Hill, Surrey, brought £1,520.

No. 6, Seamore-place, which was for many years the residence of the late Lord Monk-Bretton, has been sold by Messrs. William Grogan & Boyd. The property is freehold, and the price secured is stated to approach £40,000.

The produce of Tuesday's sales at the Mart was £26,755, and business thus continues fairly good. Messrs. W. W. Read & Co. were the principal operators, and there was keen competition for their principal lot, a freehold ground rent of £200 per annum on premises in Lombard-street, with reversion to the rack-rent in thirty-six years. It went for £12,200, which is sixty-one years' purchase. The same firm disposed of a number of freeholds at Stratford at the satisfactory total of £7,000. Messrs. Segrave, Browett, & Taylor sold a freehold house in Betterton-street, Long Acre, rent £55, at £1,015 ; while Herring, Son, & Daw disposed of one at Streatham at £1,360. A third, of £12 10s., went for £780. The remaining lots were of minor importance.

Messrs. Debenham, Tewson, & Co. resumed their sale of the assets of the Land Securities Company, Limited, in liquidation, at the Mart, on Wednesday. Only one lot failed to go off, and the remaining lots brought a total of £12,615. Messrs. Robert Tidey & Son cleared a long list of brick and mortar investments, but the other sales were not of a very important class. The total amount realised for the day was £20,675.

There was an interesting sale of local shares at Sheffield on Tuesday, under the auspices of Messrs. Nicholson, Greaves, Barker, & Hastings. Among the prices obtained were :—Sheffield Union Bank, £60 shares, £10 paid, £25 and £25 2s. 6d. ; Sheffield and Rotherham Bank, £50 shares, £8 paid, £26 5s. ; Sheffield and Hallamshire Bank, £100 shares, £25 paid, £64 7s. 6d. ; Sheffield Forge and Rolling Mill Company, £10 shares, fully-paid, £11 5s.

On Tuesday, at the Thatched House Hotel, Manchester, Messrs. C. W. Provis & Son offered for sale fifteen freehold dwelling-houses in Vernon-street, Ardwick, subject to a chief rent of £35 4s. 6d., and producing a gross annual rental of £219 14s. The property realised £2,030.

NOTICES.

EAST AND WEST INDIA DOCK COMPANY.—Notice is given that for the purpose of carrying out the conversions of securities under the new scheme of arrangement of the East and West India Dock Company, the Registers of the Debentures, First Mortgage Certificates, East and West India Dock Debenture Stock, Mortgages and Deferred Debenture Stock, will be closed from March 1 to 21, inclusive. Up to and including February 28, the company will receive transfers of the old description of securities. While the registers are closed the company will not receive any transfers except for ordinary stock. On the re-opening of the registers the company will only recognise transfers for the new description of stocks created by the scheme. The new certificates will be ready for issue or exchange on March 22. The interest which has accrued on the old securities from January 1 to February 12, 1898 (the date of confirmation of the scheme) will be paid on March 22, when the registers are re-opened.—J. G. BROODBANK, Secretary.

The Customs returns of New South Wales for 1897 show that the imports amounted in value to £21,744,350, an increase on 1896 of £1,182,840, and the exports to £23,602,991, an increase of £592,642. The exports thus exceed the imports by £572,642.

Prices of Mine and Mining Finance Companies' Shares.

Shares £1 each, except where otherwise stated.

THE NEWFOUNDLAND RAILWAYS.

An important contract has been concluded between the Newfoundland Government and Mr. Reid, the builder of the railway across the island. According to this, Mr. Reid, or his representative, is to work the entire railway system of 650 miles, for 50 years, receiving a grant of 2,500 acres of land per mile. He is to pay $1,000,000 now, and $6,000,000 more at the end of the period. He also buys St. John's Dock for $350,000, and the Government elegraph lines for $125,000, and undertakes, in consideration of a subsidy of $100,000 for 30 years, to build seven mail steamers to ply in the great bays, and for a payment of $140,000 to build an electric railway in St. John's, and pave the main streets with granite. A wonderful contract, which seems, at least, good for Mr. Reed. It is, however, very highly thought of in the colony.

New South Wales is devoting increased energy to bringing forth her wealth of coal. Last year the output amounted to 4,417,600 tons, exceeding the production of 1896 by nearly 500,000 tons.

Messrs. E. Morewood & Company, of the South Wales Tinplate Works, Llanelly, have been compelled to ask the indulgence of their creditors, in consequence, as they say, of losses from strikes and the depression in the tinplate industry. The firm has maintained an exceptionally high position for many years, and employed about 1,200 hands at the Llanelly works, and 700 at Cwmbwrla. It was converted into a limited liability company last year, with a capital of £168,750.

The Victorian gold yield for January was 43,760 oz., showing an increase on the output in the same month last year of 16,085 oz.

The redemption of the Swiss railways by the State has been carried on the referendum by an unexpectedly large majority. The numbers were—for the proposal, 384,146 ; against, 177,130.

Roumanian receipts and expenditure, according to the Finance Minister's Budget statement, balance at 222,000,000 francs, as compared with 215,000,000 francs last year. The Minister has also introduced a Bill for the conversion of 446,634,000 francs worth of the State debt.

Ominous rumours come from Cleveland, Ohio, that an effort is being made by the Carnegie Iron Company to form a trust controlling the entire pig-iron of the country.

Frenchmen seem incorrigible on the subject of bounties. They are restive about the sugar bounties, and seem inclined to join in the Conference which will probably result in their abolition. Yet here we have the Budget Committee calmly recommending a 60 cent. per kilo bounty on cotton, 400 francs per par of silk spun from French cocoons, and 340 francs for silk spun from foreign cocoons. The bounties are to remain in force for ten years—if the taxpayers do not kick against them before that.

There can be no doubt that Germany is showing great activity in preparing for the exploitation of whatever mineral wealth there may be in its leasehold property around Kiao-Chau. It has already concessions for two railways, and negotiations for others are still in progress. Besides these, the German Asiatic Bank is also active in negotiation. Coal mines and the flotation of subsidiary companies for various undertakings in China are its especial care. It seems intended to pay particular attention to the opening up of the coal mines in the locality. A German official, who has been to Kiao-Chau, during a recent lecture in Berlin declared Chinese coal far superior to Japanese, and Germany meant soon to export coal to Japan. What if the Japanese were to refuse belief in its superiority ?

The Madras Government reports that the total public works expenditure to the end of the famine will amount to 71 lakhs. This is more than was previously estimated—60 lakhs being the amount then allotted to the Public Works Department, while the Civil Department had 33 lakhs. This may possibly be slightly reduced ; but the Government, "in the uncertainty of the Public Works system of accounting," is "reluctantly forced" to an estimate of 100 lakhs. Just so. The "uncertainty" of public ways of accounting is very general—and generally ends in sending the balance to the wrong side

There may be no hitch in the negotiations for the Sugar Bounties Conference, but it does not look as if these negotiations were going quite smoothly. There is, however, we are assured, "no question of an indefinite postponement of the Conference."

It is stated in Berlin that the Imperial Postal Department has concluded a contract for a regular fortnightly mail steamship service between Shanghai and Kiao-Chau, the steamers also going on to Chifu and Ta-ku.

The profits of the Vienna Crediteurstalt last year amounted to 4,936,000 fl., as compared with 5,224,000 fl. in 1896. The directors propose a dividend of 17 fl. per share.

NEW BOOKS RECEIVED.

We have to acknowledge receipt of a number of extremely interesting official publications from New South Wales. One is a "Statistical Account of the Seven Colonies of Australasia, 1895-96," by L. A. Coghlan. It traces the progress of the Colonies mainly since 1861, although in some instances the information extends back to the very beginning of settlement. At the close of the year 1861, the population of Australasia, excluding the uncivilised native races, amounted to 1,265,898; in 1895 it had increased to 4,238,369. The tonnage of shipping entered and cleared rose from 1,076,856 in 1861 to 6,859,936 in 1895; while inter-Colonial shipping rose from 1,751,628 in 1861 to 11,309,401 in 1895. The value of imports and exports taken together in 1861 was £35,061,282; in 1895 it reached £67,606,523, or very nearly double. The volume of trade between the Colonies in 1861 amounted in value to £17,166,925, rose to £60,114,797 in 1891, and fell to £47,231,360 in 1895. The deposits in banks and saving institutions now amount to £130,246,495.

Another work by Mr. Coghlan, published officially, is "The Wealth and Progress of New South Wales, 1895-96." It is in two closely-packed volumes, and gives an interesting outline of the progress of the Colony. The volume of "The Wealth and Progress of New South Wales" for 1896-7 has likewise been sent us. We have also received "New South Wales: The Mother Colony of the Australias," with maps and many illustrations; and the "New South Wales Statistical Register."

We have received copies of Messrs. Mathieson's handbooks and traffic tables, which show the same care and comprehensiveness of get-up as have always characterised these useful little works of reference. Panton Ham's "Universal Interest Tables" (Effingham Wilson) are also on our table. They are on the decimal system, and the interest may be calculated for any number of days, on any sum of any current coinage of the world.

"Queensland Past and Present: an Epitome of its Resources and Development," is another compact Colonial compilation, which gives in brief compass a vivid picture of Queensland, geographical, commercial, and social. The author is Mr. Thornhill Weedon, compiler of general statistics.

A copy of a "Handbook of the Workmen's Compensation Act, 1897" (Cardiff: *Western Mail*), by M. Roberts-Jones, has reached us. It is the fifth edition of a useful little work, in which the effect and general bearing of the Act in question are simply and lucidly explained. The author makes several suggestions as to the improvement of the Act in the interests of workmen, especially in encouraging "friendly schemes" of compensation in connection with Friendly Societies.

* Statements of gross traffic.

Prices Quoted on the London Stock Exchange.

Throughout the INVESTORS' REVIEW middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the INVESTMENT INDEX published quarterly—January, April, July, and October—in connection with this REVIEW, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the REVIEW almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the INVESTORS' REVIEW any subscriber can follow for himself the movements of securities from week to week, and the INVESTMENT INDEX will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S.F. Snk.Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D.Stk., *debenture stock*; Pf., Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Ans., *annuities*; Cu. or Cm., *cumulative*; Gu or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Insc., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*.

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

EDITED BY A. J. WILSON.

Vol. I.—No. 9. New Series. FRIDAY, MARCH 4, 1898. [Registered as a Newspaper.] Price 6d. By post, 6½d

THE
LAW GUARANTEE AND TRUST SOCIETY, LIMITED.

Capital Subscribed	£1,000,000
do. Paid-up	£100,000
do. Uncalled	£900,000
Reserve Fund	£70,000

FIDELITY GUARANTEES,
On behalf of Managers, Secretaries, Clerks, Cashiers, Collectors, &c.

DEBENTURE INSURANCE.
The advantages of such Insurance are as follows:—
1. The Debentures being guaranteed by the Society can be placed at not less than par, thus saving discount.
2. A lower rate of interest is willingly accepted.
3. The Society acting as Trustee for Debenture Holders also adds to the Security.

MORTGAGE INSURANCE.

CONTINGENCY INSURANCE,
In respect of Defects in Title, Lost Documents, Missing Beneficiaries, Re-Marriage, Issue and Name and Arms Risks, &c.

LICENSE INSURANCE.
Mortgagees of Licensed Property should always insure in a substantial Insurance Society against loss they may sustain by depreciation in consequence of the license being lost.

TRUSTEESHIPS for Debenture Holders, and under Wills, Marriage Settlements, &c.

The Investors' Review.

A Cloudy Outlook in the Money Market.

Doubts begin to be hinted at in the City regarding the future course of the Money Market. Had we only domestic affairs to deal with, the position would be simple enough. At the present time money is comparatively dear in the City, merely because the Government has a larger amount at its credit with the Bank of England than usual—a much larger amount than the average of departmental balances at the same date in any former year. This excessive total must soon be reduced in the ordinary course of affairs. By the third week of this month, at latest, heavy payments will have to be made, so as to prevent the Government from having to re-vote a number of credits unspent at the end of the financial year. This being so, a simple deduction would be to say that the present dearness cannot last more than another three weeks, and it may not last another fortnight. Within one month from now it is reasonable to assume that quite ten millions now held on Government account will be disbursed, and once more available for market purposes. Half that sum of money would be sufficient to change the present stringency to ease and comfortableness. Call loans would again be 1 per cent. or less, and the discount rate on its way downwards below 2 per cent.

Our Money market, however, cannot be summed up in this rough-and-ready fashion. It is subjected to world-wide influences, being still the great exchange centre for the financial and mercantile transactions of all nations, and it is now threatened from several quarters. There is first of all the new loan to China, one half of which, at least, or eight millions nominal,

will have to be found within the next two months by the London market. In all probability very little of this eight millions will leave the country in the shape of bullion, but in the ordinary course it will be paid over to the Japanese Government and lodged by it in the Bank of England, where, until that Government pays it out again, it will be just as inaccessible to the outside borrower as the Home Treasury balances are at this moment. By and by, of course, Japan will pay this money away here, and not only our portion of it, but the eight millions to be provided by Germany as well. It will all come here in time, and all get disbursed, helping to ease our market. Still, for a time, the subscription of this loan may have the effect of prolonging the scarcity of floating credits in London.

Then the position of India has to be looked at. Extremely little information is allowed to filter through from Bombay or Calcutta with regard to the monetary situation in that dependency; but we do know that the bank rate in Calcutta is 12 per cent., and in Bombay 13 per cent. Further, we know that the Indian Government treasuries are not flush of cash, even if they were disposed to lend their balances to these banks so as to ease the money market. The revenue has been expended over frontier wars, and in meeting famine expenditure. A position of stringency in India therefore exists such as has never at any previous time in her history as a British possession been seen without being followed by dangerous convulsions in her mercantile credit. We believe some such convulsion to be not now far off, and that the Secretary of State for India in Council will be obliged to take most energetic measures to prevent a credit catastrophe in India, which might throw the whole finances of the Government there into the utmost confusion. Again and again this danger has been insisted upon in these columns, only to be pooh-poohed by the financial Dr. Panglosses of Simla and Downing-street. Let them say, then, why money should be 12 per cent. and 13 per cent. in the principal business centres of India, with commerce backward and industry more or less paralysed, if a crisis be not impending. We know one to be inevitable if existing conditions are not soon changed, and believe that the London market will have to find soon a very large sum of money if it is to be averted. India has a floating debt here now of six millions, and will require another ten at the very least to give ease to the commerce of the peninsula, and breathing space to its Government, borne to the earth now with obligations it cannot meet. Suppose an Indian loan floated between now and next May, that also will be detrimental to the expectation of cheap money this half-year. Money must soon be sent out to India to ease the tension there, either in gold, if the bureaucratic dementia about a "gold standard" is still to be encouraged, or in silver if the mints are to be reopened so as to allow banks and traders to obtain in the natural way sufficient currency for daily use. All money taken out of this market, in whatever form, reduces the supply of banking credit available for it, and as we have no spare supply of cash, it will require only moderate withdrawals to keep rates high.

Finally, coming westward still, we turn to the United States. Lately these have revived their demand for gold. Whether it is to be a formidable demand or not we cannot yet say; but the trade position, as exhibited in the *Commercial Chronicle* last to hand, is significant of an unusual power at present possessed by the States, to draw gold from Europe. The figures bring out favourable trade balance fully ten millions sterling above that at the end of January last year, and twenty-five millions larger than at the same date the year before. We must not lay too much stress upon these figures, because they are obscured in various ways, such as by transactions in stocks and shares, by remittances to American citizens in Europe, and by the payment of the interest due in Europe on American debts. Still, allowing for these, the fact that at the present time the trade statistics of the American Union show a balance of about fifty millions sterling in its favour, warn us to look for some shipments of gold to New York. If these shipments extend to only two or three millions sterling they will be of no consequence, because that and more can be provided by the fresh supplies of metal steadily pouring into London from the mines of Africa, Australia, and India. But should anything like ten millions be withdrawn, either from the London market alone, or from London, Paris, and Berlin, we should not be able to escape a 4 per cent. bank rate here, with a concurrent advance in rates in all principal Continental centres of credit.

We by no means wish readers to infer that this upward movement in money is going to occur, for we do not yet see a probability of it. All that we desire to emphasise is that such facts as are in sight ought to make dealers in money cautious in expecting cheapness to at once ensue when the Home Government has distributed its present excessive balances. So far is it from being probable that money will be cheaper for more than a week or two in consequence of this distribution, that we may even hold the view that it would be dearer but for the already mentioned constant inflow of new gold from the mines. Every one knows that the new supply is large and increasing, and that it has protected us against high discount rates during the past two years. We think it will protect us again, and perhaps avert an advance in discount rates beyond their present point before the autumn, unless something quite unforeseen occurs. It will not, however, be sufficient to enable the London market to work on much finer quotations than are now current. Any idea, in short, of extremely cheap money this year, seems to be out of the question, and there are weak spots enough around us—in Europe, in India, and we may say in Japan—to inculcate a wholesome watchfulness, lest we should be surprised by a quite unforeseeable advance in money and discount charges, just when we count on them to decline.

A Cold-Blooded Valuation of Rand Outcrop Shares.

The advice which it is attempted to offer in this article is intended for the numerous class of unfortunate speculators who have been stranded with South African mine shares at high prices, and are anxious to know whether they should continue to hold on the off chance of one day retrieving at least a portion of their losses, or whether they should sell and be done with it. It must be strictly understood that where an opinion expressed that it would be wiser to wait for a time, it is not to be implied that we consider any of these shares good speculative purchases. One of the first truisms which a "dabbler" in the mining market has to learn is

that the public is invariably stuck with mine shares at high prices. For instance, it may be taken for granted that if certain shares have fluctuated between £2 and £6, any "outsiders" who have bought have done so at an average of nearer £5 than £3. That there are twenty chances to one against such a deal proving profitable should be apparent to the least unsuspecting mind. Anyone who backs a horse does so with some probability of having a fair run for his money. But the same cannot be said in mining speculation.

To commence with, some firm buys a piece of likely gold-bearing ground, very probably for a quite insignificant sum of money. Upon this foundation a company is organised, with a more or less bloated capital, according to the temper of the public at the moment, and all the shares are probably taken by the promoters. The property is then developed, but its true value is kept absolutely secret; and a market is made in the Stock Exchange for the shares by buying through one broker and selling through another. The engineers and managers write one set of reports for publication, and another for the private information of the promoters; the merits of the mine are advertised by means of newspaper puffs, editorial notices, and otherwise, and when the shares have reached a figure sufficiently high to satisfy the greed of the promoters they are sold to the public as rapidly as possible. If the "outsider" makes any money under these conditions by a further accidental rise, it can only be by the miscalculation of the promoter, who, in his own estimation, has sold too soon. This is how most "honest" mining concerns are managed in these days. There are various other stages, where the company owns no mine at all, or the ground is known to be unpayable, or where the mine is picked and the profits "faked," and so on. In face of this historical summary it will be understood that any sane person who buys mining shares at the bidding of interested people, or newspapers, deserves to lose money, and does mostly lose it anyway, whether he deserves to or not.

As, however, our object is to assist rather than to revile those who have unfortunately fallen into such traps, we shall now examine the position of those who purchased "Kaffir" shares in the boom of 1895.

In previous articles it has been pointed out that, so far, very few deep-level mine shares have yet been "planted" with the poor victimised public. The big financial corporations still hold fully 85 per cent. of the entire share capital of these concerns. With the outcrop mines, however, it is different; and it may be safely assumed that in this case 85 per cent. of the shares are owned by the public. The great year of the "off-loading" of outcrop shares was 1895, when the Gold Fields Company, by selling its immense holdings, was able to pay two dividends of 125 per cent. each on its ordinary capital, and to present besides a very handsome balance to its managing directors. The prices then reached have not since been touched; and consequently the question arises, should those who purchased then sell at a loss now, or continue to exercise their souls in patience and hold?

What are known as "Kaffir Outcrops" shares may be divided into two classes: (1) the genuine dividend payers; and (2) the doubtful or rubbish concerns. The Trust Companies mixed up with them must be placed in a third category. Dealing, first of all, with the dividend payers, we had prepared a table showing the prices ruling in January and September, 1895, when the majority of these shares were disposed of by the promoters; the prices in April, 1897, when a low level was reached, in consequence of political and other complications; and the prices to-day. But this table need not be printed. It is, indeed, too sad to bear looking at and every one knows that the majority of the public hold these shares to-day at a great loss.

We advise those who are wise to effect a gradual liquidation as favourable opportunities occur, and shall state the reasons for this as succinctly as possible. At the present level of prices the interest return, after making allowance for amortisation of capital, is, for this class of security, extremely small, being not more than 5 or 6 per cent., and this only after estimating for increased dividends in the future. The majority of the Rand outcrop mines still have "lives" of from ten to twelve years; some perhaps will last longer, and others expire sooner, but that is about the average. To allow sufficient margin for amortisation of the original capital invested, and to obtain a clear 10 per cent. interest, the yield on the shares of a mine with ten years' life should be 18 or 19 per cent., and with twelve years' life 17 or 18 per cent. If an 8 per cent. return is considered enough, then the yield for ten years should be 17 per cent., and for twelve years 15½ per cent. These figures are, of course, approximate. A merely casual examination of Rand "outcrops" will show that, at the prices now ruling, they are a long way off fulfilling these conditions.

Another reason why we think a gradual liquidation the best policy to pursue is that outcrop shares have been worked up in sympathy with the deep-level "rig," which for the time being has utterly failed. Then comes the question of intrinsic merit. When any class of securities becomes unduly inflated, it is sure, sooner or later, to find its natural bottom again, and we cannot help thinking that the time is not far distant when "Kaffir" shares will experience another great reaction as the result of a true understanding of their limited dividend-paying capabilities. Some of the mines have exhausted large parts of their property in gold reefs, and the actual proportion worked out has been found by careful calculations and actual survey. As the dividends yielded by the portions worked out are known, it is a comparatively easy task to ascertain what the remaining portions of the mines will give in dividends on the same basis. We have done this and the result appended is somewhat startling, for it shows that the present market valuations of some of the mines are even higher than their total prospective dividend-earning capacities. That is to say, a speculator in some cases is paying twenty-five shillings for a sovereign, reckoning nothing at all for interest. Of course, the "bull" will argue that future profits and dividends will be larger than those earned in the past, and this may be true enough; but, on the other hand, it must not be forgotten that the portions of the mines remaining unworked to-day contain less gold-bearing reef, claim for claim, than those worked out, owing to the flattening of the reefs in depth. Add 20, 30, or even 40 per cent. to the figures given to represent the probable increased profits resulting from lower working costs and other favourable factors, and the result is not materially altered. The comparison still shows that prices are standing at far too high a level.

There remains to be considered the position of those

who purchased the second class of Kaffir outcrop shares—the doubtful or rubbish concerns. It may be safely asserted that there is not the remotest chance of people ever getting their money back on these things. Any comparison of past and present share lists shows what an enormous depreciation has taken place in the prices of some of them. Of the Barnato group, Buffelsdoorn is a remarkable instance. That company's shares were sold out at from £3 to £9; they are now practically unsaleable at 12s. 6d. The only advice that can be given to unfortunate holders of these shares is to sell on any good news, rumours of reconstructions, or reported "rich strikes." Of the best of them, it might be judicious to continue to hold for a little longer Glencairns, Auroras, Crœsus, Gochs, Knights, Nigels, and Van Ryns. The others are more or less rubbish, and should be realised on a favourable market. Even the best are things to be held with little faith and less assurance.

Company.	Percentage of surface area of property exhausted.	Dividends paid to date on percentage worked out.	Percentage of surface area of property remaining.	Dividends obtainable from unworked portion in same ratio.	Market valuation of shares, with allowance made for dip claims.

d Owns eight deep level claims, valued at £120,000.
e Owns twenty-two deep level claims, valued at £110,000.

The Progress of Russia.

(FROM A RUSSIAN CORRESPONDENT.)

For the solution of the problem as to why particular investments are popular at certain times and unpopular at others, the consideration of physiological peculiarities are requisite as an exact appreciation of material facts. The motives which determine people in placing their capital in any particular groove cannot altogether escape the influence of their surrounding moral atmosphere; and it requires more perspicacity and independence of judgment than one might believe to avoid the contagion of the example or the influence of articles published in the Press. Writers themselves, even when their motives are pure and disinterested, are frequently swayed by consideration of expediency in estimating the economic situation and matters connected with the budget of a foreign country. They regulate their views by the fashion of the moment much more than by methodical scientific knowledge of the subject of which they speak.

These somewhat lugubrious reflections have been suggested to me by the attitude frequently adopted in regard to Russia in the English market. Englishmen were among the first to trade with Russia, and since the time when communication between the two countries was carried on principally by way of Archangel the English have derived much advantage from their relations with Muscovy. Until the middle of the present century the greatest firms of St. Petersburg bore English names, just as the finest of the monumental quays on the Neva is called "le Quai Anglais," or as the most luxurious and most of frequented business establishments is the "Magazin Anglais." The Crimean War did not stop this investment of English capital in Russia. It was reserved for the complications of 1876-77 to beget a serious coolness. In 1876, thanks to the efforts of Count Rentem, who was Minister of France for more than seventeen years, and who succeeded in introducing publicity for the Russian Budget, and to furnish the country with resources necessary for the construction of great lines of railways, the Russian Five per Cents rose above par. The attitude taken by Russia against Turkey was displeasing to the English Government, and to that large portion of the public which was carried away by an excess of the Jingoism which Lord Beaconsfield stimulated with his customary cleverness. The moment was seized by a party in the English Press to attack the finances of Russia, which had become a political enemy; and the writer of these lines can very well recall the controversies he had on the subject with Mr. Labouchere in the *World* and *Truth* at the time. Speculators on the Stock Exchange sold a commodity which they did not possess—Russian Five per Cent. Bonds; and every month at the settlement they had to pay heavy backwardations to the great benefit of the holders. The same thing happened when Anglo-Russian relations were strained by affairs in Afghanistan. German capitalists then reaped the benefit of London sales, and after this the interest of British capitalists in Russian stocks diminished, while it increased in Argentine and other adventures.

I do not wish to trace the history of European investments in Russia; it would be rather a curious story, and would show that the French did less for Russia than they imagine. The French bought Russian bonds on excellent terms at the time of the newspaper war, instigated by Prince Bismarck in his "reptile press" against Russian credit abroad. As often happens, Bismarck acted out of spite, without caring about the real situation. And just at this juncture, in 1887, came the turning point in the financial and economic history of Russia. Thanks to the straightforward and pacific policy of Alexander III., to the efforts of M. Burge in reforming taxation, the chronic deficiency was about to disappear, and the Russian Budget felt the effect of the European repugnance to supplementary credits beyond those accorded at the beginning of the year. The Russian funds, sold at a loss by Germans who heedlessly played the political game of their Chancellor, were taken by Frenchmen, Belgians, and Hollanders at a price 15 or 20 per cent. below those of to-day. It has been estimated that the French buyers realised a profit of 100 to 500 million of francs by the transaction. With the support of the French market, M. Wischnegradsky went on with the conversions of the exterior debts—conversions which brought no cash to Russia but which were useful for her credit. The co-operation of France is fully recognised in Russia, but some surprise is felt when French diplomatic agents state in official publications that it was French capital which re-established Russian finance. This is not true. The re-establishment of Russian finance, like monetary reform, is an eminently national work, the merit of which is divided between the sovereigns and statesmen who, during the last twenty years, have directed the finances of the Empire. Their restoration is a reality, not a fiction, as it is the fashion of certain London editors to allege many times a year.

English capitalists were formerly pioneers in the development of Russia's natural riches, notably of its commerce and its great metallurgical enterprises; but during the last twenty years Belgians have, in these respects, taken the leading part. This is owing to various circumstances—to the excellent results obtained by an enterprise founded by the great firm of Seraing, the Société Cockerill, under the name of La Dnié-provienne; to the old relations which exist between Russia and Belgium—where there is no customs duty on Russian cereals—and finally to the success of the tramways. The freedom which exists in Belgium for the organisation of enterprises, the comparative absence of fiscal imports as contrasted with the exorbitant charges in France, have helped in giving a Belgian form to many industrial enterprises. The Bourse lists of Lyons and Paris naturally include many shares in Russian companies, some of which are old and very prosperous.

In England, the tendency up to the present time has not been the same. Nevertheless, from certain indications, it would seem that attention is being again directed towards Russia as a field of activity for British capital and intelligence. This is sincerely to be desired. Russia still offers openings for capital, and the guarantees existing there for the protection of property and capital are at least equivalent to those of other countries. One of the present English Ministers (Lord George Hamilton) has recently rendered homage to the correctness and loyalty of Russia, especially in respect of her engagements in Central Asia.

It must not be forgotten that commercial relations between Russia and England are still active and important. Here are, in millions of roubles, the figures showing the extent of the foreign commerce of Russia :—

—	France.		Great Britain.		Germany.	
	Import.	Export.	Import.	Export.	Import.	Export.
Average 1872-80...	21	44	129	149	187	139
„ 1881-85...	19	43	116	176	184	165
„ 1886-90...	14	38	95	210	121	163
„ 1891	16	43	76	172	103	191
„ 1892	17	29	94	109	101	136
„ 1893	27	62	111	143	100	131
„ 1894	27	49	128	161	142	146

England, therefore, occupies, it will be seen, a very important place in the movement of Russian trade; and certainly the participation of English capital in Russian business might easily enlarge her present share in it.

One fact of real importance in this connection is the completion of the great monetary reforms, due to the young Emperor Nicolas II., and his Minister of Finance, M. Witte. This reform, which has been under consideration since 1887, has been carried out on lines that would do honour to a theoretical economist while yet in full conformity with the teachings of practical experience. The Russian monetary reform, in virtue of which the gold rouble becomes the monetary unit of the Empire, is not a fiction, nor a reform on paper; it is an unmistakable tangible reality. The Government has not only accumulated great quantities of gold; it has put this gold in circulation, withdrawn paper money, diminished its amount, and reduced the floating debt. The most determined partisans of a wise handling of the money market as an instrument for the metallic circulation of a country must have been able to read with satisfaction the passages which M. Witte has devoted to this grave question in his report on the Budget of 1898. I believe people in England scarcely understand our public finances. This must be my justification for placing before your readers some statistics on the subject.

During the decade 1887-1896 the extraordinary expenses of Russia increased to the sum of 1,466 million roubles, of which 409 millions were for the construction of railways, 161 millions for the assistance of the peasants suffering from bad harvests, and 21 millions to pay off the shareholders in railways bought up by the State, 135 millions to railway companies on whose account the State has issued bonds, and 42 millions to augment the capital of the Bank of Russia or in payment to the Banque Foncière de la Noblesse. In addition, 697 millions have been devoted to extraordinary redemptions, either of loans to be extinguished or of the debt of the State for paper money emitted. It may be added that by the action of the regular Sinking Fund 420 million roubles of the debt have been paid off during the last ten years. What have been the resources from which the Russian Government has been able to meet this extraordinary expenditure, of which a good fourth has been devoted to public works and nearly a half to debt redemption? New loans have provided 831 millions of the money, reimbursements by the railway companies 107 millions, various resources 57 millions, and the balance has come from ordinary Budget surpluses.

Railways play a great part in the Russian Budget, though less than in the Prussian. The State possesses 27,375 versts, say, 66 per cent. of the network of the empire, estimated at a cost of about £280,127,000. The net income of the system worked by the State amounted in 1896 to £4,750,000, or an average of about 4½ per cent. on the capital emitted.

The Russian statistical bulletin has published a very interesting work on the Budget, distinguishing between the resources accruing from taxation and those furnished by what is called the State industrial domain (railways, forests, &c.). In the Budget of 1889 the total receipts were put at 1,364½ million of roubles, and the total expenditure at 1,350 millions. Of this income the total of imports, taxes, customs dues, and contributions from taxation of every nature, provided no more than 735 millions. The difference—say 620 millions—came from the gross produce of the State railway system, sales of State forests, and other sources. It is essential to note this very important distinction if we are to appreciate properly the position of the taxpayers in Russia. It makes all the difference if we divide 1,364 millions of roubles by ninety-five millions of inhabitants, or merely 735 millions.

These figures and reflections, made by a conscientious observer, whose optimism is justified by the facts of the last twenty years, perhaps merit the attention of the English public, and may be useful as an equitable appreciation of the position of a great State in full development.

A Little Light on the Northern Territories' Gold Fields of Australia, Ltd.

To see the price of "Northern Terrors," as the market endearingly terms these shares, gyrating around 4½ for the £1 share, must give an outsider the idea that the properties owned by the company have already

proved to be most valuable. As a fact, so far as the market and the public are concerned, very little is known about the company at all. Formed in July, 1896, its nineteen months of existence has produced little in the way of results from a mining point of view. From a market point of view, however, everything has happened to gratify desires; for the shares, by bold engineering, have been raised to their present giddy height, and doubtless the foolish public is beginning to think "there must be something in the thing after all if the price keeps up at this figure."

All we venture to say is, that before any faith is placed in the future of this concern, it should be clearly understood that some mining results ought to be recorded by this company, for the Northern Territories gold-fields were not discovered the day before yesterday, as Mr. Bottomley and his friends might make the public believe. In their prospectus of this company no reference is made to an earlier date than 1893, yet we have the record of one of the most important properties taken over by the Northern Territories Goldfields Company as far back as 1886. It may be as well to state that the "Terrors" Company, for the price of £225,000, acquired six properties, comprising nearly seven hundred acres, locally known as the Howley Group, Brock's Creek, Woolwonga, Eveleen (including the Eureka mine), Yam Creek and Lady Alice Union. Greatest stress was laid upon the Howley group, as in its case the result of no less than six crushings were recorded (the dates of these, however, were not given), whilst only one crushing was mentioned in the case of each of the five other properties.

It is precisely to the record of the Howley property that we should like to draw attention. As far back as November 15, 1886, a company was formed, called the Port Darwin Gold Mining Company, for purchasing and working the Howley Mine, situate near a tributary of the River Adelaide, and adjacent to the Howley township in the Northern territory of South Australia. The property was then said to have been worked for some years by private enterprise; but, perhaps prudently, nothing was said about the results obtained. From the start this Port Darwin Company appears to have had difficulties, and by December, 1887, the board had entirely changed. Mr. Hugh Watt, M.P., the far-famed ruler of the Chile—New Chile — Yuruari Mining Company, had apparently obtained control, and put himself into the position of chairman, with Colonel Gourley, M.P., and Mr. Henry George Slade as subordinate directors. More property was acquired, but complaint was made of the heavy expenditure, and no definite results seem to have been obtained. About this time Mr. Hugh Watt, M.P., figured as holder of 34,997 of the shares out of a total issue of 62,787. By 1889, however, his holding had sunk to 4,092, and it is not surprising that he then disappeared from the Board, Mr. H. G. Slade becomiug chairman, with F. H. Cheesewright and Mr. Leonard Welstead (formerly the secretary of the company) as the other directors. The secretaryship was taken over by Mr. J. M. Pates. The company was then in low water, for the two years of working had added to the debit balance. So in December, 1889, a reconstruction was proposed, and the Northern Territory Exploration Company, Limited, was registered for this purpose. No better luck, however, attended this effort, and the following letter had finally to be sent to the Registrar of Joint-Stock Companies by Mr. Pates :—

January 23, 1890.

Sir,—I am directed to inform you that this company (the Port Darwin Gold Mining Company) do not intend taking up the name of the Northern Territory Exploration Company, Limited, as the capital necessary to purchase the proposed new properties has not been subscribed, and the mortgagee has intimated foreclosure under his mortgage and bill of sale, and that the company has practically ceased to exist, possessing as it does no property or assets of any kind."

Altogether there could not have been a more hopeless wreck; but the company promoter had not done with the property, and in May, 1890, the Australian Development Company was formed, with Mr. H. G. Slade and Lord F. G. Godolphin Osborne as directors. This company purchased, or was to purchase, a property in the Northern Territories of South Australia for £50,000, which extended over 160 acres and covered the Howley Mine, formerly possessed by the Port Darwin Gold Mining Company. The shareholders in this new company included Mr. Leonard Welstead and Mr. J. M. Pates, so that there was no absence of the old connections. This new company would seem to have done little or nothing, and after an inglorious existence was dissolved by order of the Registrar of Joint-Stock Companies, under date Febru ry 22, 1895.

Public interest in the goldfields of the Northern Territories of South Australia was apparently smothered by these fiascos, and nothing more was heard of them for a little while. The whole thing might have slept in oblivion for ever had not that cloud-compelling financial Jove, Mr. H. Bottomley, one fine morning in 1896, stumbled across the neglected remains of these (on paper) particularly fine properties. The great man saw his opportunity, and at the touch of his magic wand the Northern Territories Syndicate, with a capital of £50,000 rose upon the paper-rubbish heaps of the previous failures.

After what has just been narrated, it will come as a kind of surprise to the reader that the venerated and more than half-forgotten Mr. Hugh Watt should turn up as "vendor" of the "Port Darwin" properties to this Syndicate. The contract in regard to the purchase runs as follows :—

Whereas Hugh Watt is absolutely entitled to certain valuable mines and mineral properties situated in the Northern Territories of South Australia, subject only to the payment of twenty thousand pounds, being the amount then required for completing the purchase of some of such properties.

For these properties Mr. Hugh Watt was to receive the said £20,000 in cash, and one-fourth of the nominal share capital of the company intended to be formed by the Syndicate. The Syndicate then sold these properties to the Northern Territories Gold Fields Company for £225,000, out of a total capital of £300,000, the balance of £75,000 being left for working capital. Then, in December, 1896, £295,000 of the capital was offered to the public at the modest price of £3 per £1 share, and we believe the reception given to the issue was very poor. One cannot be sure of this, for the Company has not filed a list of shareholders since it made the issue. Upon the new Company, however, Mr. H. G. Slade figures as a director, so that ties with the past are well maintained.

By dint of market operations the price of the shares has now been worked up to 4¼, or a capitalisation of £1,350,000, for the 700 acres of doubtful, and, so far as is known, still unproved property. None the less is it a

fact that, as we have shown, the framework of the concern is of the flimsiest character. Mr. Hugh Watt, who had the handling of a good section of the properties years ago, possibly by the payment of a moderate sum for options, and the promise of £20,000 in hard cash if the contracts were carried through, obtained the rights to the whole estate—rights forthwith, by a little manipulation, capitalised at £300,000. Notwithstanding a record of, we presume, twelve years' work, on and off, upon one of the properties, representing perhaps 160 acres of the 700 acres, all the prospectus contained about this particular property is that six crushings had taken place, with an average treatment of 55 tons in each crushing. Could a more abject tale of failure be recorded? yet an "Arabian Nights" sort of price was put upon the properties to start with. And now it is eclipsed by a still more gorgeous total on the market, although in the nineteen months of the new company's existence no regular returns of crushings appear to have been established. It is a mad time in the markets just now, and Mr. Bottomley has done his best with a will—the wonderful man!

Some More "Drew" Companies.

In accordance with our promise of last week we intend to deal shortly with a few of the concerns of Mr. Richard Collins Drew. First, as to Cowell, Craft, & Co. Since the verdict in the Grosvenor case, Drew has retired from the board of this company as managing director, and has given an undertaking in the Court of Chancery not to vote at the meeting of the company as a shareholder. The four businesses of Drew that this company was promoted to take over were purchased by a syndicate for £80,000, who agreed to sell them to the newly-formed company for £130,000 in cash or shares. We are glad to say that the prospectus issued to the public fell flat, and the syndicate only received £52,963 in cash and the balance in shares and debentures. Drew's share was £10,000 in cash with the rest of his consideration, £80,000, in shares and debentures. Out of the present capital of £150,000, this gentleman holds, or held when he was cross-examined in the Grosvenor case, £60,000 in shares and £30,000 in debentures, besides being managing director at £600 a year. That no information is forthcoming from this company is not surprising, and this seems to be the chronic state of companies that have got into the clutches of the Drew ring.

Drew, again, is (we wish we could write was) a director in Long's Hotel, Limited. Success seems hardly to have been the outcome of this adventure. In 1888 it was formed with £65,000 capital. In 1893 £2 10s. per share was written off as lost. The vendor guaranteed 10 per cent. for three years, which was paid, but for 1889-1890 and 1890-91 the distribution was only 5 per cent. For the next three years the loss on trading was £512, £71, and £110 respectively, but with what seems to have been a dying effort in 1894-1895 this was turned into a credit of £186. Since that date there have been no reports and no distribution. Though now a matter of ancient history, owing to the shareholders having swept away the old board and taken the affairs into their own hands, the connection of the Drew clique with the Alexandra Hotel is interesting. The directors for many years were three—namely, Lord Saye and Sele, G. A. Bolton, and George Bolton, managing director. Without the privity of the shareholders, in 1896, one T. E. Polden—who acquired twenty-five shares in January of that year from J. Jervis, one of the promoters of the company of Cowell, Drew, & Co.—was appointed managing director in succession to George Bolton. The remuneration of that gentleman was fixed at £300, rising to £500, in addition to his fees as a director. He was also at this time chairman of the board of Cowell, Craft, & Co. In their report on the affairs of this hotel the committee of investigation characterise Drew's connection with the affairs of the hotel as "most baneful." To say the least of it, that appears to us to be a term of the mildest description, considering the facts which are set forth in that report.

Since the verdict, the shareholders of the Grosvenor have held a meeting, and we cannot leave this sordid subject without one short reference to that proceeding. For colossal impudence the conduct of Newitt would be hard to beat. On ordering the Press to withdraw, a movement which was promptly checkmated by the shareholders, his statement, "we cannot allow you to stay here; there is enough publicity without that," is delightful for a man who has, with his co-directors, been found guilty of fraudulent conspiracy. Truly the motto of this ring all along has been "avoid publicity," but we trust that now light has been thrown on their dealings, the matter will be seriously taken in hand by a certain public official.

Economic and Financial Notes and Correspondence.

"Second Thoughts About Rhodesia."

The *National Review* for March contains another interesting article on this vast territory, by Mr. J. Y. F. Blake, in which he reviews some criticisms based upon his previous papers, and maintains his former conclusions. Amongst these conclusions the most important is an assertion that neither Mashona nor Matabeleland possess reefs containing payable gold. Even Mr. Blake's most determined critics admit that if gold does not turn up in quantities sufficient to establish a grand mining industry in the country, Rhodesia will, in the words of Mr. Selous, soon be "deserted by the home-born British." We are not able to pronounce judgment upon this view, never having been in the country, but, as we have said more than once before, Mr. Blake's writings bear a stamp of ingenuousness which helps to carry conviction to unprejudiced minds. Grant, however, that he is right, and still we imagine he is too sanguine altogether in shortening the original five years he gave for Rhodesia to be found out to one year. Although never an ounce of payable gold should be found in all that territory, it will take more than twelve months to convince the British public of the worthlessness of this vaunted acquisition. It has been deceived and intoxicated by the boastful words always employed in describing it, and, carried away by the Imperialist folly, sticks, against all evidence, to the faith that something magnificent will one of these days turn up.

For years before Mr. Blake came forward, with his plain narrative of facts and unimpassioned deductions, we have been striving to exhibit to the British public

the hollowness of the financial side of the Chartered Company's fabric. Again and again it has been demonstrated, on irrefragable evidence, in the Investors' Review, that the Chartered Company was a financial bubble of the very worst description, blown out by a handful of individuals whose sole object, when put to the test of facts, was the filling of their own pockets at the expense of the simple British investor, or still more simple gambler. Facts and figures did not prevent "Chartered" shares from running up to £9, any more than they saved us from the unmeasured abuse always ready for those who seek to tell the truth without prejudice. It is invariably thus with popular crazes, and it will take a good deal more than twelve months to satisfy the public that in this portion of South Africa England has acquired a territory more useless to her than Sahara would be. Just look what is going on at the present time in the newspapers mostly under the control of the financiers who have more or less stripped the British public of its money. As we write even, laudatory messages and letters about Rhodesia are appearing in print, and will be believed far more readily than anything that can be said by an unprejudiced observer who never touched a share in the Chartered Company, or had anything whatever to do with any enterprise the founders of Rhodesia persuaded the British public to place money in. Let but one "paying lode" be found in all the plateau the company owns, and if that lode hold out for only six months, it will cost the nation untold millions.

Mr. David Yule on Indian Currency.

As usual, the chairman of the Bank of Calcutta had something worth hearing to say at the half-yearly meeting of its shareholders, held in that city on January 29 last. Had we space, we should be glad to print the whole speech; as it is, a few sentences from it must serve. The speaker winds up with what might have been his text: "India's great currency problem can be solved by her fields and by her looms, and by these alone"—but the whole speech enforces this dictum. It points out that trade has been half paralysed by the vagaries of exchange—vagaries the direct outcome of Government efforts to force up the value of the rupee in the vain quest of a fixed gold standard. "The life-blood of the currency policy of 1893 depends wholly on the scarcity of rupees, and as surely as December comes round once a year will the period of dear money return. If money this year gets cheaper before the end of June, the fact may be safely taken as a sign of a falling off in the trade activity of the country."

Just so: but where will the Government find itself with its enormous and growing yearly obligations, due in London, if Indian trade falls off? In its really insane efforts to make the remittance to London of money due by it easy through an artificially high rupee, it is destroying the sources whence the money can be drawn, and inflicting fearful losses upon the Indian business community, Indian bankers and investors, and the Indian people. Take the rest in Mr. Yule's own words:—

> It is this desperate ambition to have 1s. 4d. exchange at any sacrifice that has wrought the failure of the currency legislation of 1893, and brought the people to the verge of ruin and discontent. What confidence can there be in a policy that buys rupees for 1s. 4$\frac{1}{32}$d. and sells them a few days after at 1s. 3$\frac{31}{32}$d., or declares that a limited amount of Telegraphic Transfer will be sold out of the 40 lakhs Councils offered and two weeks after sells the whole amount in that form? Can any business man have the patience to anticipate such vagaries, or to believe that they are working for the common good of the country? I think not. It is evident, too, that the Government have lost confidence in their ability to prevent fluctuations in exchange, and to maintain the rate at 1s. 4d. without utterly upsetting their revenues. The condition into which India has fallen may be gathered from a few words which fell from the Finance Minister's lips on 14th instant. He said: "It must be understood that we are not rolling in wealth while we are refusing aid to others, and our inability to advance money is due, not to any wilful obstinacy, but to want of adequate means. The Secretary of State cannot draw on us for more than we are able to pay. The fear is, therefore, that the market may reach a point where money will become actually unavailable, and merchants will find it impossible to sell their bills."
>
> Is it possible that the Government of India see no danger to their revenues if such a state of things be allowed to continue? Do they still persist in holding that this country, as a whole, makes no loss in its international trade by an appreciation of its standard, since the lower price received for its exports is balanced by the lower price paid for its imports? The fallacy of this theory in its application to India needs no better illustration than what is happening in our markets for export produce.
>
> How long can growers go on accepting fewer rupees for their produce while they have to pay the same rent, the same wages, and taxes with an increasing burden of debt at an increasing rate of interest? How long will the money-lenders suffer repayment of their advances to fall into arrear? The agricultural population of this country display great, even dogged patience at their toil, but the money-lenders have the doggedness without the patience. The village grogshop harbours the result—a dissolute and heart-broken peasant, once a thriving ryot. His loss to the land is the loss of revenue to Government, for the people cannot continue to cultivate land which gives no return. As a practical illustration of the effect of stringent money and depressed prices, I am informed by some of the largest indigo producers in the North-West that they will not sow next season. The land thus released may not be cultivated, for other products are about as profitless as indigo.
>
> It is not in agricultural pursuits alone that the stringency of money is felt. Manufacturing industries are hampered in their operations by the inability or unwillingness of bankers to advance funds either for further extensions or for the purchase of raw material. The manufacturer, to get money, has, therefore, to dispose of his goods as he makes them, at the best prices the market will pay for them. Importers, too, have cause for complaint, for buyers take delivery of goods only under compulsion, owing to the absence of demand in retail. The fact is, the masses are unable to buy to the same extent as when money was cheap and plentiful. They have barely sufficient to purchase the food required to keep body and soul together. Comforts, such as new clothes, are out of the question. Some amelioration of the lot of the people is required, for nothing is so disposed to make a man discontented and rebellious as the stoppage of the wherewithal to buy these little comforts, which give some colour to the dull grey monotony of an Indian workman's existence.
>
> Not many weeks ago the Government deprived a Rajah of the privileges of his rank for alleged harsh treatment of his ryots. I wonder whether there is any prospect of similar punishment being accorded to the authors of the 1893 policy. The only sensible remedy to the present unfortunate position of India and of her traders is to gradually reopen the mints to the coinage of silver. As London thinks in gold, let India think in silver. Instead of borrowing or purchasing gold, let rupees be sold in Calcutta, Bombay, and Madras by weekly tender, the tenderer of the greatest weight in silver bullion for each lot, say of one lakh of rupees, becoming the purchaser. The Government could fix a limit from time to time under which rupees would not be sold, thereby establishing an automatic silver currency regulated by the trade demand for money. This, with the application of the knife to certain of the home charges, would give to India the fullest measure of prosperity.

"Free" and "Open" Ports in China.

Though the debate in the House of Commons on Tuesday was raised in the interests of Jingoism, and failed in its immediate purpose, it was made the means of giving us a tolerably clear indication of what Russia has promised in connection with the occupation of Port

Arthur. Before the discussion, Sir William Harcourt asked for the production of the communication in which Russia had stated her intention to make Port Arthur an open port. This, said Mr. Curzon, was impossible, as the negotiations with both Russia and Germany were still in progress; but the papers would be published soon, and would include the despatch referred to. During the subsequent discussion, however, Mr. Curzon clearly defined Russia's present position. She is to make Port Arthur an "open" port in any case, and there was nothing to preclude her from making it a "free" port. The difference between the two seems very well defined. A "free" port is one like Hong Kong, at which no tariff whatever is imposed on commerce. An "open" port is practically equivalent to a treaty port, where all trading communities are placed on an equality. Well, then, Russia is now bound to make Port Arthur an open port at least, and she may yet make it a free one, though that seems improbable. As an open port, however, neither Great Britain nor any other trading nation is placed at a disadvantage. The somewhat alarming insinuations made as to Russia's intentions would seem to be ill-founded. And we may conclude that the position of Germany in Kiao-Chau will be much the same as that of Russia at Port Arthur.

France and West Africa.

Nothing could be more admirable than the tone and substance of M. Hanotaux's reply to the somewhat fire-eating interpellation of Prince d'Arenberg in the French Chamber of Deputies. The Prince, in his reference to the assassination of a French officer in Nigeria, meant to give the occasion a Jingo turn; but M. Hanotaux declined to be drawn in that direction. Indeed, from what he said, it seems clear that neither the British Government nor the Niger Company can in any sense be held responsible for the unfortunate death of M. de Bernis. On the general situation in West Africa M. Hanotaux declined to enter while the Anglo-French Commission was sitting; but he had confidence in the friendly dispositions of the two Governments; and the labours of the Commission had already "favourably prepared the ground." French interests had been "energetically and perseveringly defended," without, however, "excluding the desire to seek, if necessary, an equitable settlement by reciprocal concessions." Here lies the kernel of the whole business. There is plenty of room for concessions on both sides, and really none for quarrelling now that the French Minister has spoken so openly and so explicitly. We take it that a peaceable settlement of this question is near at hand. There never need have been any doubt of its possibility. To have acted otherwise would have been the veriest perversity of reckless folly.

The Operations of Trusts.

When mere business transactions are taken into account, one must not, it would seem, clamour for a high standard either of morals or prudence. Yet we confess to have expected rather better things from some of the trusts, whose wonderful story we told just seven years ago. The experience of the years that followed 1890 ought to have brought home to the directors of these concerns that much of the bad business they had done just prior to that date was a direct consequence of their greedy seeking after underwriting commissions, and their premium hunting. For a while this kind of speculation succeeds, but it usually ends by leading the trust or individual that indulges in a play with credit of this kind to possess more or less unmanageable heaps of paper, called "securities" by courtesy, whose destiny often is to become absolutely valueless; or the stuff has to be locked up and "nursed" for a great many years, at a cost that takes away all hope of profit, even should the nursing in the end give back some of the money sunk.

The period that has elapsed since 1890 has been long enough to allow many of the originally weak holdings of the Salomons and other trusts to become stronger, accordingly their own securities have again attained to a fair market value. A proportion of them also have cut down their capital by an application to the courts, so that their boards have been freed from a certain amount of responsibility. The consequence is that, aided by the recent advance in prices, these trusts find themselves in a position to satisfactorily realise a greater proportion of their assets than has been possible at any time since 1890. A great deal more shifting about of their investments has consequently been going on of late, and much of the changing has been admirably conducted. The experience of the past has not been without its lessons.

An unsatisfactory element, however, is found in the manner in which even the better sort of trusts tend to follow in the train of some harmful fashion in finance. Probably there is not a more distressful symptom, if the future is considered, than the process of Hooleyising prosperous companies. One has only to turn to the market in which this kind of finance was first freely indulged in—that for cycles and their accessories—to see what a palsying effect financial charlatanism of this kind brings upon an otherwise energetic and expansive industry. The evils are only too apparent even now, and yet a glance at the recently issued report of the Mercantile Investment and General Trust shows that powerful corporation to have lent its assistance to several of these wretched operations. In this report it is shown that during the past year the trust purchased 2,350 shares of the Austrian Incandescent Share Company, 9,225 Preference shares of Bovril, 2,650 shares of the English Incandescent Share Company, 2,000 Preference shares and £2,000 Debenture stock of Schweppes, 1,550 shares of the Second Austrian Incandescent Share Company, 6,000 Preference shares and 10,000 Ordinary shares of the Welsbach Incandescent Company, and 500 Preference shares of the Apollinaris and Johannis Company. Quite £40,000 of its spare cash must have been used in supporting the operations of latter-day financiers, and it stands to reason that if other trusts have followed the same policy the operations of the said financiers have been greatly assisted. The Mercantile and General Trust has certainly realised some of its holdings of these dangerous securities, but the initial objection to the character of this whole class of business is not removed by that.

The Council of Foreign Bondholders—A Correction and a Plain Tale.

By a slip we stated last week that this body had agreed to "accept 50 per cent. on the 'B' and 60 per cent. on the 'A' Costa Rica bonds, with interest cut down by one half as well." This should have been, "by

cutting the interest down to one half." We apologise for the blunder, which was the more unpardonable because, as every one understands, this is the Council's own exclusive patent plan for releasing debtors from their obligations. We had no business to hint at any improvement on that patent.

At the present stage of the fight which independent certificate-holders in the Corporation of Foreign Bondholders are making to prevent the complete confiscation of their property, the following brief narration of facts drawn up by one of them should be valuable, although it goes over ground already in great part covered by articles which have from time to time appeared in this Review :—

The Corporation of Foreign Bondholders consists of 545 certificate-holders, who originally contributed £100 each, which has been the substratum upon which the funds of over £100,000 have been earned and accumulated and at present vested in the Corporation, after repaying all the certificate-holders £100 plus interest. These elect, under rules, the twenty-one members of Council who manage the affairs, but owing to the advantages of the Council who control the organisation and staff, the endeavours to put forward independent candidates by the body of certificate-holders has been frustrated, and elections and re-elections have for years past been practically a matter of co-option by the members of the Council. The Council have now formulated a Bill in Parliament which totally extinguishes the certificate-holders, and vests the funds and the whole Corporation in themselves.

The two requisite meetings have been held, and by majorities secured through the Council's advantageous position to obtain proxies (and including their own twenty-one votes which, being those of interested parties, are of more than questionable validity) the Bill has been allowed to proceed.

The Bill was prepared secretly, and notice of the first meeting was sprung upon the certificate-holders with only five days' notice, proxies to be in the hands of the secretary forty-eight hours previous to meeting, no copy of the Bill was sent, though to be had on application, hence any invitation of opposition proxies was simply impossible. It is true that five days' notice only for special meetings is provided by the articles of association, but it is obvious that this was intended for use in case the Council should be confronted in the course of business by some sudden emergency which required certificate-holders' immediate decision, and not for such a purpose as the present, which, although infinitely further reaching, and involving the existence of the Corporation, could have been dealt with leisurely after mature consideration.

A petition against this monstrous proposal has been very largely signed by certificate-holders, and has no doubt been lodged before now. It is inconceivable, notwithstanding the powerful interests of the promoters, that Parliament will establish a precedent striking at the very root of rights, property, and common sense.

Mr. McKinley and the "Maine" Ferment.

President McKinley deserves high commendation for the prudence and dignity with which he has met the efforts of the Jingos and Cuba annexationists of the United States to involve his administration in a war with Spain over the unhappy catastrophe in Havana harbour. "I will not be jingoed into war," he has said, and his calmness and prudent firmness have placed him far higher in the esteem of his sensible countrymen, and in that of people on this side the Atlantic, than he ever stood before. How different his position is to-day from that of the President of the French Republic, who now appears before the world as the humble, if not cowering, slave of a Jesuit-governed military faction, "which has the horse, and only wants the man to mount him, in order to re-establish the empire" and destroy liberty in France—liberty already more than half strangled.

The Canadian Railway Rate War.

This appears to be little better than an infamy. Putting on one side the question as to how far such conflicts, always breaking out at unexpected moments, and when stock markets are "well in on the bull tack," originate in motives kindred to those actuating the basest of card-sharpers, it is surely a scandal that presidents and managers should be free to indulge in these conflicts in utter disregard of stockholders' interests and in the mere wantonness of their absolutism. This week the Grand Trunk Company has published its version of the origin of the latest of these fights, throwing back, in doing so, the guilt upon the Canadian Pacific. Which is telling the truth we have not the means to judge, but it may once more be pointed out that the Canadian Pacific Company was admittedly the first to indulge in extensive "cuts" of rates, and that its managers sought to screen themselves from condemnation by the usual sickening cant about the "all Canadian" and "Imperialist" character of their road. But a few weeks before these same managers had been boasting through the Press at their command of the complete harmony of interests that had been established between the Canadian Pacific and Great Northern and Northern Pacific Companies, both of which are United States lines pure and simple. The Vanderbilt roads, too, still supply the Canadian Pacific with its chief eastern outlet. So the British public will draw its own conclusions. It is at least sure upon one point. By such conflicts as that now in progress investors and speculators alike in the old country are from time to time stripped of large sums of money. Grand Trunk stockholders in particular have time and again been almost ruined by the unscrupulous tactics of the Canadian Pacific.

Midland Railway of W. Australia.

The following letter will interest debenture-holders in this railway :—

To the Editor.

Sir,—Before the Debenture-holders meet again it would be as well they should know that the directors of the company made an application to the Court of Chancery some time ago to get the ordinary shares of the company reduced from £5 shares to £1 shares, with the intention of relieving the shareholders who are credited with £1 a share paid, from all further liability, on the pretence that they had given up something to which they had no claim. This my solicitors, Messrs. Lyne & Holman, of 5 and 6, Great Winchester-street, E.C., opposed successfully, thus saving for the company a valuable asset of £800,000, for which, according to my counsel's opinion, the directors are liable. If the directors had succeeded in their application, they (the directors) would have been relieved from all liability for neglect in not calling up the share capital, or for any misstatement with regard to it in the prospectus.

A Debenture-holder.

Imperial Continental Waterworks, Limited.

We publish at the request of the directors of the Imperial Continental Waterworks, Limited, the following reply, prepared by their engineer, to the letter from Mr. Brown appearin in The Investors' Review of January 28. This correspondence must now end :—

Gentlemen,—At the request of your secretary, I reply to so much as concerns me of the letter from Mr. Frederick A. G. Brown, of Genoa, published in The Investors' Review of January 28.

"1. Mr. Brown states that "the population lying next to the company's reservoir" is contained in the small villages on the line of aqueduct. I should think these words were meant to describe the eastern part of the city and suburbs of Genoa, which the intended aqueduct first reaches; but it is immaterial, for in dry seasons, which are properly held to determine the question, there is at present "no adequate public supply" to the greater part of the city and suburbs of Genoa.

2. My statement with respect to the resources of the Gorzente Company was accurate. As an old director of that company, which depends for its supply upon the enormously fluctuating rainfall of Northern Italy, Mr. Brown must know that his statement of the quantity drawn from the reservoirs in 1897 is no measure whatever of what would follow after a dry winter. The *fill dyke* months of Northern Italy are October, November, December, January, and February. Now the rainfall of the five *fill dyke* months contributing to the supply of 1897 was so greatly in excess of the average of the last twenty-four years that the flow to the existing reservoirs in those months exceeded 70 per cent. above what they would receive during corresponding months of average rainfall, and was two and a half times as great as it would have been in corresponding months of occasional dry seasons.

What, after such a flow to the reservoirs, is the value of Mr. Brown's statement that an average of 424·24 litres per second passed from the reservoirs during 1897? They are quite incapable of yielding any such quantity after ordinary seasons, and the measure of the surplus, which the consumers enjoyed in 1897, is the measure of the deficiency which they will experience after correspondingly dry winters.

Mr. Brown's assumption that because the Gorzente Company own the "chief part of the 4,200 acres of barren hill-side which constitutes their gathering ground" they can, "independently of their concession, dispose of the water that falls on their land," is not a fact. These 4,200 acres form the catchment area from which the Gorzente Company are authorised to take 250 litres per second; and even if the Company own the whole 4,200 acres they would still be prohibited by law from taking more than 250 litres. It may be that the Company have infringed the terms of their concession, and taken more than the law gives them, but no volume in excess of the chartered limit is really secure. Granting even that the Gorzente Company could with impunity exceed their statutory limit, as Mr. Brown states it to have been exceeded in 1897, his case would scarcely be assisted, for in ordinarily dry seasons that company would not have the surplus water to dispose of.

3. Mr. Brown attempts to veil a statement in my last letter by proceeding to paragraph 3 of his letter, which is a reply to my No. 4. All I stated there is correct.

4. Paragraph 4 of Mr. Brown's letter purports to be a reply to my No. 6, which is correct in every particular, and does not state, as implied by Mr. Brown, that the Bisagno is necessary, in addition to the Concasca, for the supply of about 240,000 persons. The Concasca, I have consistently said, is alone sufficient, if the intended reservoir is constructed to its full size. The Bisagno is a still larger supply, available if ever required.

Mr. Brown further states that "the Bisagno, besides being polluted, is completely controlled by the intakes of the municipal aqueduct." If polluted, that pollution is now supplied direct to Genoa without storage or purification of any kind. The causes of pollution ought no doubt to have been remedied, and if I am responsible for the matter when the Concasca has to be supplemented, they will be remedied at comparatively small cost. On the second point Mr. Brown is singularly misinformed. Only a small portion of the available supply of the Bisagno is controlled by the municipal aqueduct.

5. Mr. Brown leaves untouched paragraphs 7 and 8 of my letter.

6. Concerning the Concasca and Bisagno Mr. Brown writes, "these sources have become insufficient and objectionable." In the matter of sufficiency, they yield an average flow, more than twice as great as that from all the supplies controlled by the Gorzente Company. That they have become "objectionable" to that company, I can well believe.

The issue between Mr. Brown and myself is shortly this. I assert and he denies that there is, except after wet winters, a great and crying demand for an adequate supply of pure water to the city and suburbs of Genoa. Of these facts I have satisfied myself by careful personal investigation and inquiry on the ground. That the residents of Genoa and the Government are of the same mind is shown by the requisition you have received from residents, and by the fact that the Government, recognising the inadequacy of the present supply, have granted, and from time to time renewed, a concession held by your company which, if Mr. Brown's contentions were true, would be a mere mischievous interference with existing interests, and would serve no useful purpose at all.

I am, Gentlemen, your obedient servant,

GEORGE F. DEACON.

The South Metropolitan Gas Company.

Mr. George Livesey's speeches at the meetings of this company are usually worth reading, and on February 16 he waxed eloquent about tar, its by-products, their uses, and the best means of obtaining the best price for this residual. At present, tar realises only 1d. per gallon, which is not its value as fuel, and Mr. Livesey argued that gas companies ought to combine and regulate supplies so that 4d. per gallon ought to be realised. Although we do not profess to have any inside knowledge of the gas business, in which, of course, Mr. Livesey is *facile princeps*, we fail to see how the companies could gain very largely if such a combination were possible. The difficulty in the residual market is that the out-turn of the gas companies increases so largely that consumption cannot absorb the supply of by-products. After all, gas-making is the first consideration of these companies, and, if that goes on successfully, the directors and shareholders ought hardly to complain that this very success has knocked to pieces the market for residuals.

The Scottish American Investment Company.

We fully share Mr. Menzies' objection to criticism that is illegitimate, but his complaints are rather strained in the subjoined letter. Last week, in dealing with the annual report of his company, we wrote:—"Of the net revenue of £50,609, no less than £50,000 is absorbed in paying the dividend of 10 per cent., leaving only the odd £609 to be carried forward," which was strictly correct, as we were dealing with the way in which the company divided its profits up to the hilt, and, therefore, only took the revenue of the year into account, and paid no heed to the £6,000 brought forward from the preceding year, which allowed £6,609 to be carried forward. With regard to the matter of the interest charge, the difference comes to a splitting of hairs. Interest upon calls paid in advance only amounted to £1,012, out of a total of £74,191, and after Mr. Menzies has deducted this item he makes the charge 57½ per cent. of the interest on investments, whereas our general statement made it no more than 60 per cent.:—

To the Editor.

Edinburgh, March 1, 1898.

DEAR SIR,—Our attention has been called to an article in your issue of February 25 in regard to this company.

Your article is misleading, as one would naturally infer that £609 is the only sum carried forward, whereas, if you will turn to the report you will see that the sum carried forward was £6,609.

Again, you will see that the sum required for interest last year was £73,179; you have added interest on unealled capital, which is, of course, postponed to the interest on the Debentures and Debenture stock; so that the charge for interest is only 57½ per cent. of the interest on investments, and only 54 per cent. of the total income of the company, exclusive of the sum brought from last year.

We do not object to any legitimate criticism, and, as the original shareholders of the company have in twenty-five years received in dividends three times the amount of their capital, they have confidence in the management, and are quite content; but it is only right that we should be fairly treated, and we ask you, therefore, to have the goodness to correct your statement in your next issue.—We are, dear sir, yours truly, WM. JOHN MENZIES.

Managing Director.

A Curiosity.

The Economic Bank is a curiosity in a City where all kinds of novelties are tried. Although a bank, its directors are specially forbidden by the articles of

association from engaging in discount operations, making any loans, or permitting overdrafts. Furthermore, the investments of the bank must be in Trustee stocks or Colonial Government securities, but money must not be used in mortgages. Its income thus depends entirely upon revenue from investments, and as it grants interest upon deposits, the question naturally arises whether the margin betwixt the two will bear the expenses of such banking. At present it does not, for 1896 closed with a debit of £835, and 1897 with a debit of £1,402. We should not, however, like to say that the institution will not grow—it has now £52,488 of current and deposit accounts—as, after all, people who deposit their money like to see what is done with it, which they can do in this case, for the list of investments is published and hung up in the offices of the bank. There is one great merit about a scheme like this, which is that the depositors can lose little or nothing.

Critical Index to New Investments

GARTSIDE'S (BROOKSIDE BREWERY), LIMITED.

Brewery at Ashton-under-Lyne was founded by the late John Cartside in 1830, and was in 1892, for family reasons, converted into a private limited company, with a nominal capital of £120,000. This has now been sold to the Conversion Guarantee Company, who bring it forward as a public company with a share capital of £350,000 in £10 shares, equally divided into ordinary and 5 per cent. cumulative preference shares. An issue is also made of £300,000 first mortgage 4½ per cent. debenture stock, which is offered at 103 per cent., while all the share capital is offered at par, except 2,500 ordinary shares reserved for future issue. William Wilson & Son, of Manchester, value the brewery, public-houses, and plant at £445,002, while book debts, loans, &c., with £25,000 working capital provided from this issue, make up a total valuation of £539,431. Profits are distinctly stated for four and a half years, those for year ended June, 1894, being £25,796, and for year ended June, 1897, £35,474, while for the last six months of 1897 they were £19,549. The average for the four and a half years is, therefore, at the rate of £30,650 per annum, whereas debenture stock interest and preference dividend will require as much as £21,500. The aggregate purchase price is fixed by the Conversion Company, who are the promoters, at £600,000, payable in cash, in addition to the premium on the debenture stock, and of this total, £550,000 will be paid to the original vendors. The chairman of the old company will subscribe for one-third of the ordinary and preference shares and debenture stock now offered—he could hardly do less if the former partners have any confidence left in the undertaking. It is no doubt a very good brewery business, but we do not think profits justify the capital being blown out from £120,000 to £650,000. Even taking the profits for the year ended June, 1897, the price represents over seventeen years' purchase, and considering the present tendency to curtail licences, we think investors are asked to buy at a very high price.

READ BROTHERS, LIMITED.

This business of export bottlers of Kentish Town was founded in 1877, by W. T. Read and J. W. Read, both of whom are dead; and the recent sale of the business by executors is the reason for the formation of this company. Capital £200,000 in £10 shares, half Ordinary and half 5 per cent. cumulative preference, with a 4 per cent. irredeemable first mortgage debenture stock issue for £65,000, the whole offered at par. Interest due March and September. The purchase price is £265,000 in cash, which, in spite of £75,000 being provided as working capital, seems ample, for only £41,000 is considered by Field & Blades to be the value of the freehold land, buildings, and fixed plant. This leaves a large sum represented by goodwill, brands, and trade-marks. Net profits for past six years average £18,946, and for last year they were £18,731, which is not an indication of progress—rather the other way. We believe, however, the business is sound, and the margin between debenture and preference interest and profits is over £11,000, so the debenture stock and preference shares should be good speculative investments.

HUDSON HOTELS, LIMITED.

Share capital, £125,000 in £1 shares, 75,000 being 5½ per cent. cumulative preference, 50,000 ordinary, and 500 "management" shares, the latter being subscribed by directors and entitled to one-tenth of profits remaining after paying preference dividend. There is also an issue of £125,000 four per cent. first mortgage debentures, repayable at par September 29, 1912. Interest due March and September. Debentures and preference shares offered for subscription at par. Company buys three hotels at Scarborough, one at Filey, and one near Robin Hood's Bay, all being fully licensed freehold properties, and the unlicensed freehold property at Filey. Charles Appleton, of Leeds, reports that in his opinion the value of the properties and furnishings, exclusive of consumable stock and goodwill, is £204,000. Bradley, Davis, & Co., chartered accountants, Scarborough, give a certificate about profits, but it amounts to nothing. After saying they have investigated the books of four of the hotels for four years 1893-6, they tell us that the books have not been kept in the case of each hotel on such a basis as to enable proper trading accounts to be prepared. But they have ascertained the gross receipts, and have had submitted to them a statement as to the estimated receipts likely to be derived from the hotel and the unlicensed house at Filey, from the new shops and café adjoining the Royal Hotel, Scarborough, and the additional income expected from advertisements and extensions. They are then careful to express the opinion that if these properties are thoroughly equipped and capably managed, the carrying on in them of a first-class business ought, under ordinary circumstances and good seasons, to result in a gross income of £40,000 per annum; and, taking into consideration the saving which should be effected by the amalgamation, a profit available of £13,000. What with the estimated, the likely, the if, the under, the taking, and the should be, as a certificate regarding profits it is not worth the paper it is written on. Mr. Bertini, described as an hotel expert, goes one better, and says the profits may be reasonably expected to considerably exceed the estimate of £13,000. For the properties, goodwill, &c., the vendor, Mr. W. J. Hudson, asks £240,500, including the ordinary shares and £190,500 in cash, which we think a lot too much, with due respect to the chartered accountants and the hotel expert. The product of their tillage will be nil in our opinion.

BIRT, POTTER, & HUGHES, LIMITED.

Company is formed to take over the business of shipowners, freight contractors, and merchants of this name from January 1. The firm of Allport & Hughes was founded prior to 1845; that of John Potter & Co. in 1868, and J. Gavin, Birt, & Co. in 1877. An amalgamation of these three firms took place in 1889, and the business has since 1894 been extended by the acquisition of interests in works in Australia connected with the refrigerated meat trade and in refrigerated steam ships. The capital is £200,000 in £5 shares, one half in ordinary shares taken by the vendors in full payment of the purchase money, and the other half in 5½ per cent. cumulative preference shares to provide additional working capital. Interest due April and October. After paying preference dividend, 20 per cent. of remaining profits of each year will be carried to a reserve until it amounts to £25,000. Profits for eight and three quarter years to December, 1897, averaged £14,176; for the past four years they averaged £19,558; and for last year they were £22,565. The prospectus is a very plausible document all through, and Spain Bros. & Co. draw up a little balance-sheet showing a total of £175,824, and including amongst the assets sundry debit balances, £66,286; trade investments, which are mainly interests in refrigerated steamers and meat-freezing works and wharves in Australia, £60,000; and goodwill, £32,500. This firm of accountants seem to go out of their way to point out that the sum at which these trade investments stand they have ascertained to be under the par value of the investments and below their cost, and, from information acquired during their investigation, they consider it to be also below their actual value. The accountants seem to be here stepping beyond their province. Is their zeal stimulated by an actual knowledge of the state of the Australian refrigerated meat trade? If so, it is an uncommon knowledge. In our opinion, a third of the amount would be a liberal valuation for these trade investments. What, too, is the real value of the sundry debit balances, or of "goodwill?" Leave the thing alone till more light comes.

SALVIATI, JESURUM, & CO., LIMITED.

With a total capital of £330,000 in £1 shares, of which 180,000 are cumulative 6 per cent. preference shares and the rest ordinary shares this undertaking is brought out to amalgamate various

businesses in London and Vienna and thus stop existing competition. Business specialities of these firms comprise Venetian glass and art mosaics, fabrics and laces, carved wood and ornamental marbles, and bronzes and works of art. For various periods averaging five years Kemp, Ford certify average profits of five firms as being equal to £25,908 per annum; for last year they were £29,068, and an additional £2,000 is to be derived from another firm taken over. Freehold properties in Vienna are valued at £25,692, and in addition there are numerous leaseholds, while the stock-in-trade of the various firms on January 1, 1897, at cost price amounted to £101,686, and book debts, guaranteed to £8,699. For the businesses, goodwill, &c., the price asked is £300,000, of which £160,000 in cash, and £140,000 in ordinary shares. The public are invited to subscribe at par for the preference shares which, besides their fixed interest, stand the off-chance of getting 25 per cent. of surplus profits after 8 per cent. has been paid on the ordinary, and 10 per cent. of the balance has been set aside for reserve. An undertaking difficult to judge. The stock-in-trade has had plenty of time to run down since January, 1890, and we see no valuation of the London freehold premises. Probably they are not important, in which case the goodwill would work out on a liberal scale. On the other hand the board has some good names on it, and, assuming that last year's profits are maintained, there would be a surplus of about £20,000 after paying the preference dividend.

SALSADELLA LITHOGRAPHIC STONE QUARRIES, LIMITED.

The company is to buy the stone quarry of Clotazos at Salsadella, in the Province of Castellon de la Plana, Spain, and the concession of the Consuelo Mine on the same property. Capital £120,000 in £1 shares, of which 71,667 are offered at par, while 28,333 shares go to the vendor with £61,667 in cash. Quarry is acquired as a going concern, but there are no figures as to output or of any profits having been made. The prospectus is rich in favourable remarks about Salsadella stone, which is said to be of the very finest quality and, when of large dimensions, commands, from £20 to £30 for each stone at an average cost of obtaining and preparing of only 3s. 7d. to 4s. Plenty of this stuff and the company would be in clover if the vendor did not care to keep it. We think it a very questionable thing to invest in.

BRIGG HORSE HAULAGE APPLIANCE COMPANY, LIMITED.

Company acquires British, American, foreign, and Colonial patents relating to Mr. T. E. Brigg's invention for minimising draught in connection with horse haulage for £50,000, half cash and half shares. The capital is £75,000 in £1 shares, of which 50,000 are offered for subscription. The appliance has been fitted to many vehicles belonging to large firms in and out of London, and it is an excellent thing, but whether it can be made a commercial success is more than we can say.

KNIGHT'S DEEP, LIMITED.

Issue at par of first debentures to the amount of £400,000, bearing interest at the rate of 5½ per cent. per annum, payable January and July. They are redeemable at par by fifteen annual drawings, commencing July, 1902, but can be paid off at 103 two years previously, on six months' notice, and holders can, before the end of June, 1900, convert into shares to be taken at the price of £4 per share of £1 nominal amount. The security is a floating charge on the assets of the company, and includes a fixed hypothecation of all the mining claims (other than prospectors' claims), plant, machinery, and other immovable assets in South Africa, and the debentures are issued on the terms that the company shall create no further issue to rank before, or *pari passu* with, these debentures. The payment of the principal and interest is guaranteed by the Consolidated Gold Fields of South Africa, Limited. The Knight's Deep Company was only registered in 1895, and is, compared with other deep levels, quite a youngster. Little is known about it over here outside the offices of the guarantor company, about which we have not a good opinion.

SOUTHDOWN AND EAST GRINSTEAD BREWERIES, LIMITED.

A company was formed in 1895 to buy the Southdown Brewery, Lewes, and the East Grinstead Brewery, and to lease the Dolphin Brewery at Cuckfield. The purchase price was £161,640, including £61,640 in cash. The share capital was £95,000, of which £50,000 was in 5 per cent. preference shares, with an issue of £50,000 4 per cent. perpetual debenture stock. The lease of the Dolphin Brewery and accompanying houses was at a rent of £836, with an option of purchase which the company is now going to exercise. It has also bought the Bear Brewery at Lewes, with 45 public and beer houses, and it is to pay for these that the company offers 2,500 more ordinary shares of £10 each at par; 4,500 preference at 10s. premium, and £60,000 4 per cent. debenture stock at 3 premium. Interest due January and July. Debenture capital is therefore nearly as much as the share capital; but Collins, Tootell, & Co. value the properties, book debts, and other assets, at £316,396, thus exceeding the debenture debt by £146,396. Profits for 1897 of the three breweries first secured were £11,400, while by the purchase of the freehold of the Dolphin a saving in rent and sinking fund of £936 will be effected, which will give a surplus after paying debenture and preference interest of £786, apart from profits from the Bear Brewery, and the rent of £1,918 receivable from the properties attached to this brewery. Upon this basis the debenture interest and preference dividend should be forthcoming while "pubs." abound, though the undertaking is certainly not one of the best class. The company has been spreading itself out too fast for our slow mind.

UNION STEAMSHIP COMPANY OF NEW ZEALAND.

Company offers £220,000 4 per cent. debenture stock at par repayable at par May 1, 1928, but can be redeemed in 1908 on six months' notice at 105. The object of the issue is the conversion of existing terminable debentures amounting to £218,757, holders of which will receive preferential allotment in exchange for present holdings. Security is a floating charge on the property and undertaking, exclusive of uncalled capital; and debenture stock outstanding is not to exceed one-half the paid up capital, the present limit being £298,460. Last report showed assets standing in the books on September 30, 1897, amounting to £1,128,792, of which shipping represented £813,600; coals, stores, &c., £57,770; wharf properties, &c., £120,564; sundry debtors, £66,223; and cash, £70,634, whilst the liabilities, including £227,690 terminable debentures, then amounted to £329,853. Company has been doing very well lately, and although the policy of turning terminable debentures into fixed debt is not to be admired, there seems to be margin enough after paying interest. So the stock will doubtless be taken up by holders of the terminable debentures.

DOMINION ATLANTIC RAILWAY COMPANY.

This undertaking is the result of union of the old Windsor and Annapolis and Yarmouth and Annapolis lines. It has been a pretty free borrower of late, and now wants another £150,000 which it raises in 4 per cent. second debenture stock offered at 99 per cent. It ranks equally with the existing issue of £100,000 like stock, and is repayable at par in July, 1956, or can be redeemed at 105 on six months' notice after July, 1916. Interest is due January and July. Money is required to provide additional traffic facilities to cope with growing through business between Halifax, Boston and St. Johns, and otherwise improve company's position. Profits for 1897 were £39,038, whereas to pay debenture stock interest, including this issue, and preference dividend will require £43,500. It is a slenderly-secured issue, and not very cheap.

ALLDAYS & ONION'S PNEUMATIC ENGINEERING COMPANY, LIMITED.

This company is issuing £80,000 4½ per cent. mortgage debenture bonds at 105 per cent.; redeemable on six months' notice at 108 per cent., and interest is due January and July. Of the total, £50,000 is reserved for conversion of existing debentures. Present company was formed in 1885, and has assets, apart from goodwill and patents, to the amount of £179,546, of which £43,000 is freehold and leasehold property; £37,000 plant and machinery; £40,672 stock-in-trade; £15,755 investments, and £41,618 sundry debtors, besides £2 per share uncalled capital. Profits for thirteen months to July, 1896, were £16,966, and for the next twelve months £18,301; while debenture interest will require only £3,600. Debenture bonds, therefore, appear to be secure enough.

S. HIGGINBOTHAM & CO., LIMITED.

Capital, £100,000 in £10 shares, 6,000 being 5 per cent. cumulative preference and 4,000 ordinary, all of which are offered for subscription at par. Business, which was founded about the beginning of the century, is that of merchants and calico printers, of Glasgow, London, and Manchester. The late company was incorporated in 1890, but from the outset was heavily burdened with mortgage and other debts and the Indian famine, plagues, and other foreign troubles; and lack of working capital rendered liquidation necessary, so that since August, 1897, the business

has been carried on by the liquidator. Land, buildings, and fixed machinery were valued at £88,736 in 1896, and are now acquired for £30,000, while the movable assets fixed at a going valuation of £69,025, are acquired for £55,000. For thesix and a half years to May last the average profits were £9,032 per annum, and for the last three and a-half years they were £11,012, so that if profits are maintained at this figure there should be a balance, after paying preference interest, of £6,500. Business is transferred from August 1 last, and since then working results are said to show progressive improvement; the available profits for the half-year ending January 31, 1898, being more than sufficient to pay 5 per cent. on the whole capital for the period. To buy shares in an undertaking which has suffered in the past is not particularly inviting, but the new company takes over assets at nearly a third of their former valuation, and if the capital is subscribed the new concern will start free from debt and with a working capital of £60,000 of which £15,000 will be cash and £45,000 stocks and book debts. Assuming that the latter are recoverable there should be a chance, of successful working in the future.

EDISON-BELL CONSOLIDATED PHONOGRAPH COMPANY LIMITED.

For £160,000, of which only £40,000 is taken in shares and debenture stock, company acquires letters patent for the United Kingdom and the Isle of Man, Australia, South Africa, South America and India, and the trade-marks for China and Japan granted to various people in relation to phonographs, graphophones, and similar appliances. Share capital is £110,000 in 10,000 £1 ordinary shares taken by vendors, and 10,000 6 per cent. cumulative preference shares of £10 each. There is also an issue of £85,000 5 per cent. first mortgage debenture stock (part of a total of £100,000), which, with 8,500 preference shares, is offered at par. Although the first patent is dated 1886, there is no reference to any profits having been made, only a series of estimates, which may or may not be realised, and, therefore, the concern can hardly, as yet, be recommended as an investment, however tempting as a "spec."

R. H. & S. ROGERS, LIMITED.

The object of this company is to acquire and extend the business of R. H. & S. Rogers, founded 50 years ago, shirt and collar warehousemen and manufacturers, of Addle-street, London, with factories at Rotherhithe, and at Coleraine, Ireland. Capital, £165,000 in £1 shares, 90,000 being ordinary and 75,000 5 per cent. cumulative preference. Properties, mainly leasehold, are valued at £34,455 and certificates says net profits for last ten years have steadily increased year by year, those for 1895 being £10,246; for 1896, £11,401, and for 1897, £12,440. Assets also include stock in trade, £29,243; and book debts, guaranteed, £21,839. Purchase price is £160,000, of which £25,000 is taken in preference shares, £29,998 in ordinary and the rest in cash. 'Tis an old business, and profits for last year show 7½ per cent. on ordinary shares which is nothing to go into ecstacies over.

A. GOERZ & COMPANY, LIMITED.

To begin with this is a Transvaal and not a British limited company. Then it is to be saddled with founders' shares taking 20 per cent. of all profits after the ordinary have received 10 per cent. non-cumulative. In addition these founders shares have the right to subscribe for half of any future issue of ordinary shares at the price of 30s.—or less than that price up to 250,000 shares. The total capital is to be £1,015,000 in £1 shares, 15,000 of which will be founders' shares, and the vendor company: Goerz & Company, Limited, limited under German Law, and the subscribers to the working capital of the new company take the whole of them. Out of the 1,000,000 ordinary shares, subscriptions are asked for 200,000 at £1 12s. 6d. per share, on what grounds we cannot for the life of us discern in this astounding prospectus. A list of the company's investments is given, but it is a list of names alone of South African ventures—many of them poor enough. So this does not help us, nor yet the information that—

In the opening balance-sheet of the new Company of August 1, 1897, the shares constituting part of the vendor company's assets were taken at the value of £387,499 instead of £524,303 which represented their then market value as appears in the closing balance-sheet of the old company of July 30, 1897. Likewise the claims, forming another part of the said assets and acquired in former years, which have been taken over at £120,000, were valued by Dr. F. H. Hatch at £167,400. Since the early part of August the market value of the shares taken over is practically unchanged.

This hardly justifies the purchase price of £640,000 paid by the new company for the old in fully-paid ordinary shares, part of which are now offered at 12s. 6d. premium. But what follows is more wonderful still.

"A Syndicate subscribed at the price of 25s. per share for the 360,000 ordinary shares (of which 160,000 shares are fully paid and 200,000 shares at present have 5s. paid) which were issued by the new company, outside of the 640,000 ordinary shares, which passed to the vendors. The premium of £90,000 paid on these 360,000 shares goes to a reserve account."

Decidedly this company should be given a wide berth, even by mere gamblers.

Company Reports and Balance-Sheets.

*** *The Editor will be much obliged to the Secretaries of Joint Stock Companies if they would kindly forward copies of Reports and Balance-Sheets direct to the Office of* The Investors' Review, *Norfolk House, Norfolk-street, W.C., so as to insure prompt notice in these columns.*

County of London and Brush Provincial Electric Lighting Company.—Apparently this company has only begun to grapple with its business. Two of its London stations, supplying the Wandsworth, and Clerkenwell and St. Luke's divisions, have been completed in the year; but in the huge parish of Camberwell and a few small parishes adjacent to it the laying of cables has only just been started upon by the company. Furthermore, the confirmation of a provisional order has been obtained from Parliament, covering the Mile End, Old Town, St. George's-in-the-East, and Limehouse districts, and the consent of the local bodies has been obtained towards a provisional order covering the parishes of St. Giles', St. George's, Bloomsbury, and St. George the Martyr, with the western portion of Holborn. All this means much capital outlay for the company in districts where the demand for the light must be moderate at first, and where the price charged for energy must be moderate if consumption is to be encouraged. The law, we believe, compels the company to separate the capital expenditure and working account of each division, so that shareholders in the future will be able to gather how each venture fares. At present nothing can be said about this matter, for in neither of the two London divisions was energy generated during the whole year. The company also controls two provincial concerns, the Dover Electricity Supply Company and the Richmond (Surrey) Electric Light and Power Company, and both these returned a fair profit in the year. The company's interest in a third company of this class, the Bournemouth and Poole Electricity Supply Company, were disposed of to a new company, in which a fair interest was taken, but by the operation a substantial profit was obtained, which must have been about £13,000. With this sum the revenue received from the provincial companies and small balances from the London undertakings, the gross profit of £25,371 was produced for the year. After administrative charges and interest on temporary loans had been met, the net balance of £20,875 remained, and out of this the 6 per cent. interest upon the Preference capital was paid, leaving £10,090 to be carried forward. The sum of £5,643, received as premium upon new shares, has been applied as follows:—£3,253 in reduction of general preliminary expenses, £889 to writing off costs in connection with provisional orders, and £1,500 to reserve, raising its total to £5,000. Needless to say, the balance-sheet is in a state of flux, and shows large sums owing by and due to the company.

Barrett's Brewery and Bottling Company.—This company struggles against great competition, which apparently forces down profits. Thus, £148,387 from sales last year, or practically the same as in 1896, produced only a net revenue of £16,118, as against a net profit of £17,553 in the preceding twelve months. The balance allowed of a dividend of 4½ per cent. upon the Ordinary shares, but to do this the amount forward had to be reduced, by £1,131, to the beggarly total of £96. The allowances for repairs, renewals, and depreciation appear to be good, and £2,000 of debentures were redeemed in the year, bringing down the outstanding total to £13,330. There is a reserve fund of £18,500, and a leasehold redemption fund of 3,641, but the £85,000 of goodwill, hung round the neck of the company by the promoters years ago, mars an otherwise favourable balance-sheet.

Campbell, Johnstone, & Co., Limited. — This London company, although new, issues a fair profit and loss account. Including £734 brought in, the net profits last year amounted to £18,210, of which £1,953 was set aside to reserve, raising its total to £4,000. Debenture and preference interest was met, a dividend of 10 per cent. paid upon the ordinary shares, and £1,998 carried forward. The allowance of £3,803 for depreciation seems fair, but £1,609 for repairs is rather low.

Artisans', Labourers', and General Dwellings. — In the thirty-one years of this company's existence its issued capital has risen from £18,580 to £2,407,280, and its gross revenue last year amounted to no less than £170,927. Started with a philanthropic aim, it has developed into a thoroughly substantial form of undertaking, with a tendency to slip off into business a little above the original intention. The properties held are mostly freehold, leases belonging to them having been steadily repurchased year by year. Consequently allowances for leasehold redemption are slight except in the case of the "Block Buildings," which figure in the balance-sheet for £526,886, and necessitate about £1,000 being set aside each year for this purpose, which is not a large sum. There is a reserve of £171,323, but most of this, we believe, has come from premiums upon new issues, and the revenue is divided pretty

closely each year. Thus the net revenue last year was £114,744, or £2,020 more than in 1896, and of this all but £1,361 was absorbed in the preference interest and dividend of 5 per cent. on the ordinary shares, the balance being used in placing £1,000 to revenue reserve and carrying £361 forward. The 5 per cent. dividend has been paid for nineteen years, and the regularity with which revenue fits in with the 5 per cent dividend makes one presume that any considerable balance above is used in improving the estates.

New London Brewery Company.—Formed in March, 1897, only the prior charges of this company are, we believe, held by the public. The first report does not tell much, both the balance-sheet and profit and loss account being meagre; but apparently this does not matter much, for the profit last year amounted to £40,943, and the full fixed charges are only £18,000 per annum. In such cases the holders of ordinary shares can afford to be independent, and they announce that the directors will continue in office until 1900, as set forth in the articles of association. After meeting fixed charges, and paying £10,000 in interest to the vendors for the quarter of the year prior to the company being formed, a dividend of 12½ per cent. is declared, and £3,406 carried forward.

Barcelona Tramways Company.—This company earned a profit last year of £6,510, or about the same as in 1896. The sum of £5,610 was brought forward, and, after payment of preference interest and a dividend of 4 per cent. upon the ordinary shares, the balance of £4,165 is left. The company is transforming its system into one using electric traction, and proposes to do the same with a smaller company it controls. To provide funds for these purposes £100,000 of 4½ per cent. debenture stock has been issued.

O. C. Hawkes, Limited.—A small company founded a year or so ago which has done very well. The net profit is returned as £13,593, and after meeting preference interest and placing £3,060 to reserve, the ordinary shares received 8 per cent. in dividends. The reserve will then stand at £10,000, which is not bad for a company with a total share capital of £150,000. There are no debentures or loans, while trading balances are well in favour of the company.

Bordeaux Tramways and Omnibus Company.—This well-managed undertaking jogs along in a satisfactory manner. Gross receipts last year showed a substantial increase, while working expenses were lower, with the result that the net profit of £30,802 was £5,409 more than in 1896. The usual sum of £3,320 was set aside for depreciation, and, after adding £3,654 brought forward, the divisible balance of £31,136 was shown. This permitted of a dividend of 7 per cent. for the year on the ordinary shares, the carrying of £2,000 to the reserve fund, and an additional sum of £5,000 to the depreciation fund, leaving £2,891 to be carried forward. The extra addition to the depreciation fund is something unusual, and was decided upon after a careful examination of that fund by the board. It will now amount to £80,227, and is invested in high-class securities, interest from which is added above the allocations from revenue. Thus the real addition in the year has been £10,606. The reserve fund stands at £10,500, and is employed in the business. One can understand that a company worked in this manner is prosperous; and doubtless it will face the running out of its contract in a very different manner to the London Street Company. An attempt to supersede horse by electric traction has failed, as upon the committee appointed by the Municipal Council reporting in favour of the scheme, the Council rejected the report.

London Street Tramways Company.—This is a mere wreck of its former self, and the working of the company from July 1 to October 14, 1897, produced enough to allow of a distribution of 12s. 6d. per share, with £3,819 left to carry forward. The balance in hand is said to be needed in view of the fact that several actions for compensation have still to be disposed of. On October 14 last, the undertaking was taken over by the North Metropolitan Company, which guarantees 5 per cent. per annum on a sum of about £118,153, and a further sum of £1,800 per annum until June 24, 1910. After returning £6 per share the capital remains at £124,000, and there is about £43,909 of unrealised assets. The prospect, therefore, is not very brilliant for a return of the remaining £4 per share, unless the annuity of the North Metropolitan Company is treated as a return of capital.

Abbey Road and St. John's Wood Permanent Building Society.—This small building society seems to be very well managed. With £174,595 invested in mortgages, £152,048 is in mortgages under £1,000 apiece, and not one mortgage exceeds £5,000. There are no properties in possession at all, and the reserve amounts to £3,300. The society holds no deposit, yet has £8,000 invested in high-class securities, beside a fair amount of cash. A dividend of 5 per cent. was declared on the subscribing shares.

Alliance Assurance Company. — For the year 1897 this company added £1,002,068 net to the total of its insurance policies, obtaining by the business net new premiums amounting to £56,706, about £215,000 of its gross commitments having been re-insured at a cost of little more than £7,300 of its gross new premiums. Adding the renewal premiums, the capital paid for annuities sold, the interest on the life fund, &c., this part of the business gave a total income of £472,601; expenses of management, including commission, absorbed £31,567, or 10 per cent. of the net life premiums; and claims, surrender values, annuities, cash bonuses, &c., took £224,514; altogether, £256,081. In the fire department the premium income was £536,651, and £54 4s. 6d. per cent. of this went to pay claims. In addition, £34 5s. 10d. of the premium income was absorbed by expenses of management and commissions. These payments will leave a surplus of £113,694, including £30,672 net received as interest and dividends on the fire funds. Out of this balance £5,000 was used to write down cost of premises, £3,217 went to pay income-tax, and £100,000 to pay a dividend of 8s. per share, or rather more than 18½ per cent. on the paid-up capital of £550,000. This left £5,478 to be added to the fire fund. The company's life funds amounted to £2,730,062 at the beginning of the year, and to £2,946,583 at the end, an increase of £216,521. This large sum is in great part invested in Home securities of the best class.

The Commercial Bank of Australia, Limited. — In the December half-year this reorganised institution made a net profit of £53,222. Adding £4,299 brought forward, the total available balance was £57,521, out of which a dividend at the rate of 2 per cent. was paid on the preference shares, and £30,000 carried to special Assets Trust reserve account, leaving £6,350 to go forward. The balance-sheet shows unpaid calls amounting to £310,397, and calls paid in advance £106,233. Bank premises, at cost to new bank, stand at £454,453, which is a very large sum. A commencement has been made in laying by something against the bank's interest in the special Assets Trust Company, formed to take over its dead, or dormant, assets, which stand in the books at £993,356. One good feature about the business is, that it is not, apparently, being forced, but the future does not strike us as being very hopeful.

The Broken Hill Proprietary Company, Limited.—This is fairly entitled to be called one of the greatest mines in the world. Since it started in 1885, it has paid no less than 116 dividends, aggregating £6,472,000, and in cash and shares received from subsidiary companies, the total return to its shareholders has been £8,880,000. For years back its directors and managers have had to contend with various difficulties, and not least with the fall in the price of silver. In 1885, the first year of working, the highest price of silver was 4s. 2d. per ounce and lowest 3s. 11½d., as against 2s. 6d. and 1s. 11½d. in the year just closed. Sulphide ores again have given the company great trouble, but many difficulties have been surmounted and the mine remains a great property, with apparently a considerable period of life still before it. In the half-year ended November 30 last, operations were much interfered with by a fire at the mine which, for one thing, withdrew a large portion of the water supply from mining operations. Silver was also low in price, but some compensation for this was found in the increased price secured for lead. As a result of the six months' working the net profit was £111,128, which was not enough to pay the usual bi-monthly dividends. These, however, the directors continued to distribute, and drew the difference of £32,872 from the balance standing at the credit of profit and loss. They were quite justified in doing this, because the said balance even now amounts to £597,520, made up principally of liquid assets in cash, bullion, coke, and convertible stocks. In future, however, dividends will be paid quarterly, and the first one, at the same rate as the previous bi-monthly distributions, was paid on January 26 last. The company's works at Port Perry are described as being in excellent order, and a promising business has been started to deal with gold ores from Western Australian mines. It is not improbable that the dividends in the future may not be uniformly as good as they are now, but there seems little doubt that the company will long continue to give fair returns to its proprietors.

The Star Life Assurance Society.—The directors report a prosperous business for 1897, 5,385 new policies having been issued, insuring £1,719,931, and yielding £70,145 in annual premiums. The total amount of insurances now in force is £16,620,612. Last year the total income was £709,229, and, after payment of claims amounting to £268,506, including bonus additions of £34,369, and meeting all expenses, a balance of £301,022 was left to be added to the assurance and annuity fund, which now amounts to £4,375,761, about £1,400,000 of it invested outside the United Kingdom. Commission and expenses of management came to about £92,000 for the year, or rather less than 17 per cent. of the premium income.

London, Paris, and American Bank, Limited.—For the year 1897, the directors of this bank report a net profit of £29,117, exclusive of £6,586 brought forward. Two dividends, making seven per cent. in all for the year, have been declared and paid, taking £16,000; this leaves £7,703 to be carried to the new year. The bank has a reserve fund of £170,000.

The Great Western Colliery Company, Limited. — The accounts of this company made up to December last show net profits amounting to £18,964. After applying £5,000 to reserve, and adding the £805 brought forward, the available balance is £19,769, out of which the ordinary "B" shares receive dividends amounting to 5½ per cent. for the whole year. This leaves £1,019 to be carried forward. The cost of rebuilding a fresh batch of coke ovens, £4,049, has been taken out of the special fund reserved for such purposes.

Commercial Banking Company of Sydney.—The report for the second half of last year shows considerable improvement, both in respect of larger business and increased strength. Deposits are up £209,000; the note circulation, £76,000; and bills in circulation, £218,000. On the other side, cash balances and securities have risen £417,000, and bills discounted £87,000. The chief feature is the increase in Government securities, from £305,000 to £1,009,000, which is practically the amount of the reserve fund. The half-year's profit came to £45,000, or £000 more than in 1896, from which a dividend at the rate of 8 per cent. is paid. At the half-yearly meeting the chairman mentioned that the prospect of an abundant harvest has not been realised, but it was estimated that sufficient wheat will have been harvested to render foreign importations unnecessary for the present year. The deficient wool clip and reduction in flocks and herds by the drought make up a poor prospect for the immediate future.

Town and County Bank.—Almost the same amount of profit was made last year by this little Scotch bank as in the previous twelve months—£30,973 against £30,430. The substantial dividend

of 12½ per cent. is again paid, buildings account reduced by £1,500, Guarantee Fund increased by £4,000, and £1,000 added to Officers' Superannuation Fund. Deposits have increased £28,000 and the note circulation by £27,000, and together amount to £2,850,136, while the assets total up to £3,265,339. Amongst the latter "debentures, stocks and shares, loans on security of stocks, and other loans" is an item which might be very well sub-divided.

Bank of Mauritius.—The bank has hardly done so well as in 1896, the profit for last year being £16,320, against £17,421. A dividend of 5 per cent. for the year is again paid and £10,043 carried forward. Last year £10,000 was added to reserve, making it £15,000, only £1,144 being carried forward, and it was expected to have again carried £10,000 to this fund, but since the close of the year's accounts in Mauritius information has been received that failures of certain native firms have occurred, which will involve some loss to the bank, and, therefore, the whole balance is carried forward. This is unfortunate, as the bank had been making quiet progress during the three years it has been established, and a young institution like this will feel its first losses rather severely.

Surrey Commercial Dock Company. — The statement of tonnage shows that there has been much greater activity in the wood department during the past year, the increase in tonnage of wood-laden vessels being 84,940 tons. This has been offset, however, by a decrease of 81,452 tons in grain-laden vessels, owing to diminished import from Baltic ports, and consequently stocks in warehouse have been materially reduced. The revenue account shows hardly any variation in the net outcome, the profit for the year being £105,712, as compared with £105,001 for 1896. The usual 6 per cent. distribution is made, which absorbs a little more money than last year, owing to the recent issue of ordinary stock, but the balance carried forward is increased from £262,162 to £321,120, because the latter amount includes £48,087 premium on issue of new stock.

The Produce Markets.

GRAIN.

Wheat markets generally have been dull, with a tendency downward in price. English wheat was offered on Tuesday at Mark-lane at 6d. decline, but buyers were unwilling to respond, and there seems to have been no sales at even that figure. On Wednesday the attendance and trade were alike poor. English and foreign wheat held at Monday's rates, but buyers difficult to meet with. Flour, with a large arrival, was very dull. Maize was firm at recent currencies; buyers of mixed American, ex ship, at 16s., and sellers at 16s. 3d.; old corn held at 17s., ex quay, and Galatz-Bessarabian at 17s. 6d. to 17s. 9d. Barley was rather easier—Odessa-Nikolaieff, ex ship, 16s. to 16s. 3d.,; and Danubian 16s. to 16s. 3d. Oats were rather firmer, with an improved demand. Mixed clipped, ex ship, 15s. 6d. to 15s. 9d. Arrivals:—Wheat, 10,210 qr.; maize, 14,040 qr.; flour, 87,340 sacks; barley, 27,690 qr., and oats, 61,410 qr. The cargo market has been equally inactive, and on Wednesday sellers asked an advance of 3d., but buyers refused, and the close was dull at nominal rates. An advance of 3d. asked in maize checked business. Wheat options: June, ¼ up; October, ¼ down, with business for June. Barley firm, but quiet. Oats irregular. Spot parcels at Liverpool steady, but with a quiet demand. Prices unchanged. Red American futures opened ¼d. to ⅜d. higher, in sympathy with American advices, and moved in an upward direction during the morning on good buying, but when the demand had been satisfied the market fell off a trifle, the close being steady and ⅛d. to ¼d. per cental dearer than previous evening.

Official Closing Values (100 lb. deliveries—March 2).

	March.	May.	July.	Sept.	Dec.
Red American Wheat	7'10½	7'5¼	7'2	6'6½	6'5⅝

New York market has also ruled dull, with a tendency to decline, but recovered somewhat on Wednesday under the influences of steadier toned fore cable news. The market started with a steady tone, and May ½c. higher, and foreign buying orders, together with some "bears" covering, caused a further improvement, which was helped by a report that the Chicago clique was buying through a prominent commission house. During the middle of the day the market ruled dull; but later became again more active, fluctuating nervously in new positions, while distant months were sold off by "bears" on generally good crop prospects. The close was easy, with near months ⅝c. dearer; July unchanged, and September ⅜c. lower.

COTTON.

The spot market was fairly active throughout the week at hardening rates, though with periods of easiness. In American a good business has been done and quotations recovered Monday's reduction of $\frac{1}{32}$ (middling, 3 15/32d.). Brazilian was quietly steady. A good demand continues in Egyptian at firm prices. Surats remain dull, but, in sympathy with other descriptions, quotations are advanced $\frac{1}{16}$d. Futures on Wednesday opened at 1 to 1½ points dearer, and, with a good demand from "bears," improved slightly during the morning, especially for near months. The afternoon fully confirmed the improvement, but in the absence of sellers business was small. The market closed steady at a rise of 3 points or near and of 1 to 1½ points for distant positions. There has been a more buoyant spirit in New York, and on Wednesday the market closed steady 5 points up. The Southern markets are firm, with a general advance of $\frac{1}{16}$c. to ⅛c. Futures opened steady and 2 points dearer on favourable Liverpool cables, continued to improve under the influence of "bears" covering and good buying orders from Europe, the South, and from outside speculators, and closed steady with near positions 5 to 3 points and distant 1 point better than Tuesday. It is anticipated that there will be a much larger area planted with cotton in America according to Messrs. Neill Bros., though this is regarded as of doubtful benefit. Messrs. Hubbard Brothers & Co., of New York, think it more in the nature of a disaster to the interests of the country.

New York Closing Values.

	Spot.	Mar.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.	Jan.
Mar. 2 ..	6⅛	6'14	6.17	6.20	6'22	6'25	6'28	6'22	6'19	6'18	6'19	6'22

WOOL.

In wool there has been a sort of hand-to-mouth business. In some districts there has been a fair turn-over, but spinners only buy enough for immediate requirements. Though English wool is dull, mohair is firm, and merino is in considerable request at an advance. Holders are disinclined to sell. At the London Wool, Exchange on Tuesday, Messrs. H. Schwartze & Co. offered 3,055 bales of damaged China sheep's wool salved ex-Cromarty, China. The attendance was good, biddings were keen, and the bulk sold at from 2d. to 2¾d. per lb. A few lots realised 4d. to 4⅛d., while grays sold at 1¼d. to 3¼d. per lb. Continental and home representatives purchased about equal quantities.

METALS AND COAL.

Copper has been very active during the week, and has been advancing in price by "leaps and bounds," though one day there was a fall of 1s. 6d., which was recovered before the close of the market. The visible supply of the metal at the end of February shows a slight increase, Messrs. Henry R. Merton & Co.'s statistics giving the total stocks as 29,262 tons, compared with 29,076 tons on the 15th—a difference of 186 tons. The total deliveries of the month, however, having again exceeded the supplies—18,136 tons against 17,672 tons—the stock is smaller by 484 tons than at the end of January, and is 1,597 tons less than a year ago, 14,219 tons less than at the end of February, 1896, and as much as 25,928 tons less than at the same date in 1895.

Copper ..	50 7 6	49 17 6	49 10 0	49 5 0	49 2 6	48 17 6

The Glasgow pig iron market has also been strong, with a slight increase in rates. A fair business was done on Wednesday, 40,000 tons changing hands. Prices were very firm throughout, and at the last Scotch showed a further gain of 2½d. and Cleveland 1½d. A good deal of "short" covering was engaged in.

Settlement Prices.

	Mar. 2.	Feb. 23.	Feb. 16.	Feb. 9.	Feb. 2.	Jan. 26.
	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.

Hematite ..	49 6	49 1½	48 9	48 7½	48 6	47 0

There has been a slight improvement in tone in the coal market, but the attendance at the Exchange on Wednesday was small. Sellers were predominant. In the seaborne department there was nothing offering, the cargoes unsold on Monday having been in the interim disposed of. The prices accepted were unsatisfactory, but on Wednesday, with the continuance of colder weather, the feeling was possibly a little brighter Official quotations remain at 16s. and 15s., usual terms in the Pool, for Hetton Wallsend and Lyons respectively. The better classes of steam coal were steady, and Welsh was firm, owing to the liberal exports, though common descriptions are very cheap. Best West Yorkshire, 9s. 9d. to 10s.; Barnsley selected, 8s.; soft nuts, 6s. 6d.; Sheffield Silkstones, 7s. 6d. to 8s.; best Derby blackshale, 9s. to 9s. 3d.; North Derby Tupton, 7s. to 7s. 3d.; Erewash brights, 6s. 9d. to 7s. 9d; and nuts, 6s. 6d. to 7s. 6d.

SUGAR.

The market has generally been firm, with a fair business, but no change in rates. Cane kinds quiet but firm. In beet futures little doing, though rates are steady. Refined British cubes have been in fairly good demand at steady prices. Crystals.—Yellows active at the recent decline; white, quiet but steady. Foreign.—Granulated steady, but very slow. Ready J H, Groningen, Glauzic and E C H sold at 11s.; March, E C H, 11s.; April, first marks, 11s. 0¾d.; May-August, 11s. 3d., buyers 11s. 3⅜d., sellers f.o.b. Hamburg; April, P P Z, sold at 11s. 0¾d., f.o.b. Stettin.—Cubes—F M S, prompt, sold at 12s., and Meyer 12s. 7½d.; Hansa 12s., sellers f.o.b. Hamburg; W S R, prompt, 13s., sellers; S and T, 12s. 9d.; A S R and cut loaf, 12s. 9d, f.o.b. Amsterdam. Beet futures—March, 9s. 3½d. v.; April. 9s. 4½d. s.; May, 9s. 5½d. s.; June, 9s. 6½d. s.; July, 9s. 7½d. s.; August, 9s. 8d. v.; October-November-December, 9s. 6¾d.

TEA AND COFFEE.

Very little change, according to Messrs. Gow, Wilson, & Stanton has taken place in the Indian tea market, except that medium Pekoes and broken Pekoes occasionally show fractionally lower quotations. The official telegram gives exports to the United Kingdom for the second half of February as 930,000 lb. against 550,000 lb. for the same time last year, making the total from April 10 to the end of February as 133,350,000 lb. against 131,010,000 lb. during the same period last season. With heavy offerings, totalling 32,343 packages, the Ceylon market showed a further slight falling off in prices. The exceptionally good value now obtainable should have the effect of stimulating consumption in both home and foreign markets. The official wire gives exports to the United Kingdom for February as 6,750,000 lb. against 6,500,000 lb. same time last year, making the total from January 1 to the end of February 14,750,000 lb. against 15,000,000 lb. last year; it also estimates the quantity available for

March as 8½ to 9 million lb. Java was not represented, but catalogues are issued for 2,633 packages to be sold during the next fortnight.

Coffee has been quiet with a downward tendency. About twelve thousand packages have been sold by auction during the week, but the competition cannot be described as keen: Ceylon—middling to good bold bright gray, 109s. to 115s.; smalls, 99s.; peaberry, 121s. East India—bold common rough dull green to good coated pale bluish, 84s. 6d. to 108s.; low middling to middling, 67s. 6d. to 80s.; smalls 55s. to 63s. 6d.; peaberry, 84s. to 108s. Costa Rica—good bold dull coloury mixed, 104s. 6d. to 105s. 6d.; good middling, 89s.; peaberry, 109s. Salvador—middling to good bold dull green, 75s. to 81s. 6d.; low middling to middling pale greenish, 66s. to 68s.; peaberry, 84s. 6d. to 91s. Colombian—middling to good bold dull green, 74s. to 91s. 6d,; fine ordinary bold brownish, 46s.; smalls, 37s. to 46s.; peaberry, 89s. to 91s. 6d.

THE PROPERTY MARKET.

The activity and big sales of last week have been succeeded by dulness and somewhat trifling business this. Tuesday's sales at the Mart only realised a total of £6,643. The principal lot, the freehold of No. 12, Laurence Pountney-lane, City, submitted by Messrs. Debenham, Tewson, & Co., failed to find a purchaser, and was withdrawn at £7,000. A freehold residence, known as Edensor, in Finchley-road, Hampstead, put up by the same firm, met with a like fate, and was taken back at £3,500. Mr. C. W. Davies succeeded in disposing of all his lots for a total of £5,030, the chief item being a freehold residence, No. 6, Marlborough-place, Brighton, for which £1,795 was obtained. Things were also dull at Masons' Hall Tavern, where the only one of fourteen properties offered that changed hands was the free lease, with possession, of the "Duke of Wellington," in Haggerston-road. This realised £10,980. The premises are held for thirty-eight years at an annual rental of £100. Messrs. Thornton, Lumsden, & Newman were the auctioneers. A freehold residence, called Springfield, Moorgate, was sold by auction, at Rotherham, by Messrs. W. H. & J. A. Eadon, of Sheffield, for £1,560.

There was a considerable improvement at the Mart on Wednesday. Only two lots were returned "not sold," and the total sales for the day realised £18,170. Messrs. Rutley, Son, & Vine made the principal show, and commanded remarkable prices for some lots of freehold property. This firm disposed of about £12,000 of the day's results. It was altogether a day of "bricks and mortar."

Next Week's Meetings.

MONDAY, MARCH 7.

Civil Service Co-operative Society ...	The Criterion, 5 p.m.
Harrow and Stanmore Gas ...	Albion Tavern, 1 p.m.
International Investment Trust ...	Winchester House, noon.
Mersey Railway Debentures (Spec.)	Worcester House, 2 p.m.
North Provident and Guarantee ...	Edinburgh, 3.30 p.m.
State Fire Insurance	Liverpool, noon.

TUESDAY, MARCH 8.

Anglo Californian Bank	18, Austin Friars, 2 p.m.
Buenos Ayres Northern Ry. (Ex. Gen.)	Winchester House, noon.
Commercial Bank of Scotland ...	Edinburgh, 1 p.m.
Hageman & Co.	Cannon-street Hotel, noon.
Lea Bridge District Gas	3, Jeffreys-square, 2 p.m.
North Cornwall Ry.	57, Moorgate-street, noon.

WEDNESDAY, MARCH 9.

Alliance Assurance	Bartholomew-lane, noon.
Artisans' and General Dwellings (Gen. and Ex. Gen.)	Westminster Palace Hotel, noon.
Bordeaux Tramways & Omnibus ...	Winchester House, 2 p.m.
Cassell & Co	Memorial House, 2 p.m.
O. C. Hawkes	Birmingham, noon.
Railway Passengers' Assurance ...	64, Cornhill, noon.
San Salvador Spanish Iron Ore ...	Great Eastern Hotel, 12.30 p.m.
Star Life Insurance	32, Moorgate-street, noon.
Waterford & Tranmore Railway ...	Waterford, 1 p.m.

THURSDAY, MARCH 10.

Lever Brothers	Cannon-street Hotel, noon
London, Paris, and American Bank	Ditto, ditto.
Reversionary Interest Society ...	17, King's Arms-yard, naon.
Sheffield Tramway	23, Queen Victoria-street, 2 p.m.
Surrey Commercial Dock	106, Fenchurch-street, 1 p.m.

FRIDAY, MARCH 11.

Brighton and Hove General Gas ...	5, Great Winchester-street, 2 p.m.
Dominion Atlantic Railway... ...	6, Great Winchester-street, 1½ p.m.

MINING RETURNS.

MYALL UNITED GOLD MINING COMPANY.—Crushed, 2,100 tons, yielding 354 oz. of gold. Cyanide, 1,100 tons; yield, 407 oz. of gold.

MOUNT YAGAHONG.—1,000 tons of ore crushed from Star of East mine for yield of 540 oz. retorted gold, and 201 tons from Mount Yagahong for yield of 175 oz. retorted gold.

WELD HERCULES.—Tons crushed, 163; gold produced, 86 oz.; tailings, 4 dwt.

TOKATEA CONSOLS.—30 tons of ore crushed; yield, 90 oz. of retorted gold.

OTTO'S KOPJE.—7,223 loads washed, 197 carats won.

ALASKA TREADWELL.—Return for February, bullion shipment, $34,515; ore milled, 23,883 tons; sulpherets treated, 300 tons; bullion from sulphurets, $11,065.

NATAL COLLIERIES AND DURBAN COALING STATION.—Output of coal, January, 2,594 tons.

NEW QUEEN GOLD.—Result for fortnight ended February 26, 100 tons, yielding 80 oz.; Queencross, 108 tons, yielding 24 oz.

GREAT EASTERN COLLIERIES.—Output of coal for last month, 14,400 tons.

CUDDINGWARA.—Crushed 335 tons in 31 days; yield, 335 oz. of gold.

GOLDEN ARROW.—98 tons of ore crushed yielding 101 oz. gold

CROWN UNITED.—For fortnight ended January 21; 40 tons crushed; yielded 19 oz. 5 dwt., including tailings.

PESTERENA UNITED.—For February, 445 tons of ore produced 521 oz. gold.

AUSTRALIAN CHAMPION REEF.—Battery ran eight days; crushed 270 tons for a yield of 75 oz. retorted gold from the old stopes and workings.

GREAT BOULDER PROPRIETARY.—Returns for fortnight ended February 28, 1,413 tons crushed, yield 2,220 oz. gold.

ALADDIN'S LAMP.—530 tons of ore crushed, yielding 550 oz. gold and one ton rich ore shipped, containing 36 oz.

INVERELL DIAMOND FIELDS.—668 carats from 64 loads washed by hand.

VICTORIA (CHARTERS TOWERS).—320 tons crushed yielded 461 oz. gold.

LADY ISABELLE.—Cleaned up 98 tons for 86 oz. gold.

BREMNAES.—Crushed, 100 tons of quartz; result, 21 oz. gold; assay of tailings, 6 dwts. per ton.

CHAMPION EXTENDED AND HOME RULE.—785 tons of ore crushed yielded 396 oz. of retorted gold.

FRANK SMITH DIAMOND.—3,300 loads washed produced 130 carats.

LEICESTER CONSOLIDATED DIAMOND.—From the mine, 3,200. Floors, lumps, and hopperings, 3,600 loads washed, producing 177 carats, including good stone 20 carats.

ST. AGNES GOLD REEFS.—Clean up to February 25 after crushing 370 tons of quartz, yield being 162 oz.

MYSORE WEST AND WYNAAD.—Crushings for February, 1,400 tons, yield 477 oz.

NORSEMAN GOLD MINES.—Return for February:—697 tons crushed, yielded 515 oz. of gold.

BAYLEY'S UNITED GOLD MINES.—February return:—679 tons, treated by cyanide, yielded 842 oz. of gold.

COROMANDEL GOLD MINING COMPANY OF INDIA.—During February crushed 1,200 tons of stone, producing 903 oz, of gold; 1,100 tons of tailings (cyanide process), 109 oz. Total, 1,012 oz. of gold.

OOREGUM GOLD MINING COMPANY OF INDIA.—Crushed during February, 4,698 tons of quartz, produced 3,548 oz. of gold; 4,300 tons of tailings produced 498 oz. Total, 4,046 oz. of gold.

Answers to Correspondents.

Questions about public securities, and on all points in company law, will be answered week by week, in the REVIEW, on the following terms and conditions:—

A fee of FIVE shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of FIVE shillings must be sent to cover the cost of such letter, the fee then being TEN shillings for one query only, and FIVE shillings for every subsequent one in the same letter. While making this concession the EDITOR will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus:—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway?"

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The EDITOR has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market manipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The EDITOR further respectfully requests that merely speculative questions should as far as possible be avoided. He by no means sets himself up as a market prophet, and can only undertake to provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the INVESTORS' REVIEW, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

TOUJOURS PRET.—I believe the management is honest and, so far, the record of the company has bee a fair one. Its ore is said to vary considerably in quality, and, as no information is published between the reports, it is impossible to say how far it has benefited by the rise in price. One point against it is an unsettled dispute with the Government. Though the shares have not improved so much as others of the same class, they are higher now than at any time last year. I should be disposed to wait until the report in May.

ORIGINAL READER.—The stock you mention is not quote officially, hence its omission from the list.

CENTRAL PACIFIC RAILROAD.

A MEETING of Shareholders in the Central Pacific Railroad Co. favourable to the Lubbock as opposed to the Banbury Plan was held at Anderton's Hotel, Fleet Street, London, E.C., on Thursday, the 24th of February, 1898, at 2.30 p.m.

The Meeting was, with the approbation of a large body of other Shareholders, convened by Mr. Walter Morshead, on the requisition of thirty-five investors in Central Pacific Stock, asking him "to take such steps as he might deem expedient by advertising, convening meetings, or otherwise, for explaining the present position to our fellow Shareholders, and securing, as far as may be found practicable, a re-organisation on the basis of the Fairchild-Lubbock Plan."

The following RESOLUTIONS were submitted to the Meeting and carried unanimously :—

1. That a Committee of Shareholders and Banbury Certificate Holders be formed to support the Fairchild-Lubbock as against the Banbury Plan, and with the object of securing, as far as may be found practicable, a re-organisation on the basis of the Fairchild-Lubbock Plan, to take such steps as may be deemed expedient to represent and protect the interests of the Shareholders in the Central Pacific Railroad.

2. That such Committee should consist of the following Shareholders :—Mr. Aubrey Stanhope, Arthur's Club, London; Mr. M. J. Horgan, 50, South Mall, Cork; Mr. T. Stewart Jones, 43, Park Lane, London; Mr. F. J. Longton, Woolton Hill, Liverpool; Mr. Walter Morshead, Albany, Piccadilly, London; and Mr. Edward Fox White, 59, Lexham Gardens, London, with power to add to their number.

Steps have been taken for the protection of the Stock, and further announcements will be made shortly. Meantime communications are invited, and papers will be forwarded to all Shareholders on application to W. C. GUNNER, Secretary, Shareholders' Protection Committee,

124, Chancery Lane, London, Room No. 12.

25th February, 1898.

Notice to Subscribers.

Complaints are continually reaching us that the Investors' Review cannot be obtained at this and the other railway bookstall, that it does not reach Scotch and Irish cities till Monday, and that it is not delivered in the City till Saturday morning.

We publish on Friday in time for the Review to be at all Metropolitan bookstalls by at latest 4 p.m., and we believe that it is there then, having no doubt that Messrs. W. H. Smith & Son do their best, but they have such a mass of papers to handle every day that a fresh one may well look almost like a personal enemy and be kept in short supply unless the reading public shows unmistakably that it is wanted. A little perseverance, therefore, in asking for the Investors' Review is all that should be required to remedy this defect.

All London newsagents can be in a position to distribute the paper on Friday afternoon if they please, and here also the only remedy is for subscribers to insist upon having it as soon as published. Arrangements have been made that all our direct City subscribers shall have their copies before 4 p.m. on Friday. As for the provinces, we can only say that the paper is delivered to the forwarding agents in ample time to be in every English and Scotch town, and in Dublin and Belfast, likewise, early on Saturday morning. Those despatched by post from this office can be delivered by the first London mail on Saturday in every part of the United Kingdom.

Cheques and Postal Orders should be made payable to Clement Wilson.

The Investors' Review can be obtained in Paris of Messrs. Boyveau et Chevillet, 22, Rue de la Banque.

ADVERTISEMENTS.

All Advertisements are received subject to approval, and should be sent in not later than 5 p.m. on Thursdays.

The Investors' Review.

The Week's Money Market.

Short money has been in strong demand throughout the past seven days, and, as will be seen below, the market has had to reborrow more than the whole of its loans falling due at the Bank of England. The rate for day to day loans, therefore, moved up to 2¾ to 3 per cent., and seven day market loans have not been quoted under 2¾ per cent.

Discount rates hardened in sympathy and 2⅞ per cent. has become the general rate for three months' choice bills, 2¾ per cent. being charged, as a rule, upon longer-dated paper. Whatever inclination there was towards a slightly easier tone a week ago was quite dissipated by the appearance of a demand for gold on New York account. Offspring this of the "war-scare" and stock jobbing operations, at one time it ruled so strong as to lead to the purchase of all the gold in the open market, buyers having to bid 77s. 10¼d. per ounce, before they obtained it all. The shippers also withdrew £500,000 from the Bank of France, and when that institution raised its premium for the metal they completed their order by buying £23,000 in eagles from the Bank of England on Tuesday. Since then the political ferment in the States has considerably subsided, prices of stocks have recovered, and the New York exchange has distinctly risen. The price of gold, however, hovers about 77s. 9¾d. per ounce, and until the fast steamer has left to-morrow it would be premature to assume that the demand is over. Foreign exchanges continue to move in our favour, especially the German rate, which supports the view that a fair proportion of that country's share of the Chinese Loan will be sent over here, an operation encouraged by the fact that the outside market rate in Berlin is only 2½ per cent. So far there has been no release of Government money, but the rate of accumulation has diminished, and disbursements cannot now be long prevented. The withdrawal of £200,000 in sovereigns, for shipment to Buenos Ayres yesterday, was of no importance by itself, and if the United States demand comes to nothing, the Bank may even gather up a little bullion which it would be all the stronger for.

The £1,500,000 of Treasury Bills offered last Friday were applied for about eight and a half times over, the whole amount being allotted in twelve months' bills at an average rate of 2¼ per cent. Government departments and banks took the bulk of the issue, and so the payment for them on Wednesday did not have much effect upon the market. The Consols settlement did not influence rates, and it is probable that the market gained rather than lost by the adjustment of accounts, as the Government bought stock last month.

Not much more than £216,000 has been added to the "public" deposits or Government balances, the week's Bank return tells us. The Treasury disbursements, however, at the end of February might have been expected to reduce the total somewhat. They have not done so, and therefore, with the slight addition named, it stands at £18,811,093. And the open market has had to find nearly as much money for taxes as usual as the decrease in the "other" deposits, which are down by £847,053 to £35,914,840, proves. The money has been paid over to the Government, and by it dispersed in salaries, &c., at the end of the month. Hence the decline of £878,101 in the banking reserve, which is now £23,605,649. Notes and coin to more than that amount have gone into circulation since £78,000 in gold came in from abroad. As the open market was already poor it has had to increase its borrowings at the Bank

by £533,109 during the week, and the total of the "other" securities is now up to £35,579,185. The figures of the "Rest" in this week's return indicate that the Bank will be able to pay its stockholders a 5 per cent. dividend for the past six months. This is the same as it paid both in September and March last.

SILVER.

The weakness in this market has made further progress and the price for bars, both for immediate delivery and two months forward, is 25d. per ounce, as against 25 11/16d. per oz. a week ago. As we have said, the market is inherently weak, but a reason for this sharp decline was furnished by the revival of the rumour that the Indian Government will raise the duty upon silver. It is an old tale that serves to influence the market about every two months, but there is more inclination to lend an ear to the suggestion just now in view of the near approach of the Indian Budget statement. The "Bazaars" in India, whence this rumour emanated, usually know beforehand any important change that may be proposed in that Budget, and there is, therefore, a fair possibility that the rumour may only anticipate Sir J. Westland's statement. Such a policy has been strongly urged in certain quarters, but if it is carried out, will the Indian Government provide any plan for an increase of the currency? Silver still goes in large quantity to India in spite of the Government boycott, and must, therefore, serve as a medium for settling debts, although, perhaps, a cumbrous one; but if its employment is further penalised, will the Government provide the trader with an alternative instrument of payment? Meantime, the monetary stringency in the Peninsula enabled the India Council to sell about 88 lacs of bills and transfers, chiefly the latter, in the week ended Tuesday last, and the applications on Wednesday were again on a large scale, with fair sales of "specials" since. The amount to be offered next time has, therefore, been raised to 50 lacs. Indian exchanges have risen to 1s. 4 1/32d., but Chinese rates are weak on the decline in silver.

Stock Market Notes and Comments.

Our markets have been in the hands of the sensation-monger during the greater part of the past week. Nothing illustrates more strikingly the cosmopolitan character of the London Stock Exchange than the rapidity with which it responds to influences acting upon it from all the ends of the earth. Last week it was affected principally by the United States, where a political scare came upon the top of that caused by the railway rate conflict, and further depressed prices. There never was any sense in the Jingo outcry of certain American newspapers about the *Maine* disaster. No sensible person on either side of the Atlantic believed for one moment that the Spanish Government had anything to do with the destruction of the ship. Spain is not governed by assassins. Nor could it have been the work of the insurgent party in Cuba; they had no motive to do such a thing. All the probabilities point to an internal explosion, due either to spontaneous combustion in the coal bunkers of the vessel, or to the presence of some dangerous explosive in its magazines. Nothing, however, would serve American Jingos but a war with Spain, and their organs in the Press industriously circulated and caused to be transmitted to London the most unblushing lies about this lamentable accident, which had the effect of depressing not only American railroad securities, but Spanish bonds, and even, to a minor extent, our own Home Railway stocks. The Stock Exchange, in other words, is so sensitive that all departments suffer when one is attacked.

Appearances now indicate a calmer frame of mind, and prices have momentarily resumed their upward course, but we are not yet delivered from the railway rate conflict. The slight recovery of the last two days is due to the re-purchases of speculators for the fall, and cynics here do not scruple to say that it has been allowed to take place because Jingo Senators at Washington, and their supporters among the speculative American public, "have got all the stock they want." This is, and is not, a slander. Beyond question a very large amount of money has been won from British speculators through the "bear" operations of Americans in Wall-street and in London during the past fortnight. When the selling began here nothing was known publicly about the war of rates, and it went on merrily through the earlier stages of that war, down almost to the close of the hubbub made about the loss of the *Maine*. We are sorry to say that a great many people here have recently been selling "bears" also, and pretty near the bottom of the market. As usual, however, the shrewd wire-pullers who manage these things in America probably again stand to make money at our expense on a rising market. How often is it necessary to repeat that there is only one way to handle these American railroad securities with any degree of safety? It is to buy when prices are down no more than can be lifted and stowed away, and to pay no attention to episodes like that to which markets have been subjected in the last ten days, but quietly wait and sell when a favourable opportunity comes. This advice, of course, applies only to speculative securities. The best American investment stocks are as little affected by passing market ragings and plungings as are our English railway preference stocks.

A certain amount of depression has also been produced by the condition of our own money market, dealt with elsewhere. The decline in prices arising from the stringency of money has not been great, because credit has not been really very dear; but it has been sufficient to let observers see how great the trouble might be were money to advance to twice its present price, and stay at that rate for three months. Even with loans at 3½ per cent. to 4 per cent., numbers of speculative holders are being obliged to sell. This selling is, perhaps, specially noticeable in Argentine Government stocks, which are still sufficiently smudged to be more difficult to borrow upon than most securities of a better grade. For many months back money in the Stock Exchange has been 4 per cent. to 5 per cent. if lent on these bonds, when the current rate was little better than 3 per cent. Very little more is charged now than then on these bonds, yet speculative holders are being forced to let them go, and prices have been going backward, with only occasional small rebounds. The fall should not, in our opinion, tempt new buyers to come forward. Argentine stocks are in no sense investment securities. They have been skilfully worked up to high prices, and the deficits of the Government have been adroitly concealed; but there is no stability as yet in Argentine finance, and the promise of full payment of interest on the various loans was merely a piece of bounce indulged in "to inspire investors with confidence."

In all departments of the Stock Exchange business has been quiet and often difficult to transact. Had Paris not continued to support a few of its special favourites the fall in South African mine shares, and in some of the foreign government bonds, would have been greater than it is; and even with Home securities there has been no particular display of strength. The market is not now having money poured into it freely at any point, and, therefore, all sections of it stagnate and become dull, or flat, after each little spurt of activity. How long the Bourse will be able to maintain even its

present appearance of strength no one can tell. We must not, however, forget that the agitation has again sprung up in Paris against the outside dealers forming the *Coulisse*. Two French papers in particular—*La Réforme Economique* and *l'Economiste Européen*—have begun to bitterly denounce the "foreigners," as they call them, who deal on the Paris Bourse, and popular sentiment is running so bitterly against all houses of Jewish origin that we should not be in the least surprised to see these houses begin to move their funds, and their business, to other centres, where race and creed hatreds are not fanned into activity by fanatical malice. We may be quite sure that such a transfer of capital could not take place without very serious consequences to quotations on the Paris market. In short, the situation is ticklish at many points, and requires to be watched with vigilance, for trouble may arise when least expected. The position of Spain, for instance, is extremely precarious in a financial sense, and the doubts beginning to prevail about the payment of the next coupon on the public debt are by no means ill founded. Spanish paper money is steadily depreciating, and the Government is not only spending a great deal more than its available revenue, but is also in such feeble credit as to be unable to raise a fresh loan. Default and reorganisation of Spanish debts cannot be very far off. A spasm of dearish money in Paris would bring it about at once.

We have dealt so fully with South African shares in other parts of this number, and during the past few weeks, that it is not necessary to enlarge upon this subject here, beyond noting the fact that the disposition to sell predominates, and that it appears to be beyond the power of the trusts and financial combinations to keep the market up. The way it sank, in places, on Wednesday is by no means pleasant to contemplate. As for the Western Australian market it seems to be still "Bottomley & Company," with empty pockets outside. The career of this man is a wonder and a mystery to us, but he certainly manages to "keep his corner" with wonderful resource and activity, and if the public contents itself with merely watching his performances it will be all right.

The Week's Stock Markets.

Stock markets have shown a slightly stronger tendency this week, but political uneasiness and monetary uncertainty have tended to restrict speculative business, and beyond a little reinvesting of dividends there has not been much inclination on the part of the public to join in. Apart from a large business in United States Railroad shares there has been no particular activity displayed in any department.

Consols are now quoted ex. the quarterly dividend, and the price shows hardly any change, but the hardening tendency of the discount market has caused a slight set back in some of the leading gilt-edged securities.

The Home Railway market has been an idle one, and speculative business remains on a small scale, while the only items of interest have been the declaration of two of the Scotch companies' dividends. The distribution of 5 per cent. by the Caledonian Company was quite up to the most sanguine expectations, and this gave a rather firmer tone to the whole market, and Caledonian issues all advanced. Glasgow and South-Western deferred however, declined a point or so, the dividend of 5 per cent. being ¼ per cent. lower than a year ago. Unusual activity is now being displayed in the Clyde shipbuilding trade, and the large amount of arrears of work which has to be made up will, it is argued help the traffic on these lines considerably. Brighton deferred fell sharply, the traffic return being looked upon as unsatisfactory, but there is a certain amount of mystery about this week's figures, as possibly some of the season ticket payments do not fall in the same week in both year's returns. All other traffics were good, when due allowance is made for the big increases with which comparison is made. Central London shares have again been inquired for, but Metropolitan and Districts are weaker, and the stocks of the heavy lines have met with little or no support.

A large amount of attention has naturally been devoted to United States Railroad shares. Towards the end of last week prices hardened up slightly in spite of a large amount of arbitrage selling, this being more than balanced by home buying, and the market has begun to ignore the daily batches of conflicting telegrams all purporting to explain the origin of the *Maine* disaster. After the process of weeding out weak operators had been concluded in Wall-street a healthier tone was apparent, and advices from Washington stating that there would be no difficulty in settling the *Maine* matter by diplomacy also helped to raise prices. Wall-street on the whole, however, has exhibited a feverish tendency, and the absence of the decision in the Nebraska maximum rate case, coupled with the uncertain political outlook, all tended to discourage operators. The shipments of gold from Europe to the United States had very little effect on prices, and after losing one day about as much as had been gained the day before, the net result is to leave quotations very much as they were. The Pennsylvania Company has issued a very favourable annual report, and the monthly statements of the Louisville and Nashville, and the Northern Pacific Companies were also up to expectations. Chicago and Milwaukee stock has fluctuated considerably on dividend rumours, a distribution of 5 per cent. being now looked for. It is stated that $6,000,000 out of a total of $8,600,000 guarantee notes of the Atchison Company have been converted into 4 per cent. general mortgage bonds. Last week's *Financial Chronicle* gave some interesting particulars of the earnings of 190 roads during the year 1897, the net earnings amounting to $349,166,347, or an increase of nearly $36,000,000. The changes in Canadian Railway issues were confined within narrow limits during the greater part of the week, but on Tuesday a rapid advance occurred on rumours, as yet unconfirmed, that the question of rates was about to be settled on the intervention of the Canadian Government. At any rate, large buying orders were received from Montreal, which were interpreted as meaning much about the same thing, and this was quite enough in itself to put prices up several points. A good Trunk statement for January was also published, and helped to harden prices.

Among foreign railway stocks a feature was the strength of Buenos Ayres and Ensenada issues, the rises ranging from 4 to 6. Several other South American

stocks advanced moderately, but, on the other hand, Cordoba Central (Central Northern) income debentures have been pressed for sale, the traffic return again showing a big decrease, and it is now thought that the dividend will, at an outside estimate, not be above 2½ per cent. instead of the full 5 per cent. paid a year ago.

The foreign market has been quiet, and prices have drooped but not to any appreciable extent, although the Paris Bourse was for several days thoroughly under the influence of the heavy fall in Spanish "Fours," caused by the tension between America and Spain, and the monthly settlement on the Bourse which began on Tuesday disclosed a very weak account in this stock. The price has since recovered part of the fall, but still leaves off well below last Thursday's quotation. Greek bonds advanced on the statement that the new indemnity loan had been arranged for by a syndicate, and a slight improvement is apparent in Hungarian and Russian bonds. As regards South American descriptions, Argentine Government and the Cedula issues have been depressed by the rising gold premium at Buenos Ayres, but a slight drop in the premium yesterday was promptly followed by a sharp rally in prices. Brazilian bonds have hardly moved, in spite of rumours to the effect that Brazil is likely to default in the payment of the next coupon of the external debt. A little more support came from Paris just at the last, when it was found that the account there was being settled rather more easily than had been anticipated.

Business has been slightly on the increase in Miscellaneous securities, and members have been deserting to this section from the now almost lifeless "Kaffir" market, turning their attention to Russian petroleum shares and the like. The price of the latter company's ordinary shares has been forced up from 18 to 25, and a "splitting" scheme is already being discussed. Another feature has been a sharp rise in Millar's Karri ordinary, a first dividend of 25 per cent. being talked of. Salt Union ordinary and preference issues have recovered part of the recent fall. Eastmans and Hammond Meat Company's shares have been enquired for, after a long retirement from the active list. The dividend of 7½ per cent. announced by the directors of Cassell's put the price of the shares down 30s., the distribution being 1½ per cent. lower than last year. Sulphide Corporation debentures have fallen 10, and Welsbach Gas stocks have shed still more of their premium. Electric lighting concerns continue in favour, a rise of 4 in Brush debentures being noticeable. Among Breweries, Guinness, ordinary is 10 lower, and Allsopp ordinary and preference have both been marked down about 3. South Hetton coal stock is higher, a dividend of 10 per cent. having been announced, and it is also proposed to split the stock into ordinary and preference shares of £10 each. A steady rise in Western and Brazilian Telegraph issues was attributed to some sort of an arrangement with the Direct West India Cable Company; Peebles debentures rose 2 on the satisfactory position of affairs disclosed at the meeting; and D. H. Evans ordinary and debentures are firmer on dividend rumours. The Lipton prospectus is expected in a day or two, and a premium of ¾ on the ordinary has already been set up to stimulate the zeal of the speculative investor.

There are few fresh features of interest noticeable at the close of the week. Grand Trunk stocks finished off with a smart rally, the weekly traffic return, in spite of rate-cutting and snow-storms, being again excellent, and the strength of Union Pacific and Northern Pacific issues, points rather to a belief that the rate question has taken a favourable turn. United States Railroad shares close rather below the best points, but still well above last week's level, the solitary exception being Reading ordinary. Mexican Railway and other silver securities have been adversely affected by the decline in the price of the metal, and South African and West Australian ventures show a further fall.

MINING AND FINANCE COMPANIES.

The South African market has been dull and neglected and little or no support has been received from Paris; on the contrary, operators on the Bourse here have sold freely everything from De Beers downwards, and the Cape has also been sending selling orders, the recent speech by the President of the Orange Free State not being at all well received over there. To make matters worse there are also some queer rumours about, and among other reports one to the effect that the Transvaal Government intends imposing a tax of 15 per cent. on the production of the mines. Little or nothing has been going on in the West Australian section, but copper shares have again attracted a good deal of attention. Rio Tinto is nearly 1 higher on the week, owing to a rise of 17s. 6d. in the price of the metal during the past fortnight, but the last returns show a slight increase in the visible supply of copper. Among Indian companies, Nundydroog is firmer, a cablegram from the mine stating that the flood is now under control.

Dividends Announced.

MISCELLANEOUS.

East London Water Works.—Dividend for the past half-year at the rate of 8 per cent. per annum. Balance forward, £19,627.

Surrey Commercial Dock Company.—£2 10s. per cent. on the ordinary stock and on preference stock "A," making, with the interim dividend paid in October, £5 per cent. for the year, and an additional bonus of £1 per cent.

Prices Quoted on the London Stock Exchange.

Throughout the INVESTORS' REVIEW middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the INVESTMENT INDEX published quarterly—January, April, July, and October—in connection with this REVIEW, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the REVIEW almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the INVESTORS' REVIEW any subscriber can follow for himself the movements of securities from week to week, and the INVESTMENT INDEX will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S.F. Snk.Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D.Stk., *debenture stock*; Pf., Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Ans., *annuities*; Cu. or Cm., *cumulative*; Gu or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Insc., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*.

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

The Investors' Review

EDITED BY A. J. WILSON.

Vol. I.—No. 10. New Series. FRIDAY, MARCH 11, 1898. [Registered as a Newspaper.] Price 6d. By post, 6½d

The Investment Index,

A Quarterly Supplement to the "Investors' Review."

Price 2s. net. 8s. 6d. per annum, post free.

THE INVESTMENT INDEX is an indispensable supplement to the Investors' Review. A file of it enables investors to follow the ups and downs of markets, and each number gives the return obtainable on all classes of securities at recent prices, arranged in a most convenient form for reference. Appended to its tables of figures are criticisms on company balance sheets, State Budgets, &c., similar to those in the Investors' Review.

Regarding it, the *Speaker* says: "The Quarterly 'Investment Index' is probably the handiest and fullest, as it is certainly the safest, of guides to the investor"

"The compilation of securities is particularly valuable."—*Pall Mall Gazette.*

"Its carefully classified list of securities will be found very valuable."—*Globe.*

"At no time has such a list of securities been more valuable than at the present."—*Star.*

"The invaluable 'Investors' Index.'"—*Sketch.*

"A most valuable compilation."—*Glasgow Herald.*

Subscription to the "Investors' Review" and "Investment Index," 36s. per annum, post free.

THE

LAW GUARANTEE AND TRUST SOCIETY, LIMITED.

Capital Subscribed	**£1,000,000**
do. Paid-up	**£100,000**
do. Uncalled	**£900,000**
Reserve Fund	**£70,000**

FIDELITY GUARANTEES,
On behalf of Managers, Secretaries, Clerks, Cashiers, Collectors, &c.

DEBENTURE INSURANCE.
The advantages of such insurance are as follows:—
1. The Debentures being guaranteed by the Society can be placed at not less than par, thus saving discount.
2. A lower rate of interest is willingly accepted.
3. The Society acting as Trustee for Debenture Holders also adds to the Security.

MORTGAGE INSURANCE.

CONTINGENCY INSURANCE,
In respect of Defects in Title, Lost Documents, Missing Beneficiaries, Re-Marriage, Issue and Name and Arms Risks, &c.

LICENSE INSURANCE.
Mortgagees of Licensed Property should always insure in a substantial Insurance Society against loss they may sustain by depreciation in consequence of the license being lost.

TRUSTEESHIPS for Debenture Holders, and under Wills, Marriage Settlements, &c.

The Investors' Review.

Russia and China.

We earnestly hope that the British public is not going to lose its head over the latest display of Russia's purpose towards Manchuria. To talk of going to war about that territory, or anything else, with a great Power like Russia is sheer madness—madness of a kind which is becoming traditional with certain sections of people in this country, whose utter want of a capacity for reflection was strikingly exemplified in the harangue of Lord Roberts in the House of Lords on Monday last. His speech, which the Service and Jingo papers have lauded to the skies as the words of a wise statesman, seemed to us little better than a prolonged howl of apprehension. At the very best it was devoted to the advocacy of a policy towards Russia which experience has taught us to be the most disastrous to our interests that the country has ever followed in modern times. The greatest fool living hardly now contends that the Crimean war was a wise episode in our history. Most people recognise that it was a terrible blunder, but we have never abandoned the policy which dictated that blunder; and one consequence of adhering to it has been that to-day India is brought almost to ruin as a British dependency. There never was any good reason why we should seek to block Russia's outlet southwards, or to an open ocean, as we have done. It was folly to support Turkey against Russian aggression, but we have toiled and schemed and done evil at an enormous cost to ourselves in order to checkmate Russia; and the net result is that we are, as an Imperial power, immensely weaker to-day, far more isolated also, than we should have been had we cordially admitted our blunder in

making war on Russia in 1854, and as cordially helped her to spread the benefits of orderly government over regions of the earth now full of bloodshed and every conceivable infamy.

Doubtless, Russia herself has lost a great deal by our hostility, and not least in the direction of an enlargement of the civil liberties of her people. Had Englishmen been welcomed in Russia—in helping the Government to develop the country, to build its railways, to establish its industries, to improve its agriculture—the personal qualities of the Englishman, his profound love of individual liberty, his manliness and honesty, must have had a powerful influence in shaping the domestic policy of the Russian Government and in educating the people towards a conception of self-respect now scarcely to be found there, except amongst the aristocracy. But if Russia has lost something we have lost much more, and we are destined to be still the losers if we assume an attitude in China detrimentally hostile to Russian designs upon Manchuria. Instead of doing that, we ought to endeavour to placate Japan so as to prevent war between her and Russia, because, should war break out, it might become almost impossible for us, in our own interests, not to side with the Japanese. At all costs war ought to be prevented. It is in nobody's interest, least of all in that of China. Readers, we hope, noticed the interview with Sir William Des Vœux in Wednesday's newspapers. It was well worth reading and pondering over. We have room for only one extract of it, but it is enough to show the wisdom of the whole :

> It is the integrity of the real China which we have to guard, and to which all our strongest efforts should be directed. Militating much more against this object than the occupation of Manchuria is the control which Russia is reported to have acquired over Chinese armies. Her immediate object in obtaining it has unquestionably been to provide additional defence against possible attack by Japan. She would very probably relinquish it in exchange for assurance against such attack, and our acquiescence in respect of Manchuria. For many reasons I hold that Russia has no interest in being our enemy, and is only such because we force her to be so. Indeed, I am not without good reason for believing that she would gladly hold out her hand to us if we met her half way. If, however, on the above condition she was to refuse to give up her hold on China proper, it would then become clear that I am wrong, and that she intends hostility to us.

Sir William knows the East. He was Governor of Hong Kong, and has great Oriental experience, both Japanese and Chinese. His statement that Manchuria is not part of China proper, but only a conquered territory is perfectly accurate, and his advice to us to limit our efforts to the maintenance of the integrity of the eighteen provinces composing the ancient Empire of China is the best possible to follow. As he truly points out, Russia has long had designs upon Manchuria and the Leao-Tong Peninsula, and, from her point of view, such designs are perfectly reasonable. She wishes to utilise the resources of Siberia through ports ice-free all the year round. According to the ethics of modern empires—ethics strikingly exemplified by our conduct in every part of the world, Russia is perfectly justified in annexing this territory if she has the power, and power to do so she undoubtedly does possess. We could no more permanently prevent Russia from annexing this region than we could conquer her as an empire and hold her immense dominions as we hold India. The Japanese alone might be able to destroy her fleet next spring ; with our help it certainly could be destroyed, but what would either Japan or ourselves gain thereby ? Absolutely nothing. Neither they nor we could land and maintain armies to be marched into the interior to drive the Russians back. Steadily and surely her battalions would spread themselves over the country, without let or hindrance from us or any one. As steadily and surely a new fleet would be provided, and before many years were over, either by another war or through the persistence of a powerful race steadily marching onward in the fulfilment of its destiny, Russia would have all that she now desires and probably more. It is not by resistance we can stop Russia, but by friendliness and co-operation much might be done to open the regions which she annexes to our commerce. As Sir William Des Vœux says, if we draw off Japanese hostility, and effect an arrangement between the Japs and the Russians, whereby the former may be ensured room for expansion, it may be then in our power to get Russia to withdraw her demand for the control of the Chinese army—a demand obviously dictated by motives of self-defence. Russia wishes to train Chinese troops so that if Japan does recklessly plunge into war, her armies may receive a very different reception from what they got in the last fight. Look at it how we may, there is no ground for us to quarrel with Russia about China's northern dependency ; and we beseech the public to exercise prudence, to avoid indulgence in wild braggadocio language which can do no good, and, above all, to try to shake the mind clear of the absurd terrors about Russian designs and Russian machinations, to which Lord Roberts gave expression last Monday evening. To nourish this sentiment is to court our own undoing.

The Trade Returns for February.

Perhaps it is owing to the disturbed state of politics in all parts of the world that the figures of our foreign trade so far this year are proving to be so disappointing. The return for February shows a decrease of nearly 4 per cent. in the imports and rather more than 1 per cent. in the exports. This is not much in money, about £1,700,000 altogether on the two sides of the account, but the exports represent a decrease upon a decrease, since the figures for February last year were fully 9 per cent. below those for February, 1896. The outcome is, therefore, discouraging, and so far this year our imports are nearly 2 per cent. under those of 1897, and our exports quite 2 per cent. under. Only in the re-exports of foreign and colonial merchandise is there any enlargement, and these on the two months have risen over 6¼ per cent. When, however, we look into the details of the accounts we find less to be alarmed at than this summary way of speaking might lead people to suppose. Apparently we are less dependent on foreign supplies of grain this year than last, for there is a heavy decrease in our imports of wheat, which in spite of a rise in price amounting to about 1s. 3d. per cwt. has cost us nearly £700,000 less so far this year than in the first two months of 1897. All descriptions of cereals, in fact, except oats, have cost us less than last year, up to date. The decrease is slight, but considering the higher price ruling in some cases, it is satisfactory. The slight expansion in our imports of wheatmeal and flour do not offset the decrease in the imports of wheat itself.

Against this consolation, however, must be set the pronounced tendency to increase shown by our imports of dead meat of all descriptions. It is a progressive increase, the figures for 1898 being much larger than those for either of the two preceding years, with the result that the country has had to pay about £440,000 more under this head than in 1897, and about £100,000 more than in 1896, up to the end of February. Much the same testimony is afforded by such articles as eggs, for the supply of which we are becoming increasingly dependent on the Continent. Eggs are even coming to us from Russia, so unable are we to provide them at home. The import of articles of consumption which cannot be produced in this country is steady, and, on the whole, tending to increase—a proof, at least, that the consuming power of the nation has not been impaired. True, our imports of sugar, refined and unrefined, have been less this year than in the first two months of 1896, but they are distinctly larger than last year's. Our imports of tea are also distinctly progressive, although the return for February alone was less than that for the same month last year. Home consumption, however, does not seem to be expanding in this article at present, nor yet in foreign spirits; but the consumption of wines is on the increase, and so is that of tobacco. There is nothing important to be said of our imports of metals, except to note a decrease in the supply of copper ore and of regulus and precipitate. Our import of iron ore is also less, but that is probably merely a temporary drop in the figures, as we certainly require more iron every year, were it for nothing but to supply the demands of the Navy. Raw materials used for textile manufacturers show better on the whole in quantities than in values—a proof that we are buying on advantageous terms. In cotton, for example, the decrease in quantity for the two months is only 72,000 cwt. on a total of 4,420,366 cwt., but the decrease in value is nearly £2,000,000. For the month of February alone there is an increase of nearly 262,000 cwt. in the quantity, at the same time that the value has fallen off about £320,000. Flax is also cheaper, as well as hemp and silk, while the price of wool remains pretty much where it was a year ago. This cheapness is certainly favourable, and the decrease of more than £4,000,000 in the total value of the raw materials required for textile manufactures is not a thing to lament over, but represents in some measure a gain to manufacturers.

For when we turn to the exports we find that, although prices for these likewise are lower, they have not, on the average, gone down so far as the cost of raw materials. We are, therefore, now in a better position to compete in foreign markets than we should have been if prices for raw materials had remained where they were a year ago. In other respects, however, the exports of textiles are not in a very satisfactory position. Our trade appears to be on the decrease with a good many countries, not only in cotton and woollen fabrics, but in jute and linen as well. As regards cotton, in the first two months of this year, there has been a decline, more or less important, in our shipments to Germany, France, Italy, Turkey, Egypt, Dutch India, China, Central America, West Africa, South Africa, and Australasia. No doubt the loss in these instances is more than made good by larger exports to Foreign West Africa, Austria, Brazil, the Argentine Republic, and, above all, to India; but the fact remains that trade is languishing with many of our most important customers. This holds true also of exports of linen yarn, although not of linen piece goods. These last have lately been, one may say, stationary; but the figures show a notable decline compared with those for 1896, especially with the United States, British North America, Columbia, and France. As regards woollen goods, there is an increase in woollen and worsted yarn for the two months of this year over the same period of 1897, but a decrease on 1896, especially in the value; and woollen tissues have also fallen off very materially both in quantity and in value, the principal loss being attributable to the United States, to which we have this year so far sent only 425,600 yards, as against 1,376,400 in 1897, and 3,375,400 in 1896. China also is showing the disorganisation of its trade by taking less, and so are our Australasian possessions.

The testimony of the figures relating to worsted tissues is to the same effect, exports to the United States having fallen from upwards of 12,000,000 yards in the first two months of 1896, to less than 4,000,000 in the same period of the present year. It is notable here, also, that countries like France, China, and Japan are rapidly-declining customers; for the present, at all events. Neither is our trade in metals flourishing as we should like to see it, although in this instance we may still, perhaps, attribute the stagnation to the effects of the prolonged struggle in the engineering trade last year. Broadly, however, it may be said that the customers who are not in a position to borrow from us with a free hand are poor buyers of our iron, whether crude or manufactured. Fresh capital, for example, is obviously required to stimulate exports of mining machinery, which have fallen off this year £643,000, against which decrease there is a slight gain in the total exports of iron and steel, whose value, in spite of their paltry-looking totals in quantity, aggregated £1,696,421 for February, and £3,724,406 for the two months. There is a decrease in the month's figures compared with both the preceding Februarys, but on the two months there is a slight gain.

On the whole, the impression obtained by studying these returns is that business drags and is in places difficult to conduct with a reasonable prospect of profit. Our smaller exports even are suffering, or are at least non-progressive, such as those of soap, skins and furs, paper of most descriptions, and earthenware. To sum up, the total value of our imports for February amounted to £35,770,874, a decrease of £1,474,290, and of our exports to £17,641,849, a decrease of £222,873. For the two months to date, the value of the imports has amounted to £75,700,165 and the exports to £36,873,253, a decrease in the one case of £1,320,667, and in the other of £777,665. Re-exports, however, show a total of £9,994,318, an increase of £615,195, or 6·3 per cent. on the first two months of last year. Adding exports and re-exports together, and deducting their total from the value of the imports, there is a difference against the country, so to say, of about £29,000,000 on the trade of January and February, and this is set off by a million only of net exports of gold and silver in the same time, the country having lost £531,050 of its stock of gold since January 1, and £488,443 of its stock of silver. The position is, therefore, not altogether comfortable, with so many insolvent or half-insolvent debtor states, and such heavy war clouds around us.

An Example in American Life Office Methods.

The subjoined correspondence between the Mutual Life Society of New York and one of its policy-holders would be highly amusing, were it not for the manner in which the policy-holder has lost the use of his money. It seems that some six years ago he was induced to take out a twenty-year Endowment policy. Having some money by him, he was led by the agent to pay £200 down in a single premium for policies covering £325. The agent, he informs us, with whom the business was contracted, highly approved of this mode of payment, and told him that he would be able to get his money back if necessary, or else to borrow on the policy; not only so, but that the policy would always be saleable for what had been paid for it, since any bank would advance up to the £200 on such a very valuable piece of paper. This was nice, but the correspondence we print exhibits the other side of the picture.

About eighteen months ago, the policy holder desired to raise money on his investment, and applied to two banks where he was known with this object. Both told him that they certainly could not advance on a policy in an American office. Had it been in an English office the result would have been different. He then tried the Mutual of New York Office itself, and it refused also to lend on its own paper. Still gaining experience, the holder next tried a leading firm of auctioneers to see whether the policy was saleable, and was told by them that American life policies could only be sold with difficulty. Going back to the issuing society he tried again to secure the return of his money, and only received very vague letters on the subject—letters which kept begging the question. Finally he succeeded in reaching the General Manager, who told him that the policy had no surrender value, but that it might be changed for another kind of policy, for which they would give about £130. The offer was refused, and the Manager graciously intimated that he would never advise such a policy to be taken out, but did not repudiate the action of his agent, who, to all intents, had obviously practised a form of the "confidence trick" upon an unsuspecting victim. The correspondence speaks for itself. Readers, however, may note in it a description of the surrender values mentioned by three of the British offices to whom this client of the Mutual Life Office applied for information. The original letters on which each of these estimates are based lie before us, and fully bear out the writer of the letters, and are, in their straightforwardness, a suggestive contrast :—

February 10, 1898.

Sir,—Policies —— and ——, maturing ——, twenty year distribution.

I should be greatly obliged if you would let me know how much the Society would allow me if I surrendered the policies? Also please let me know what amount of cash I should have received for these policies in 1896, had they been taken out under the five year distribution scheme, but maturing in 1911 and surrendered at the end of the first five years.—I remain, yours faithfully,

X

The Manager, Mutual Life Assurance of New York.

This letter was not acknowledged, so the policy-holder wrote again on February 15, and was answered the following day in the letter here subjoined :—

17 and 18, Cornhill, London, E.C.,
February 16, 1898.

Dear Sir,—I have to acknowledge receipt of your letters of the 10th and 15th inst., and, in reply to your inquiry, I may say that the Company are not prepared at the present time to make an offer for the purchase of Policies ——— and ———.—Yours truly,

D. C. Haldeman, General Manager.

February 17, 1898.

Dear Sir,—I am surprised to hear these policies have no surrender value. In an English office I should have had a valuable policy by now. I have made inquiry of three offices, and I find that for the same kind of policy as the one issued by you to me, in one case the surrender value at the end of the first year would have been 100 per cent. of the premium paid, in the two others 90 per cent., and in each the surrender value would increase with the age of the policy. The British offices act more justly than you do. I have also been informed that some of the American offices do grant surrender values. It is strange you do not. It appears that one who pays for his policy, as I did, is in a worse position than one paying for it by annual premiums. I shall certainly endeavour to point out to my friends the inadvisability of insuring in an office which does not grant surrender values. I observe you have ignored the last paragraph of my letter of the 10th.—I remain, &c.,

The Manager, &c. X.

17 and 18, Cornhill, E.C.,
February 18, 1898.

Dear Sir,—I have to acknowledge receipt of your letter of the 17th inst. I am very sorry you have seen fit to write in the strain you do. It was not our wish that you paid a single premium, nor was it our wish that you selected this kind of policy. You could not get the benefits of the Life option without the Endowment and the Distribution period being coterminous. In making comparisons you must compare things that are equal, which you are not doing. I venture to say that none of the companies you have referred to would duplicate the policy that you have taken with us.—Yours truly,

D. C. Haldeman, General Manager.

February 10, 1898.

Dear Sir,—I have to acknowledge the receipt of your letter of the 18th inst.

The reason I selected this class of policy and mode of payment was that I wished to have a policy easily negotiable, should at any time I require money, and your representative assured me that the policy I had selected would always fulfil my requirements. I also was told that though the bonus on the policy at its maturity would not be so great as on policies paid for by annual premiums, yet this would be compensated for by the extra negotiability. Knowing the English offices always gave some surrender values, I never thought at the time that you would not do the same. I asked one of your agents the other day whether my policy could be surrendered for a reasonable sum; his first answer was that he thought so, but would look the matter up; he then found he was wrong. I quite understand that the life option would be different if the distribution period was not conterminous with the maturity of the policy.

I am afraid I did not make my meaning clear. I wished to find out what options would have been given me at the expiration of the first five years had I chosen the same policy with a five years' distribution, and if one of the options was a cash payment what would have been the amount of the cash? I know the life option would have been different. British offices offer similar policies to yours, but with this advantage, viz., in the office I am thinking of, the surrender value at the end of the first year would be 100 per cent. of the premium paid, and this would increase with the age of the policy.

The policy is as follows :—Twenty year endowment annual payments for twenty years, or a single payment at maturity, cash for policy and bonus, or an annuity of 5 per cent. or sum assured, and bonus for life, and the sum assured and bonus to representatives at death, or the sum assured and bonus at maturity, could be sunk in an annuity. This is practically on the same lines, only in your case the bonus is not distributed until the end of the twenty years, and in theirs it is every five years, but the principle is the same.—Yours, &c., X.

The Manager, &c.

17 and 18, Cornhill, E.C.,
February 22, 1898.

Dear Sir,—I have to acknowledge receipt of your favour of the 19th inst., and as it seems useless to prolong our correspondence on the subject, I think it would be in every way more satisfactory

if you would give me a call at your convenience. I shall be very pleased to explain fully to you our own policies, and to indicate where they are more advantageous than the other policies to which you refer.—Yours truly,

D. C. Haldeman, General Manager.

February 23, 1898.

Dear Sir,—In reply to yours of February 22, 1898, I have to inform you I shall be unable to call on you at your office. You have not answered my questions yet.

If you do not grant surrender values and if you do not make loans on your policies, no policies issued by you can be so advantageous to Englishmen as policies issued by English companies. If you alter your rules, then possibly you may be able to boast of offering better terms, and the result may prove you are right.—Yours truly, X.

This fellow was getting troublesome, causing pre-eminent respectability within-the-law and the bond, some shade of annoyance. It therefore became necessary to speak plainly, and this Mr. Haldeman does in the following letter, which we conscientiously recommend as a model of its kind, objurgatory, persuasive, hortatory, unctuousy severe, and overlaid with an assumption of injured innocence which is "just lovely," as a young lady would say :—

17 and 18, Cornhill, E.C.,

February 24, 1898.

Dear Sir,—I am surprised that you should write to me in the way you have in your letter of the 23rd inst., to hand this morning. If you did not know your own mind when you took out the policy, you must forgive my saying that you have no right to turn round now and censure the company ; or because your policy does not contain options which you were at perfect liberty to have had you taken a different class of policy at the time, you surely cannot blame us ; the fault rests entirely with you.

It is not a question of changing our rules : it is a question of your having chosen one thing, and now, after a lapse of time, being sorry you did not choose another.

I am not aware, either, that you have the power to speak on behalf of Englishmen at large.

I must say that I do not think your letter is written sincerely. You know full well that we do give surrender values ; all you have to do to know this is to read your own policy. Why you should make this statement now, when you know it is not true, I am at a loss to understand.

As I have already said, you chose certain ways of dealing with your policy. I have a case before me now, where a gentleman took the same class of policy as yours, but chose a different mode of settlement. He had to give up certain options that you have at the end of twenty years, but he preferred other advantages at the end of ten years, and he had the option of surrendering the policy at the end of the tenth year, receiving back no less than ninety-five per cent. of the premiums he has paid as a cash surrender value, although only half the endowment period has run, and, in addition, had he died before completion of the ten-year distribution period, the company guaranteed an addition to his policy, no less £5 1s. 2d. per cent. per annum. This is an actual result of a twenty-year endowment policy, with a ten-year distribution period, taken out at this office ten years ago.

It is our practice to be as courteous as possible to our policy-holders, and to give them every information that lies in our power; and you must forgive my saying now, that in face of your letter of the 23rd inst., I see no useful purpose in carrying on the correspondence any further.—Yours truly,

D. C. Haldeman, General Manager.

February 25, 1898.

Dear Sir,—Seeing that in your answer to my first letter you stated that the society would not purchase my policies, I naturally concluded they had no surrender values. You now state you do grant surrender values. If so, what is the surrender value of my policies?—Yours faithfully, X.

17 and 18, Cornhill, E.C.,

March 3, 1898.

Dear Sir,—I have to acknowledge receipt of your letter of the 25th ult. It seems futile to continue the correspondence, as you persistently ignore the fact that when you made your application to the company, you, in order to secure the full benefits of the survivorship principle, entered into an agreement with the company that no cash surrender value should be payable to you until the completion of the twenty-year distribution period which you selected. You were at perfect liberty when you insured to select a five, ten, fifteen, or twenty year distribution period, and having taken the last-mentioned you are not at liberty now to change the contract, as this would be tantamount to your making a selection against other policy-holders who had insured at the same time as yourself, and under the same conditions.—Yours truly,

D. C. Haldeman, General Manager.

March 4, 1898.

Dear Sir,—Your letter of the 3rd is the first intimation I have had that policies in your company can only be surrendered for cash at the expiration of the distribution period selected. Had I known this I certainly should not have insured in your society. If you will refer to my previous letters you will find that the reason I took out the policies in question was that I might have a policy easily negotiable, and I am confident that when discussing the matter with your representative he never even hinted that I was under a wrong impression. I am now more convinced than ever that though your results may prove better than the results in English offices—but of this I have grave doubts—yet the permanent advantages are with the English offices.—Yours, &c., X.

17 and 18, Cornhill, E.C.,

March 5, 1898.

Dear Sir,—I am utterly at a loss to understand your letter of the 4th inst. Surely as a business man, or a man with an ordinary amount of common sense, you cannot expect me to believe that you would send a written application to us applying for a particular kind of policy, and for a distribution period that must be coterminous with the endowment in order to obtain certain results, and in exchange for this application receive from us a contract setting forth the conditions on which the policy is issued, and that you never read through the application which you signed, or even read the policy which you received in exchange. If so, then it seems to me utterly incomprehensible, and all I can say is that, if it is so—and it must be if your contentions are right—then you have no one to blame but yourself, and you must not cast any reflections upon our representative, nor must you say that the company does not give surrender value.

I do not like to think that you are writing these letters to annoy us, but that is the only interpretation I can put upon them, seeing that you have refused to call here in response to my invitation, when I should perhaps have been able to explain everything to your satisfaction.

D. C. Haldeman, General Manager.

Is not this correspondence curious? There can be no question, either, that Mr. Haldeman is quite within his rights in leaving this unhappy fly in the net, who chose to be victimised by an "agent." Said fly is seeking to alter his "contract." Behold the "endorsement" on one of the policies in proof of his folly :

[Endorsement on Policy.] *Life Option.*

At the maturity of the endowment term of this policy, instead of accepting the cash settlement then provided for, the insured may continue this insurance for the full amount without medical examination, and without further payment of premium, by exchanging it within thirty days after such maturity for a paid-up policy of life insurance payable at death, participating annually in dividends, and in addition thereto the insured shall be entitled to a paid-up annuity of £8 for life, payments thereon to commence one year after said maturity. This policy is issued on the twenty year distribution plan ; it will be credited with its distributive share of surplus apportioned at the expiration of twenty years from date of such issue. Only twenty-year distribution policies in force at the end of such term and entitled thereto by year of issue, shall share in such distribution of surplus, and no other distribution to such policies shall be made at any previous time. All surplus so apportioned may be applied at the end of such period to increase the amounts under the life option and paid-up annuity *pro rata*, if previously requested in writing, or may then be drawn in cash.

In the language of Mr. Haldeman, no "business man or a man with an ordinary amount of common sense" would ever dream of signing such a contract as this, had the nature of it, and the fact that he was bound to part with all claim to any portion of his money for a term of twenty years, been made known to him beforehand. It is a contract so one-sided, so contrary to the usages in

English life insurance offices, that not one of them would, we believe, have taken this man's money on such terms. He has plainly been "hocussed" by the "agent," who probably netted £80 or £100 by the transaction, and upright men ought to be ashamed to be associated in any capacity with such "insurance." None the less is it true that, powerless as the victim of enterprise of this kind always is to legally prove fraud and misrepresentation against their "agents," the Mutual Life Office of New York is quite within the contract in sticking to the £200. The insurant's only consolation is that, if he lives, he may some fourteen years hence get it back with interest and some slender "bonus."

"Lipton's."

Undoubtedly Sir Thomas J. Lipton's business is at present a good one. He trades in things that people require as necessaries in their lives. By splendid organisation, command of unlimited banking capital, and a careful study of the wants of the common people, one of the most extensive provision businesses in the world has been built up in a comparatively short space of time. As the prospectus of the company to which Sir Thomas proposes to transfer this business observes: "There is practically no limit to the development of the business in goods which are required for daily consumption, and the company having hundreds of thousands of customers, has a ready market for any new article it may introduce from time to time." Not only so, but new commodities can be put before customers with a facility, and to an extent, no other organisation of the kind that we know of can hope just yet to rival. For example, a "fluid beef" has lately been put upon the market by Sir Thomas and very extensively advertised n competition with "Bovril" and other articles of the kind, and no doubt his servants will be able almost to pour it down customers' throats. Again, a few years ago—for the business altogether does not date more than fifteen years back, so far as we can recollect—Sir Thomas went extensively into Ceylon tea production, and amongst the estates taken over by the company are no less than twelve tea estates in Ceylon.

The profits of all this business have recently, it seems, been very large, and, according to the certificate of Messrs. Turquand, Youngs, & Co., amounted to £176,984 in 1897, as against £68,046 in 1890. This is an increase of £108,938, or upwards of 160 per cent. in seven years. But these profits are, in a sense, gross profits, inasmuch as they have borne no deduction for interest on capital and loans, or for Sir Thomas Lipton's management. Nor, for that matter, does it seem to be the case that the cost of recent advertising has been deducted from them. This has been stupendous during the last few months.

Splendid as this business may be, we cannot say that we see value for two and a half millions of capital in it. On many essential points information is not produced in the prospectus, but we are told that the assets, consisting of tea, coffee, and cocoa estates in Ceylon, all freehold; of freehold and leasehold properties, factories, warehouses, and branch establishments throughout the United Kingdom and in Calcutta and Colombo; of plant, machinery, fixtures, and fittings, carts, vans, horses, &c., stock-in-trade, cash in hand, bills receivable, and book debts are valued by the vendor himself at merely £976,785. Add the £200,000 which is to be handed back to the company out of the purchase price of £2,466,666, deduct the total from the said purchase, and we find that the amount paid for goodwill, trade marks, and brands, &c., is £1,289,821, or more than 50 per cent. of the entire amount given for the business. Besides this, interest at 4 per cent. per annum is to be paid on the purchase price from November 20 last to completion of purchase. We have no means whatever of testing the valuation, since the prospectus gives us no information. But we can see from the accountants' abstract of past profits that the business is a highly speculative one, and twice in the eight years shown it did not yield enough to pay the debenture interest and preference dividend on the proposed capital. Yet so eager is the temper of the Stock Exchange and the speculative public to get hold of such a seemingly splendid concern, that quite a week before the prospectus appeared, before even the nominal value of the shares was known in the market, dealings were entered into in the ordinary shares at ¾ premium. When it became public that these ordinary shares were to be £1 shares offered to the public at 5s. premium, the market price fell a little, but only for a day, and as we write the quotation is still ¾ premium on the ordinary, and 5s. premium on the preference. As a friend puts it: "The fact is that speculative eagerness is doing its best to throw a slur upon Sir Thomas Lipton's intelligence by offering him three-quarters of a million to a million more for his business than he himself thought it was worth."

There is no curing this feverish lust to gamble in anything presentable, or which can be made to appear so: nothing will cure it short of a bank smash. For many years we have held the view that the custom of floating companies with shares of £1 nominal value, fully-paid, would in the end cost the British public far more than it ever could lose by shares of a higher denomination only partly paid up. The £1 share is so handy for the small gambler. To have paid a £75 premium on a £100 share, or even a £7 10s. premium on a £10 share would have been more than nine-tenths of the habitual market gamblers would have cared to do, but 15s. on a £1 share looks nothing, therefore the multitude rushes to "deal" and get stripped. We know quite well that it is hopeless to contend against this spirit. If it cannot be gratified at one point, it will at another. No sooner have mine shares palled upon the public taste than something else must be laid hold of, to be played with and to lose money by; for money must ultimately be lost and in large amounts by companies such as this. Lipton's business is, let us grant, a good one now; ten years hence, five years hence, it may not be half so good. In buying it for nearly two and a half millions the public is capitalising a fluctuating profit, and paying in "goodwill" alone nearly ten times the amount of the average profits for the past three years.

Sir Thomas Lipton has no monopoly in any of the articles in which he deals. Some of his possessions to be taken over imply very serious risks to their owners, such as the Ceylon Tea estates. Nobody at all acquainted with the history of Ceylon could put trust in the durability of any industry carried on there. For a few years still the production of tea may yield large profits to all well-conducted Ceylon companies, but the day is sure to come when competition will reduce these profits; and a day might even arrive when they would disappear altogether, as the profits

of coffee-growing did, not so many years back. In other directions the business must encounter fierce competition. How, for instance, can the directors be assured of "large additional profits" from the manufacture of beef extract and fluid beef? Not to speak of "Bovril," there are dozens of manufactures of this sort of article on the market, and the demand is not unlimited. To obtain a large sale, prices will have to be cut, and in proportion as they go down profits must tend to sink. The public, however, do not care a straw for this calculating view of the matter. The accountants tell them that the profits have mounted with astounding rapidity, and shares are bought on the assumption that they must continue to expand in the future as they have done in the brief past during which the business has been in existence. And for a few years all may go according to their wishes. The danger from over capitalisation seldom comes just at once; very frequently a fillip is given to a business through the sensation caused by its conversion into a public company. Sooner or later, however, over-capitalisation cripples the power to compete. New firms, less weighed down by capital charges, enter the field, and are able to undersell the overburdened corporations. What the public is here buying, then, is the chance, the speculative chance, of large future profits on a globular capitalisation represented by no solid assets whatever. Looking on such hints at a valuation as is vouchsafed about Sir Thomas Lipton's multifarious undertaking, we doubt whether there is really security of a first-class kind for the half million of debentures which are put with the property as a floating charge. Certainly there is no real security for one million of the capital, and there must be very heavy liabilities on leases, for it is not presumable that many of the establishments which the Company will have to carry on and maintain throughout the three kingdoms, are freehold property. Great numbers of them, we suspect, are held on leases of very short tenure. On this point also, however, there is no information, and it is more by what is not said than by what we see in print, that we are disposed to doubt exceedingly the future prosperity of this huge tea, fluid beef, cocoa, jam, sauce coffee, cake, and pork business.

Economic and Financial Notes and Correspondence.

The Navy Estimates.

All we can now say about these is that they are inevitable in the present temper of the nation. Their amount however, is sufficiently large to cause us to ask how long and how far this kind of thing is to go on? The total estimate for the coming official year is £23,778,000, or nearly £2,000,000 more than the estimate put forth a year ago, and almost £1,500,000 more than the expenditure voted for this present year, including supplementary estimates. We learn that another 6,300 men are to be added to the officers and men of the navy, and ship building of course is to go on as furiously as ever. Three battle ships, four armoured cruisers and four sloops are to be laid down. Including the new orders there will be no less than ninety-five vessels of various descriptions under construction for the navy in the coming year, twelve of them being battle ships, the cost of which amounts to £1,000,000 or more a piece, and the utility of which grows more and more doubtful the more we have experience of them.

Going back to the past for a moment it is worth while taking note of the fact that twenty years ago the expenditure on the navy was less than £11,000,000. In fact, between 1865 and 1880 it never once reached a total of £12,000,000, and was for four years out of the period under £10,000,000. The foreign trade of the country was then not much smaller than it is now, but the fever of empire had not risen to its present height, nor had the farce of keeping the peace by over-arming come to be the prevailing fashion. Unquestionably this enormous expenditure, amounting for the Army and Navy together to some £44,000,000 of money, this coming financial year, is being provided for, to a considerable extent, out of the capital of the nation. It does not realise this fact yet; well for us will it be when the day of realisation arrives if we find ourselves in a position to build any more ships of war at all.

And Russia also!

Yes, if England must have a huge unmaimable Navy, and Germany, France, and the United States ditto ditto, Russia cannot linger behind, especially now that she is to have at least one open port on the mid-ocean —Port Arthur. So the news comes that 90 million roubles will be devoted to new ships out of the current income of the Empire. We can only hope that the ships will be ordered or built here. It would be well for our ship-yards to have the United States, Russia, and Spain bidding against each other for the ships they have on hand for China, Japan, Brazil and other countries, whose zeal to have a big navy outruns the capacity of their treasuries to pay for the luxury. The ships must be bought ready made or nearly so, for there is no time to build them. Russia in particular, should hurry up, since not only will the North Pacific thaw soon, but the Turkish question will be upon us again in all its acuteness before the spring is well open. The Turk will not leave Thessaly we may be sure until forced. Russia will force him and the Dardanelles too. Then won't brand new ships of war come in useful. Ah! what a sad world it is, and how far from the peace it dreams of.

The War Fever in the United States.

So, at last, the fashion just spoken of has spread to America, and the United States legislature has voted upwards of $50,000,000 to be devoted to an increase in the Navy. Mr. McKinley, in giving reasons for this step has fallen quite into the European, not to say British manner, and carefully points out that the money is to be laid out in the interests of peace. It is not for us, however, to criticise such a departure, much as we may lament that a peace-loving nation like the United States should fall into an imitation of us, where imitation is undesirable. We do not believe that this increase in the American Navy was necessary, but if the people think so and feel that they can spend the money, well, they must just do as they please. Some day, we suppose, a better temper will come to prevail among the great civilizing powers of the world, and the outcry for more armies and more fighting men stand a chance of being treated with the ridicule and contempt it essentially deserves. Modern

armaments are a mockery when placed side by side with modern progress in the arts of peace. But they serve excellently well to dissipate a people's substance, and American iron masters and engineers now stand a chance of faring as richly as our own. They are quite right to get their innings when they see the chance, and democracies love, above all things, to be fooled out of their money.

The Bombay Riots.

Already have events in Bombay given the lie to Lord Sandhurst's officious optimism and in the most unpleasant way possible. A dissatisfied population in that city, the most Europeanised in the Peninsular, ridden down by troops, Mahommedans making common cause against Europeans with the Hindoos whom it is their wont to despise. Something must be wrong with the system of Government which rouses such passions. Why was no heed given to the representations of leading natives that the methods of inspection adopted by the Government in hunting down the plague were offensive to deep-rooted native prejudices, and calculated to induce riots—the very thing which has happened? Is it because the British civilian official is no longer in touch, still less in sympathy, with the natives? If so, and we fear much it is, our rule in India is indeed on a precarious basis. Much is plainly wrong out there. Is our incurable optimism to lead us to go blindly and trustingly on until the wrong produces mischief past remedy?

Finance and "Glory."

It is not surprising that Lord Roberts, in the grand manner of military critics, refused to discuss the financial aspects of the Indian Forward policy, in support of which he showed so much enthusiasm in the House of Lords on Monday night. Great as well as little military commanders only think of spending; and if their heedless squandering operations are promptly followed by bankruptcy or national ruin, they content themselves with the protest that "it is not their business" to consider how the money is obtained for their costly expeditions. The more need, therefore, for Ministers and civil officials who must consider carefully the question of ways and means, to keep a tight rein on military enthusiasts. Lord Salisbury has already shown his appreciation of this necessity. Even Lord George Hamilton admitted that there was some need of caution in the future, and Lord Onslow, the India Office spokesman in the House of Lords, was only following in the wake of the Premier when he reminded Lord Roberts that the Forward policy must be tempered by some consideration for the pockets of the Indian taxpayers. But what did Lord Lansdowne mean by unceremoniously "rounding" upon his Ministerial colleague, and telling him that he had misunderstood Lord Roberts's meaning? Is it no business of the Secretary pro War to think of financial matters? Or did he know, tea, c throwing Lord Onslow overboard, that he was freehold ng the same unceremonious operation on Lord and bran Lord Roberts made his meaning plain Kingdom ar the Forward policy had failed, he said, it machinery, fa use it had not been carried far enough. stock-in-trade, cas downe's view? Was it he or Lord debts are valued sed the Ministerial opinion? Lord £976,785. Add the lain. It is not a point on which there should be divided counsels in the Government at least of all in the present condition of India.

A Warning to Bankers.

This day week a case was reported in *The Times*, which bankers should make a note of. A firm of engineers, Marshall, Sons, & Co., sued Brown, Janson & Co., bankers, for damages caused by fraudulent misrepresentation. The firm asked the bankers whether the National Skating Palace, Limited, was good in the way of business for £100, and received the following reply:—

"Confidential. For your private use, and without responsibility on our part."

"Dear Sirs,—We are in receipt of your letter of yesterday's date, and in reply thereto beg to inform you that the company mentioned is very respectable, and in our opinion may be considered quite good for your figures in the way of business.—We are, Dear Sirs, yours truly, Brown, Janson & Co."

On this opinion goods are supplied and never paid for. At that time the business with the Skating Palace Company was really in Brown, Janson & Co.'s hands, they holding a bond for £20,000, subsequently increased to £25,000, over the whole of its assets. The company had been placed in the hands of a receiver by Brown, Janson, & Co., who took possession of the assets. It was utterly bankrupt at the date when the goods were ordered. Failing to get their debt paid, and barred by the action of the company from excuting a judgment for it, Marshall, Sons, & Co., brought an action against the bankers for the amount of their bill, £104 odd; and as there was really no defence, the Lord Chief Justice mercifully allowed a juror to be withdrawn, on the understanding that the bankers would pay the claim, so as to avoid, as he remarked, casting on them "the slur of a verdict." The story was altogether an ugly one as told in court, and we trust it does not in any way represent average banking customs. Any way bankers will now know that the words "without responsibility" do not protect them against having to suffer for the consequences of opinion given about customers.

The Bill of the Council of Foreign Bondholders.

It was, we suppose, the clever tactics of Sir John Lubbock, which prevented any discussion of this Bill at the recent meeting of the Corporation. If so, he was again victorious. The measure, however, must not be left out of sight, and we again point out that it contains a principle which should not be conceded. It is beyond the power of Parliament to take the property of a Corporation and extinguish its proprietors, who are "permanent" members. No government has power to confiscate people's possessions in this fashion, nor yet to hand over what is confiscated to a section of the owners in the way the Bill proposes to hand over all the property of the Corporation to the Council. It is true, of course, that two legally held meetings of certificate-holders authorised this transfer, but we have already more than once indicated the questionable way in which these meetings were summoned and handled. The Bill has been treated in a hole-and-corner manner throughout—in a manner, we say deliberately, honourable men should not have allowed themselves to be associated with. Therefore, this part of the plot must be carefully examined into by a Parliamentary committee, and also the question how far executors dealing with deceased estates have been induced

to sell certificates, found among the property in their charge, under the impression that such certificates possessed only a sentimental value. unquestionably those certificates have frequently been picked up through the agency of the Council's staff at less than one quarter of their real value, and that fact alone stamps the dealing as something eminently deserving investigation. We keep hammering at this subject, but not, it must be confessed, with great hope of doing good. Foreign bondholders are almost more apathetic than shareholders in joint stock companies. They will not help themselves—never have done. Had they been diligent in looking after their interests in the past the many scandalous debt compositions to which the Council of Foreign Bondholders has been a party in the course of its history, could never possibly have been brought about.

The London and Globe Amalgamations.

Mr. Whitaker Wright has sent out another circular to the shareholders of half-a-dozen of its companies or groups of companies—Mainland Consols, Golden Crown, Wealth of Nations, Paddington Consols, Hannan's Golden Group and Hannan's Golden Treasure companies, which is really a beautiful production. Some of these shares "for a year or two commanded premiums of from 50 to 300 per cent." so he, in effect, says, you fellows have had "a good run for your money." That some of the mines are now in debt, that few, except the Wealth of Nations, have any working capital left, that sufficient water is not to be had, that "rich ore" no longer appears, that dividends never did come in sight, these are all nothing to the purpose. All that is now necessary to secure another market, "run" is fusion, and confusion, of interests within the wide-mouthed sack of the Standard Exploration Company, Limited, a thing whose very name should be worth 50 per cent. premum right off. We have more than once expressed a frank enough opinion on this new kind of bait, and shall not again labour the point. After all, Mr. Whitaker Wright is a very smart American, and if he can by this means or another draw a few more fortunes out of the public, who is to say him nay. Of substance in these properties we see none, capitalised as they have been and are to be. Some of them may originally have been wine and water, but in the new distillation the wine will disappear. Really though, this circular should be kept as a curiosity, and because one of these days the London and Globe and its dependencies might get into the Law Courts.

A Klondike Investment!

A fortnight ago we called attention to the Central Klondike Gold Mining and Trading Company, Limited, which had been shown to be a swindle of the worst description. We refrained from any comment at that time, owing to the matter still being *sub-judice*. The company was promoted by one E. G. Savigny, and registered in November, 1897, without articles of association, so that the signatories became the first directors. The address of the company was that of the London and South Eastern Bank, an alias of Savigny, who acted as the bankers of the company. The nominal capital was £100,000, but in response to the prospectus the public only came forward with £16,454, which included £2,000 applied for by Savigny himself, which he never paid, and an application for 6,600 shares by "Chas. M Hosali," which was apparently in the writing of the *deus ex machinâ* Savigny, and in respect of which the company never received a penny. On December 29 it was found that this gentleman had drawn a cheque for £5,000 on the "bankers," which he had signed as director. This and other amounts were drawn without the knowledge of the board except one Aitken, who has just received, as a further share of the plunder, fifteen months' hard labour at the Old Bailey. Savigny has since been adjudged bankrupt, and like a prudent man has sought foreign air. It is to be hoped that he also will be allotted as soon as possible a temporary retirement in one of Her Majesty's prisons.

The Northern Territories Company.

This week the Northern Territories Gold Fields of Australia has issued its report, and the document is quite in the usual Bottomley vein. The accounts are drawn up to September 30, and after working fourteen months the company appears to have spent £52,351 upon development and mining expenditure, and obtained £1,629 from rents and tributing, and £609 from gold won. Administrative charges had also to be met, so that the company has spent all but £1,023 of the £54,015 subscribed for working capital. On September 30, it had yet to receive £20,000 in calls on the shares of the insiders who supported the concern, and doubtless a good deal of this, if not all, has been called up and spent in the interim.

The gem of the report, however, is the announcement that the Howley property has been sold to a subsidiary company with a capital of £150,000, from which sale the Northern Territories Company is to receive £100,000 in shares. A large body of ore is stated to exist on this property, but the same thing was stated in 1886—only twelve years ago—when the Port Darwin Gold Mining Company opened a career that led to such disastrous results. The Northern Territories Co. is going to deal with the shares obtained from this transaction, and, doubtless, will distribute them to its own shareholders, who must then gloat over the fine company they are in. All this makes us think of the old Hansard Union days, and we fear wicked financiers may be doing Mr. Bottomley a mischief later on.

Tunis Transformed by France.

In his report on the "Regency of Tunis during the French Protectorate," Sir H. H. Johnston gives us a very attractive account of this country as it is after seventeen years of French rule and guidance. Formerly a lawless, ungovernable, bankrupt land, where neither life nor property was secure, the poor oppressed and the rich plundered; where to travel from one town to another was almost an impossibility on account of the danger and expense, it is now a peaceful and prosperous community, in which each individual has the protection of just laws for himself and his possessions, and where travelling is easy, cheap, and as safe as in England or France, nay safer, for Sir Henry tells us that an "enterprising missionary bicycles alone, or accompanied only by his wife, anywhere he pleases, and no one has ever said a disagreeable word to him or thrown a stone"!

The products of the country, agricultural, mineral, and manufacturing, have all been fostered and encouraged. It is solvent, and its commerce has

increased in value over £2,000,000 per annum. Our own trade with it is nearly £700,000, and according to Sir H. J., might, with a little pushing, and less of the "take-it-or-leave-it and pay-on-delivery" manner of doing business, be greatly extended, in spite of the new differential tariff duties. These duties came into force at the beginning of the year, and though the differences at present are unimportant, it is the thin end of the wedge, and before long, to quote my authority again, "we must be prepared to see French goods enter Tunis free of duty." From a Frenchman's point of view, no doubt this is admirable policy, as tending to increase the trade of his own nation; but it is short-sighted, for other nations resent such selfish protection, and prefer the extension of rule on the part of a country like our own, where equal commercial advantages are granted to all alike.

The Shipping Garrotte and Foreign Competition.

Colonel Foss has written, and published at the office of the *Mercantile Guardian*, a sixpenny pamphlet on this subject, which is worth reading, although the writer swipes about him rather wildly. There are many facts scattered throughout his pages which the manufacturers and shippers of this country might weigh and ponder over. Most of them are extracted from official publications, and are highly suggestive. What, for example, are we to think of this? Conference steamers—that is to say, steamers in the ring—"carry American cotton goods from New York to Shanghai at 25s. to 26s. 6d., and out of this they pay the Atlantic steamer about 7s. 6d., leaving only 17s. 6d. to 19s. for the steamer from Liverpool to Shanghai. This is the same class of goods competing with the goods shipped from Liverpool, and paying the Conference steamer from Liverpool 47s. 6d." We presume the figures refer to tonnage rates, and the word "conference" means, of course shipping ring. On another page we are told that, in the last decade, eighteen new foreign lines have been established at Antwerp, and the increase at Hamburg has been equally marked. With two exceptions, these lines are unsubsidised, yet the tonnage of Hamburg has increased by 43 per cent., that of Bremen by 40 per cent., and that of Rotterdam by 52 per cent., while the tonnages of Glasgow and Liverpool have only increased 3½ per cent. and 3 per cent. respectively, and that of London no more than 13 per cent.

We presume these figures cover the same period of time, but what that period is the Colonel does not make clear. In fact, he has not marshalled his statements very well, and his pamphlet, therefore, fails to produce the effect it might do. For all that, it is well worth reading, not that we believe much good will come of this or any other effort to bring about a better state of affairs: the P. & O. Company is too well entrenched behind its great subsidy and its low standard of speed. It can, therefore, afford to coerce any line that enters into competition with it. Merchants and shippers, when they condescend to act together, might bring about reform, but this action requires a degree of loyalty and good comradeship not to be found yet amongst traders in any part of the world. Given combination and a resolute purpose to stand together, there would be nothing to hinder British manufacturers and merchants from putting on a line of steamers running, say, to India, China, and Japan, which, in the course of a twelvemonth might effect a revolution in rates and bring even the mighty P. & O. Company to its knees.

But money would have to be provided in order to stand the loss sure to arise from running these steamers, because the first thing that the P. & O. Company and the members of the "ring" would do would be to put down freights to a non-remunerative point. They would cut and cut until they might come to carry some things even for nothing, as Colonel Foss asserts the P. & O. Company once offered to carry cotton to Japan, But with money and combination even this form of coercion could be overcome, and a better state of things brought about. To expect that the British Parliament, or the authorities at the Post Office, or, we fear it must be added, the Board of Trade, will do anything to help British industry by cutting down or abolishing the disgraceful bounties now lavished upon certain lines of mail steamers, is as vain as to look for the millennium. Shippers, however, are so cowed that there is no probability of any stable combination of them being formed. nor can we hope much from the efforts Colonel Foss and his friends are making, through the issue of this pamphlet and in other ways, to establish an "Imperial trade co-operation." Sentimentalists alone will join them: the hard-fisted and suspicious merchant will submit to the tyranny of the rings, or escape from them by way of foreign ports. Nevertheless, we hope the public will read and think over this suggestive, if jumbled, essay.

"Maple's" Board in Elysium.

The Elysée Palace Hotel Company's prospectus was issued on January 20, 1897, and it was stated that the £200,000 of £1 ordinary shares proposed to be issued had been underwritten by subscribers for the £2,000 of deferred shares, the remaining £1,000 of such shares going to the vending company — the Compagnie Internationale des Grand Hotels. This latter concern also received £10,000 in cash, although the hotel has yet to be built. The share list on May 26, 1897, showed the following as the principal shareholders of this peculiar company :—

	No. of Shares.	
	Ordinary.	Deferred
H. Adams	4,000	—
A. Bird	5,000	—
R. C. Blundell...	4,070	—
H. A. Campbell	5,000	—
G. Cooke	4,000	300
Cie Internationale des Grand Hotels	20,000	1,700
F. A. Dinham	3,000	125
M. de Fos	2,500	—
Sir F. H. Evans	5,000	125
E. Herbert	1,000	125
F. Lunniss	6,000	—
J. L. Lucas	500	—
Sir J. B. Maple...	14,700	—
T. Marisot	5,000	25
J. C. Merryweather	600	—
G. C. L. Nagelmackers	10,000	—
C. Neef	3,000	—
F. Peake	5,000	—
R. Peake	5,000	—
H. Requart	6,000	350
Vicomte de Segur	5,000	—
G. W. Wolff	1,000	—
C. H. Requart	6,950	350
H. M. Snow	—	25
	122,320	3,000

Monsieur G. C. L. Nagelmackers is Directeur-General of the Cie. Internationale des Wagon-lits and Director of the Cie. Internationale des Grand Hotels, both of which companies had an interest in the promo-

tion of the new hotel. Sir Francis Evans is also a director, and the Vicomte de Segur is Vice-President, of these two companies. Sir John B. Maple is Governor of Maple & Co., Limited, who furnish the new hotel, Mr. A. Bird is Chairman of Maple & Co., and Messrs. H. A. Adams, R. C. Blundell, F. A. Denham, J. L. Lucas, F. Lunniss, C. H. Requart, and H. G. Requart, are all members of the Board of that company. The Messrs. Peake, we presume, are members of the firm of Peake, Bird, Collins, & Peake, solicitors, who are closely connected with Henry Frederick & Co., the hotel-building syndicate that works under the auspices of Maple & Co. Mr. G. Cooke is a director of the same company, and Mr. G. W. Woolf is a co-director with Sir F. H. Evans on the Board of the Union Steamship Company, which is, we believe, interested in the Cie. Internationale des Wagons-lit. One or two others appear to hold shares from collateral motives, so that the ordinary public, who, presumably, have subscribed the remaining £70,000 of capital, cannot have much to say about the management of affairs.

The City of London Electric Light Company.

Evidently this company could pay a higher dividend than 10 per cent. before reducing its price of energy. We are glad, however, to see that it has not attempted to stand upon this right, but will lower its price from 8d. to 7d. per Board of Trade unit, the reduction dating from January 1 last. The chairman also stated at the meeting that if the business permitted, the board hoped to further reduce the price. This is a sensible policy, and removes the stain from this concern of charging the highest price for energy in London by virtue of a monopoly. We do not believe the company will lose by its move, for it has a splendid district to work upon; and other companies have found that a reduced price meant increased revenue. And yet the Gas Light and Coke Company is going to raise its price for gas!

River Plate Trust and Agency Company.

In our "Reports and Balance Sheets" we point out that the excellent condition of this company, and its record of dividends in the past, through good and ill report, bear out the result of good management. Unfortuately, however, the share capital seems to have been arranged in the most objectionable fashion, as if to induce cautious people to abstain altogether from touching the shares. The "A" shares, of course, with their high dividend, yield very well, if revenue only is considered; but then they are only £2 paid, and have therefore a liability of £8 per share upon them. This is no light matter for the Debentures and Debenture stock total £1,095,896, as against a paid-up share capital of £686,512. The percentage of the latter to the former is certainly better than in other companies of this class, but that liability of £8 per share must be a "spectre at the feast" to any prudent holder, when he remembers the chances and vicissitudes of Argentine affairs.

But the company has £375,000 of "B" £5 shares, which are fully paid, and which one would think would be a favourite medium of investment. There again, however, the utmost care has been taken to make them a poor security for investment. The terms upon which these unfortunate shares receive dividend are that the "A" shares shall first have 6 per cent. cumulative, and after that surplus profits are divided equally between the "A" and "B" shares, without reference to the amount paid on each. Under this system the £300,000 of "A" shares last year received £40,500 in dividend, and the £375,000 of "B" shares £11,250. Net profits have risen by nearly 50 per cent. since 1892, and these "B" shares receive a 3 per cent dividend, and the prior charges in front of them are so great that the prospect of increase would be at once dissipated if profits suffered any, the most moderate reaction. Could a more unfortunate scheme of capitalisation be devised?

EAST RAND PROPRIETARY, LIMITED.

The history of this concern is a useful illustration of the curious methods of finance adopted by some South African promoters and directors. When the company was originally formed, it acquired a number of properties from a syndicate known as the "H. F."—the initials of Hanan & Farrar—with, however, the important proviso attached that the syndicate should receive 25 per cent. of the profits after £600,000 in dividends had been returned to the shareholders. It cannot be stated that a knowledge of this "lien" was intentionally concealed from the shareholders, but it is certain that very few of them were aware of its existence, and in the well-known textbook, "South African Mining and Finance," compiled by one of the directors, all mention of it was excluded. The shares at one time were run up to over £12, and a terrible awakening came when last year it was suggested that the H. F. Syndicate should be given 200,000 shares, or a capital of £950,000, for its rights. Investigation proved that the directors of the East Rand Proprietary, Limited, were also directors and proprietors of the H. F. Syndicate, a dual position which they still occupy. Moreover, Messrs. G. and F. Farrar, who practically control the company, are also members of a firm of machinery agents, and in this capacity supply the various mines of the group with their own machinery. The French shareholders combined, and, with a pertinacity which unfortunately is generally absent in English shareholders, refused to be thus despoiled, and the scheme, whereby the H. F. Syndicate, alias the East Rand directors, would have netted some £700,000 or £800,000, was rejected. But the H. F. Syndicate was not yet done with. It would not suit the gentlemen comprising it to wait until the parent concern returned £650,000 in dividends before they would be able to put their finger in the pie.

With a brilliant ingenuity, the East Rand directors have just carried by acclamation a remarkable scheme that secures to the syndicate the option to call upon the company to deliver to it 75,000 shares at £5 during one year, or a rather less number of shares at £5 10s. during a period of two years. Furthermore, it has obtained a first mortgage bond, to the extent of £375,000, on the whole of the assets. That is to say, if the company can be made a success, the market in the shares will be rigged and a very handsome profit made on the options; if it is a comparative failure, the syndicate holds a first mortgage on the property, and is, from its point of view, amply secured — a double-headed arrangement with a vengeance. What do the East Rand shareholders receive in return? If the H. F. Syndicate exercises its option to call the 75,000 shares, and only then, it has agreed to forego its right to participate in 25 per cent. of the profits until £800,000 instead of £650,000 has been returned to the shareholders "in specie or cash." How magnanimous! What value the H. F. Syndicate places on this lien may be gathered from the fact that it is shortly to be floated into a company with the ultimate intention, no doubt, of selling the shares to the public, as soon as all possible profit has been made out of the before-mentioned options. And the generosity of the directors of the East Rand Proprietary towards themselves in the form of the syndicate does not cease even here. After the original Company was formed, further property was acquired from an independent source, for 100,000 shares, worth to-dav £450,000. The H. F. Syndicate not being the vendor, naturally had no right to participate in the profits. Under the scheme recently sanctioned, the Company has ceded to the Syndicate similar rights in respect to these additional assets, to those already held over the original mine. Perhaps it will be interesting to the reader to relate how the directors were able to obtain the consent of their shareholders to such an extraordinary course, especially after the opposition evinced towards their proposals a year ago.

It will be remembered that the entire financial Press—gutter and

otherwise—was then unanimous in condemning the conduct of the board. The first step at reconciliation—we merely state a fact without drawing any conclusions—was an entire change of opinion on the part of the Press. The confidence of the French shareholders was gained by forming a Paris and London Committee, and placing several of their number on it. The subsidiary mines were loaded with huge machinery — the Comet owns one hundred stamps, of which to-day it is only working 40—thus necessitating the East Rand Proprietary being plunged heavily into debt. To raise the funds required for this policy, a bond of £375,000 was passed on the property, and shortly before it matured the amended scheme was placed before the shareholders to accept, or find the money as best they could. No wonder they chose the least harmful alternative. As to the value of the shares, it has been shown that, taking the most optimistic estimates the annual cash dividends for the next two or three years cannot amount to more than 16 or 18 per cent.; and, of course, if scrip is distributed it will be merely paying away some of the assets and weakening the company. Yet simpletons can be found to give £4 10s. for the £1 shares. As with many other mines on the Rand, only the richer reefs are being extracted; while profits, "lives," and other estimates are calculated on the assumption that all the ore bodies will be mined.

Critical Index to New Investments.

DOVER CORPORATION.

A further issue of £93,000 3 per cent. stock was offered for tender yesterday by the London and County Banking Company, the minimum price being 102 per cent. which is pretty lofty for a garrison town. It ranks in all respects similar to the existing stock which is quoted 102—5. £82,000 of this was offered two years ago at the same minimum, and was taken at an average price of £105 0s. 4d., the tenders amounting to £442,230. Of the present issue £70,000 is for purchases and works said to be remunerative. Estimated population of Dover 37,000; outstanding debt of Corporation £252,000. The desire to lend money to Dover on this occasion was much less strong, the applications reaching only £94,900. The largest tenders were at the minimum, but an average price was secured of £102 1s. 8d.

W. T. GLOVER & CO., LIMITED.

Company acquires business of Walter T. Glover & Co., manufacturers of insulated wire and cables for electric lighting, telephonic, telegraphic, and other purposes, now carried on at Salford, Westminster, and elsewhere. Capital is £200,000 in £1 shares, half ordinary and half 5 per cent. cumulative preference, and 67,000 of the latter are offered for subscription at par, the rest of the capital, with only £17,000 in cash, being taken by the vendors. Business is twenty years old, and profits for last four years have averaged £14,155, those for the past six months being £16,548, and for the previous twelve months £16,678. Assets amount to £135,425, including land works and plant £43,733; stock £49,436; and book debts guaranteed £41,049, and further assets will be acquired with the £50,000 of working capital provided by the present issue, while the amount required to discharge liabilities of the firm on 31st December last was £76,514. The position looks sound, and in view of the growing activity in this class of business, the preference shares should prove an investment.

PATENT DOUBLE PICK LOOM COMPANY, LIMITED.

This is described as a sound Home Industrial investment, and it may be for aught we know. The prospectus is headed "Revolution in Weaving; Double Pick Loom; 90 per cent. quicker, 50 per cent. cheaper, and can be applied to existing looms at a small cost." We are not authorities either in double or single pick looms, but can appreciate such a revolution if it is a fact. Just above this is printed in red ink the announcement that a contract has been made for the sale of the patents for Germany, France, and Belgium, for the sum of £80,000, the benefits of which will accrue to this company. If this means that the company will get the £80,000, we must admit being dazed by such generosity. Why did not the vendors net this for themselves? However, they know their own business best, and we leave them to it. But there is more to come, for not only does the company acquire the valuable inventions of Messrs. Slicer & d'Andria for the "Patent Double Pick Loom" which have been secured for the United Kingdom, France, Germany, Italy, Belgium, Portugal and Austria-Hungary, but likewise the benefit of an application which has been made for letters patent in Russia, as well as the right to apply for and take out patents in all other countries except the United States. There is much more of similar stuff, but space is running short. It is all calculated to make investors sell their Consols to come in. A slight reference is made in passing to revenue to be expected, and it takes the form of a rule-of-three sum. The idea is that if no more than 2½ per cent. of the 1,000,000 looms in Great Britain and Ireland are fitted at the small minimum royalty of £2 per loom per annum, this would afford an annual revenue from this source alone of £50,000. One other point consequently gets over us, and that is why, with such a prospect, the vendors take the £100,000 of purchase consideration in cash and not in shares. Being thus self-denying, the whole of the capital of £150,000, in £1 shares, which is offered by the Monarch Syndicate, can be secured by the public. Of the four directors who make up the board, the first two are north-country men, and we know nothing about them, but Samuel Jennings is chairman of such gems as the Monarch Syndicate, Limited, and of its offspring the Lucky Guss Gold Mine, and also of the Dunderberg Gold Mines, Limited, while the fourth director, Charles H. Tyndall, is connected with such successes as the Dixie Gold Mining Company, the Gem of Cue, the Great Mount Phœnix, the Lucky Guss, the Mid-Kent Coal Syndicate, the Monarch Syndicate, National Cycle and Motor-Car Insurance Company, Vehicular Insurance Company, and Walkers, Parker & Co., Limited. Confidence, under these circumstances, needs no stimulant.

"SHIP AND TURTLE" (PAINTER'S), LIMITED.

This Leadenhall-street hostelry, which dates from the reign of King Richard II., is held on a lease having another 64 years to run, at a ground rent of £1,700. Owing to failing health and retirement into private life, the sole proprietor seems to have sold the business to a Mr. Fox, who in turn offers it to the public for £100,000, o which only £20,000 is to be in shares. The capital is £60,000 in £1 shares, in equal moieties of ordinary and 5 per cent. cumulative preference shares; and there is an issue of £50,000 four per cent. first mortgage debenture stock, redeemable at 105 from July, 1918, or at par on July 1, 1961, and now offered for subscription at par. Interest due January and July. The value of the lease, goodwill, furniture, &c., is given in one lump sum of £80,000, so it is not possible to learn how much of it represents goodwill, while the takings for nine years are also given in the lump sum of £214,263, so that we cannot tell whether they have increased or diminished of late years. Upon the far more important point as to what profits have been, we are told nothing, except that it is hoped to work them up to £12,000. To invest in a thing of this sort upon such flimsy particulars is simply blind hookey.

ALBERT BAKER & CO., LIMITED.

These are described as the "up-to-date" tobacconists, and they offer their business, chief offices, and 22 branches, 3 of which are not yet opened, for £75,000 in cash, and £50,000 in shares. The capital is £200,000 in £1 shares, and the public is asked to subscribe for 100,000 of them, the remaining 50,000 being held in reserve. Not a figure is given as to any profits having been made in the past, and no mention is made as to any valuation of the stock to be taken over. It is true Salmon & Gluckstein, Limited, was successfully floated without these particulars being given, but we much doubt if the public will subscribe capital for Baker & Co., on such terms, and we think it will be very foolish if it does. When Albert Baker & Co., Limited, bought the business of A. Baker & Co., Limited, there were only 7 branches and £20,100 was accepted for it. The present vendors seem to think it has grown very much in value since them.

THE BRITISH DRYING CO., LIMITED.

This does not refer to clothes only, but to materials and refuse of every description. The company buys the British patent rights of Mr. Heinrich Hencke for the drying of distillers' dregs and other products, and similar rights granted to Mr. Richard Cunliffe, o Manchester, for drying machines; also two machines ready for immediate use. The capital is £85,000 in £1 shares, of which the vendors take 30,000 with £35,000 in cash. The prospectus contains full reference to the success of a drying company on the Continent, but this company, apart from the two machines, seems to buy nothing but patent rights, the value of which may possibly prove to have been over-estimated.

LAKE BENNETT AND KLONDIKE STEAM NAVIGATION COMPANY.

Capital £150,000, in £1 shares, 100,000 offered for subscription; remainder with £50,000 in cash go to vendor company, the Klondike Gold Reefs Exploration Company, Limited. The new

company is to establish a line of steamers to run from the head of Lake Bennett to Dawson City, the monopoly for which route during the ensuing season is said to have been practically secured by this company, which acquires a contract whereby the Albion Ironworks Company, of Victoria, B.C., undertakes to build the machinery complete for three steamers, the parts to be delivered at Lake Bennett by May 24. So that shareholders should feel they are getting something tangible for their money, a complete sawmill is thrown in. Are we to learn from this that the "practically" secured monopoly will only last for one season, and that the steamers have yet to be built at Lake Bennett, and there fitted with machinery to come from Victoria, B.C.? Suppose there is any delay in getting the boats ready, and the rush is over, or may be even returning. Then what will the vessels do during the long winter? Oh, Klondike, Klondike! you will have much to answer for.

LIPTON, LIMITED.

Share capital £2,000,000, half in 5 per cent. cumulative preference shares and half in ordinary shares of £1 each. Debenture capital, £500,000 in 4 per cent. debenture stock, the said stock redeemable at 115 after September 30, 1920, on six months notice. It will also be redeemed at the same price in the event of the reconstruction or amalgamation of the company. One third of each class of capital is taken by the vendor at par in part payment of the £2,466,666 given for the business. The employes, directors and friends subscribe for £83,333 debenture stock, 166,000 preference shares and the same number of ordinary shares, the two former at par and the latter at 5s. premium. This leaves £251,001 debenture stock, 500,067 preference shares and the same number of ordinary shares to be subscribed by the public; 5s. premium being asked on the ordinary shares. This concern is dealt with in a leader, and we need only add here that the rush of the public to secure allotments has been tremendous. Eighteen thousand letters of application came in one day to the National Bank of Scotland which has the account, and its office was crowded with eager applicants who came in person to tender their money. The preference shares, you see, are quoted at 5s. premium and the ordinary at 15s. to 17s. 6d. Sir. T. J. Lipton has consented to act as chairman for at least five years, and has wisely put his own managers on the board.

THE DEBENTURE CORPORATION, LIMITED.

Subscriptions are asked at the price of 115 per cent. for an issue of £200,000 4 per cent. Perpetual Debenture Stock, ranking *pari passu* with £1,000,000 stock already existing. Share capital subscribed, £3,000,000; paid-up, £1,800,000; reserve fund, £218,000. Interest due, January and July. Out of presen issue £376,900 Terminable Mortgage Debentures will be paid off March 31 next. General assets of Company at end of 1897 amounted to £3,714,000, apart from uncalled capital. Dividends for seven years ended 1892 were 10 per cent., the following year 8 per cent.; and the two next 5 per cent.; while for 1896 and 1897 7½ per cen was paid. Perhaps a good enough security, but very high priced, the yield being less than 3½ per cent.

BARNSLEY BREWERY CO., LIMITED.

Issue of £150,000 4 per cent. first mortgage debenture stock at 102 per cent. Interest due January and July, and stock is redeemable at 10 premium after 1923 on six months' notice. Share capital £210,000, and there now exists £140,000 first mortgage 4 per cent. debenture stock and £11,300 mortgage 5 per cent. debentures. Present issue, of which £50,000 has been already subscribed, with a reserve of £34,000, will be used in paying off the existing debenture stock and debentures, as well as sundry mortgages and other liabilities, amounting in all to £187,000. Security is a specific first mortgage on freehold, copyhold, and long leasehold properties, and a floating charge on fifteen licensed houses, stock and book debts, the whole of which figured in the books last July at £414,933, less trade liabilities, unpaid dividends, &c., amounting to £17,933. Profits for 1895 are certified at £18,496; for 1896 at £22,018 and for 1897 at £22,710. As interest on this new debenture stock will need only £6,000, the issue seems a good enough investment.

NEWFOUNDLAND COPPER COMPANY.

Capital, £250,000 in £1 shares, of which 125,000 are now offered. Company buys contracts for the purchase of certain leases, claims, licenses, and mining properties, with power to test them by working them for twelve months. Purchase price is £75,000, and in order to obtain complete titles to all the properties from the vendors and the Government, further sums of cash, not exceeding £11,500, and fully-paid shares, not exceeding £10,000, will have to be provided by the company. We do not think much of the arrangement, although a vague sort of estimate is drawn up, showing that under certain conditions a profit of £42,100 may possibly be made. Granting there is a moderate amount of copper in the properties, it is an easy matter to anticipate much profit with copper standing at over £50 per ton. We should not care to take a hand in the venture. Both the chairman, John Peters, and the vendor, Joseph Henry Collins, are connected with the California Milling and Mining Company, the New Colorado Silver Mining Company, and the Rocky Mountain Milling Company.

Company Reports and Balance-Sheets.

*** *The Editor will be much obliged to the Secretaries of Joint Stock Companies if they would kindly forward copies of Reports and Balance-Sheets direct to the Office of* The Investors' Review, *Norfolk House, Norfolk-street, W.C., so as to insure prompt notice in these columns.*

Prudential Assurance Company, Limited.—A week or two ago we gave some outline of the figures of this great company for 1897. The balance-sheet and report are now before us, and details can be filled up. Unquestionably this is a magnificent business, quite the greatest in the United Kingdom, and when we compare the methods by which it is conducted with those of the American life offices, against whose conduct we have had and shall have so much to say, we cannot but speak well of the Prudential. Last year in its ordinary branch it issued 65,893 new policies insuring £6,698,755, and producing £365,996 in new annual premiums. The total premiums in this department last year reached £2,774,264, an increase of £231,002 on 1896, and claims took only £707,643. This branch of the business is conducted at a cost of 10 per cent. of the premium income. In former years it was our regular habit to pitch into this company for its conduct of "Industrial" insurance. We did so on the ground of the wasteful expenditure involved in conducting it and also on the ground of the smallness of the benefits the working class insurers received in return for their money. A good deal has been reformed since those days, and, granting that it is a business which has to be carried on, there is no organisation in existence which conducts it with anything like the fairness and liberality now shown by the Prudential. This is proved by the fact that there is no longer any wholesale forfeiture of lapsed policies, such as once was the fashion. If the holder of a policy of five years standing is unable to continue the payments necessary to maintain it, what has been paid is no longer cancelled, but a fresh policy is granted for a smaller sum in place of the original one, this policy involving no further liability to its holder. Of these policies, 60,848 were granted last year, and the total number in force is now 549,889. This is fair treatment as far as it goes, and since the company is now so rich that it can well afford to deal handsomely with its clients, we hope to see such liberal treatment further developed. Expenses ratio is also improving in this department. An income, which amounted last year to no less than £4,793,591, was collected, at a cost of rather less than 40 per cent., including £461,525 charged against new business. There are now 12,546,132 policies in force in this branch, but how much they insure is not stated. As we mentioned on a previous occasion, however, the total funds of the Industrial branch exceed £15,200,000, and the total assets of the company altogether come to £30,438,337, showing an increase of £3,379,226 in one year. As the claims and surrenders in the ordinary branch came to less than £800,000, and those in the Industrial branch to only £1,833,404, or together about £2,600,000, it follows that the funds of the company must continue to increase with an even greater speed, since the interest income of the whole funds comes to nearly £915,000. Being thus rich, with the prospect of growing increasingly rich, and having its funds so far as the summary allows us to judge, very carefully invested, the directors have done well to deal liberally with their staff. In 1896 they set aside £50,000 to be divided amongst its members, and the same amount is now to be given out of last year's surplus. A provident fund has also been established on an equitable basis, to which members of the staff may subscribe voluntarily, the company undertaking to add 50 per cent. from its own funds to the amounts provided by the subscribers. The actuarial surplus of the two branches amounted to £1,631,825 at the end of the year, and after carrying forward £641,736, besides adding £100,000 to reserve, there remains £890,089 for distribution among participating policy holders and shareholders. Out of this the shareholders are to receive £363,750 in dividends and bonus.

Provident Life Office.—Last year was the quinquennial valuation year of this very old life office, and the valuation report is appended to the ordinary statement of the year's business. We heartily wish these quinquennial valuations were done away with and that every insurance company followed the custom of valuing at the end of each year. No other reform would tend in our opinion to have a greater effect in popularising insurance business with the public, whose mind is befogged by these periodical estimates and calculations of profits at comparatively long dates. Taking the report for the year, we find that this office issued 931 insurance policies, insuring £376,065, and yielding £15,012 in premiums. Total premium income was £230,239, and the receipts from interest and dividends £124,403. Expenses of management and commissions absorbed rather less than 14½ per cent. of the premium income. The interest on the company's funds, whose total is now £3,213,446, averaged £3 18s. 10d. for the year, or 4d. more than in the previous year. As regards the quinquennial valuation, it shows a surplus of assets

over liabilities amounting to £621,192. One half of this sum has been carried forward till the next quinquennial investigation, and the other half has been divided—£9,008 of it to shareholders and £301,588 of it to policy-holders. Shareholders thus receive but a very small proportion of the profits realised by the business, which is just as it should be.

Cassell & Company, Limited.—Profits in the past year fell off, being only £28,101 as against £35,673 in 1896. The dividend was therefore reduced to 7½ per cent. as against 9 per cent. a year ago, and dividends ranging between 8 and 10 per cent. for many years previous. A further £5,000 of 6 per cent. debentures were paid off, but the liquid assets are materially reduced. Stocks of volumes, publications, &c., tend to grow and now amount to £192,767, and the machinery and plant stands at a higher total. The reduction in profit is, therefore, particularly disappointing, and a little examination into the stock might not be amiss.

Dairy Supply Company.—After placing £2,000 to reserve, the net profit last year was £10,399, as compared with a net profit of £6,795 for 1896. This allows of a dividend of 7 per cent. and the carrying forward of £10,942, or £2,778 more than was brought in. The reserve fund now amounts to £12,000, and trading balances are well in favour of company. A small sum has been added to the debentures, but these only amount to £13,050, as against a share capital of £100,000. Including the balance forward, the reserves represent about 20 per cent. of the capital.

Price's Patent Candle Company.—This old-established company has to announce that profits last year were distinctly below those of the two preceding years owing to the competition in business, which has necessitated a cutting down of prices both in the candle and soap departments. The board, too, are not very sanguine about an improvement in the immediate future. Fortunately, this company has never divided up to the hilt, and so can pay very good dividends in spite of reduced profits. Out of the net revenue of £77,531, the usual sum of £12,500 is written off for depreciation, £5,000 is placed to reserve, a dividend of £1 12s. 6d. per £16 share, or just over 10 per cent., is declared, and £6,013, or about the same sum as a year ago, is carried forward. The dividend for 1896 was £1 13s. 6d. per share, and for 1895 £1 12s. 6d. per share, but in those years more was carried to reserve. The balance-sheet is a very strong one, no less than £245,771 being invested in securities, although the reserves and provident funds only amount to £150,208. Trading balances are strongly in favour of company.

United States Debenture Corporation.—The revenue of this company last year was satisfactory, and after meeting charges and debenture interest the balance of £24,130 was left. Preference interest required £9,520, and a dividend of 7½ per cent. on the ordinary took £11,250. The sum of £3,500 was placed to general reserve, and £3,241 carried forward. A profit of £10,721 was realised in respect of investments, and this sum was added to capital reserve, raising its total to £35,243. The investments and loans are stated to be worth more than their book value, if the total reserves of £42,743 are deducted. The weak point of the concern is the small amount of paid up share capital, £323,090 to the £1,000,000 of 4½ per cent. debenture stock. Consequently, although such a good dividend was paid, debenture interest took £45,000 out of £69,130 of revenue left after administrative charges had been met. The uncertainties about the concern are heightened by the fact that the board does not publish a list of investments.

Lever Brothers, Limited.—The report of this concern still consists of a mere skeleton balance-sheet, and a notification of how profits are divided. Of course, if preference shareholders, who have found about 60 per cent. of the capital, are satisfied with this form of statement no one else need grumble. Such bald accounts, however, render it impossible to give an opinion as to the worth of the assets or the reality of the profits which are set out. Last year it is claimed that these latter amounted to £222,026. The preference interest took £50,000, the 12½ per cent. dividend on the ordinary shares required £96,875, bonuses to customers absorbed £49,392, and £35,000 was carried to reserve. The latter fund will now amount to £150,000, which is not a large sum in a balance-sheet running over £2,300,000.

Bilbao River and Cantabrian Railway Company.—This company, in addition to the trials of the past, has now to meet the increased loss arising from the depreciation in the Spanish currency. Out of a net revenue of £61,115, no less than £13,272 had to be deducted for this reason, so that the available balance was reduced to £46,168. The sum of £30,000 was set aside for depreciation, and after including £1,725 brought in, dividends equivalent to 10 per cent. upon both ordinary and preference shares were declared, leaving £1,491 to be carried forward. By the deduction of the sum for depreciation, the balance sheet value of the undertaking is reduced to £112,184, as against £164,025 of share capital, and the difference is provided by £45,039 of securities in which the company has invested in order to replace its capital. The trading balances are level, and the only other item is £6,000 for stores. It is a remarkable record of what foresight can do for a company even in face of considerable difficulty.

United States Trust and Guarantee Corporation.—This Trust seems to have shaken off the Lombard interest completely, and its revenue for the last few years appears to have allowed, after payment of preferred interest, a fair margin for additions to reserve. Last year, for instance, the income was £10,407, which permitted of £2,250 being placed to reserve, the 5 per cent. interest upon the preferred stock being met, and the amount forward being increased by £230. It look almost as if a new departure had been taken in the past year, for £47,628 was raised in the time by a loan from bankers, and the proceeds invested in securities. It is, therefore, a pity that a list of investments is not published. Such a list was published in 1892, and the securities shown in it must have prepared common-sense people for the trouble that followed. Now that a new departure has been effected, could not the board publish the list once again? Holders, and would-be holders, of the preferred stock would then be in a position to judge whether the present board is superior in judgment to the old one. Presumably its work of late years has been to nurse the legacies of an unfortunate past, but one would like to judge the ability to invest on one's own opinion.

River Plate Trust Loan and Agency.—The affairs of this company show further improvement, and, after meeting charges and debenture interest, the net profit last year was £75,067. This allowed of a distribution of 13½ per cent. on the "A" shares, 3 per cent. on the "B" shares, the placing of £20,000 to reserve, and the carrying forward of £15,813, or £1,364 more than a year ago. The dividends distributed last year were the same, but only £10,000 was added to reserve. The board has ceased to write off the cost of properties and investments, presumably because depreciation no longer exists, but adds quite as much to reserve, which now stands at £180,000. The stability of the company, of course, depends upon the value of land in the Argentine Republic, for £1,349,449 of its money is, in first mortgages of freeholds there. It has, however, considerable liquid assets, chief among which is £100,000 of consols, valued at 95. General investments come to £281,874, bills receivable to £74,290, and cash to £53,396, of which about £25,000 would be required for the dividends. The company has completed a large block of buildings in Buenos Ayres at a cost of £81,885. About four-fifths of the offices in this building will be let out, and should form a fair addition to revenue.

The Bank of Victoria made a profit of £22,729 in the half-year ended December 31 last, and devoted £10,419 of it to paying a dividend at the rate of 5 per cent. on the preferred shares. The rest is added to the balance forward, which now amounts to £58,689. One-fifth of the remaining deferred deposits will be released on the 15th of next month. If the board could get the item, "advances £4,691,188," down to reasonable proportions, we should have hope. As it is, we cannot say much, but should like to know whether £257,000 is the amount creditors have lost by forfeited shares, and what the prospect is of the payment of £62,489 due on calls in arrear.

Caledonian Railway Company.—Gross income for half-year ended January 1 last, including £58,004 from canal, £1,870,220, an increase of £44,002; working expenses, also railway and canal, £962,862, or £62,150 more. The railway cost £52 4s. 11d. per cent. of gross receipts to work, as against £49 19s. per cent. in the corresponding half-year, but the cost of working the canal was only £27 12s. 10d. per cent., against £29 7s. per cent. It follows that the net income on the whole business was less by about £20,000, but the same dividend, at the rate of 5 per cent. per annum, is paid as in 1897, only £9,545 is left to be carried forward against £17,418. The principal increases in expenditure were due to maintenance of way and works, &c., and to working the traffic. Rates and taxes have risen no less than £11,000 during the year to £52,851. The capital expenditure of the half-year was £243,411, much less than the estimate. For the current half-year this outlay is put at £441,447. The report is a lean one, and might give more details, percentages, and such like. Dividends become payable on April 1.

Glasgow and South-Western Railway Company.—Gross income for half-year ended January 31 last, £754,039; expenses, £407,700; ratio of expenses to income, 54·1 per cent. Compared with twelve months ago, the revenue is £15,991 up and the expenses £17,859 up, so that the figures disclose the same tendency as those of the other railways, though not to the average extent. Net revenue is accordingly down £1,268. This should not have affected the dividend, but the directors have had to come down to a distribution at the rate of 5 per cent. on the old undivided stock, being at the rate of 2½ per cent. each on the preferred and deferred duplicates of that stock, instead of at the rate of 5½ per cent., as a year ago, because the preferential charges have risen £3,873 within the year. Nothing at all is paid this time on the deferred contingent stock, and in the result £7,364 is carried forward, against £5,562 brought in. Capital expenditure last half-year came to £61,351, about £21,000 of it on working stock, and the estimated expenditure for the current half-year is £196,146. As there is a debit of £190,548 against capital now, a further issue of stock must be made soon, and the shareholders are to be asked to grant fresh capital powers for the more distant future. Dividends will be payable on the 25th inst.

Callander and Oban Railway Company.—Earnings rose £1,375 and expenses £1,073 in the six months to January 31 last. A dividend at the rate of 1¾ per cent. on the ordinary shares absorbs £2,421 of the net balance of £2,652 and leaves £231 to be carried forward. The company spent £21,500 on capital account in the half-year and calculates on spending another £23,000 in the current half-year. Its gross revenue was £30,932, and its expenses £18,465, or almost 60 per cent. of the receipts. Dividends will be payable on April 15.

Atlas Assurance Company.—In the life department 534 policies were issued last year, the ninetieth of the company's existence, insuring £354,486, and giving £15,010 in annual premiums, but £26,500 of this was re-insured at a cost of £1,227 in premiums, so that the net addition to the revenue was £11,783. Claims took £97,313, £89,812 of which fell on the company. The gross premium income was £143,724, an increase of £4,063, and the life funds were augmented by £86,485, so that they now amount to £1,584,195, mostly invested at home, but none of it in Ireland. Ratio of expenses to premium income 15·7 per cent. In the fire department the premium income was £357,521, and the losses £205,018, or 57·3 per cent. of the income. Expenses and commissions took another £123,652, so

that the final balance to the good was only £28,850. This is carried to profit and loss, and £15,000 of it added to the fire fund, which will now stand at £385,000. Including income from interest the total surplus in this department for the year is £45,870, and £28,800 of it has been devoted to the payment of a dividend of 24s. per share, being 24 per cent. on the original paid-up capital. A balance of £2,070 is then left to be added to the reserve fund, raising it to £52,665.

African City Properties Trust.—With £366,162 invested in real estate, and shares in real estate companies in the Transvaal, this company earned a net revenue of £30,245. This included profit on sales of properties, so that one cannot say what the income from rents and dividends amounted to. Dividends equivalent to 12½ per cent. were declared upon the shares, £5,800 was added to reserve, and the balance was increased by £1,328 to £6,896. The reserve will then stand at £42,000, and so far £25,410 has been invested in high-class securities. The company is well in funds as it has recently issued £100,000 of debentures. Shareholders, however ought to remember that real-estate in the Transvaal is not of such a permanent character as in Great Britain, and should rather consider themselves as owners of leaseholds of short duration. Therefore a sinking fund ought to be established, specially to wipe off the capital expenditure, or else holders of the shares must do this for themselves.

Val de Travers Asphalte Company.—The weather was better for this company last year, and so the net profit of £13,773 was £3,572 more than that of the preceding year. Consequently, the ordinary shares receive 9 per cent. in dividend, as against 7 per cent. for 1896, and the balance forward is increased by £1,572 to £4,773. Before bringing out the net profit, the board set aside £2,000 to reserve, £1,000 to concessions redemption account, £2,628 for depreciation and maintenance of plant, and £863 off buildings. By prudent accumulations in this manner, the board has built up a balance sheet which is peculiarly liquid. With £100,000 of share capital and no debentures or loans, all but £19,867 is represented by assets, which would probably realise more than their book value. The only item which may be taken to represent the "business" is £19,867 for the concessions purchase account. This has been written down from a total of £61,170, and the time seems approaching when interest from investments will provide the amounts necessary to finally wipe it out.

Great Northern Railway Company (Ireland).—Gross receipts for the previous half-year, £448,105; working expenses, £224,846; ratio of expenses to income, 50·2 per cent.; increase in receipts, £24,382; ditto in expenses, £22,393, compared with corresponding half of 1896; therefore, the net profit on the six months' working was only £2,259 larger, including a gain of £270 in miscellaneous receipts. After meeting fixed charges, and placing £5,000 to reserve, the balance-sheet allows the payment of a dividend at the rate of 6¾ per cent. per annum on the rolling stock, or the same as a year ago, leaving £38,777 to be carried forward against £38,102. The capital expenditure in the half-year was £39,837, and another £22,000 is expected to be spent in the current half-year. Dividend warrants will be posted on the 28th inst.

The Lancashire and Yorkshire Accident Insurance Company, Limited, received £47,987 in premiums in the year ended January 31 last, and paid £26,902 in claims, besides £1,962 in bonuses. After paying commissions and expenses, £18,252, or 37½ per cent. of the premium income, a balance of £2,893 was left to be added to the reserve, making it £37,452. Out of this the directors propose to take £3,000 to pay a dividend of 1s. 6d. per share on the paid-up capital of £30,000. This dividend is payable on September 1 next.

John Bazley White & Brothers, Limited.—The report for last year is the best we have seen, and shareholders are to be congratulated upon the fact that the concern has at length been worked into something like shape. The company dates from 1883, when a cement manufacturer's business of the same name was absorbed at an enormous price, and ten years later three limited companies in the same line of business were absorbed, in order to moderate the competition which has ruled rampant during the greater part of the company's life, and is the original reason for the adoption of limited liability. The undertaking is saturated with capital, there being £630,000 of ordinary and £388,500 preference shares, with £393,900 first mortgage debentures, and now there appears in the balance-sheet £17,000, being mortgages on Bridge and Globe Works. Improvements and extensions, we are told, have been effected during the year, and two additional manufactories have been purchased, with the result that freehold and leasehold property, plant, &c., have been written up in the balance sheet from £550,255 to £604,949, while good-will, trade marks, &c., figure for the enormous total of £731,151. The company has, of course, got a very poor history. The reserve has had to be called upon to pay the preference dividend, but for 1896 a distribution of 1 per cent. was paid on the ordinary capital, and £1,072 was carried forward. Last year the company did very much better, the total revenue being £89,057, compared with £58,710, so that, besides increasing the dividend to 4 per cent. on the ordinary shares, the directors are able to add £10,000 to reserve. Reference is made to the improvement in the cement trade, both as to prices and demand, and the make and delivery of the finished products were the largest in the history of the concern. The company is said to have become the largest producer of Portland cement in the world, and from the fact that fees and fixed salaries to directors absorb £8,750, the managing director's special remuneration is only £1,121, we should think it ought to do a pretty big business.

Jay's, Limited, fully maintains the promise of its prospectus. Profits for the year ended January 31 were £39,307, compared with £39,307 in the previous year, and £38,207 two years back. The dividend on the ordinary shares is again 7½ per cent., while £1,000 is placed to leasehold reserve, raising it to £2,000, and £9,000 is added to general reserve, making it £18,000, but this latter fund is not invested outside the business. Nothing is written off goodwill; on the contrary, the item freehold and leasehold buildings and goodwill has had £10,464 added to it, raising it to £301,936, and £5,525 has been spent on alterations and extension to premises. Stock-in-trade figures for £55,534, and there are sundry debtors for £52,906, which is somewhat heavy.

Hagemann & Co., Limited.—This company was formed two years back to buy a Dutch margarine business, but only the 6 per cent. preference shares were issued over here. Report for 1897 shows total profits of £51,582, of which expenses absob £32,365, leaving £19,216, and from this London expenses, and £2,500 written off machinery, plant, &c., take another £5,690, so that with £1,794 brought forward, the year's balance is £15,320. A dividend of 10 per cent. is paid on the ordinary capital; £2,500 added to reserve, and £820 carried forward. This will make the reserve £5,000, invested in securities outside the business. Sundry creditors, £27,082, and sundry debtors, £40,382, seem rather heavy. Position is satisfactory so far as can be judged from the meagre accounts submitted, and there is a good margin at present, after paying preference interest.

The National Explosives Company has again had a very good year. This is a reconstruction of the old company, which never paid a dividend, and the way profits are now distributed is that after the 6 per cent. has been paid on the preference shares the ordinary shares take 8 per cent., and of any balance half goes to holders of deferred shares and half to the preference and ordinary shares. The profits for the past year came to £26,204, which allows of dividends of 11 per cent. being paid on the ordinary shares and £4 4s. 6d. on the deferred shares. For 1896, the ordinary also received 11 per cent., but the deferred only got £3 17s. 6d. It is further proposed to write £5,000 off property account and to place £2,500 to reserve. No profit and loss account is supplied.

Chelsea Electricity Supply Company.—The number of lamps connected by this company increased last year by 16,178 to a total of 96,638. Revenue went up still more rapidly, for gross receipts were £27,382, as against £21,355 in 1896. Working expenses certainly were larger, but they did not grow in proportion, and the net revenue of £14,554, compared with £10,361 in 1896. Thus, the number of lamps connected rose by 20 per cent., gross receipts by 28 per cent., and net revenue by 40 per cent., which shows that the company is benefiting from the effects of expansion in previous years. Including £1,526 brought in, and deducting £2,000 set aside for renewals and depreciation, the sum of £14,044 remains. After meeting debenture and preference interest, the balance permits of dividends equal to 6 per cent. on the ordinary shares, as compared with 5 per cent. for the preceding year. The moderate addition to the dividend is explained by the fact that a good deal more capital has been raised in the interval. Altogether £6,840 has been set aside out of revenue for renewals and depreciation, which is small compared with other compaoies, but there is a reserve fund of £36,177, composed of premiums received upon new shares. The two funds together have enabled about £32,000 more to be spent upon the undertaking than has been raised in share or debenture capital. A weak point of this company is that the founders claim one-third of the surplus profits above a dividend of 6 per cent. upon the ordinary shares.

Hong-Kong and Shanghai Banking Corporation.—The report for the second half of last year is most satisfactory, the net profit being $2,429,736, compared with $1,761,136 in 1896. The customary dividend of 25s. per share is paid, and $1,000,000 is transferred to reserve, being double the amount added a year ago. The directors also write $100,000 off dead stock, or in other words stores, which is the amount standing at debit of this account, and carry forward $298,863. The difference in exchange to be provided for is $571,428, against $501,368 a year ago, the exchange being now only 1s. 11⅛d., compared with 2s. 1⅛d. at the corresponding period, the exchange at which the dividend is declared being 4s. 6d. Comparing the balance-sheet figures would serve no good purpose, because several of the items a year ago were swollen by payments of loan instalments. With the new Chinese loan in hand there ought to be a good time in store for the bank, and to look for an early increase in dividend seems reasonable.

British Bank of South America.—The report of the year's operations is unsatisfactory, and shareholders have to submit to a further reduction in dividend. Gross profits for 1897 were as good as £130,764 compared with £77,024 for 1896, but a smaller balance is brought forward, and a year ago £50,000 was taken from reserve to keep up the dividend. Consequently 16s. per share or 8 oz. was distributed. Nothing is now taken from reserve and the bank will be all the stronger for it, so the available balance is only £41,186, or £4,400 less than in 1896, in spite of the large gross profit, and the dividend is put down to 12s. per share or 6 per cent., a balance of £11,186 being carried forward. The balance sheet shows a material shrinkage in business, deposits being down fully £600,000 at £2,028,000, and bills payable £1,285,000 at £3,376,874, while on the other side cash has fallen from £1,489,000 to £935,000; bills receivable from £4,388,880 to £3,210,780, and other assets from £2,134,323 to £1,970,572. Bank premises have been written up £10,000 to £126,426, which rather surprises us. With the continued drop in the exchange and the consequent unsettlement of financial affairs in Brazil the Bank will, doubtless, have its business further curtailed and will need careful guidance.

West Australian Bank.—The profit last half year amounted to £18,251, or much the best showing yet made by this bank. It is the custom to treat this half-year as the end of the year, and so the large balance of £23,300 was brought forward from the first

half of the year, making the available total £41,611 From this £25,000 is placed to reserve, and £8,750 is absorbed in the payment of a dividend at the customary rate of 17½ per cent. per annum, leaving £7,861 to be carried forward. The reserve will then staud at £175,000, as against a paid-up capital of £100,000. Deposits amount to £1,475,450, of which £429,921 bear interest. A year ago they totalled £1,750,602, of which £346,273 bore interest. The interest-bearing account, however, was much larger in 1895. The chief assets are £1,172,365 for bills receivable and other advances, and £594,377 specie and bullion.

The Produce Markets.

GRAIN.

The wheat trade has been dull throughout the week, with prices mostly in buyer's favour. At Mark-lane there has been a poor attendance and slow trade. On Wednesday there were scarcely any buyers. Flour, with continued large arrivals, did not attract attention. Maize steady at 16s. 1½d. to 16s. 3d., ex ship, for American mixed, 17s. ex quay for old corn, and 17s. 9d. for Galatz-Bessarabian. Barley quiet at 16s. 6d. to 18s. 9d. Odessa-Nikolaieff, and Danubian at 16s. 3d. to 16s. 6d. Oats steady, but business restricted. Mixed American, ex ship, 15s. 9d. The cargo market, which had been dull during the week, opened on Wednesday with an improved tone, but buyers were cautious, and, though disposed to deal, refused any advance. Late on Tuesday the *Strathgryfe*, 15,955 qr., Walla Walla, arrived, made 37s. 6d. for the Continent; the *Verbena*, 12,168 qr., January 5, changed hands at 35s. 10½d. To-day the *Macmillan*, 10,194 qr., January 25, has also been sold at 35s. 10½d. net; and the *Creswell*, 2,700 tons La Plata, on passage, at 35s. 3d. For the *Willkommen*, 11,279qr., Walla Walla, arrived, 37s. 3d. is bid; and for the *H. F. Glade*, 12,603 Californian, arrived, 38s. 4½d. was paid. Californian, near at hand, held at 38s. 3d. Spot parcels at Liverpool were firmly held at ½d. per cental advance, but the demand was quiet. Red American futures gained ½d. to ⅝d. per cental at opening on Wednesday, and further advanced owing to good buying orders, combined with light offerings. Some moderate fluctuations took place afterwards, and the market became dull and inactive. Just before the end the market fell rather sharply on pressure to sell, and the close was dull and irregular, ¼d. per cental lower to ½d. advance on last night's rates.

Official Closing Values (100 lb. deliveries—March 9).

	March.	May.	July.	Sept.	Dec.
Red American Wheat	7'10½	7'5⅞	7'2	6'7⅞	6'7⅞

In New York, wheat has been steady on the whole, but on Tuesday dulness was produced by the action of the "bears." In the afternoon the market rallied with "bears" covering, owing to the fair decrease in "Bradstreets'" visible supply exhibit, and as regards distant positions on continued unfavourable crop reports from some leading winter wheat States. The close was steady at an advance of ¼c. to 1c. On Wednesday some foreign buying orders and cable advices of higher European markets caused the market to open ⅜c. dearer for May with a steady tone. Sentiment was generally inclined to favour the "bull" side, but when the foreign orders were filled the market relapsed into dulness, and sagged under some realisations, "bulls" being disappointed at the absence of an expected cold wave over the wheat belt. Early in the afternoon a rally followed on covering by the "bears," owing to unfavourable crop reports and an increased export business, but the tone again weakened somewhat towards the close on freer offerings. The session ended steady, with near months ⅛c. and September ¾c. higher, July being unchanged. Sales, 2,000,000 bushels.

COTTON.

The spot market in Liverpool was steady, with rather a firm tone, until Tuesday, when, with large offerings, quotations fell 1/32d. (middling 1/32d.). The decline was continued on Wednesday, but with a steadier undertone. Fair business in American. Brazilian and Egyptian quiet and steady. Surats continue idle and unchanged. Futures opened ⅛ point dearer, but with realisation receded the point in the forenoon. Dullness followed the reaction until the arrival of American cables, which were steadier than expected, and induced re-purchases by "bears" at a recovery of 1½ point, the close being steady at 1⅛ to two points net improvement. The New York Market fluctuated considerably during the week, with the general tendency lower, but on Wednesday there was a slight turn to one point higher, becoming firmer later on favourable late cables. Near the close, however, there was again a decline under a moderate accumulation of selling orders, and closed barely steady unchanged to two points down. Spot dull during the week.

New York Closing Values.

	Spot.	Mar.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.	Jan.
Mar. 9 ..	6¼	6'05	6'07	6'10	6'10	6'13	6'15	6'14	6'12	6'10	6'12	6'13

WOOL.

Shortness of stocks and better reports from manufacturing centres point to higher prices in wool, especially in the case of merino staple. In some cases holders have declined to sale even at the enhanced rates. The list for the second series of the Colonial wool sales was closed on Saturday, and shows that the quantities available for the auctions, which commence on Tuesday, amount to about 222,000 bales, as against 358,000 bales for the corresponding series last year, or a decrease of 136,000 bales. Reduced arrivals are on this occasion noted from South Africa as well as Australia, the former contributing 5,400 bales and the latter 149,000 bales less than at this time last year. The diminution of the supply seems to point to higher prices; but it is hardly likely, in view of the heavy import duties, that America will be as keen in their biddings as they were in the early sales of last year.

METALS AND COAL.

Though there has been a very fair business doing in copper, the market fluctuated greatly. A rise in one day of 6s. 3d. was followed the next by a fall of 3s. 6d. On Wednesday there was a decided improvement in tone and greater steadiness. The market opened about 1s. 3d. dearer, and in spite of a restricted business, prices continued to improve steadily during the morning session, and by the close were fully 3s. 9d. to the good. Sales 300 tons, in cash, at £50 5s; Mid. March, £50 6s. 3d.; early May, £50 7s. 6d. and £50 10s., the last price being also accepted early for three months. The afternoon rates further improved 1s. 3d., the close being firm at an advance of 5s. on the day.

Settlement Prices.

Copper ..	50 7 6	50 7 6	49 17 6	49 10 0	40 5 0	49 2 6

The Glasgow pig-iron market fluctuated somewhat, but a good business has been done, and large quantities have changed hands. Prices went up in the early part of the week, but declined later. On Monday the market was flat, apparently in sympathy with the depression in the stock markets. Scotch declined to 46s. 0½d., but recovered somewhat, and the loss at the close was only 1d. Cleveland fell 2d. On Wednesday buyers operated cautiously, and Scotch at the close was 1d. dearer, Cleveland being 1½d. higher.

Settlement Prices.

	Mar. 9.	Mar. 2.	Feb. 23.	Feb. 16.	Feb. 9.	Feb. 2.
	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.
Scotch	46 1½	46 6	46 3	45 7½	45 7½	45 7½
Cleveland ..	40 4½	40 10½	40 10½	40 7½	40 4½	40 6
Hematite ..	49 1½	49 6	49 1½	48 9	48 7½	48 6

The improved tone in the coal market has scarcely been maintained. A fair business has, however, been done, and the reports of the retail trade are satisfactory. In the seaborne department there is a better business, with a good demand for seconds, and prices show a partial improvement of fully 3d. Four cargoes were sold, the rates paid being somewhat higher than those recently accepted. The official quotations stand at 16s. and 15s., usual terms in the pool, for Hetton Wallsend and Lyons respectively. Since Monday seventeen cargoes have arrived in the Thames. The rail-trade cannot be called active, but the hardening in tone has made further progress, and for medium qualities there is a satisfactory inquiry. Steams of good quality are very firm at full prices, but inferior sorts are in a less favourable position and sellers are open to reasonable offers. Prices:—Best West Yorkshire, 9s. 9d. to 10s.; Barnsley selected, 8s.; soft nuts, 6s. 6d.; Sheffield Silkstones, 7s. 6d. to 8s.; best Derby blackshale, 9s. to 9s. 3d.; North Derby Tupton, 7s. to 7s. 3d.; Erewash brights, 6s. 9d. to 7s. 9d; and nuts, 6s. 6d. to 7s. 6d.

TEA AND COFFEE.

Coffee Auctions have been rather dull, and only good qualities maintained later rates, while other grades, especially common, were dull at 1s. to 2s. decline. The smaller supply of 1,555 packages at Auction on Wednesday met with a moderate demand and nearly all sold without quotable change. Guatemala—middling to good bold dull coloury, 75s. to 82s.; smalls, 40s. to 46s.; peaberry, 93s. Salvador, middling to bold dull greenish coloury, 68s. 6d. to 73s.; smalls, 38s. to 42s.; peaberry, 86s. Colombian—bold mottled pale grayish, 61s. 6d. to 65s. 6d.; low middling pale greenish, 63s. to 63s. 6d; good to fine ordinary greenish, 41s. to 54s. 6d. Ecuador—mixed dull greenish, 31s. Jamaica—low middling brownish coloury mixed, 59s. to 59s. 6d.; small mixed, 26s. 6d.; peaberry, 75s. Futures opened dull and declined 3d. to 6d., but recovered somewhat, closing steady. There is little to remark on in the tea market during the week. For some time there was a tendency to dulness, but the tone has on the whole been firm. Both Ceylon and Indian have sold well at the auctions, but broken Pekoes have declined.

Next Week's Meetings.

Monday, March 14.

African City Properties Trust ...	Cannon-street Hotel, noon.
County of London and Brush Provincial Electric	Winchester House, 2 p.m.
Dairy Supply Company	28, Museum-street, 11.30 a.m.

National Explosives Company ...	Winchester House, 2.30 p.m.
Price's Patent Candles	Cannon-street Hotel, noon.

Dividends Announced.

MISCELLANEOUS.

Maypole Company, Limited.—5 per cent. on the ordinary shares.

Lenares Lead Mining Company, Limited.—14s. per share, payable on the 19th inst.

Alamillos Company, Limited.—1s. 9d. per share, payable on the 19th inst.

London and British Columbia Gold Fields, Limited.—Interim dividend of 1s. per share on the ordinary shares.

Fortuna Company, Limited.—1s. per share.

Canterbury and Paragon.—Interim dividend at the rate of 6 per cent. for the six months ended January 31.

Lake View Consols.—Interim dividend of 50 per cent., being 10s. per share.

J. & C. H. Evans & Co.—Interim dividend of 6 per cent. per annum on the preference shares, and 10 per cent. per annum on the ordinary shares.

D. H. Evans & Co., Limited.—Final dividend of 8½ per cent. on the ordinary shares, making, with the interim dividend, 12 per cent. per annum, and £3 per share on the founders' shares, carrying forward £6,300.

North American Trust Company of London and New York.—Half-yearly dividend of 2½ per cent. $200,000 carried to surplus.

British Gas Light Company, Limited.—Dividend at the rate of 10 per cent. per annum for the half-year ended December 31 last, with a bonus of 2s. 6d. per share. Payable April 7.

Frontino and Bolivia Gold Mining Company, Limited.—Interim dividend of 2s. per share.

Johannesburg City and Suburban Tramway Company, Limited.—7½ per cent. has been declared.

Jones & Higgins, Limited.—Final dividend at the rate of 12 per cent. per annum for the six months ended 20th ult. upon the ordinary shares, making with interim dividend, 9½ per cent. for the year, as against 9 per cent. for the previous year.

Day Dawn Block and Wyndham Gold Mining Company, Limited.—Interim dividend of 9d. per share.

Yorkshire Engine Company.—Dividend at the rate of 12½ per cent., carrying forward £1,611.

Eastern Mortgage and Agency, Limited.—Four per cent. for the year to be paid, £2,500 added to reserve, and £273 carried forward.

Abingdon Works, Limited.—Interim dividend for the six months ended February 28, at the rates of 6 per cent. per annum on the preference shares, and 10 per cent. per annum on the ordinary shares.

G. W. Bacon & Co.—9 per cent. for the half-year ended December 31 last. £2,000 carried forward.

BANKS.

Standard of South Africa.—Dividend for the half-year ended December 31, at the rate of 10 per cent. per annum, with a bonus at the rate of 6 per cent. £20,000 added to reserve, £5,000 to pension fund, and about £20,500 carried forward.

Anglo-Austrian.—6¾ per cent., equal to 8 florins per share for 1897. £8,300 placed to reserve and £22,900 carried forward.

BREWERIES.

Hull Company.—12 per cent. per annum for the half-year ended December 31, making 10 per cent. for the year. £7,000 to reserve, and £1,072 carried forward.

Hudson's Cambridge and Pampisford.—7½ per cent. on the ordinary shares for the half-year ended December 31, making with interim of 5 per cent, 12½ per cent for the year. £1,128 carried forward.

RAILWAYS.

Callandar and Oban.—Dividend on the ordinary shares at the rate of 1¾ per cent. per annum for the half-year to January 31.

North British Railway.—Dividend is declared at the rate of 1¼ per cent. on the Ordinary stock, carrying forward £800. Last year the dividend was at the same rate, £1,400 being carried forward.

THE PROPERTY MARKET.

The close of last week came out better than the beginning, the total sales of yesterday week mounting up to no less a sum than £61,395. Messrs. H. E. Foster & Crawfield were responsible for £42,450 of this amount, the principal item being the reversion to freehold ground rents and other securities of the estimated value of about £50,000; lives aged fifty-two and sixty-five. This lot realised £23,000. An insurance policy for £7,500 and profits, life aged seventy-two, realised £5,600. Another policy for £5,000 and profits, life aged seventy-two, realised £4,500; and a reversion to moiety of trust fund, estimated value £16,124, life aged fifty-seven, brought £4,525. On the same day Messrs. Stimson & Sons' sales amounted to a total of £10,960. Friday's total dropped to £18,375; but the total for the week was £91,825, as against £65,000 odd in the same week of 1897.

Sales at the Mart on Monday resulted in a total of £30,000, and of this amount £29,264 went to Mr. Alfred Richards, for gas stocks and shares. £10,000 ordinary stock of Plymouth and Stonehouse Gas Company fetched £15,220; Watford Gas, £1,760 "E" capital stock went for £4,361; ditto £10 additional shares of Haywards' Heath Gas brought £7,463; and £1,500 5 per cent. debenture stock of the Epsom and Ewell Gas Company went for £2,220.

A total of £55,970 at the Mart on Tuesday showed good business and tolerably keen competition for the property offered. But £37,500 of the total went for one lot, a parcel of freehold ground-rents, offered by Mr. F. H. B. Biddle, amounting to £1,282 13s. 3d., on properties in Nightingale-lane, &c., Wandsworth Common, with reversion in eighty-three years. They were bought by "Queen Anne's Bounty." Messrs. Holcomb, Betts, & Co. secured £5,400—a good figure—for the thirty and a half years' lease of No. 434, Oxford-street, and they also disposed of several other properties. Messrs. Rogers, Chapman, & Thomas, and G. E. Clarke were successful with most of their lots. At the Masons' Hall Tavern on Tuesday, Messrs. Godfrey, Ellis, & Co. disposed of the Daisy public-house, 33, Brompton-road, with the shop adjoining, held for terms of seventy-five and fifty-five years at a rental of £550, for the handsome sum of £36,000. A block of freehold property at Clifton, Bristol, comprising four shops and business, was bought some days ago for £3,510, after a very keen competition.

The sales at the Mart on Wednesday only reached a total of £14,465. The property offered was for the most part ordinary bricks and mortar, but the attendance was good, and the bidding fairly keen. Messrs. Edwin Fox & Bousfield offered a number of stocks and shares of different undertakings, for which the following prices were realised:—North Middlesex Gas Company, Limited, £10 original shares, fully paid, £25; £10 ordinary shares, fully paid, £17 10s. and £17 15s.; Cobham Gas Light and Coke Company, Limited, £5 shares, fully paid, £5 2s. 6d.; Sandown Park, Limited, £10 shares, fully paid, £12; Folkestone Racecourse Company, Limited, £1 shares, fully paid, £1; Gillmann & Spencer, Limited, £5 6 per cent. preference shares, fully paid, £5 2s. 6d.; Freehold and Leasehold Investment Company, Limited, £10 shares, £5 paid, £3 15s.; International Trustee, Assets, and Debenture Corporation, Limited, £1 ordinary shares, fully paid, £1 1s. Mr. Alfred Richards announces a sale of shares in the Lea Bridge District Gas Company for the 10th inst.

The estate of Drumkilbo, at Eassie, in Forfarshire, containing about 1,368 acres, with an annual rental of £1,427, sold at Edinburgh last week for £36,600, or about twenty-nine years' purchase.

Answers to Correspondents.

Questions about public securities, and on all points in company law, will be answered week by week, in the Review, on the following terms and conditions:—

A fee of five shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of five shillings must be sent to cover the cost of such letter, the fee then being ten shillings for one query only, and five shillings for every subsequent one in the same letter. While making this concession the Editor will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus:—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway?"

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The Editor has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market manipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The Editor further respectfully requests that merely speculative questions should as far as possible be avoided. He by no means sets himself up as a market prophet, and can only undertake to provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the Investors' Review, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

Y. F.—The effect of payment in full seems to be discounted, but I do not think there is any likelihood of a serious relapse. There is no haste to sell, but you might do so gradually on any improvement in the market, as it is only being sustained in order to float a fresh loan.

H. K.—Thanks, have made the alteration you suggest, but for your guidance would point out that the official quotation is only ex div. to-day.

W. G. R.—It is a fair security, and, unless political disturbances upset the investments held, might easily rise a little. The scheme for cancelling the uncalled capital has been dropped, so you have this to look to as well as the investments.

Express.—If you can buy about par it seems a reasonable investment. The line is an important one for the guarantor, and is therefore likely to be kept up properly, and not neglected as some of the other subsidiary lines have been.

S. J.—I see no reason why you should not, there is sufficient margin for the loan. Politics may, however, interfere with its success.

S. E.—Neither of the shares you mention seems to me tempting. Your other question I will answer by letter.

R. D.—I think you can make a more satisfactory exchange; will write you in a day or two.

Notice to Subscribers.

Complaints are continually reaching us that the Investors' Review cannot be obtained at this and the other railway bookstall, that it does not reach Scotch and Irish cities till Monday, and that it is not delivered in the City till Saturday morning.

We publish on Friday in time for the Review to be at all Metropolitan bookstalls by at latest 4 p.m., and we believe that it is there then, having no doubt that Messrs. W. H. Smith & Son do their best, but they have such a mass of papers to handle every day that a fresh one may well look almost like a personal enemy and be kept in short supply unless the reading public shows unmistakably that it is wanted. A little perseverance, therefore, in asking for the Investors' Review is all that should be required to remedy this defect.

All London newsagents can be in a position to distribute the paper on Friday afternoon if they please, and here also the only remedy is for subscribers to insist upon having it as soon as published. Arrangements have been made that all our direct City subscribers shall have their copies before 4 p.m. on Friday. As for the provinces, we can only say that the paper is delivered to the forwarding agents in ample time to be in every English and Scotch town, and in Dublin and Belfast, likewise, early on Saturday morning. Those despatched by post from this office can be delivered by the first London mail on Saturday in every part of the United Kingdom.

Cheques and Postal Orders should be made payable to Clement Wilson.

The Investors' Review can be obtained in Paris of Messrs. Boyveau et Chevillet, 22, Rue de la Banque.

ADVERTISEMENTS.

All Advertisements are received subject to approval, and should be sent in not later than 5 p.m. on Thursdays.

For tariff and particulars of positions open apply to the Advertisement Manager, Norfolk House, Norfolk-street, W.C.

SUN LIFE
ASSURANCE SOCIETY.

ESTABLISHED 1810.

Funds in hand exceed £3,900,000.
Total Income exceeds £600,000.

The "Perfect Protection" Policy.

LIFE OR ENDOWMENT ASSURANCES

WITH

Relief from payment of Premiums during PERMANENT or temporary illness causing inability to attend to ordinary occupation for at least two consecutive months;

The Investors' Review.

The Week's Money Market.

A little less pressure for short loans was experienced at the end of last week, but since Monday the demand has been very keen, and business has been transacted throughout at 2¾ to 3 per cent. for both day-to-day and seven-day loans. All amounts falling due at the Bank have been renewed, and increased borrowings had to take place, so that in the week ended Wednesday last the market has been able to pay off very little of its debt. The India Council also lent as much as it wished at 3 per cent. With the Chinese Loan due next week, and other financial operations to follow, there is not likely to be much relief to the short loan market for some time yet.

The political tremor of the week naturally tightened up an already poverty-stricken Money Market, and since Monday the discount rate for two or three month's choice bills has been well maintained at 2 15/16 to 3 per cent. One affrighted establishment went so far on Monday as to quote discounts "subject to a change in the Bank Rate," but short of a disturbance of peace, there does not seem to be much room to fear an advance in the official minimum. The American demand for gold has certainly proved stronger than was expected, but it has both Paris and London to draw upon, while its influence here is counterbalanced, in a measure, by the unusually large arrivals of gold from abroad. Not only have the African shipments kept up, but a large amount of Japanese yen, to the extent of about £500,000, arrived in the week, and quite as much more of this coin is on the way here. The Bank of England appears to be desirious of obtaining their coins, and therefore on Monday raised its buying price for them again to 76s. 5d. per ounce, and at this price was able to secure the unsold portion of the shipment. This advanced price also applied to French and German coin, which are of the same fineness, and therefore a small amount of Napoleons likewise reached the Bank. The quotation for bar gold in the market has only risen to 77s. 10d¼. per ounce, which does not point to a very urgent demand from the States. Foreign exchanges have all moved still further in our favour, and with 25·31 quoted for the Paris cheque, more gold would have come from that quarter, had it not been that the Bank of France has raised its premium on gold to fully 5½ per mille. Apart from foreign demands upon the Bank's stock of gold, the coming Loans already cast their shadow over the market. The Chinese issue is just upon us, and Greece and the Transvaal cannot remain long out of the market, to say nothing of the possible demands of the Indian Government. No doubt the financial houses will arrange these matters so as to disturb the market as little as possible, but the knowledge that they lie in the future must tend to keep rates for both loans and discounts well up to the Bank's minimum.

The Stock Exchange Settlement showed heavy differences to be met in certain departments, but the volume of the account was sensibly reduced. Bankers, therefore, did not obtain much advance on the rates for loans current on the previous occasion, as, although 3¾ to 4 per cent. was quoted for account to account money, the majority of the business was done at the lower rate.

The Bank return issued yesterday indicated nothing but the prolongation of the dead-lock caused by the heaped-up balances of the Treasury. They fell off only £119,000 within the week, and still stand at £18,692,165. So the market has daily had to borrow and borrow from the Bank as its loans fell due, and the total of the "other" securities in the Bank's possession is still

£35,579,185, or only £320,000 less than a week ago. In the second week of December last these "other" securities amounted to less than £27,000,000. We may, therefore, infer that the market now owes the Bank at least £8,000,000 of the moneys held by the Exchequer; and that it will not be sensibly more at ease when all the Government disbursements, including the April dividends, have been made. Those who depend on banking credit should take note of this fact. Coupled with the drafts upon our market resources, known to be impending through projected loan operations, it warns us to look for no "cheap money" this spring or summer. Other items in the Bank return may be traced in our balance-sheet table compiled from it, and require no explanation here.

SILVER.

Bar silver recovered at one time to 25⅜d. per ounce upon purchases chiefly by those who had sold the metal previously. When these "bear" operations were rounded off the quotation sank slowly to its present level of 25⅛d. per ounce. At this figure there is no great desire to buy, as the market is awaiting the Indian Budget statement, which is due about the 20th inst. If the Indian Government means to make a fresh attempt to bolster up the exchange, the scheme will, doubtless, be touched upon by Sir J. Westland; and opinion seems to favour the view that such a scheme would involve further obstacles being placed in the way of sales of silver to India. With the Budget date so close upon us, it is useless discussing the matter further, until the actual proposals are known.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7 and 8 Vict., cap. 32, for the Week ending on Wednesday, March 9, 1898.

Stock Market Notes and Comments

The chronicle of the week's scares will be found in the next article. Here we propose to press home some of the lessons they inculcate. Why is it that the Stock Exchange should be so prone to flurries, the product of every rumour no matter how silly in itself? Supposing the worst had happened in the beginning of the week and that the United States and Spain had gone to war, would that have been any reason for depressing the price of British railway debenture stocks several pounds per cent? Grant that Russia and Japan may fall out and come to blows as soon as the ice melts to let Russian ships of war out of the port of Vladivostock, should we for this reason all rush and sell Consols? Were Mr. Chamberlain to send an expedition into the Transvaal for the purpose of once more destroying the liberty granted to the Boers, is there any reason to expect that the commerce of the United Kingdom would there and then fall to pieces? If fire-eating Colonel Lugard, who is now on his way to West Africa, were to carry fire and sword into the territories we are disputing for there with the French, would that imply a blockade of French ports by the British Fleet, and a state of war between two countries which ought to be the best of friends? And if it did imply war, is the country so helpless that immediate ruin must be looked for? Why should the aged Queen's health be used to depress markets, as if she were merely a Mr. Cecil Rhodes?

We leave these questions to be answered by every man for himself, only remarking that none of the contingencies mentioned, not even the gravest, could be deemed probable on the reports flying about in the City during the past and present weeks. Nor do we think that sensible people there or elsewhere really believed in war of a serious character at any point. They shook their heads at each fearsome tale and said it was grave, but they did not in their hearts believe in an outbreak of hostilities. Yet prices went down and in many large groups of securities there was frequently no market at all, that is to say, a man with a few hundred pounds worth of stock to sell of a particular security might dispose of his little lot, but the man with thousands could not.

Does not this statement disclose to us something of the cause of the market's weakness? The Stock Exchange is like a quagmire thawing in times like these. While the frost was hard the bog gives firm foothold, but the thaw reveals it to be only a bottomless swamp. Fear has taken possession of men's minds, because the operations of the past few years, whereby prices of public securities have been lifted to unheard of heights, are now threatening to bear their natural fruit. All over the kingdom people are loaded up with pawned securities held by them on banking credits. So long as they got their money at low rates they were able to carry these stocks and live, but money has lately been dearer, and does not promise soon to become cheap again. Therefore, in all directions speculative holders of stocks are being obliged to throw off part of the obligations they had assumed in pledging these stocks to their bankers. The real reason of the proneness of our Stock Markets to take fright on the slightest provocation, is to be found in the moderate stiffness of the Money Market, acting on inflated quotations.

We quake because of the way we have gone on and on, heedlessly buying all sorts of stocks and shares at ridiculously high prices, without giving the slightest thought to the possibility of being able to sell them again, and banks have taken their full share in producing this inflation.

With their experience of the evil consequences of free lending when money is very cheap, they ought to have put a curb upon the market by demanding larger margins on their loans, the further prices went up. It is not the same thing to lend on London and North-Western Railway stock at £200 with a 10 per cent. margin as to carry out the same transaction when the price is £170. Every pound rise increases the risk of the lender, and ought to be provided for if business is to be conducted under ordinary considerations of prudence. There has been no prudence in bank lending these several years back. Not only have high class securities, such as the one named, been advanced upon lavishly at high and even excessive prices, and often with less than 10 per cent. of margin between the lender and loss—but questionable financial undertakings of every description have been treated as good banker's securities. Should any crisis arise, as it one day must, in consequence of this careless finance, we are confident that it will disclose a startling disregard of prudence on the part of some of our apparently strongest and most wealthy banks.

There is evidence before our eyes in last week's market fluctuations that this must be so. Why should Apollinaris shares, for example, dip as they have done, or Welsbach Incandescent stock, or Argentine Government and railway securities, or the shares of some favourite companies in the mining market? Is is not because this class of paper has been pawned in the happy times of cheap money, and is now being forced out, either by the inability of the pledger to pay the higher interest asked for, or by the banker insisting upon calling in such loans because his money is wanted elsewhere. Readers may depend upon it that, if anything, a war scare or a commercial crisis, or the failure of some foreign State to pay interest on its national debt, should force the open market rate of interest up to 6 per cent., there would be such a collapse in all these speculative classes of securities as cannot fail to bring some of our credit institutions into serious trouble.

We have often insisted on this view of markets before, but it was never more necessary to press it than now, because the London Money Market is slowly and surely working towards such a crisis, and by and by it will become so imminent that prudence will forbid us to talk about it. At present it is safe to insist upon the dangers lying ahead, because there is yet time for sensible people to guard against them by limiting their commitments and avoiding speculation as much as possible. The day is coming when it will be too late for them to do this. Understanding the motive for speaking thus bluntly, we hope our words will be taken as a hint to be careful. Hasty readers have been only too ready, when we have uttered words of warning such as these, to jump to the conclusion that we were looking for "a panic" or something of that sort next week. This is folly. They may depend upon it that if we saw any such disaster as a panic at hand we should use language calculated to sooth apprehensions rather than endeavour to excite them. We can mention the word "panic" now because the symptoms of one are only discernible in the distance, and by warning people against the treacherous character of market prices, against rushes after fancy market premiums, like those on Lipton's shares, we hope to avert the danger, not to bring it nearer. Seeing what one has seen repeatedly in the last two years, would it be fair or reasonable to advise the public, for instance, to buy Colonial securities at the present moment, when we know perfectly well that directly a pinch arises in money these securities are unsaleable? It is not a question of price at all; at such times, the market simply will not buy, and the reason why it will not is just as plain. These securities lie in banks, pawned in immense masses, carried on margins which have to be kept up as quotations go down. The nominal holders, underwriters, members of syndicates, and so on, in the majority of cases do not possess the means to keep up these margins long; their only resource, therefore, is to sustain quotations nominally as high as they possibly can by stopping business. The truth of this statement could be very easily tested by any man who likes to send his broker into the Exchange to sell 10,000 of almost any Colonial security on a bad day. In a lull of the apprehensions scouring over markets day by day the stock might be disposed of, if pressed, but it would be at a price well below the published quotation, and in all probability such price would not be marked so as to become public property. This is only one section of the quagmire of which we have spoken that the heat of dearer money is thawing. Of the others, such as the Mining and Miscellaneous markets, it is not necessary to enlarge.

We have dwelt upon the symptoms in one or other of them almost every week. All we now desire plainly to do is to inculcate caution, circumspection, and the drawing in of commitments that a man may feel beyond his strength to hold out under should the worst come. The fever of speculation has been great and unrestrained in the City for quite three years now, and it is going to produce its usual consequences, not immediately, not at a date to be fixed beforehand, but as surely as water finds its level. And to think that many of those whose ruin is certain should a serious war break out, should be among the people who clamour for a fight with France, with Russia, with any power they imagine to be standing in the way of that expansion of empire which is wasting our best strength.

The Week's Stock Markets.

On the Stock Exchange there was practically nothing doing the latter part of last week, as far as the general public was concerned, and prices gave way simply for want of support. The weakness of the Paris Bourse, caused by the action of the French Government in introducing legislation affecting the *coulisse*, was also reflected on markets here, and the continued stringency of the money market had a depressing effect on Consols and all other leading securities. The present week opened in a truly startling fashion, the news from Peking and New York causing a mild sort of panic, and the forced closing of weak "Bull" accounts help to make matters worse. On Tuesday a calmer view of the political situation was taken, and a partial rally occurred, later news regarding Spain and the United States being more satisfactory; but the move in the upward direction was destined to be short lived, an unfavourable impression being created by the report that the Queen's journey to the South of France had been delayed. Alarmist rumours spread like wild-fire, and the delay was at once put down to complications in foreign politics, nobody believing the story of Her Majesty's indisposition. The result was that for a time markets were reduced to a state of blind "funk," and a general stampede occurred. But a few buying orders from Paris and Wall-street, where a recovery soon set in, caused a smart reaction, although the volume of actual business was small, owing to the fortnightly settlement having begun.

96⅜	92½	94½	Do. 2½ p.c. Stk. red. 1026	93	−1

Consols declined steadily all the week, and after starting at about 112 1/16 "marked" 111 on Tuesday, recovering since then to nearly last Thursday's level again. A heavy fall has taken place in the whole list of "gilt-edged" securities, the premier stocks of the leading Home railways suffering severely, while Indian railways and Colonial Government issues have fared but little better.

The Home Railway Market, in addition to all the other evils, has had one more to combat with in the shape of disappointing Board of Trade returns, but on the whole the market has come through the ordeal fairly well, and prices do not show any very serious losses on balance. Good traffics are again to hand, but little or no support has been forthcoming from the outside public. South Eastern Deferred was pressed for sale when the news of the rather sudden death of the chairman of the line was announced; but the price has since recovered, in common with the partial rally in the rest of the list. The North British dividend is about due, and the deferred stock has, as generally happens, "wobbled" rather wildly in anticipation of the event. Among the heavy stocks, Midland Deferred marks a big decline, this being principally due to the announcement recently made by the directors in reference to the question of wages. The settlement disclosed the usual "back" on Great Eastern, and the price recovered sharply. Rates generally were easy, although rather higher than a fortnight ago; North Western at ⅜ to ½, and Great Western at 5/16 to 7/16 being about ⅛ above last time.

United States Railroad shares were inclined to harden up when we last wrote, but the steadiness was only of short duration, although there was rather a lull, operators standing off pending the publication of the United States Commissioners' report on the *Maine* disaster. There was a sharp break in prices on Monday, caused by the demand on the part of Spain for the removal of the United States Consul-General at Havana, and other political complications induced a still deeper feeling of easiness. The Nebraska rate decision coming at any other time would have caused a jump in prices, as it has been given in favour of the railroads; but it was almost overlooked for the time being. When it was found that the Queen's journey was only to be delayed for a day or so, prices recovered quickly, and a few buying orders came to hand from New York, and further helped to put a little more backbone into the market. Wall-street nervousness seems, however, to have been considerably increased by the preparations for meeting trouble by the War and Navy departments, and some further passenger rate-cutting to the North-West by the Union Pacific Company is also responsible for part of the fall in that and kindred companies' stocks. The general rate for money at the settlement was 5½ to 6 per cent., easing off slightly towards the close, whereas last time 4½ to 5½ per cent. only was paid. A considerable reduction was apparent in the account, which seems to have been smaller than for several months past.

Helped by a good traffic return, Canadian Pacific Railway shares were on the up grade for several days, but it was hardly to be expected that they would fail to be affected by the general weakness. After dropping sharply, the price as quickly recovered and almost to last week's level, it being now confidently expected that the end of the rate war is in sight, as the President of the Canadian Pacific line is about to start for New York to attend the Railway Conference there. Grand Trunk stocks have followed in the steps of United States shares, but the recovery has been rather more pronounced, although all the lost ground has not been made up, the "bull" account in them being very weak.

In spite of the unsatisfactory state of politics abroad, the Foreign market has not been very much depressed, and apart from the heavy fall in Spanish "Fours" the changes in inter-Bourse securities are unimportant. Greek bonds have shown the firmest front in the whole list, but other changes have been in the downward direction. Chinese issues drooped on rumours that the new loan might possibly be delayed, but the tale was not, and did not deserve to be credited, and a recovery has since taken place. In South American stocks Uruguay 3½ per cent. mark a rise on the week, but Brazilian issues have been very depressed, owing to a steadily declining exchange at Rio, and Paris operators sold large blocks on Wednesday, as it was rumoured there that the payment of the coupons was going to be suspended. All the Continental bourses have been in a nervous state and entirely under the influence of alarmist rumours, and, in addition, the Paris Bourse, as mentioned above, has been very much upset by the course taken by the French Government to further strengthen the monopoly of the official brokers. Continuation rates were slightly firmer, ranging from 2 per cent. on Russian to 4 per cent. on Greek and Turkish. The rate on Spanish and Italian was about 4 per cent. as compared with 3½ per cent. last time.

Foreign Railway stocks have been almost unsaleable, the falls registered from day to day extending to almost the whole list. About the only stocks unaffected were those of the leading Uruguayan companies, which have been remarkably steady, in sympathy with the rise in Uruguayan Government bonds. A partial rally is apparent in several cases towards the close, and good traffic returns have helped to impart a slightly firmer tone to this section. The old Mexican companies' stocks leave off considerably under last week's closing prices, the weakness of the Silver market helping to depress quotations; and a good traffic return, showing an increase of $5,700, only just helped to steady prices at the fall.

In miscellaneous securities, the stocks of the leading Gas and Water Companies have been freely offered, owing partly to the result of the London County Council election, coupled with the general all round decline in other departments; and shrinkages are apparent in Banks, Insurance, and Electric Lighting Company's shares. Brewery properties, judging by the result of recent sales at the Mart and elsewhere, are not commanding anything like such high prices as those ruling of late, and a set back is noticeable in many of the leading brewery stocks. Russian Oil ordinary shares came down with a run, owing to the approach of the account, but the price rallied, in spite of a stiff rate of something like 3s. being charged for carrying over. Savoy Hotel shares are a very weak market, and several circulars have been issued lately by the directors, which seems to indicate a screw loose somewhere; at Any rate a serious dwindling away of profits is talked of aerated Bread, and the shares of the various other catering concerns have met with support; and a 12 per cent.

dividend on D. H. Evans ordinary has caused a further advance in that company's shares.

Just when markets looked like recovering a little, there came the news that the Russian Government proposed to spend ninety million roubles on their navy, and the interpretation put upon this was soon seen is the all round break away that followed. Consols fell sharply, and Home Railway stocks, especially the heavy lines, followed suit. The Foreign Market closed very weak, heavy selling orders of Brazilian bonds from Paris causing a further big drop, reaching to about seven points on the week, and Spanish 4 per cents. were also pressed for sale from the same quarter. The fall in the latter security also affected United States Railroad shares, and about the only firm market in the Stock Exchange was for Grand Trunk Railway stocks, which were favourably influenced by another remarkably good traffic return.

Mining and Finance Companies.

It was hardly to be expected that the South African market would be anything else but flat under the present circumstances, and a decline in prices has been steadily going on all the week. The conclusion of the settlement is being looked forward to with considerable apprehension, especially as regards the accounts of those who had to be helped over last time. De Beers fell heavily on large selling orders from Paris, but have since partly recovered on repurchases from that quarter. Continuation rates were not much heavier, except in a few instances, 6 to 8 per cent. being about the general charge. Western Australian ventures have been very depressed, and it was not until quite the last thing that a slightly firmer tendency set in. Copper shares also wind up the week with a rather better tone, after being a weak market. Indian shares have been comparatively steady, with little or nothing doing.

STOCK EXCHANGE "BOLSTERING."

There has been a good deal of forced liquidation in the "House" recently, and some failures are expected. It is to be hoped members will set their faces against any bolstering of those with large accounts open who cannot meet their engagements. Such methods are dangerous in the extreme, and do no permanent good. For the small man who is heavily hit, through no direct fault of his own, we have every sympathy, but it is not often he can find friends to assist him. On the other hand, the man who in good times makes money fast, only to spend it extravagently, and continues to run a large speculative account, we contend deserves neither help nor pity. If his account is such as to threaten the market, let it be taken off his hands, but only on condition that he leaves the Stock Exchange. Allowed to remain, with his difficulties hushed up, he continues to be a weak spot, and a source of danger to his fellow members. Surely, it is not in prudent policy for Stock Exchange men to foster such individuals in their midst. A man who, when times are good, makes money, lives in extravagant style, lays by no reserve, but continues to deal largely in speculative ventures, in not acting honestly. If markets move in his favour, well and good, but if the contrary happens he is simply speculating at other people's expense. He deserves no mercy and should receive none.

Agricultural land in Lincolnshire seems to have gone down very much during the last quarter of a century. A freehold farm of 87 acres at Leverton, was put up for sale the other day, and the highest bid for it was £2,100, at which it was withdrawn. In 1873 the property realised £6,200. Two freehold hotels in Scarborough were put up for sale a few days ago, but only one went off, public-house business having apparently become rather dull. For the Albert Hotel the bidding was spirited, and it was knocked down for £7,025. The highest bid for the Castle Hotel was only £6,000, and this lot was withdrawn. The freehold tavern known as the King's Arms, Kingsdown, Bristol, with dwelling-house and shop adjoining, was sold lately for £6,450.

It may seem a comparatively easy, if dignified, thing to preside over a public meeting; but that vision of ease only lasts until you have tried it. There is a great deal of law on the subject. The chairman's authority is carefully hedged in, and nobody should venture to undertake the duties of a president without knowing some of the law that should guide him. On this they will find clear explanations in a little volume entitled "The Law of Meetings," by George Blackwell (Butterworth & Co., London). It is very full and lucid.

MINING RETURNS.

Queen Cross Reef.—Crushed 270 tons for 495 oz.; approximate value, £1,590.

St. Augustine.—2,389 loads washed yielded 68 carats.

Australia United.—210 tons for 439 oz.

Coromandel.—1,200 tons of stone produced 903 oz. gold; 1,100 tons of tailings, cyanide process, produced 109 oz. gold.

Bellevue Proprietary.—186 tons for 210 oz.

Hall Mines (B.C.).—5,436 tons of ore smelted, yielding 321 tons of matte containing approximately 125 tons copper, 77,029 oz. silver, 492 oz. gold.

Brilliant.—2,400 tons of stone crushed producing 3,000 oz. of gold.

Broken Hill Proprietary.—19,450 tons of ore treated for the four weeks ended March 3; output from refinery, 1,061 oz. gold (estimated), 455,613 oz. silver, 2,437 tons lead, and 47 tons antimonial lead (estimated), the copper matte containing 16 tons copper (estimated) and 30,106 oz. silver (estimated).

Champion Reef of India.—Last month's return:—7,050 tons of stone produced 9,994 oz.; 2,370 tons of tailings produced 606 oz.; and 4,620 tons of tailings (cyanide process) produced 1,294 oz.; total, 10,994 oz.

Gibraltar Consolidated.—Result for February:—1,267 tons, inclusive 400 tons low grade, 1,486 oz.; concentrates, 405 oz.; tailings, 140 oz.; total, 2,031 oz.

Gold Fields of Mysore.—Last month's return:—42 oz. obtained from 700 tons sand, cyanide process; 234 oz. obtained from amalgamation.

Ivanhoe.—Clean up for fortnight, 1,497 oz. of gold from 929 tons crushed. Total return for month of February, 2,851 oz. of gold from 1,722 tons crushed.

Mysore.—6,875 tons of quartz produced 11,336 oz.; 2,580 tons of tailings produced 700 oz.; 1,645 tons of tailings (cyanide process) produced 254 oz.

Mysore Reefs (Kangundy).—February return.—1,250 tons of ore crushed yielded 483 oz. of retorted gold.

Nine Reefs.—Last month's return.—1,000 tons milled amalgamation on plates, 103 oz.; cyanide 30 oz.

Nundydroog.—Return for February.—2,900 tons of quartz produced 2,940 oz. of gold; 700 tons of tailings produced 84 oz.; 2,653 tons of tailings (cyanide process) produced 325 oz.—total, 3,349 oz

Ottos Kopje.—8,380 loads washed, 231 carats won, including two stones each of 16 carats.

Stanhope Gold.—Last month's crushing yielded 1,054 oz.

United Ivy Reef.—Last month's output was 550 oz.; crushed, 964 tons.

Koffyfontein.—Return for February, 2,130 carats.

Pigg's Peak Development.—For February.—Crushed, 1,700 tons for 202 oz. gold; cyanided, 2,200 tons for 380 oz. gold.

Worcester Exploration and Gold.—Last month's crushing yielded 2,888 oz of gold.

Highland Chief.—Crushed 287 tons; yield, 138 oz. retorted gold.

Queensland Menzies.—Crushed 270 tons for 670 oz.

Tolima.—February estimated returns, £3,555.

Premier.—715 tons for 345 oz.

Salisbury.—Last month's crushing yielded 2,450 oz.

White Feather "Reward."—Last clean-up, 527 tons crushed: yield, 252 oz. 5 dwts. gold.

Victoria and Queen.—Partial clean up. Crushed 391 tons for 540 oz.

Eastleigh.—February, total output, 2,100 oz.

Inverell Diamond Fields.—383 carats from thirty-eight loads washed by hand.

Jubilee.—5,374 tons crushed for 1,959 oz. gold. Tailings 841 oz.

Kimberley Waterworks.—Consumption of water for February, 12,000,000 gallons.

Mount David (New South Wales).—400 tons crushed during month for 313 oz. of gold.

Cassel Coal Company.—Output for February, 19,600 tons.

Crown Deep.—Tons crushed, 19,000; yield in smelted gold from mill, 5,242 oz.; tons of sands and concentrates treated by cyanide works, 16,670; yield in smelted gold from sands and concentrates, 4,827 oz.; tons of slimes treated, 3,500; yield in smelted gold from slimes works, 179 oz.

Day Dawn Block and Wyndham Gold.—For fortnight ended the 5th inst.:—Tons crushed, 1,310; yield of gold, 1,470 oz., including tailings.

Durban-Roodepoort.—Results for February: Quartz milled, 9,990 tons for 5,007 oz.; tailings treated, 5,810 tons for 1,172 oz.

East Murchison United.—Great Eastern: 760 tons of ore crushed, 950 oz. gold obtained. Donegal Leases: 530 tons of ore crushed, 445 oz. gold obtained.

Ferreira.—Results for February: Crushed, 9,695 tons; bar gold extracted, 7,925 oz.; concentrates caught, 230 tons; assay value of concentrates, 5 oz. fine gold per ton, equal to, say, 1,150 oz. Cyanide works: Bullion produced from tailings, 3,002 oz.; total gold from all sources, 12,077 oz.

Geldenhuis Main Reef.—Crushed, 2,100 tons; obtained 424 oz. of gold. No clean up cyanide works.

Mikado (Lake of the Woods), Ontario.—February return:—Mill crushed 1,071 tons of ore, yielding 550 oz. of gold.

Mount Usher.—115 tons of ore crushed have yielded 88 oz. of gold.

New Guadalcazar Quicksilver Mines.—Production for the past month amounts to 8,100 lb., equal 108 flasks.

New Kleinfontein.—Crushing for last month:—Tons crushed, 10,290; ounces recovered from mill, 3,680; tons treated by cyanide, 7,000; ounces recovered from cyanide, 1,312.

Premier Tati Monarch Reef.—February return:—Crushed, 1,825 tons, including a considerable quantity of poor-grade ore on the dump; yield of retorted gold, 550 oz.

Princess Estate and Gold.—Result for February:—Crushed, 4,960 tons, producing 1,805 oz.; extracted 920 oz. from tailings.

Robinson (Western Australia).—292 oz. of gold from 415 tons of ore, exclusive of concentrates and tailings.

Treasury.—Output for February, 5,300 tons; yielded 3,844 oz.

Wemmer.—During February crushed 6,066 tons, yielding 4,208 oz.; cyanide plant—4,000 tons treated, yielding 825 oz.; and from concentrates 134 tons caught, assaying 115 dwt. per ton.

Angelo.—Crushing for last month, 6,572 tons; ounces recovered from mill, 3,160; tons treated by cyanide, 5,043; ounces recovered from cyanide, 2,280; ounces recovered from slags, 428; total number of ounces recovered, 5,868.

Barrett.—Yield for February, 800 oz.

Beacon.—Ounces of gold, 600; approximate value, £2,100, being an average yield of 1 oz. 3 dwt. 7 gr. per ton from 515 tons of ore crushed.

Burma Ruby Mines.—The result of the mining for February was 71,000 loads washed, producing rubies valued at Rs. 96,000.

Glynn's Lydenburg.—Results for February: from mill, crushed, 1,225 tons, obtained 419 oz. of fine gold; from cyanide works, treated, 800 tons, yield, 263 oz.; total, 682 oz.

Grand Central.—Return for February: crushed, 4,230 tons of ore, yielding bullion estimated to realise $45,600, and concentrates to value estimated $18,000.

Hannan's Brownhill.—540 tons sands, 454 tons slimes treated, realised 1,840 oz. of gold.

Hannan's Reward.—February returns: Cement crushed, 513 tons, yielding 85 oz. 17 dwt.

Henry Nourse.—Result of Febuary: Mill crushed 7,850 tons, producing 4,857 oz.; treated 6,130 tons cyanide, producing 2,866 oz.: total, 7,723 oz.

Montana.—Output for February was: Gold 2,150 oz., silver 5,900 oz., obtained from 5,925 tons of ore crushed in the mills.

New Comet.—Tons crushed, 4,083; ounces recovered from mill, 1,735; tons treated by cyanide, 3,631; ounces recovered, 1,010; ounces recovered from slags, 223; total number of ounces recovered, 2,968.

Roodepoort United Main Reef.—Result for February: Crushed 6,645 tons, producing 3,130 oz.; cyanide, 927 oz.; total, 4,057 oz.

Sheba.—Return for February: 6,800 tons of ore, 3,450 oz.; 3,480 tons tailings, 1,350 oz.; 138 tons of concentrates, 1,130 oz.; total, 5,930 oz.

Transvaal.—Results for February: From mill—crushed 3,800 tons, obtained 3,553 oz. of fine gold; from cyanide works—treated 1,445 tons, yield 592 oz.; total, 4,145 oz.

Mount Morgan (Queensland).—Tons chlorinated, 9,574; gold returned, 14,207 oz.

Lisbon-Berlyn.—For February: Ore mined, 2,000 tons; ore crushed, 1 8z

tons; treated by cyanide, 1,750 tons; fine gold recovered, 707 oz.; estimated value £3,000; estimated expenses, £2,375.

Consolidated Main Reef.—February production, 1,909 oz.

Crown Reef.—Output for February: Yield in smelted gold from stamp mill, 6,998 oz.; cyanide, 3,233 oz.; and from slimes, 101 oz.

De Lamar.—Return for February: Crushed, 900 tons; bullion produced in the mill (including clean-up), $18,845.

Frank Smith Diamond.—4,100 loads washed, producing 142 cts.

Geldenhuis Deep.—Results for February: Tons crushed by stamps, 20,700; yield in smelted gold from mill, 7,098 oz.; tons of sands and concentrates treated by cyanide works, 14,920; yield in smelted gold, 3,796 oz.; tons of slimes treated, 5,723; yield in smelted gold, 481 oz.

Ginsberg G. M.—February production, 2,154 oz.

Glencairn Main Reef.—February production, 6,512 oz.

Great Boulder Perseverance.—Amount of ore smelted for Febuary, 259 tons, returning 769 oz; 760 tons of ore milled for 807 oz.

Hannan's Virgina.—Crushed 400 tons, yielding 102 oz. gold.

Jumpers.—Results for February: crushed, 10,800 tons; obtained from mill, 3,788 oz.; from concentrates by cyanide, 570 oz.; and from tailings by cyanide, 981 oz.—total, 5,319 oz.

Klerksdorp Gold and Diamond.—From July to January the returns show that 25,132 tons of ore have been treated, yielding 5,623 oz. 6 dwt. of gold. Results of crushing for February, 797 oz.

Lancaster.—Result for February:—Crushed 7,029 tons, yielding 2,917 oz. over the plates; 2,457 tons of tailings were treated, having an average assay of 3⅓ dwt. per ton.

Meyer and Charlton.—Result for February:—Crushed 8,334 tons, producing 2,528 oz., extracted 1,407 oz. from tailings; total, 3,935 oz.

New Australian Broken Hill Consols.—Two tons, containing 5,600 oz. of silver.

New Modderfontein.—Output for February, 4,874 tons yielded 2,434 oz.; cyanide, 401 oz.

New Primrose.—February production, 8,824 oz.

New Spes Bona.—February production, 2,286 oz.

Nourse Deep.—Results for February:—Tons crushed, 6,596; yield in smelted gold from mill, 2,375 oz.; tons of sands and concentrates treated by cyanide works, 4,991; yield in smelted gold from cyanide works, 2,267 oz.; total, 4,642 oz.

Rietfontein A.—Production for February, 5,049 oz.

Robinson Gold.—Production for February: Mill crushed 14,180 tons of ore; yielded in smelting gold, 9,543 oz.; from concentrates (by chlorination), 1,489 oz.; from tailings (cyanide process), 3,243 oz.; from slimes, 928 oz.; from own ore 15,203 oz.; from concentrates bought (by chlorination), 1,320 oz.; total gold recovered, 16,523 oz.

Roodepoort.—February production, 950 oz.

St. John Del Rey.—Gold produced for February: £10,100; yield per ton '44 of an ounce troy.

Van Ryn.—Production for February: Mill.—Tons milled, 9,561; number of ounces recovered, 2,474. Cyanide works.—Tons treated, 7,140; ounces recovered, 1,264. Total, 3,738 oz.

Village Main Reef.—Result for February: Crushed, 6,675 tons, yielding 3,576 oz.; cyanide treated, 6,750 tons, producing 1,782 oz.; total, 5,358 oz.

Wealth of Nations.—Crushed during the last twelve days, 270 tons, the gross yield being 256 oz. of gold.

Rose Deep.—Result for February: 100 stamps working 28 days crushed 13,118 tons yielding 5,655 oz. of gold; 10,031 tons treated by cyanide produced 3,005 oz. Total, 8,660 oz. of gold.

Henry Nourse Gold Mining Company.—Profit for month of February, £16,482.

Windsor Gold Mining Company.—Crushed 3,737 tons, yielding 1,191 oz. o gold; obtained by cyanide, 554 oz.

Wolhuter Gold Mines.—Result for February:—Crushed 12,580 tons, producing 3,918 oz.; obtained by cyanide, 2,757 oz. Total, 6,675 oz. of gold.

George Goch Amalgamated Gold Mining Company.—During February crushed 7,406 , yielding 1,638 oz. of gold, and 1,312 oz. of gold from tailings.

TRAMWAY AND OMNIBUS RECEIPTS.

For past week:—Belfast, +£83; Calais, −£7; Croydon, +£43; Glasgow, −£63; Lea Bridge, +£93; London & Deptford, +£18; London Southern, +£46; London General Omnibus, +£652; London Road Car, +£10; Metropolitan, +£238; North Staffordshire, +£10; South London, −£3; Woolwich & S. E. London, −£1; Provincial, −£70; Southampton, −£24; Wolverhampton, −£0.

Calcutta, +£127.

Anglo-Argentine, week ending February 7, £470 increase; City of Buenos Ayres, week ending January 31, £881 increase.

Italy's imports during 1897 amounted in value to 1,300,841,368 lires, and her exports to 1,115,815,841 lires, the latter the highest figure reached since 1883.

The death-rate in Birmingham has been so low during last year that the Birmingham Church of England Cemetery Company are only able to declare a dividend of 2s. 6d. per share instead of 5s., which has been the usual amount.

New Zealand last month exported 20,088 oz. of gold, of the value of £78,372. In the same month last year the weight exported was 26,039 oz.; the value being £104,457.

The adhesion of England to the Sugar Bounties Conference is said to have been virtually obtained, though under what conditions is not stated, and the first meeting is expected to be held about the end of April.

The output of the Indian Gold Mines for February amounted to 33,060 ozs., a decrease of 1,516 ozs., as compared with January, but an increase of 2,640 ozs. compared with February, 1897.

The scheme for organising a huge combination of fine cotton spinners and doublers has been approved and accepted by 32 firms, the contracts have been sent out to the amalgamating firms, and as soon as these are signed a provisional board will be called together to direct the issue of the prospectus, which, it is stated, will invite the subscription by the public of two-thirds of the capital, which is given as £5,000,000. The firms who have already entered the combination control over 2,250,000 spindles.

The exports of gold from Cape Colony for February amounted in value to £1,079,591.

The seven Australasian Colonies produced in 1897 is 521,544 oz. of gold more in 1897 than in 1896, the figures for the two years being 2,899,050 oz. and 2,378,126 oz. respectively.

The space allotted to England in the Paris Exhibition of 1900 is 60,000 ft. As this includes our Colonies and Canada asks for 60,000 ft. for herself, and New Zealand 100,000 ft., it seems pretty clear that Great Britain will be very indifferently represented at this advertising show.

Prices of Mine and Mining Finance Companies' Shares.

Prices Quoted on the London Stock Exchange.

Throughout the Investors' Review middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the Investment Index published quarterly—January, April, July, and October—in connection with this Review, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the Review almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the Investors' Review any subscriber can follow for himself the movements of securities from week to week, and the Investment Index will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S.F. Snk.Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D.Stk., *debenture stock*; Pf., Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Ans., *annuities*; Cu. or Cm., *cumulative*; Gu or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Insc., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*.

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

The Investors' Review

EDITED BY A. J. WILSON.

Vol. I.—No. 11. New Series. FRIDAY, MARCH 18, 1898. [Registered as a Newspaper.] Price 6d. By post, 6½d

Notice to Subscribers.

Complaints are continually reaching us that the INVESTORS' REVIEW cannot be obtained at this and the other railway bookstall, that it does not reach Scotch and Irish cities till Monday, and that it is not delivered in the City till Saturday morning.

We publish on Friday in time for the REVIEW to be at all Metropolitan bookstalls by at latest 4 p.m., and we believe that it is there then, having no doubt that Messrs. W. H. Smith & Son do their best, but they have such a mass of papers to handle every day that a fresh one may well look almost like a personal enemy and be kept in short supply unless the reading public shows unmistakably that it is wanted. A little perseverance, therefore, in asking for the INVESTORS' REVIEW is all that should be required to remedy this defect.

All London newsagents can be in a position to distribute the paper on Friday afternoon if they please, and here also the only remedy is for subscribers to insist upon having it as soon as published. Arrangements have been made that all our direct City subscribers shall have their copies before 4 p.m. on Friday. As for the provinces, we can only say that the paper is delivered to the forwarding agents in ample time to be in every English and Scotch town, and in Dublin and Belfast, likewise, early on Saturday morning. Those despatched by post from this office can be delivered by the first London mail on Saturday in every part of the United Kingdom.

Cheques and Postal Orders should be made payable to CLEMENT WILSON.

The INVESTORS' REVIEW can be obtained in Paris of Messrs. BOYVEAU ET CHEVILLET, 22, Rue de la Banque.

ADVERTISEMENTS.

All Advertisements are received subject to approval, and should be sent in not later than 5 p.m. on Thursdays.

The advertisements of American Life Insurance Offices are vigorously excluded from the INVESTORS' REVIEW, and have been so since it commenced as a Quarterly Magazine in 1892.

For tariff and particulars of positions open apply to the Advertisement Manager, Norfolk House, Norfolk-street, W.C.

The Investors' Review.

The Bank of England, and the Gold demand.

In the early days of the week there was a pretty general disposition among dealers in banking credits to look for an advance in the Bank rate yesterday. We could never quite fall in with this view, because the necessity for the step did not seem apparent. A demand for gold on account of New York had arisen, and, if they wished it, the American people seem to have the power to take away a great deal of the metal from Europe this spring. But they do not possess this power in any special way over us; the Continent is their debtor for foods much more than we are, and continental markets felt the effects of their weaker position the moment the gold demand arose. Paris became the point upon which the orders converged, and if the Bank of France had not put up the premium on the metal to 6 per mille and followed this step up by refusing to sell bar gold at all, the entire amount New York wanted would have gone from Paris. By, in a sense quite real up to a point, suspending specie payments, the Bank of France threw the buyers of gold back on London, and considerable amounts in American eagles have been withdrawn from the Bank for New York, at the same time that all the bar gold offering outside has likewise been snapped up.

We have faced this demand, a factitious one, created by political exigencies in the States much more than by commerce, and it has up to the present cost the Bank of England so little—less than £500,000 within the past fortnight—that no adequate pretext is afforded to put up the rate. A step of this grave kind now, moreover,

would probably tend to have the effect of depressing rather than maintaining rates of discount a little later on, when a moderately firm market would be beneficial. And the fact that Continental Exchange rates are strongly in our favour now, that of Paris most unusually so, offers another cogent reason against hasty changes. It would be almost unheard of to force up the price of money here under such conditions, and a rate established on so feeble a basis could not be stable. In fact, if the directors of the Bank of England had raised their rate yesterday to 4 per cent. they would have driven the market to conclude that some formidable political danger lay ahead which compelled precautions to be taken. In a business sense there is no visible necessity for the step and up to the present never has been.

The market is right enough as it is. For some time to come the Bank will retain control of it and force it to work so as to keep pretty near the 3 per cent. official rate. We shall thus have no cheap money this spring, but neither is it going to be very dear, as far as we can see. At the existing range of rates we shall not collect much gold, nor will we lose much—always barring some currency cantrip played upon India. The mere sale of the Chinese loan will tend to collect money in London, and to keep the German Exchange, at least, in our favour. On the whole, then, we are glad that the Bank Court allowed no passing market fears to sway them yesterday. In keeping the official discount rate at 3 per cent., the directors are retaining an effectual hold upon the market, and with that the power to make the market follow them should the necessity for an advance arise later on. We are not out of the wood because the bank rate remains at 3 per cent., but dealers in credit will be happier in their minds than they would have been had a perplexing change taken place.

Some Dangers Inherent in Dependence upon Mercenary Troops.

Many people seem to think that we are of those who believe that the British Empire should give up arms altogether, and depend for its existence on "the brotherhood of nations." It is always hard to get the average reader to draw distinctions. What we have said on this head, and shall continue to say, is that we do not get value for our money either in army or navy, and that, as regards the army, it is nearly useless to make provisions for larger numbers of men while the administration of the War Office is unreformed, surcharged with prejudice, and traditionally corrupt. Further, we have insisted often that the modern system of expansion, in virtue of which great tropical wastes, where Anglo-Saxons cannot settle or thrive, are becoming more and more a charge upon the home tax-payer without prospect of compensation, for money thus sunk through enlarged trade is forcing the country toward recruitment by some form or other of compulsory service. On the old lines we can neither fill the ranks of our regiments nor man our navy. So weak are we that were the country to enter now upon a great war, it is probable that we should begin with a complete breakdown in all our fighting organisation; and assuredly a great war would involve the abandonment of expeditions like those of the Soudan, or into the back lands of the West Coast of Africa, to say nothing of the Uganda protectorate with its East African Railway, or of Rhodesia.

Try to look at the position with an unprejudiced mind. Surely it is unwise to rage and foam at the mouth with the passion of an over-heated patriotism, when a suggestion is made that we might be stronger if we had not so many small jobs in the fighting and conquering line always on hand, in places of the earth more or less distant from any safe base of operations. Look how weak this kind of thing tends to make the country when any great emergency arises, such as the struggle which has begun at Pekin over the partition of China. Do not our numerous commitments in other parts of the world help to cripple us in the Far East? We talk in bragging tones about "fighting Russia," "giving the French a jolly good hiding," "putting the Germans in their place," and so on, and only make ourselves ridiculous, because, as a plain matter of fact, we are not in a position to do any one of these things, owing to our involvements elsewhere—involvements that not only draw off ships of war and our troops, but absorb likewise, year after year, enormous sums of money, money it will soon be increasingly difficult to find. The consequence of our restless expansiveness in savage and tropical regions, where there is little scope for commerce, has been to draw the country into a war-standard of expenditure in time of peace. A great conflict would, therefore, find us without either the men or the means to carry it on. We are already reduced in China to the humble rôle of money-lender. Our wealth is about the only agent we have left with which to checkmate Russia and Germany, and it cannot long be effective. It is, moreover, all out on mortgage, so that we have no reserves to draw upon when the supreme hour of danger does come. Suppose Japan, whose fury is almost uncontrollable against Russia, refuses to hand over Wei-hai-Wei in May next, when the last instalment of the war indemnity is paid to her by China, and announces that she will hold the place until Russia comes to terms with her about Port Arthur, Manchuria and the Corean Peninsula. And suppose, further, that Russia, with a haughty contempt for the sea power of Japan, decides to go to war to assert her "right" to carve out of China whatever territory she pleases, where shall we come in? Dare we back the Japanese? Where are the ships and men, where is the money with which we could do this? "Russia has no fleet there which could stand up against Japan alone," many allege, and the allegation is probably true. But an army is wanted as well as a fleet, and a large army, too. We have not got it. All our available troops are engaged elsewhere, and most of the available officers as well—warring among the mountains beyond the North-West frontier of India; garrisoning South Africa; conducting campaigns in the Nile Valley; quelling mutinies in Uganda; leading armies of mercenaries into the uplands of the Niger basin; holding down Egypt with the "mailed fist"; and as regards the nearer East, where our fleet is assisting to maintain anarchy in Crete, trembling lest the flames of war should fill the Balkan Peninsular or Asia Minor in the spring, and lead to the seizure of Constantinople by Russia. Could we move 10,000 men to try to prevent this seizure? No, not one thousand without raising acute dangers elsewhere.

We have mentioned mercenaries, and is it not by the aid of mercenary troops that all our wars are now carried on? And have not these troops again and

again proved a source of danger to the Empire? To say nothing of the Indian Mutiny, is it not the fact that the Soudan was lost to Egypt through the weakness of British-led mercenaries? Does not the present trouble in Uganda spring from the same source? What but weakness and liability to sudden disaster can come to the Empire through its daily increasing dependence on this class of fighting men? We are continually asked to admire the "loyalty" of our Native army in India; but let a disaster befall us at any point in our widely-scattered dominions, and could we trust to that loyalty? Did not British officers talk in the same way down to the very day when the Mutiny broke out in 1857? After the struggle had actually begun, did not officers frequently lose their lives by refusing to believe that the soldiers they commanded could be other than loyal? It is not the fashion nowadays to read such books as Gibbon's "Decline and Fall of the Roman Empire." We therefore hold it useless to appeal to the experience that history affords of the danger to liberty inherent in an extensive dependence upon alien mercenaries; and it is possible that our own freedom may never be directly menaced thereby. But the solidarity and maintaining power of our Empire as a whole undoubtedly is menaced more and more by this very habit, and our brand-new policy of expansion, no matter where, is putting the country in this dilemma: either it must coerce Englishmen, Scotchmen, and Irishmen to serve as soldiers and sailors, thereby weakening the kingdom in the capacity to maintain its industrial supremacy, or we must trust the controlling, discipline, and the fighting expeditions our Empire and our conquests demand more and more to alien soldiers.

That such dependence must be a source of weakness should be evident to the meanest comprehension, but let us help such by an illustration. If war broke out in the further East, as it may do this spring, between Japan and Russia, and if our paramount commercial interest in China obliged us to take part in this war, could we place an amount of confidence in our native army sufficient to allow us confidently to withdraw, say, 20,000 of the British garrison in India for the Chinese war? We could not: the most fanatical believer in the loyalty of the Indian native army would not dare to maintain that we could. What is much more likely to be necessary is an increase of the British garrison of India; for Russia has but to make a demonstration Afghanistan way to put India, from one end to the other, in a ferment of expectation essentially unloyal. And as we cannot spare British troops in sufficient numbers both to augment the Indian garrison and to fight a war in China, the outcome would be more British troops to India and Sepoys to China. We should have to fight there with an army mainly composed of mercenaries saturated with discontent at being removed from their native land. It would be in Asia as in Africa, and no sensible man can deny that an empire functioning and ruling under such conditions is on its way to trouble. Will the reader turn these things over in his mind and decide for himself how far it is wise to go on spreading out dominions which have already far outgrown our capacity to rule them with the aid of home-bred soldiers? And alongside this actual empire, disjointed, full of incongruities, covering many regions where existence to races from a temperate climate is difficult or dangerous, where settlement and multiplication by such races are impossible, place the fairer picture of an Anglo-Saxon brotherhood of nations in America, in Australia, in South Africa working together with the grand old mother land for the good of mankind and the progress of the world. How far away such a dream appears now when the earth is full of wars and threats of war, when the clatter of armed men drowns the hum of the loom in all men's ears; when men's faculties are bent unceasingly towards the production of instruments of death! It is as if an Armageddon were at hand.

A New Irish Muddle.

(From a Correspondent.)

Whoever knows anything about the Irish Land Question and the certainty it involves of large drafts on the purse and patience of the British and Irish taxpayer to solve it, must dread addition to the perennial trouble it causes. Yet in the new Local Government measure we have such an addition, and it would be well the taxpayer should realise that the land muddle is to be made straight by his cash and credit. This order might be thought big enough without having added to it a Local Taxation muddle, also evidently meant to be solved at his expense.

The facts lie in a nutshell. The rateable valuation of Ireland was (1891) £14,027,858, in which total agricultural holdings accounted for £9,971,987. The actual rates levied (1896) on the whole country came to £3,095,517, of which £752,056 was town taxation, exclusive however of the poor rate on towns. Under the measure now proposed, the landowner becomes entirely exempt from local taxation, while the agricultural occupier, now paying the whole of the cess and half the poor-rate, becomes exempt from half the former, calculated on a standard year. In the agricultural districts, almost the entire area of the island, this strikes out of the valuation book half the fund liable for rates. The small class thus becoming exempt in whole or part is far the richest section of the ratepayers; and of the £750,000 a year to be given out of the general taxpayer's money, £600,000 at least goes to this class. But the mischief does not end with this. The ratepayers are divided into two classes, one a propertied and privileged class paying no rates or half rates, the other a non-propertied, non-privileged class, paying in full. The last, in many districts the most numerous, in all the poorest, will henceforth become exposed to exorbitant exactions on a small fraction of the valuation. It is already oppressively, though unequally, taxed, and will now become more uniformly exposed to weightier burdens. It gets no share of the grant, but, under the great contraction of the taxable fund, it becomes liable in extreme degree to impossible and violently fluctuating rates, as the result of any, even the smallest, increase of expenditure falling on the narrow area of incidence. And a large increase of expenditure is inevitable under the new system. Whatever may be urged against the present local administration it is extremely cheap, so much so as to be inefficient. The present cost of administration in the counties is only 6·6 per cent., and in the unions for poor relief 10·58 per cent., greatly below what it is in England.

The mass of the privileged class of ratepayers will be disappointed; what it gets will not compensate it for the consequences flowing from the conjunction of a narrowed taxable fund with increase of expenditure. Of

the 486,865 agricultural holdings in Ireland 68·3 per cent. have a valuation below £15, and 88·9 per cent. of the whole are below £40. Under the existing system this mass is exposed to exorbitant rates owing to its poverty and to estate-rating. Its share of the £750,000, about £150,000, would be at the best an inappreciable boon, but the benefit of it is certain to disappear entirely as a consequence of any increase in expenditure.

The larger occupiers over £50 valuation, whose holdings number 40,783, collectively get an appreciable boon, but in respect of a large number of them, what is given with one hand is taken away by the other, under the enactment of union rating. Union rating, the abolition of 3,444 areas of rating in which the rate arbitrarily varies from 4d. to 5s. 10d. in the £, is in itself a highly desirable reform, but as it is now proposed to be done, the discontent of those who, expecting a favour, will have their burden increased, is sure to greatly outweigh the gratitude of those who are doubly benefited by the agricultural grant and by union rating. The proposed re-adjustment is in very many cases not only violent, but, as effected, unjust and uncalled for.

The landowners of course come in for the plum. They not only get a large part of the £750,000, but become practically altogether exempt from local taxation in respect of a rental of £10,000,000. Mr. Chamberlain not long ago told his constituents at Birmingham that the Irish landlords pay the bulk of the local rates, and others of Her Majesty's ministers have been pathetic in urging the necessity of protecting them from confiscation under the title of taxation. But they are protected already up to the hilt: it would be strange were it otherwise in the country they so long governed despotically. They pay virtually none of the county cess, and only a part of the poor-rate—nominally a half, really, under the system of electoral or estate rating, less than a quarter. This is at once apparent from the fact that of the £750,000 to be now drawn from the general taxpayer, £250,000 to £300,000 will amply suffice to entirely exempt landlords from local taxation. Surely this shows that they pay less than a tenth of the rates assessed on real property rates whose total amounts to £3,000,000. Further, it is notorious in Ireland that subsequent to 1838, when the poor-rate was imposed, rents were raised, as they were again in 1852 when Mr. Gladstone extended the Income Tax to Ireland. In point of fact, the rental of Irish land, at present paying nothing like its fair share of local rates, throws the burden unjustly and inequitably on a mass of small occupiers, thus contributing in no small degree to the discontent and unrest of the country. Such inequality is now, instead of being remedied, about to be made worse; £750,000 of the British taxpayer's money is to be not merely wasted, but really so applied as to aggravate a gross existing abuse. Who can doubt that this proposed rate will soon produce a state of things which must call for, and is, perhaps, meant in the end to call for, larger demands on the general revenue of the United Kingdom. The exemption of rental from local taxation, the odious and invidious creation of a privileged class of ratepayers, the intolerably heavy burden which a narrowed area of incidence must place on a large body of non-privileged ratepayers, will be made the grounds for placing local burdens entirely on the general taxpayer.

It may be said that the Irish people want a system of democratic local government, and are willing to pay for it. But the question is one not of will alone but of ability as well. The people want, in the cant of politics, taxation according to representation, and they get it with the whole rental of the country and half the interest of the agricultural occupier struck out of the taxable fund. The deception inherent in this proposal would, in working, be intensely irritating, even if practicable, which it is not. A taxable fund curtailed to the extent proposed would not yield enough to support local administration without entailing insufferable burdens on the poorest class of ratepayers. So the logical consequence of the exemption of the wealthy ratepayers must be, in the end, the exemption of the poorer too, at the cost of the general taxpayer, whose representative, the State, would nevertheless have no effective control over elected local bodies. The helpless supreme Government would assuredly be denounced as tyrannical if it dared to interfere with the vagaries of these bodies. This is the new muddle, political and financial, which our legislators are, apparently with unanimity, preparing for us in Ireland and in Great Britain.

If our "democratic" Parliament votes away the taxpayer's money to exempt the Irish landed interest from liability to local rates, already unfairly light, not to relieve or re-adjust local taxation but to enhance the liability of the mass of ratepayers, can we expect that "democratic" local bodies will act in any better spirit? In Ireland from end to end, untempered elements of class and party tyranny abound, and we cannot hope to find in its local councils the qualities so conspicuously wanting in the action of Parliament.

The Accountant's Certificate in a Prospectus.

When a limited liability company is formed to take over a "going concern" the amount of its capital is presumably adjusted in order to provide the following:—1. The sum required to buy the tangible assets of the old firm. 2. The sum required to buy the goodwill of the old firm. 3. The sum required by the new company for "working" capital. The first of these items is, or should be, clearly defined in the reports of expert valuators; the third depends entirely upon the individual character of the business to be transferred; the value of the second is supposed to be ascertainable from the accountant's report certifying the past profits. To the curious outsider who has his funds snugly invested, the post-prandial perusal of the documents which pass for "certificates of past profits" contained in his daily budget of prospectuses must be a pleasing and amusing excitement, but to investors the fact that anything but a perfectly straightforward certificate should be granted by an accountant is no joke, and it is now, very properly, beginning to emerge as a serious matter for the profession of accountancy also.

It is no difficult task to determine what represents "a perfectly straightforward certificate." An accountant's duty is to examine the books of the old firm, and declare to the public what he finds there as the result of its trading. His certificate, therefore, should state the actual amount of profit earned in each of a certain number of past years, and at the same time should narrate how these amounts have been arrived

at. This may seem obvious enough, but it is a lamentable truth that promoters too often see reasons for departing from this course. What is even more culpable is the fact that accountants are often prevailed upon to conceal or juggle inconvenient facts, presumably in order to curry favour with the promoters and obtain the position of auditor to the company.

One of the favourite methods of hoodwinking the public is that of averaging the profits earned during a certain number of past years, and certifying the sum arrived at as the "average profits" for the last three, five, or seven years, as the case may be. The objection to this is, of course, that, for all the public knows, it may be purchasing a business which has been steadily declining in late years; indeed, it is almost safe to assume when this method is adopted that such is the case. A curious example was seen lately in the flotation of a small aërated water company. In this prospectus the average profit for three years was certified in the manner described, but on looking further into the prospectus one found that the estimated value of the assets, exclusive of goodwill, was over £15,000, while the purchase price of the business was £14,000. As the vendor also agreed to pay all the flotation expenses he evidently considered that the goodwill of his business was best represented by a minus quantity. Thus the value of the accountant's certificate was, to say the least of it, considerably discounted.

A method which is often adopted is that of certifying a statement of profits which only covers the trading of a few months, and estimating therefrom the probable profits for a whole year. This, of course, is a palpable "juggle," and it is extraordinary that investors should be considered capable of being contented with averages deduced in this way from the results of a period selected by the vendors to suit their own interests.

In one flotation of a recent date a sort of combination of these two unsatisfactory methods was adopted, which was even more unsatisfactory than either taken singly. In the certificate given by the accountants in this instance, the profits for three years were jumbled up together, and the average taken; then a period of thirteen months was taken by itself!

A third method is that of making a pure estimate of future profits. As we are considering only the case of a "going concern" flotation, some good reason must be adduced for asking the public to be satisfied with an estimate. Frequently this is recognised and a reason given; sometimes, owing to stupendous improvements in machinery or methods of production, past profits are declared to be no criterion of future ones; or, perhaps, the influx of new business which is to result from the introduction of new capital is put forward by way of justification. Whatever the excuse is, however, one point should be duly noted. An estimate given by an expert member of the trade which the company is formed to carry on, may have a certain value, but the estimate of one who is presumably skilled in accountancy alone is rarely worth the paper on which it is written. A glaring example of this was furnished recently in the prospectus of a distillery company. The capital of this company was £200,000; the amount of the valuation £150,000, and the profits, as estimated by two practical distillers, exceeded £56,000.

A certificate was granted by a firm of chartered accountants saying that they had had submitted to them, "in order to save publication in detail," the statements prepared by the two practical distillers, and that they found "the estimate of profit fully borne out by these statements, which together show an estimated profit of £65,422 per annum." Surely one may assume that the word of the "two practical distillers" would have been as satisfactory to the investing public as that of the accountants, and one is therefore almost forced to the suspicion that the matter was cast in the shape of an accountant's report in order to catch ignorant or unwary capitalists.

A class of certificate which at first sight appears perfectly satisfactory is that which declares that past profits have been sufficient to pay a certain percentage on the capital of the new company. But, in spite of its apparent straightforwardness, this method is also open to objection. In such cases the public is rarely informed what depreciation has been written off or what allowances have been made for bad debts or other contingencies. In the recent flotation of an hotel company where this method was adopted in the prospectus, a fixed annual sum was charged for ordinary repairs and renewals, "which sum the manager certified as being amply sufficient." As the accountant had evidently been compelled to resort to the manager for assistance, one could hardly consider this remark to be "amply sufficient" information of how the results contained in his certificate were brought out.

Then there are many certificates granted by accountants which cannot be placed in any of these classes, some apparently straightforward, others conveniently vague. One of the most impudent of these was that given by a chartered accountant in the flotation of a soap company in October last. This stated that for the five years to March, 1896, the profits had been equivalent to twelve per cent. on the capital employed. What the "capital employed" was or had been, what ratio it bore to the issued capital of the new company, why the certificate of profits stopped at a date over eighteen months previous to the issue of the prospectus, are mysteries upon which the vendors did not deign to shed light. As the *Economist* remarked at the time, the certificate was "an utter burlesque of what such a document should be," and "such a certificate from a chartered accountant is calculated to bring the business of accountancy into contempt."

When such certificates are given by accountants, and remarks regarding accountancy are made by leading financial papers such as those quoted from the *Economist*, it is surely time for the profession to recognise its position in this matter. There can be no doubt that, whether the public puts the accountant's certificate to its chief use—the valuation of the goodwill—or not, the statement of profits does possess great weight. A frank statement of past results is undoubtedly a most potent factor in a successful flotation. There is, however, a section of the investing public which is lamentably gullible, and which, on reading such a certificate as the one last noticed, remembers only the words "12 per cent. on the capital employed." To these investors much loss, which is directly traceable to such misleading statements, must accrue. There is reason to hope, however, that the ranks of this division of the public are being gradually thinned by experience, and there is now considerable danger that the injury done to the public will, in the near future, rebound upon the reputation of the accountants. Were accountants to take a firm stand in this matter, refusing to sign certificates

that could be misconstrued in any detail, they could lessen considerably the chances which unscrupulous promoters possess of deceiving the public. On the other hand, by acquiescing in the concealment of misrepresentation of material facts, they do incalculable harm both to the public and to themselves.

Economic and Financial Notes and Correspondence.

The Marquis of Salisbury.

Men of all political parties, we feel sure, will regret that the Prime Minister and Foreign Secretary should be laid aside from work by ill health at the present critical state of foreign affairs. Partisans may gibe at his lordship and accuse him of vacillation, and make fun of his capacity to retreat from difficult situations by way of "graceful concessions." We have ourselves differed strongly from his line of policy in regard to Turkish affairs, whether in Armenia, in Crete, or in Greece. We felt that it was due, both to the moral responsibilities and the power of England, that he should have assumed a more masterful attitude all through the recent troubles of the moribund Turkish Empire. None the less is it true that Lord Salisbury has exercised on many occasions a wise discretion, that he is a man of peace, anxious above all things to prevent the entanglement of this country in a disastrous war; that his long experience and strong common sense have frequently enabled him to steer us out of troubles a rasher man would have brought down upon the nation's head. And the worst of it is there is no man visible at present at all able to replace this statesman, whose patriotism is undoubted, whose ability is great beyond that of any of his colleagues, and whose knowledge of diplomacy is more extensive than that of any Englishman now living. All parties in the State may, therefore, be trusted to join cordially in the hope that his lordship may soon be restored to health and vigour, so as to be able to resume the anxious, incessant, and too often thankless labours of his office.

Mr. Cecil Rhodes and the Transvaal.

A Reuter's telegram from Capetown published yesterday, announces that Mr. Rhodes in a speech at Salt River used the following language: "You must decide whether you will go on patting the back of the Transvaal Government or whether you will take up a Constitutional position, and say 'We remonstrate with you, and hope you will change, because you are embarrassing the union of South Africa.' There are now eighty thousand people in the Transvaal, a number which will soon be raised to five hundred thousand, and if we do right we shall constitutionally support their claims for just rights rather than support the Government which just happens to be successful on the basis of the vote of fifteen thousand."

This is very specious, but not true so far as the position of the Transvaal Government is concerned. It is not a "constitutional" attitude to allege that this Government is in the wrong in defending the liberties handed back to it by the Government of England. No doubt it is [illegible] way clever, and certainly cunning, to endeavour to represent the South African question as a question of equal rights for all, and to hold up the foreigners within the South African Republic as a body of people denied their just liberties, but there is no getting away from the fact that this kind of thing is not merely contrary to fact but directly provocative of a fresh outbreak of race hostilities in South Africa. There should be no mistake in the minds of the British public on this question. If we follow the lead set by Mr. Cecil Rhodes, in harangues like that from which we quote, we shall be landed once more in a South African conflict where we shall be almost completely in the wrong. Grant that the Boers are obstructive when they exclude aliens from the franchise, have they not the right so to do, and have they not good excuse for thus acting in the treatment they have received from us again and again during the period when we have been supreme in South Africa? Mr. Rhodes's policy is still the policy of the Jameson raid; is it likewise that of Mr. Chamberlain?

The United States and Cuba.

We have not abandoned the hope that the difficulties between these two Powers may yet be settled without war. For one thing, as an American correspondent shows in a letter which we print below, the American people as a whole are actuated by excellent motives in desiring to see an end put to the anarchy prevailing in Cuba. They are not moved by a desire for annexing it, but by a humane impulse to remove from their doors an open sore full of danger to their own people. Another source of hope is the fact that Spain is too exhausted to maintain a fight. As the able special correspondent of the *Times* in Havana pointed out in a very interesting letter published by that paper on Monday last, the Cuban rebellion has cost Spain already some £60,000,000, if the £12,000,000 of unpaid arrears of Cuban taxes are counted in, the occupation of the island entails on Spain an expenditure of £1,600,000 per month at the present time. Were the cost of a naval war with the United States to be added to this frightful burden upon Spain's resources her bankruptcy must ensue within a very few weeks. It is perilously near now. The Madrid Exchange is going up steadily, so that the piastre is now depreciated quite 40 per cent., and the Bank of Spain is so over-weighted by the task of sustaining the credit of the State that very little more would force it to suspend.

Under these circumstances, with an empty Treasury, with an unready fleet, and without means to augment the revenue at any point, the Spanish Government must in a little time be forced by circumstances to put its pride in its pockets, and accept the inevitable. The knowledge that this is so helps to account for the recrudescence of an old proposal on the part of the American people to buy the freedom of Cuba from Spain outright, for money down. Some two years ago indirect negotiations were entered into for effecting this purchase, and we believe the American Government was willing to hand Spain a hundred million sterling in order to liberate Cuba. Spanish pride scorned to entertain any such proposal; but pride does not fill the Treasury, nor cause surpluses to arise in place of yawning deficits; therefore, we are inclined to think that if a money transaction could be arranged

under some guise which would cover Spain's humiliation it would afford a solution acceptable to all parties. One thing is certain, Spain cannot go on much longer on the present lines without re-awakening revolutionary movements at home. Then Cuba and all might be lost in one upheaval. Señor Sagasta's Ministry appears to be beginning to show some perception of this danger, and the faster the United States prepares for war, the greater may be the certainty that war will not break out.

Dear Mr. Wilson,—Practically speaking, we know no more about prospects of war with Spain than you do. If it was most any other country I would say there would be no war, for we certainly don't want one, but you know Spain, her characteristics, and embarrassments, and that she may be expected to do the wrong thing, unless by accident. Cuba has been a constant worry for a half century, and especially for the past two or three years, a large bill of expense to us, of which we are heartily tired; and when you add the barbarities carried on under our noses, and that owing to the miserable sanitary conditions at Havana, it is likely to send us yellow fever any year, always causing many deaths, and a tremendous loss to several States, you will readily understand our great desire for a finish.

Evidently preparations are being pushed forward rapidly, but, the Administration says little, and allows but little to leak out. It is not running this thing with a "brass band." I imagine, however, that when the time comes, the position assumed will be unequivocal, and will be a pretty clean bill of health. The general impression is that after war is actually under way, business will not be greatly affected, and that Cuba will be worth the war's cost, either as our own, or independent, and bonded for enough to repay our outlays. The contest, if it comes, will be very interesting from a scientific standpoint, as it will be the first opportunity for fairly testing the practicability of the various new armoured warships, torpedo boats, &c., and it will be especially interesting to us in testing our coast defences.

There is a steadily growing conviction that our true policy is, the best possible coast defences, a very small Army, and comparatively small Navy; but while feeling pretty confident in regard to the sufficiency of our coast defences, a fight with Spain will, no doubt, develop important defects, and it will cost us much less to gain experience through a war with that country, than with a stronger Power, and, no doubt, Spain has enough good ships to test our defences. As an instance, showing the deep-rooted prejudice against increasing the Army or Navy, absolute necessity is demanded to be shown before Congress will grant an increase of two artillery regiments for use on the coast defences.

Sir William Robinson's Views on China.

This gentleman, who has just returned to England after having been Governor of Hong Kong for six years, has been giving his views about the affairs in the far East, and in particular about the defence of Hong Kong. They are so apposite and interesting that we venture to extract some portions of the interview with him, so that they may be available for future reference. It is pleasant to see that a more sensible and right-minded view regarding our position in the far East seems beginning to prevail. We hope, though, that the "partition" policy will not be the one we shall have to follow in China in order to keep the door open for our trade.

I must say I do not share the alarm felt by some regarding the political situation in China, neither do I believe that Russia's policy in that part of the world should be regarded as necessarily inimical to us. I approve entirely of Germany's action in taking Kiao-Chau. She did exactly what we might have done, and what we shall probably ultimately have to do if friendly concessions are not made to us. In pursuing her present course Russia is simply carrying out a definite policy which she has been steadily and with determination pursuing for years—a policy which, as I have said, is not unfriendly to us, but which in any case it is now too late for us to attempt to stop. I do not believe that the acquisition by the Czar's Government of Port Arthur will do any harm to England, if that and other ports are kept open. So long as we have Free Trade, Russia's action will not only not hamper us, but will even be in some ways helpful. She intends to come as far as Port Arthur, and I do not believe she will come further. Already she practically possesses the whole of Manchuria. We must recognise that Russia means to have an open port, and under the conditions I have mentioned I am in favour of an *entente* with Russia, the result of which would be of mutual advantage. Our own policy is, above all things, to insist upon Free Trade and an open door. That is all we want; and as the policy of Germany and the United States is in this respect identical with our own, we should work with those countries in the accomplishment of our aim. We ought undoubtedly to keep a firm hold of the whole of the Yangtse Valley. Beyond all this, we must insist on the fulfilment of all the Clauses of the famous Tientsin Treaty, and if the Imperial Government of China object, coercion, in my humble opinion, should follow. Although I do not believe that the partition of China has yet commenced, there is a feeling in Hong Kong and Shanghai that the provinces cannot long hold together. Already they are to a certain extent independent, not only of each other, but also of the Imperial Government.

The First of the West Indian "Doles."

Mr. Chamberlain has obtained the sanction of the House of Commons, by very considerable majorities, to the first of his proposed doles to the West Indies. The amount thus voted is £120,000. A large proportion of this sum—£90,000 in all—is to be applied in wiping off certain deficits, which have accumulated in eight of the islands, and which those colonies are declared to be entirely unable to discharge. Now, this method of meeting what Mr. Chamberlain calls the "cost of decent administration," is, to say the least of it, a very questionable proceeding; for, from all that the Colonial Secretary stated, this will not be a mere occasional dole to help a temporarily crippled colony over a temporarily difficult stile, but must become practically an annual charge upon the mother country. Mr. Chamberlain made no note of the charges of extravagant administration brought against these colonies. A few economies had been introduced, but these would not enable the spendthrift islands to pay their administrative way. The limit of taxation had been reached there. England must make good the deficit. Nay, from his complimentary reference to the "wise expenditure" of France and Germany on their colonies, Mr. Chamberlain seems to have lost faith in the good old English policy, that the first and chief lesson given the colonies, is that they must learn to pay their way. Of course we are assured that in every case where a grant is made in those islands, the Government mean to see that "we have full and ample control over taxation and expenditure." A pleasing assurance truly, considering the admirable way in which the House of Commons exercises its "full and ample control over taxation and expenditure" at home! It looks as if one distinguishing feature of Mr. Chamberlain's tenure of power at the Colonial Office will be that he has taken the first step towards the financial demoralisation of our colonies.

Something may perhaps be said for the scheme for the disposal of the remaining portion of the supplementary vote, amounting to £30,000. It is to be applied in making roads, in helping the negroes to settle on the land as peasant proprietors, and in encouraging new industries. We do owe these negroes something. In a moment of somewhat reckless generosity, we paid the West Indian planters £20,000,000 to buy

the freedom of their slaves. They were shrewd gentlemen these planters; and, while grumbling loudly, they pocketed the money, and left the island much poorer than it was before. They got fortunes, the slaves were left in a position considerably nearer starvation than they had been. This was the real beginning of the trouble which has ever since oppressed the island. It may be an excellent thing to buy out some or all of the landlords, but it may be made the very reverse. It all depends on how the scheme is carried out. Mr. Chamberlain pledged himself that, so far as he personally could, nothing like exorbitant prices should be given for land or buildings. If he succeeds in that the proposal may do well. It is worth a trial, but it will have to be very jealously watched, lest it ends in doing more harm than good—in being a mere scheme for putting money in the pockets of the landowners in place of benefitting the colony at large.

But this, it seems, is only a small part of the great project for the advantage of the West Indies which the Government are understood to have elaborated. Mr. Chamberlain could not explain the general proposals on Monday night because he is at present engaged in preliminary negotiations for "reciprocity arrangements" between the United States and Canada and the West Indies in regard to the reception by the former countries of West Indian products. It is a question of how far Protective duties may be modified on either side. Mr. Chamberlain spoke as if the West Indies were being asked to make too great a "sacrifice"—a sacrifice, be it remembered, of import duties which bear with undue weight upon the poorer inhabitants of the colony, and have undoubtedly greatly retarded its prosperity and industrial development. But Mr. Chamberlain is hopeful. If these reciprocity arrangements are concluded, it will, in his opinion, be equivalent to a "bounty" for the sugar growers. If this is all the Colonial Secretary hopes for, he will have done little indeed for the general prosperity of the West Indies. The colony cannot be improved by Protection, whether in the shape of "reciprocity arrangements" or bounties. But we must wait for the unfolding of the Government proposals. Meantime, we note that Mr. Chamberlain objects to his grants being called "doles." He prefers to call them the "necessary expenses of empire"—the specious pretext under which we have been called upon to nearly triple our naval expenditure within twenty years.

Antofagasta (Chili) and Bolivia Railway Company, Limited.

Mr. Ottomar Haupt is a very clever fellow and writes with great intelligence. We always peruse his letters in the *Financial Times* with much interest and instruction. But he has some failings, and when he gets upon a gold standard for India we cannot follow him, still less when he falls foul of this railway company. Perhaps it is because his interests lie with the Huanchaca Mining Company, whose shares he some two years ago praised as the finest investment a man could have, that he becomes so savage when he thinks of this railway, interest at 6 per cent. on whose capital stock has been guaranteed by the mining company down to 1903. He really should moderate his wrath, for it would appear that neither the mine nor the railway are deserving of either pity or anger because of their connection with each other.

A very interesting report is before us drawn up by Mr. George Stielow, one of the directors of the Antofagasta Railway, as the result of a visit made by him to the property. From this report we not only learn that the mining company suffered no loss by working the railway last year, but, on the contrary, made a profit of £2,800; and we learned from last year's Huanchaca report that part of the debt incurred to that company by the railway for advances on account of interest was in 1896 repaid out of earnings. This is healthy enough, but what is still better is the fact that the general traffic of the line is becoming larger every month, we may say, and that it, therefore, is growing more independent of the traffic brought to it by the Huanchaca Company. People must not be led away by the notion that if the Huanchaca mine has had to shut down because of the water in its deeper levels—a most merciful flood by the way for those who work in it—the railway company would there and then fall into an impecunious position. It would do nothing of the kind. As the director whose report we deal with points out, although this current year will show a falling off in the gross receipts, just as the latter part of 1897 did, through a reduction in the Huanchaca traffic, the earnings from the general business are likely to continue to be sufficient to cover the Huanchaca company's guarantee.

In other words the Antofagasta line might be able by its Bolivian traffic alone to meet its engagements and, were it freed from all connection with the Huanchaca Company at once, its common stock would be in no danger of falling into default. Apparently in spite of drawbacks, such as we describe, the property is well maintained, and in good condition. Assume therefore, that it will require further capital expenditure within the next few years, and that either the port of Antofagasta itself must have a large sum spent upon it; or that another port will have to be found towards which the main line must be diverted, and at the very worst the company might still be able to pay 4 per cent. on its common stock. The traffic of Bolivia is increasing, and must increase, quite apart from the mineral devolpment going on.

We have no interest whatever in this property, and therefore can speak impartially enough when we say that it does not appear to us that holders of either the debenture stock or the common stock should sell on the present depressed market. They have been doing so through a mistake, and also through the clamour raised by Mr. Haupt, who, in what he deems to be the interests of his pet mine, desires to have the guaranteed annuity on the stock reduced at once to 4 per cent. We see no reason why this reduction should take place. In all probability the line will be able to clear off its debt to the Huanchaca Company by the time that Company is freed from its present guarantee. At all events the railway stock holders must not let themselves be bullied into a release of the Huanchaca Company, still less of the Chilian Government, until its position becomes very different from what it now is.

Sir George Lewis and Sir Henry Hawkins on Usurers.

Some remarkable evidence was laid before the Committee of the House of Commons on money lending by this gentleman last week. He, for one thing, emphati-

cally defended the Jews from the accusation of being the only usurers in the country, and declared that Jews who did follow this loathsome occupation were despised and loathed by the Jewish community, and were not allowed to hold any public position therein. Further, the Jewish clergy, he stated, preach against them and their usages. His testimony was all the more valuable because he himself is a Jew, and we have no hesitation in saying that he spoke the truth. It is the bad Jew who gives the whole race a character with the public that it does not deserve. In regard to remedies Sir George thinks that a clause in the proposed Act running as follows, would do something to check the mischief :—

> That whosoever, being a professional money-lender or manager, clerk, or agent, shall circulate or concur in circulating or publishing any statement knowing it to be false with intent to deceive injure or defraud any person by entering into contract for the loan of money shall be guilty of misdemeanour.

We are not sure whether this enactment would attain the end sought, because it appears to us the evils of usury lie much deeper down than any law can reach. Public opinion, frequently enlightened by such testimony as this distinguished lawyer gave, and the cultivation of simpler habits of living, might do more in the long run to destroy this canker than any law could be trusted to accomplish. As helping towards this illumination of the public mind, we quote the following from Sir George Lewis's evidence :—

> There was a notorious case the other day, and he ventured to think that if it had not been for the facilities money-lenders gave, and the way in which a debtor became entangled, aud the way in which he got into the hands of money-lenders, the crime for which that young nobleman was suffering would not have been committed. The first thing the money-lender did was to see who was the father and who were the relations, and what was the chance of screwing money out of them. He had heard of another case where a man had borrowed hundreds of thousands of pounds at the rate of 40 per cent. What possibility was there of that man being otherwise than ruined? He for one would be glad to see a heavy blow struck at West End usurers. He never knew a borrower gain advantage. A case was known of one money-lender who came over without a shilling who was now lending money to the extent of £40,000. Where did that come from?
>
> After noticing action taken by Mr. Labouchere, Sir George Lewis said, in reply to members of the Committee, that he did not think any objection would be raised by legitimate bankers to legislation. Questioned by Mr. Ascroft, he believed it would benefit both poor and rich if these money-lenders were swept off the face of the earth. At the present moment the laws were all in favour of the money-lenders, and none were in favour of their victims. In Germany the usury laws worked well, and in America he was told there was no usury at all. He would not go so far as to say that money should be irrecoverable if lent to post-office clerks and others, who in borrowing of money-lenders were disobeying the rules of their offices. The difference between a banker and a professional money-lender was quite clear to everybody.

On Tuesday last Mr. Justice Hawkins also gave most valuable evidence, and it is interesting to note that he inclined to the opinion that the usury laws should be re-enacted in some form. In the United States, if money is lent above a certain rate of interest, it seems that the lender forfeits both interest and principal. Sir Henry Hawkins thinks that a good system, and we are disposed to agree with him. These debts to harpy money-lenders ought to be irrecoverable. Even this, however, would not eradicate the evil, and the danger of a strict usury law is that it drives the crime against society underneath the surface. As it is, very few cases of extortion come before the Courts out of all those that daily occur. None at all might come if the law were made stringent against the wretches who prey upon the needy and simple. Both Sir George Lewis and Sir Henry Hawkins emphasised the manner in which the trade of the usurer and the habit of gambling on the turf formed interdependent halves, as it were, of a system by which young men are ruined. Would it not be advisable to see whether some more stringent regulations could not be drawn up with a view to check if not to put an end to betting on horse races, especially in the young? The staid respectable citizen has very little conception how widely this pernicious habit prevails in the community. It affects all classes and does more to destroy the youth of the present generation than anything else we can point to. In the meantime to register usurers like pawnbrokers, to compel them to keep accounts of their transactions, open to inspection, and to strictly hold them at ransom for any unscrupulous practice, might do something to mitigate the evil.

The Uruguayan Coup d'Etat.

Uruguay seems to be rejoicing greatly over its recent coup d'état. It is regarded as a relief from an intolerable burden borne not very patiently for a good many years. The banished Assembly is denounced as having been an agglomeration of corrupt jobbers and bribers, while Senor Cuesta, the new dictator, is lauded as a strong man, and an upright. He may be so. Thus far he has, to all appearance, acted with firmness, judgment, and decision. He has been perfectly straightforward; and if we may trust in his manifesto—an able document—he means to behave like another George Washington or Cincinnatus. As soon as the Council of State has reformed the electoral law, and has convoked a new Assembly, Senor Cuesto intimates that he will retire from the Presidency as well as from politics, into private life. If so, Uruguay will doubtless be grateful. Occasionally dictators may even be desirable. They are not necessarily bad. "By their fruits ye shall know them." England has had her dictator, and on the whole it is acknowledged that his reign was beneficial. But it depends upon the individual; and in South America the rule of dictators has not always been beneficial. It may, generally does, require a revolution to displace one; and, on the whole, they cannot be regarded as desirable rulers unless in extreme and exceptional circumstances. Senor Cuesta, however, has undoubtedly, for the present, tranquilised Uruguay. The finances, he declares, have been managed with honesty and economy. There is cash in hand for all demands, and if his policy is continued he thinks there need be no dread of future deficits. He has not undertaken any public works—he was too busy putting the administration into order for that—but the way is prepared for them. The harvest is good, and trade is brisk. If Senor Cuesta purges the electoral laws, and secures a freely elected Assembly, he may retire with the goodwill and respect of all. But even with Senor Cuesta, worthy though he may be of the praise bestowed on him, a permanent dictatorship is neither desirable nor commendable.

Agitation in Austria.

Austria is in a peculiarly unfortunate position. It has been celebrating, in quiet and orderly demonstrations, the revolution of 1848, without apparently realizing that right in front of it hovers what may prove

another revolution. One of lesser magnitude, perhaps, but still of serious dimensions. The Constitution is at present suspended; and the Emperor Francis Joseph is practically as absolute as ever was Maria Theresa. The Reichsrath reassembles shortly, and an attempt is being made to secure some sort of working Ministerial majority; but there is little hope of real success. It may be that such a majority may be secured for the passing of the Budget and the Ausgleich with Hungary; but after these chaos must come again. The rival linguistic parties cannot breath the same air without fighting. The Germans insist on dominating the Legislature, or stopping legislation if they cannot. The Czechs are equally determined not to submit to the Germans; and so the obstruction in the Reichsrath is sure to be resumed after the adoption of the Budget and the Ausgleich—possibly before. Count Thun is credited with a good deal of vigour and firmness. What will he do if confronted with German obstruction? The expectation is that he will dissolve, but to dissolve on the existing franchise would be but to return a body of delegates similar to the present. The Emperor may, if he chooses, revert to the old electoral law, and have a Reichsrath elected by the various Diets. But the probability is that the burden of responsibility will continue to rest on the Imperial shoulders as it does now. The Emperor is forced to be a dictator in spite of himself. The future is very uncertain. The uncertainty is seriously affecting trade; it checks and weakens Austrian international policy. This is the Emperor's Jubilee year; but he is afraid to encourage festivity lest it degenerate into riot. Yet he is the sole tie that binds the somewhat heterogeneous Empire together. His death would release the warring atoms; and the dissolution of the ancient Empire is not at all an improbable contingency. Indeed, there is a rumour that the first incentive to the Russo-French *entente* was a desire to be prepared for the partition of Austria when the time came. We do not believe the rumour; but the mere fact that it could be set afloat is significant of a great deal.

Mr. Woolf Joel.

No one could avoid being shocked at the tragic death of this young man. We are sorry for his fate and for the distress which it has brought upon his relatives and friends. Sympathy of this kind, however, is no justification for the manner in which some of the newspapers have been prostrating themselves before the shrine of Barnato Brothers, and lauding in a most fulsome manner "the business enterprise," the "great success" and "the marvellous aptitude at combinations to make money" and so on, which have distinguished the career of this firm. Surely journalists, if no longer endowed with self-respect, might at least remember that the British public, whether as investor or speculator, has nothing whatever to thank Messrs. Barnato Bros. for except the sorrowful and chastening experience of huge and irretrievable losses. From first to last the dealings of this firm with markets and the public have been of a description about which the less said the better. Where can the finger be pointed to one of their enterprises which has turned out well? Is there a single company floated by them in which British shareholders have any power of control, or to command information valuable to themselves? There is not one. But there are many whose operations, judged by their consequences, have been shaped wholly with an eye to plunder. It is necessary to protest against the indiscriminate praise which is nowadays so readily showered down upon any notorious individual, or group of individuals, merely because it is supposed that he or it is enormously rich. To the sad-eyed thousands whose vanished savings have gone to swell the millions of these Barnatos, the shocking deaths of one and another of them will seem as a judgment of Heaven on crimes human laws cannot apparently be framed to reach.

The Grosvenor Hotel.

We wonder what can have induced the board of this noted or notorious hotel to change its ground within the small space of fifteen days. At the meeting of the company after the verdict, the directors would accept nothing, and would do nothing. Now, when an application is made to the Court of Appeal to appoint receivers and managers, they are ready to submit to any order the Court might see fit to make. It would have been interesting from a legal standpoint had they resisted such an order. There is only one authority on the subject, and it is to be found in two decisions of Vice-Chancellor Malins in 1873, where, owing to internal disputes in a Company, a receiver was granted until a proper governing body could be appointed. The gravest doubts, however, have been thrown on those cases by the present Master of the Rolls, in his book on Company Law. As matters now stand, Mr. Kimber, M.P., Mr. Russell Spokes, and Sir William Fitzwigram will act for six months without remuneration as managers, and it is sincerely to be hoped that this undertaking will have a new lease of life, having thrown off the weight which was crushing the life out of it.

One of Mr. Whitaker-Wright's "Successes."

By this time every one knows about the "mines that failed" of the London and Globe group. The meetings, adjourned meetings, confirmatory meetings, and non-confirmatory meetings, of those unfortunate concerns have proved quite a golden harvest to the financial Press in an otherwise quiet time. It appears now to be the turn of the "successes" of the group to attract a little attention. The Ivanhoe is peculiarly a child after the kind of Mr. Wright's desires. Formed originally with a capital of £20,000, by the aid of the financier's air-pump the capital has been blown out to £1,000,000, very little in the way of fresh cash being added. Last October the great crowning operation took place, the £50,000 of capital then existing being converted by a registration at Somerset House into £960,000. In this swell-out the London and Globe Corporation obtained £210,000 of the capital as a perquisite for performing the feat, and the inflated capital was offered to the public at par—£5 per share.

We should imagine the response by investors was less than half-hearted, but the London and Globe Corporation nothing daunted, boldly ran the price of the new shares up to £7 each. Then, doubtless, with the desire to let outsiders in at a "cheap" price, the quotation was dropped to 6½, and remained between this and $6\frac{5}{16}$ from November to the end of February. Although five months had elapsed by this time, no dividend was declared, and the special settle-

ment in the new shares—that discoverer of things unseen—was due on March 15. Accordingly, the price of the shares began to sink, and since the commencement of the month they have fallen from $6\frac{5}{16}$ to 5. Weak "bulls" are said to be realising, but we should fancy that professional operators could not have been attracted towards this particularly fragile specimen of the financial wind-flower.

The record of crushings by the concern forms a charming commentary upon the prescience of its controllers in capitalising at the present high figure. In the following table we give these results together with the prices of the shares at the different dates :—

Monthly Periods 1897.	Tons crushed.	Ounces obtained.	Yield per ton.	Price.	Price per old share.
		oz.	oz.	£	£
August 10	1,335	2,319	1·7	12	—
Sept. 6	1,274	2,258	1·7	$12\frac{7}{8}$	—
Oct. 30	2,438	4,623	1·8	$\begin{cases} 14\frac{5}{8} \\ 17 \end{cases}$	—
Nov. 30	669	1,323	1·9	$6\frac{1}{2}$	26
Dec. 31	2,695	4,891	1·9	$6\frac{5}{16}$	$25\frac{1}{4}$
Jan. 31	1,556	2,759	1·8	$6\frac{1}{2}$	26
Feb. 28	1,722	2,851	1·7	$6\frac{3}{8}$	$25\frac{1}{2}$
Present price	—	—	—	5	20

Please pay special attention to the "price per old share" in the table. This is the equivalent of the price quoted then for the old shares in the company with a capital of £50,000 that were dealt in before October last. In that month the new shares became the sole medium of dealing, and at that time we pointed out the extravagant quotations at which they had been started. Just then, though, the crushings seemed to come very much to the assistance of the market, but since the present year opened they have been disappointing, and the inevitable special settlement has brought a collapse in the price, bringing it down to the point at which the London and Globe is the proud, and perhaps, directly or indirectly, nearly the only holder.

Swift as the decline has been of late, the present quotation is still very high, for it represents about £20 for the old £1 share. The property only consists of twenty-four acres with a twenty-stamp mill at work, and the yield of gold is diminishing, for the average for the first six months of 1897 was 2·2 oz. per ton, as against the 1·7 oz. per ton obtained in the last return. We doubt whether the mad time in the undeveloped days of the Rand ever saw such a high capitalisation on as slender a foundation, and even in the West Australian market there is nothing to set quite in a position with it. All this will be fully understood later on, but experience is often dearly bought. We can only trust that our warnings, oft repeated, have in this instance helped to keep most folk from paying the price.

Lipton's, Limited.

An eminent accountant writes to us to point out that we have understated the amount paid for goodwill, &c., by the shareholders of this new company. He says: "The £200,000 is not to be deducted from the purchase price, but is to be supplied by the public subscriptions for the capital, partly by the 5s. premium on the ordinary shares reserved for public subscription." Probably our correspondent is right in this matter, but it did not seem to us to be clearly stated in the prospectus, and therefore we gave the vendor the benefit of the doubt. Assuming that we were wrong and our correspondent right, the total amount paid for goodwill, trade marks, &c., is £1,489,821, or more than 60 per cent. of the entire price given for the business, instead of 50 per cent. as we stated. It was bad enough on our showing, and this view only emphasises the madness of the public, which has wept and prayed in thousands for "just one little allotment" in the shares.

The Northern Territories Meeting.

Quite an Arabian Nights entertainment was provided by the organisers of this concern. The Chairman, Mr. Robert Smith, J.P., who has had a sadly wide and, we fear, woefully unfortunate experience of mining companies of recent years, was comparatively prosaic in his analysis of the wonderful balance-sheet, and in his account of the work done upon the properties. When it is remembered that it represents eighteen months' labour, very little seems to have been done, and tangible results seem entirely wanting. In his explanation of the accounts, as might have been expected, he made no reference to the sale of shares to the public at £3. How many were sold at this figure we don't know, but presumably some were, and the £2 per share have apparently been pocketed by the adventurous spirits who control the company. Actually the accounts show a little over a thousand pounds in cash; add calls in arrear "since paid" £2,800, and the cash to be refunded by the Howley mine, say £9,000, we get a total of less than £13,000, a small sum, truly, to develop such wonderful properties. Mr. Bottomley, however, changed the whole character of the meeting when he spoke, and, throwing prosaic language, and something else, to the winds, launched into brilliant estimates as to the wealth of the properties. One little gem in his speech will suffice to convince those who know anything about mining either that Mr. Bottomley for vivid imagination cannot be beaten, or that he has some one at his beck and call possessed of a truly oriental cast of mind. He does not profess to make the statement upon his own knowledge, which is highly prudent on his part.

He said, "My own advices are to the effect that in one of your properties alone—I refer to the Eureka group of mines—you have upwards of £3,000,000 in value of ore in sight and ready to be crushed." Now, the Chairman had just previously stated that upon this Eureka property the shaft had been sunk 114 feet, and apparently 386 feet of driving had been carried out. Is it possible that ore to this value could have been disclosed in a mere scratching of the ground such a statement implies? But Mr. Bottomley knew his audience and was just tickling the ears of those who are as ignorant about mining as he himself appears to be. Doubtless he relies for pocket results more upon the announcement that he and his friends have created a shortage of shares upon the market than on mere prophesy of this kind. That is a good deal more in the line of an operator like Mr. Bottomley, and market men will give his hopefulness as to the future its true meaning and value.

The Ceylon and Oriental Estates Company.

It is a nice thing for a financial gentleman to come along and offer a better price to a company for the right to buy it up lock, stock, and barrel, than can be obtained by resort to the market. This is what

Mr. Ford has offered to do to the Ceylon and Oriental Estates Company, and he has agreed to forfeit £3,000 if he does not carry his bargain through before June 30. It is a small sum to pay for an option of this kind, and we are not surprised that the old chairman of the company, Mr. H. C. Smith, objected strongly to the scheme *in toto*. Surely the board which has overlooked a company's affairs for ten years or more knows its capabilities better than an outsider, who offers a high price for it upon the understanding that he is going to sell it again. It is not like one undertaking amalgamating with another, for there economies are often brought into play, but it is the case of a dealer in securities buying up the concern by staking a small sum as forfeit money in the hope of making a large profit by selling to the public at an extravagant figure. If the scheme does not go through he loses £3,000, if it succeeds he possibly gambles himself into a fortune. Meantime, this concern, which by hard labour has been brought out of the sloughs of an unfortunate past into the position of paying substantial dividends, will be once again at the mercy of the company-promoting financier. Of course he may make a substantial company of it yet, for the old concern suffered from the liability upon its shares, but he also may not.

With a Hooley, Hooley Ho!

And is it really so? The renowned Ernest Terah Hooley is going to limit himself, and merely to a million. His generosity overwhelms us, and we should have given the statement no credence had it appeared anywhere else than in the *Financial News*. But there it is in black and white—Hooley, Limited, and capitalised at a trumpery million, with his contracts, his flotations, his ten years' managing directorial life, and all. Had the figures been ten millions, now, we should have felt that the grandeur of the man had been adequately cyphered up. Is there not a mistake somewhere? Hooley, going, going at a million! Never! At this rate he will be gone in no time. His friends should really see to it that he does not thus throw himself away.

The British Insulated Wire Company.

The re-organised company of this title did very well in the eight months of its existence last year, but its claim that "the rate of profits actually realised has been in excess of the estimate inserted in the company's prospectus" is hardly supported by facts. In the prospectus the profits for the first four months of 1887 were stated at £16,890, *being at the rate of £52,692 per annum* and for the last eight months of that year they amounted to £33,281, or, at the rate of £44,374 per annum. In the matter of gross profits the anticipations of the prospectus were therefore not fulfilled, but if we turn to the item of net profits the result is somewhat better. In the prospectus it was stated that after paying debenture and preference interest, the net surplus ought to be £27,725 available for depreciation, reserve fund, and dividend on ordinary shares. Adding the £2,222 set aside for depreciation, the net profits of the eight months as returned in the report were £19,976, or at the rate of £26,632 per annum. This is below the estimate, but less so than in the case of gross profits and the improvement in this respect is due to the fact that the prospectus allowed for full interest on the preference capital or £6,000 per annum, whereas only £1,740 was paid, or at the rate of £2,320 per annum.

Pushful Japan.

Japan has just made a new advance in civilisation. It has issued a guide-book all about itself. But the book is a novelty in its way. It is an official publication. Perhaps there are no independent publishers in Japan. It is written in English, and the language is sometimes quaint, often peculiar, but generally wonderfully accurate. This little volume is uncompromisingly commercial. It is described as being "mainly for the use of foreign visitors to Japan." So we must suppose that the principal visitors to Japan are commercial men. Here we have nothing—or almost nothing—but statistics of imports and exports. There is a little about the geography of this wonderful Empire; nothing about its history. That is a pity. We should have liked to have been officially informed that it possesses a written history extending over 2,000 years; that its sovereigns have formed an unbroken dynasty since 660 B.C.; and that the present Emperor is the 121st of his race.

But of all this we hear nothing. We get but a "general view of commerce and industry in the Empire of Japan." The most ancient date we have observed in the volume is 1858. Since then 2,117 miles of railways have been constructed—580 miles by the Government, and 1,537 by private companies; 1,572 miles are now in course of construction. Japan has risen from an insignificant Eastern Power, with no commerce to speak of, to be the leading Power of the Far East, and the only one whose commerce is worth special mention. She is going ahead in manufactures, and in some respects has advanced so far as to be an adept in the manufacture of shoddy goods—one of those signs of nineteenth century civilisation which we may hope Japan may soon see the folly of. There is no need to go into detail as to the figures packed in this little volume. They, of course, leave us in no doubt as to the immense progress made by Japan; and they make it plain, also, how great is the business Great Britain—not to mention our colonies—is doing with Japan. We take a large quantity of her manufactured cotton goods—so does America — a notable quantity of her lacquered wares, bronze wares, ingot and slab copper. America and Canada, however, seem to take the chief portion of her tea—largely green tea. Of the goods which Great Britain sends to Japan, we may note cotton yarn, grey shirtings, white shirtings, T cloth, Turkey reds, cotton velvets, and cotton satins. In neither of these does any other country come near us—not even Germany. The latter does take the lead, however, in woollen yarns and flannels, while Britain again comes to the front in blankets. It is also worth noting that Britain takes an unmistakable lead in iron goods, especially in iron pipes and tubes, and in steel; while in various sorts of machinery, railway carriages, and steam boilers and engines, neither the United States nor Germany come anywhere near Great Britain. This seems rather surprising, for we should have expected America to have been well up to us in these articles.

Another official publication gives us a somewhat closer glimpse of industrial Japan. It is the report of an investigation conducted at the instance of the Department of Agriculture and Commerce into the working of industrial companies throughout the country. There are only 172 of these; the company promotar

does not therefore seem to have been much abroad on the islands. Taking the companies altogether, their total paid-up capital and loans amounted to 34,424,364 yen, and the profit realised upon that was 2,272,647 yen, or an average rate of 6·6 per annum. Not a bad average; but then it seems that out of the 172 there were sixty-one that not only earned no profit, but lost to the tune of 251,803 yen on a working capital of 5,720,075 yen. What the real cause of the losses may have been no indication is given, but the amount of capital possessed to start with is not to be called overpowering, and probably over-sanguine or reckless trading did the rest. But eighty-nine of the companies earned an average dividend of 13·5 per cent., with an aggregate capital of 28,698,287 yen. Japan may not yet have many millionaires, but apparently she is not without a fair proportion of shrewd and sound business men.

SOUTH AFRICAN MINING NOTES.

THE FALL IN DEEP LEVELS.

Since the series of articles on the Rand deep levels appeared in these columns a depreciation has taken place in deep level shares of fully 20 or 30 per cent., and, although a reaction has been witnessed from the lowest points touched, the public still wisely refrain from coming into the market to any great extent. Deep levels, whatever may be the immediate course of prices, have not yet fallen to their true speculative value. It is interesting to notice that no sooner is the attempt to maintain an artificial level of prices partly abandoned than down come tumbling both the outputs and profits of the mines. This only confirms our previously expressed view that the mines are manipulated to meet the necessities of the market. The set-back in values occurred first; the fall in outputs and profits followed afterwards. The result of all this is that the simpletons, who a few months ago indulged in fantastic predictions as to the dividend-paying capabilites of deep levels, based on the earnings then being announced, have now to entirely revise their calculations.

How large the set-back in the profits has been may be seen by comparing the December and February figures of some of the Companies. The Crown Deep in December, with 160 stamps, earned £21,000; in February, with 180 stamps, only £9,000. The Crown Reef (the outcrop mine), with 120 stamps, working under the same conditions, earned £17,000 during the same month. So if it were not for the limited length of its life, the comparison would be all in favour of the outcrop. In December, the Rose Deep profit was £16,939; in February, £13,000. The Nourse Deep declared a profit of £7,710 in January; last month it only earned £5,600. Other examples might be multiplied, but it is unnecessary.

THE RAND MINES MEETING.

The fact that the annual meeting of the Rand Mines, Limited—the great parent trust of the deep levels—is to be held in Johannesburg on the 24th inst. has installed hope into the sinking heart of many a weary Kaffir "bull." It is rumoured, with a certain amount of authority, that the shareholders are to be consulted as to the advisability of splitting the shares, this, of course, with the object of bringing them more within the reach of the small speculator. Consider for a moment what this signifies. Mr. Beit, in his evidence before the South African Committee, stated that his firm held two-thirds of the entire capital of the Rand Mines Corporation. As vendors, they, with others, also possess the right to 25 per cent. of the profits after the shareholders have received dividends totalling 100 per cent. No doubt what will happen is that dividends of 100 per cent. will be first paid to enable the vendors to rank for their portion of the profits. Their lien will then be capitalised in some form or another, and the shares afterwards "split." Why should the shares be so sub-divided unless it is that Messrs. Wernher, Beit & Co. wish to create a freer market to enable them the more easily to unload their holdings on the public? The intention is perfectly obvious. When Rand mines are split, then it is that the market proppers and privileged holders will wish to sell their shares.

DIVIDENDS BY TRUST COMPANIES.

And this leads to another interesting question in connection with deep level trust companies. Concerns of this class have no goodwill, their profits are not made by trading or manufacturing, and the only possible manner in which they can earn dividends is by the disposal of their assets. Even profits accruing from dividends paid by their subsidiary mines are in reality obtained by the exhaustion of assets, for the mines will one day be worked out and valueless. If these South African trust companies confined themselves to distributing profits received from the legitimate working of their mines there would be nothing to object to; but they do not. The invariable practice is to declare large dividends, resulting from the actual sale of shares and ground, the proceeds of which, in reality, should be regarded partly as a return of capital. With this course pursued, a trust company has a "life" limited in length in much the same manner as an ordinary mine. This point is nearly always overlooked. Speculators who pay £27 or £28 for Rand mines should remember that the only way in which the company can at present distribute large sums to its shareholders is by parting with assets which it has to depend upon for future profits. The question is, in how many years can the directors sell sufficient of their shares and mining properties at the required profit to return £28 to each shareholder, and what assets will the company possess at the end of that period?

A CASE OF OVER-CAPITALISATION.

The Simmer and Jack Proprietary Company is a typical example of the gross over-capitalisation of some of the Rand mines. Its issued capital is £4,700,000, besides which there are £200,000 or £300,000 unredeemed debentures in existence. Floated originally with a capital of £85,000, for some years it continued to pay annual dividends of 40 per cent. The Goldfields of South Africa, Limited, then took the company in hand, and by selling it additional mining ground gradually increased the capital up to its present figure. A very elaborate programme of work was then drawn up, including the erection of a 280-stamp mill; but while the capital has increased, the yield of gold has as steadily decreased. The recovery of gold for every ton crushed in 1890 was £3 1s. 4d., falling by stages until, in 1895, it was £1 18s. 6d. Portions of the new mill have now been crushing for some four months, during which the yield has only averaged £1 4s. 6d. per ton. The costs are declared to be very low—about 18s. 6d. per ton—but as other mines, fully as well equipped and probably better managed, cannot work under 25s. or 26s., this figure cannot be relied upon. What is certain, therefore, is, that if any profit is being made, it is exceedingly small; while it is noteworthy that the company has abandoned the usual custom of announcing monthly the result of its operations. There is very little chance that the company can earn any but the smallest dividends on its huge capital, while there are those who do not hesitate to predict its complete ultimate collapse. Over £1,000,000 sterling has been spent in the development of the ground, and the shares in its sub-flotations have had to be sold to pay off a portion of a large debt contracted. As the Gold Fields has a very large stake in this mine, its prospects are in no way improved by this state of affairs.

Critical Index to New Investments.

CHINESE IMPERIAL GOVERNMENT FOUR-AND-A-HALF PER CENT. GOLD LOAN OF 1898.

This loan, amounting to £16,000,000, will be offered to the public on Monday at 90 per cent., a price which gives just 5 per cent. to the buyer, by the Hong-Kong and Shanghai Banking Corporation here, and by the Deutsch-Asiatische Bank, Berlin. The last instalment of the price will be payable on the 3rd of May next. It will be a forty-five years' loan, redeemable at 100 by annual drawings through an accumulative sinking fund, and it is secured on the balance of the Imperial Maritime Customs left over from the service of previous loans, and as a first charge free from all encumbrances on the general and salt Likin of certain ports and districts in the Yangtse Valley, and adjoining province of Chekiang, viz., the ports of Soochow and Kiu Kiang, and the districts of Sunghu & Eastern Chekiang, Hupeh and Anhui, the last two for salt tax. All these duties are placed in the control of the Inspector General of the Chinese Imperial Maritime Customs. As the available balance of these customs is about three million Haikwan taels, and as these Likin revenues are valued at five million taels, making eight millions in all, or at 2s. 9d. per tael, £1,100,000 there appears to be ample security for a loan, whose service requires only £835,232, and we think the investment a good one. Yet so fickle is the temper of the City at present, that we should not be in the least surprised were the underwriters to have a considerable portion of it left on their hands.

UNITED BREWERIES OF WESTERN AUSTRALIA, LIMITED.

Two breweries are to be bought, the Stanley and Perth and the Port Brewery of Freemantle, whose united profits for two years are said to have averaged £10,435 per annum. A valuer in Perth, says his estimate of value of the Stanley Brewery is £60,200, which bald statement will, no doubt, bring in a lot of investors, and the same man cabled his valuation of the Port Brewery as £22,300; but apparently a barrel or two more has been found, and therefore subsequent advices increase the total to about £24,200. The capital is £150,000 in £1 shares, of which 75,000 are ordinary, and 75,000 6 per cent. cumulative preference, while the purchase price is £105,000 including £76,667 in cash. The promoters, who sell at a profit, are Westralia Industries, Limited, and it strikes us the undertaking has not been brought forward entirely to benefit the London Market. Still, Western Australia one way and another has got so much out of investors on this side that there is nothing like having one more try.

JOHN SUMMERS & CO., LIMITED.

Company is formed to buy business of ironmasters, iron and steel manufacturers, &c., established in 1850, and carried on at the Stalybridge and latterly at Connah's Quay. Reason for sale is to facilitate dealing with partners' interests and to provide more working capital for extension of works. Share capital £200,000 in 10,000 £10 ordinary and 10,000 £10 cumulative five per cent. preference shares. All ordinary and half preference go to vendors in satisfaction of purchase money; remaining preference shares held in reserve. Manchester, Liverpool, and District Bank invite applications for an issue of £100,000 four and a quarter first mortgage debenture stock at par; it can be redeemed at 105 after 1912 on six months' notice. Interest due January and July. Assets forming security amount to £261,419, including freehold land, works, and plant valued at £182,750; stock £46,205, and the remainder book debts and cash, guaranteed. Accountants certify that average yearly profits for last three years have been sufficient to pay debenture interest four times over. According to this the debentures should be a fair investment.

YEATMAN & CO., LIMITED.

For the purpose of buying the business of the private firm of Yeatman & Co., manufacturers of yeast powder, soups, jam and other delicacies, the company is formed with a capital of £200,000, half in ordinary £1 shares, and half in five and a-half per cent. cumulative preference £5 shares. Subscriptions invited for 13,334 preference, and 66,667 ordinary shares. Freehold properties valued at £41,035; plant, &c., at £8,287; stock, cash, bills receivable and debts estimated at £23,379; making a total of £72,601. Purchase price £155,000, so the value of the goodwill is about £80,000. Profits for last three years are given at £13,430; £13,614 and £13,601, which certainly shows lack of growth, but this may be supplied by the recent opening of a marmalade department, from which much seems to be expected.

STANLEY GIBBONS, LIMITED.

Capital £75,000 in £1 shares, and £45,000 in 5 per cent. first debentures of £50 each. Subscriptions at par invited for 50,000 shares and 640 debentures, remainder of shares and debentures with £64,000 in cash, taken by vendors. Debentures redeemable by annual drawings commencing June, 1901, at 5 per cent. premium business, foreign stamp dealers and publishers, established in 1856. A good deal is printed about increase in cash receipts, but all we are told about profits is that for three years ended June 30 last they averaged £11,399 per annum. Lease, fittings, stock-in-trade are valued at £90,638. A peculiar business for investment, capitalised at a high figure.

JOHN, SON & WATT'S, LIMITED.

Formed with a share capital of £85,000 in £1 shares, the public are asked to subscribe for 29,500 6 per cent. cumulative preference shares. There have been issued £35,000 in 5 per cent. debentures of £50 each, and these are redeemable after March 1905, at £52 10s. each. The company buys a fancy box, chromo-lithographic, letterpress printers, &c., business, established in 1842, for a purchase price of £100,000. The shares do not seem inviting, as there is little to judge the concern by. No valuation is supplied as to the properties; the amount of the trade liabilities to be taken over by the company is not stated, and the accountant's certificate regarding profits is confined to an average annual for last three years of £9,713. More light is needed.

CROWBOROUGH DISTRICT WATER CO.

The little Sussex town of Crowborough needs £30,000 to finish construction of high and low service reservoirs and pumping station, and to lay mains. It therefore offers through Barclay & Co. 2,364 ordinary shares of £10 each, 636 having been privately subscribed, and the issue price is par. No particulars are supplied as to the population of Crowborough, or of its capabilities to pay for a water supply, and therefore the shares appear a suitable investment for Crowborough alone.

GRAND THEATRE (CROYDON), LIMITED.

Capital, £50,000 in £1 shares, half ordinary and half 6 per cent. cumulative preference. Board consists of directors of Grand Theatre, Islington, and the latter has acquired from George Edwardes a ninety-nine years' lease of the Croydon house which has recently been rebuilt on a somewhat sumptuous scale. Gross profits for the year of the latter are approximately £9,605, and the net profit £5,020, but this we take it will be considerably lowered by directors' fees, ground rent, and depreciation. The property to be acquired is valued at £35,350, and the purchase price is £35,000, so that in taking it all in cash the lessors display prudence.

Company Reports and Balance-Sheets.

*** *The Editor will be much obliged to the Secretaries of Joint Stock Companies if they would kindly forward copies of Reports and Balance-Sheets direct to the Office of* The Investors' Review, *Norfolk House, Norfolk-street, W.C., so as to insure prompt notice in these columns.*

The Commercial Cable Company.—The Report of the Directors of this company for the past year discloses a highly flourishing position. After reserving $11,750 to meet depreciation of spare cable, the net revenue was $1,200,155, an increase of $76,502 on the previous year. This was from the cables alone, and the company's land lines gave in addition a revenue of $645,185, after setting aside $60,000 to meet depreciation. Altogether, therefore, the Company had $1,845,341 to divide, out of which it paid the interest on its bonds and debenture stock, and dividends and a bonus aggregating 8 per cent. on the capital stock of $10,000,000. These two payments absorbed $1,440,000, leaving $405,431 to be carried forward. The balance to the credit of revenue at the end of 1896, after adding $250,000 invested in United States Government bonds to the reserve fund, amounted to $596,678, and the directors have set aside a further $250,000 out of the balance of $1,002,089, which last year's balance added to that of 1896 gives, to still further strengthen the reserve fund, which now stands at $2,608,329. Also the directors set aside $275,000 as a reserve "for the insurance of stations, apparatus, and repairing steamer," and for any special expenditure necessary to the maintenance of the company's property. After providing all this, $477,019 is still left to be carried forward. The fixed charges of the company absorbed only 34½ of the total of the net revenue of the combined cable and land-systems. During the year 3,966 miles of additional wire have been put up on the company's land lines system. The balance-sheet shows current liabilities of $524,084, and current assets amounting to $1,158,469. Altogether the exhibit is one of remarkable strength and prosperity. No wonder the Canadians desire their "all Imperial" Pacific cable project to be tacked on to such a corporation.

Bury, Rochdale, and Oldham Tramway Company.—This is a mechanically-worked tramway, and in the half-year ended January 31 last, the company, with receipts amounting to £21,709, earned a net profit of £2,984. Out of this £500 was placed to reserve against depreciation, the debenture bonds received interest at the rate of £2s 8d. 4d. per annum, and the shares a dividend at the rate of 6 per cent. per annum. The debenture bonds, strangely enough, receive only a fixed rate of interest of 2 per cent., but receive half the surplus profits after 5 per cent. has been paid upon the shares.

Law Land Company, Limited.—By acquisition of neighbouring properties this concern is growing into one of importance. The gross rental last year amounted to £27,599, or an increase of £3,269 over that of the preceding year. After meeting charges the net revenue came to £7,482, as compared with £4,708 in 1896. More share capital had been raised in the time so that, in order to pay the 6 per cent. upon the ordinary shares, the addition to reserve was only £2,000, as against £3,500 a year ago. Leasehold redemption, however, received £758 instead of £500, and £812 was devoted towards writing off expenses of issuing capital. The record is therefore good, and the reserve fund now amounts to £12,000, and the leaseholds redemption fund to £4,872. It would be a sound policy to invest these funds outside the business. Temporary loans have certainly been granted to the extent of £27,000, but if these are to the leaseholders and tenants, it is little different to having the money in the business.

General and Commercial Investment Trust.—The revenue of this trust improved to the extent of £1,281 in the year, and amounted to £39,169. After meeting debenture interest and charges, a net balance of £21,689 was left, which permitted of the payment of the preferred interest and a dividend of 2½ per cent. on the deferred stock, or ½ per cent. more than in the preceding year. Nothing was added to reserve from revenue, but the trustees, as in previous years, handed over £2,500 from their remuneration to this fund, which had to bear £1,302 from loss on securities realised, and its total now amounts to £32,154. The liability upon securities held has been reduced by £2,600 in the year to £44,455, and, apart from a moderate sum upon 500 Bank of New Zealand shares, this

item does not seem a matter of importance. A study of the investments brings out the fact that the trust is peculiarly free from thoroughly hopeless lock-ups, although, of course, the price paid for some of the securities must have been high. Many investments have appreciated considerably, and, so far as we can gather, the sums obtained from realisations have been carefully and judiciously employed.

British Insulated Wire Company.—The company is evidently doing a large business, but there appears to be a great desire to pay high dividends. For the eight months ended December 31 the profits were £33,304, and after meeting administrative charges, setting aside £2,222 for depreciation, and writing £1,770 off preliminary expenses, there is a net balance of £19,494. Of this £1,740 is taken for preference interest, and a dividend at the rate of 15 per cent. per annum is declared upon the ordinary shares, leaving £1,629, of which £1,500 is written off patents and goodwill, and £129 carried forward. The patents and goodwill account stand in the balance-sheet for £117,119, out of total assets amounting to £322,652, and, with such a large percentage assigned to this doubtful form of asset, we should have preferred to see a start made with a reserve fund before such a high dividend was paid.

North British Railway Company.—Gross receipts for half-year to January 31 last, £1,924,485; expenses, £935,594; increase in receipts, £66,659; ditto in expenses, £41,894. Little of the gross gain thus remained, the small net increase being £25,000 in fact, and it was nearly all absorbed in additional preference dividend charges. These amount to £491,433 in the past half-year as against £471,476 in the corresponding half-year, or £20,000 more. Consequently the company is able to pay no additional dividend on its ordinary stocks. The "ordinary preference" receives its 3 per cent. per annum, and the other ordinary, known as "North British Deferred," gets 1¼ per cent. per annum, or 12s. 6d. per cent. for the six months. Not a fat return this by any means, but then the company is much overborne by its disproportionate preference capital, and by its continuously heavy capital outlay. Last half-year it spent £324,407 on capital account, and the estimated expenditure in the current six months is £540,800. The Waverley works at Edinburgh are proving very costly, but may ultimately repay the company.

London Guarantee and Accident Company, Limited.—Premium income for the year 1897 £201,763, claims due and accrued £98,657. Expenses, commission and income tax £85,400, or altogether £184,000. The company received £11,093 in interest on its invested funds amounting to £323,398. After placing £3,000 to reserve, raising it to £100,000, and paying the preference share dividend, a dividend of 6s. per share is declared on the ordinary capital, making, with the interim dividend of 2s. per share, 8s. or 20 per cent. for the whole year. What this leaves the directors do not state, and there is no use guessing.

Accident Insurance Company, Limited.—Total income for 1897, including £3,275 from interest, &c., £65,077. Claims took £29,489 and bonuses to policy-holders £3,792. Out of the balance of £37,935 left after paying everything, this balance being about £3,500 larger than that brought in, a "bonus" of 5 per cent. is declared on the paid-up capital, making with the dividend 10 per cent. for the year. This would, we calculate, leave about £33,000 to go forward as reserve. Why are the reports and accounts of these accident companies so imperfect?

The Scottish Life Assurance Company, Limited, issued 578 new policies last year, insuring £251,275 and yielding £15,571 in new premiums. The total premium income of the year was £66,815, or deducting re-insurances, £61,314, of which £6,538 represented single premiums. The company also received £15,031 for annuities sold. Claims took £11,721, and expenses and commissions £10,791, or 17·6 per cent. of the premium income. The total life funds of the company at the year's end amounted to £400,784, an increase of £60,900 within the year. The company has an accident branch, the funds of which amounted to £16,796 at the year's end, or about £1,800 more than at the beginning. The expenses of this branch came to nearly 48 per cent. of the premium income. A sum of £1,900 was absorbed out of the income of this branch, of which £2,717 came from interest and dividends, in paying a part of the pividend to the shareholders, which was at the rate of 6½ per cent. der annum.

Agra Bank.—A good improvement is shown in the annual report, the net profit for 1897, including £2,326 brought forward, being £26,260, as compared with £20,326 in 1896, when £138 was brought in. The dividend is consequently put up from 3 to 3½ per cent. for the year, and the considerably increased balance of £5,260 is carried forward. The bank's capital of £600,000 is now held entirely in sterling, which is a great improvement on the half gold and half silver of former days, but the reserve of £20,000 might with advantage be increased at an early date. Deposits are rather less, but still exceed a million sterling, current accounts being up £43,000, while fixed deposits are £66,000 less, which to some extent explains the increased profits, the reduction in interest being £6,000. The division of bills payable and loans payable gives the balance-sheet a better appearance, and owing to the change adopted regarding the accounts, both bills and loans payable, and bills receivable show a reduction of something like a million sterling each, while investments have risen from £93,316 to £272,178, against which has to be set a reduction of £82,000 in cash in hand. Deposits now stand at £1,013,837, while cash and investments figure for £394,000, or nearly 39 per cent.

Spratt's Patent, Limited.—The past year's working has not turned out so well as the previous year, and that was bad compared with 1895. In the latter year the profit was £25,462, and in 1896 £20,529, but it has now further declined to £18,714. The usual £2,000 is written off trade debtors, and £3,000 is this time written off premises, goodwill, &c., as compared with £2,000 in previous years, so that after paying the customary dividend of 12½ per cent., only £4,333 is carried forward, or £3,000 less than a year ago. Last year's tale is reprinted of continuous increase of sales, more than offset by increased cost of materials and freights, while the advance in the price of flour is said to more than account for the variation in the trade profit, although many expenses were economised. The reserves used in the business stand as before, but premises, plant &c., owing to annual additions, have further increased to £230,268. Unless a change comes soon, a reduction in dividend seems to be drawing near.

China Mutual Steam Navigation Company.—The company did better last year, but it is a long way off being a typical success. Profits realised came to £66,314, or £7,650 more than in the preceding year, and after deducting expenses and interest, there remains a balance of £53,368 against £44,552. The directors add £37,000 to the depreciation, boiler, and reserve fund, which is thus raised to £123,769, while the fleet stands in the balance-sheet for as much as £646,159, or £522,390 net, which represents rather more than £11 per ton. The ordinary shareholders have £5,020 divided amongst them by way of a dividend of 6 per cent. For 1892, which was a time of trouble for the company, only the preference dividend was paid, but for 1893-4 the ordinary shares received 5 per cent., and since then the dividend has been 6 per cent. Possibly the developments now going on in the Far East may prove beneficial to the undertaking.

Limmer Asphalte Paving Company.—This successful undertaking, with its modest capital of £22,500, continues to make good progress. Last year the gross profits on works executed and asphalte sold came to £11,360, compared with £9,225 in 1896. Expenses were not more than £3,719, and after adding £1,250 to reserve, writing £400 off for depreciation and £1,250 off preliminary expenses, being the balance of mines account, there remains £5,039, out of which shareholders get a dividend of 10 per cent., with a bonus of 1s. per share, or 15 per cent. for the year. At the corresponding period no bonus was paid, but for the three previous years the return was 15 per cent. The reserve for maintenance of contracts and for equalisation of dividends stands at £3,500, and there are sundry creditors and bills payable amounting to £4,139. Sundry debtors figure for the comparatively large sum of £16,084, but stock, plant and machinery, and the mines and factory in France represent together only £13,835, and the freehold premises have been written down to £400. This shows what can be done by a well-managed company with only a light capital.

The Mountain Copper Company was brought out over here in 1896 with a capital of £1,250,000 in £5 shares, the purchase price being £416,630 in shares and £733,370 in cash. The properties are situated at Iron Mountain, State of California, and when acquired were said to be largely opened up. The first report shows that £39,043 has been spent during the year on the mines, buildings, and plant in California, and £2,465 in New Jersey. The net profits for the first year come to £63,144, which just allows of 5 per cent. being paid on the share capital. Nothing is allowed for depreciation, which is to be dealt with in future years. With the present high price of copper, this is not a very brilliant result, and there will have to be a good improvement in the future to justify the purchase price.

The Produce Markets.

GRAIN.

Until Wednesday, the tone of the wheat market may be described as quiet, but firm, with indifferent business doing, but on that day buyers were few at Mark-lane, and these few were utterly indifferent. The consequence was that English wheat declined 3d., while foreign was neglected, and a decline of 6d. failed to attract buyers. Spot parcels at Liverpool were also slow, with ½d. per cental decline. Futures were also quiet, with indifferent business, and a decline in Red American of ½d. to ¾d. per cental. In the Cargo Market there has been scarcely any movement, and on Wednesday the market was dull and featureless, There was, however, no quotable change in price. Late on Tuesday, 14,000 qr. Walla-Wall, March, changed hands at 34s. For the Salvatore Ciampa, 11,455 qr. Californian, arrived, 38s. 9d. is wanted; for the Sierra Estrella, 9,655 qr., 38s. 3d. is asked on sample, and for the Anaurius, 10,876 qr., 38s. 6d. Californian, December, is obtainable at about 37s. 9d., and early March at 35s. 6d. Walla-Walla, January, can be had at 36s. 3d., February at 35s. 9d., and prompt at 34s. 3d. Parcels inactive. No. 2 Calcutta, April-May, sold at 34s. for Hamburg. The surplus for shipment in the four months ending with June, is believed to be about 30,000,000 bushels, and, though the Indian wheat harvest promises well, any great decline in prices need hardly be expected. Wheat options, 2d. down to ½d. up. Maize ½d. down for early months.

Official Closing Values (100 lb. deliveries—March 16).

	March.	May.	July.	Sept.	Dec.
Red American Wheat	7'9½	7'4½	7'0¼	6'6½	6'4½

New York reports have, on the whole, shown improvement. There has been a better political feeling, and greater confidence in the maintenance of peace. On Wednesday "bearish" influences were at work, and after sharp fluctuations, a decline set in, and there was no further rally. The export demand was fair.

COTTON.

In their last circular, Messrs. Neill Bros. say :—"The phenomenal deliveries of the past two months are doubtless the outcome of the rich yield on the lands fertilised by the floods of last spring; but they may also point to a more extensive planting than was generally supposed, upon land bordering the flooded region, at the period when it was feared that the waters would not run off in time to plant cotton. Notwithstanding its previous enormous takings, the Continent of Europe has continued to absorb the lion's share of the exports, having taken for the five weeks 496,000 bales, against 301,000 last year and 299,000 in 1895. Liverpool, though still behind, has somewhat improved her comparison with the ten million year, having taken 387,000 bales against 308,000 in 1895. American spinners continue to add to their already large stock." The Liverpool spot market rather dull to begin with, but became more active towards the close of the week. Futures on Wednesday were ½ to 1 point higher. Manchester sales on a small scale, New York fluctuating, but spot was rather dull, and with little change. Futures on Wednesday quiet at opening, and declined a point, but rallied later, and closed 1 point dearer on the day.

New York Closing Values.

	Spot.	Mar.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.	Jan.
Mar. 16 ..	6¼	5·95	5 95	6·00	6·01	6·04	6·06	6·03	6·03	6·03	6·05	6·08

WOOL.

Messrs. Jacomb, Son, & Co., state that the second series of wool sales began on the 15th with a total available quantity of 218,000 bales against 357,000 at this time last year. Competition was extremely animated from a large concourse of buyers. Of Australasian merino wools scoured descriptions may be quoted, on the average, 5 to 7½ per cent., and greasy 5 per cent. dearer than at the close of last sales. Fine cross-breds, with keen demand from the Home districts, ruled firm, but coarser sorts were occasionally easier. Competition was not very animated at the Liverpool sales, which commenced on the 14th. Prices showed a slight decline. As to subsequent London sales, Messrs. H. Schwartze & Co. write :—"The sale passed off with animated competition, opening rates being fully maintained, and for scoured merino often exceeded"; and Messrs. Du Croz, Doxat and Co. say :—"The sale passed off with keen competition, all marines showing a hardening tendency. Cross-breds show no improvement."

METALS AND COAL.

Copper has been active throughout the week, with a considerable advance in price. The opening on Wednesday was firm, and 2s. 6d. higher, with cash at £50 10s., June 3, £50 15s.; and three months £50 16s. 3d., which advanced to £50 11s. 3d., £50 16s. 3d., and £50 17s. 6d. respectively by the close of the first 'Change. Other dates operated in were April 7 and 12 at £50 12s. 6d., and the 30th at £50 13s. 9d., some 1,100 tons changing hands. Although 200 tons covered the afternoon's business, the tone continued strong, and was helped by the publication of the mid-monthly statistics, which revealed a reduction in the visible supply of no less than 1,259 tons on the fortnight. End of March sold at £50 13s. 9d., and April 25 and 20 at 1s. 3d. more.

Settlement Prices.

	Mar. 16.	Mar. 9.	Mar. 2.	Feb. 23.	Feb. 16.	Feb. 9.

Copper ..	50 12 6	50 7 6	50 7 6	49 17 6	49 10 0	40 5 0

The Glasgow pig-iron market inactive for the most part, but improved on Wednesday, when operations amounted to 50,000 tons. The tone was very firm until near the close, but Scotch closed under the best, selling being considered as better than buying, but on the day the price made 1d. Cleveland was supported by one of the big houses and rose 3d. Cumberland hematite gained 2d.

Settlement Prices.

	Mar. 16	Mar. 9.	Mar. 2.	Feb. 23.	Feb. 16.	Feb. 9.
	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.
Scotch ..	48 4½	46 1½	46 6	46 3	45 7½	45 7½
Cleveland ..	40 9	40 4½	40 10½	40 10½	40 7½	40 4½
Hematite ..	48 6	49 1½	49 6	49 1½	48 9	48 7½

Warmer weather has checked business on the London Coal Exchange. In the seaborne department, however, advantage was apparently taken of the material reduction in merchants' stocks which has recently taken place, and with a good demand two or three cargoes have changed hands at fully late rates, some of the coal being sold ahead. The official quotations remain at 16s. and 15s. for Hetton Wallsend and Lyons respectively. Since Monday twenty coal-laden vessels have arrived in the Thames. The inland trade is not quotably worse, but the market, owing to the scarcity of orders, is in a less satisfactory position and quieter all round. Steams are decidedly dull, with inland descriptions weak. North country coals are steady, owing to the diversion of tonnage in that direction; but so far as Welsh descriptions are concerned the situation is unchanged.

SUGAR.

Cane sugars have been tolerably steady, even firm, though they got rather easier towards end of week. Beet futures dull. No quotable change in prices. Imports of sugar into United Kingdom, all ports, week ended March 12, raw and refined, 29,458 tons, against 25,510 tons for the corresponding week last year; total since January 1, 266,826 tons, against 216,190 tons last year.

TEA AND COFFEE.

Coffee has been irregular throughout with a tendency to lower prices. At the auctions, good qualities brought steady prices, but no increase. Ceylon—good bold to fine extra bold coloury, 108s. to 118s.; good middling, 106s.; small, 77s.; peaberry, 116s. East India—bold common greenish foxy to fine bold blue, 67s. to 107s.; low to good middling, 64s. to 90s. 6d.; smalls, 43s. to 69s. 6d.; peaberry, 73s. 6d. to 111s.

Tea dull, and the tone at the auctions was very depressed. Still a good deal was sold without reduction in price. Wednesday's auctions comprised 3,000 packages Indian, and autumnal flavoured were eagerly competed for at very full rates. 1,400 Java were also disposed of, previous rates being about maintained.

THE PROPERTY MARKET.

Last week's business at the Auction Mart ran up to the remarkable total of £165,364—the total for the same week in 1897 having been £96,654. Among lots unnoticed in last week's Review was one of Messrs. Farebrother, Ellis & Co., a freehold building estate of four acres in London-road, Croydon, which sold for £6,000, or £1,500 an acre, a figure which local men acquainted with the ground seemed to consider highly satisfactory. Three freehold shops in High-road, Kilburn, the combined rental being £170 a year, were sold by the same firm at £6,150, a figure which must be regarded as fairly satisfactory. Messrs. Stimson & Sons disposed of houses Nos. 13 to 27 (odd), Aldridge-road villas, Westbourne Park, leasehold for a term of 58½ years, at £80 ground rent, and having an annual rental value of £480, at £4,190. On Friday Messrs. Moss & Jameson obtained £18,000 for a freehold building estate at Bexhill-on-Sea, containing an area of about 15¾ acres. Four freehold houses, Nos. 150 to 156 (even), Weston-street, Bermondsey, producing a yearly rental of £150 16s., put up by the same firm, made £1,850, Messrs. E. and S. Smith disposed of two villa residences called Park View and Shirley, in Muswell-road, Muswell-hill, rental £83 per annum, for £1,335.

Monday was rather an "off" day at the Mart, and the total sales amounted to only £18,950. Much of the property offered was building land, two plots in Ilford-lane, Ilford, containing nearly 21 acres, offered by Mr. J. W. Kemsley, realising £9,300, rather over £440 per acre. Another notable sale was a freehold ground-rent of £65 per annum, secured on 166, High Holborn, with reversion in 83 years, which, offered by Mr. T. Woods, fetched £2,000.

Tuesday's sales at the Mart realised the fine total of £65,838, of which £25,000 fell to the lot of Messrs. Debenham, Tewson, & Co., for the freehold business premises, Nos. 27, 29, and 29½, Gracechurch-street. The same firm disposed of the freehold of No. 62, St. James's-street, for £8,100. It was a day of freeholds. Messrs. Chinnock, Galsworthy, & Co. put together an aggregate of £16,360, freehold ground rents at Shepherd's Bush being responsible for a large proportion of that sum. Messrs. Bignolds & Eason sold the freehold premises at 8, Old Compton-street, Soho, for £2,000. Is there a slump in licensed properties? Several of these were put up at Masons' Hall Tavern on Tuesday, but not one of them changed hands.

Some sales by private treaty effected by Messrs. Grant, Whieldon & Co. are worth noting. No. 39, Kensington-square, freehold residence, with possession, area 6,825 square feet, £5,000; Nos. 21 and 23, Ball-street, Kensington, freehold, with possession, £3,000; No. 54, Clifton-hill, St. John's-wood, lease 38 years at £8 10s., with possession, £800; and a parcel of freehold ground-rents amounting to £60 per annum, five times secured on houses let on agreements, reversion in seventy-four years, £1,920 (thirty-two years' purchase).

Wednesday showed a total of sales at the Mart of £17,975, of which amount Mr. Alfred Richards was responsible for £13,045, derived from £10 shares in the Lea Bridge District Gas Company, which realised £19 15s. to £20 5s. each. The other lots consisted of leasehold properties in London, for which there was some keen competition.

In last week's Investors' Review the name of Mr. F. H. B. Riddle was, by mistake, printed as Biddle.

The somewhat famous historical seat of "Rawdon," Hoddesdon, Herts., has just been sold by Messrs. Millar, Son & Co. It is built in the Elizabethan style, of date 1622. The previous owner expended £50,000 in restoring it. The interior is decorated with the armorial bearings of former owners, and there is some fine statuary as well as excellently carved oak panelling. The price at which the property changed hands is not stated.

Several lots of freehold ground rents at Birmingham Heath were sold by Messrs. Frank Smith & Wilson at the high average of 33¼ years' purchase. A fully licensed house in Bradford, put up for auction last week, was withdrawn at £12,000. A freehold farm of twenty acres at Hebden Bridge, Yorkshire, was recently disposed of for £1,375.

TRAMWAY AND OMNIBUS RECEIPTS.

For past week :—Belfast, + £36; Calais, + £3; Croydon, + £10; Glasgow, — £61; Lea Bridge, + £72; London & Deptford, + £14; London Southern, + £50; London General Omnibus, — £50; London Road Car, — £130; Metropolitan, — £36; North Staffordshire, + £10; South London, — £46; Woolwich & S. E. London, — £7; Provincial, — £222; Southampton, — £58; Wolverhampton, — £1.

Dividends Announced.

MISCELLANEOUS.

Broken Hill Water Supply, Limited.—6d. per share.

Bury, Rochdale, and Oldham Tramway Company, Limited.—6 per cent. per annum.

G. W. Bacon & Co., Limited.—9 per cent. for the half-year ended December 31 last; £2,000 carried forward.

Grand Hotel, Monte Carlo, Limited.—Interim dividend of 5 per cent. on the Ordinary shares.

Durban Roodepoort Gold Mining Company, Limited.—Interim dividend of 4s. per share on account of the year 1898 ending December 31.

French Harvey Steel Company.—Dividend of 12.71 fr. per part de fondateur (vendor shares) upon presentation of Coupon No. 3. Also 187.25 fr. per share upon the social shares, of which 18 fr. will be placed towards amortisement of these shares, and the balance—namely, 6.25 fr. paid in cash in Paris.

Lake View Consols, Limited.—Further dividend for the current year of 10s. per share.

Grand Theatre, Islington, Limited.—Inferim dividend at the rate of 10 per cent. per annum for the six months ended 31st inst.

Jointless Rim, Limited.—Interim dividend at the rate of 9d. per share.

Henry Bucknall & Sons, Limited.—Interim dividend for the half-year ended February 28 at the rate of 6 per cent. per annum on the Ordinary shares.

British and American Mortgage Company, Limited.—4 per cent. on the ordinary shares, making 7 per cent. for 1897.

Savoy Hotel, Limited.—5s. per share dividend is proposed, making 7½ for year; £4,000 placed to reserve and £1,751 carried forward.

Direct Spanish Telegraph Company, Limited.—Divideed at the rate of 4 per cent. per annum on the ordinary shares, and of 10 per cent. per annum on the preference shares, for the half-year ended December 31.

Brilliant and St. George United Gold Mining Company, Limited.—1s. per share is announced.

New Heriot Gold Mining Company, Limited.—25 per cent. The warrants may be expected to arrive in Europe about the end of May next.

Imperial Tramways Company.—Dividend at the rate of 6 per cent. per annum, leaving £68 to be carried forward.

Ivanhoe Gold Mining Company.—Further cash distribution at the rate of 10s. per share has been declared.

Sheba Gold Mining Company, Limited.—9d. per share, payable on April 2.

Crown Reef Gold Mining Company.—100 per cent for the second half of last year.

Schultze Gunpowder Company, Limited.—£20 per cent. has been declared.

Parke's Drug Stores.—Dividend on the ordinary shares for the half-year ended December 31, at the rate of 6 per cent. per annum.

Birmingham Small Arms.—Interim dividend at the rate of 5 per cent. per annum on the preference shares, and of 5s. per share on the ordinary shares.

Septimus Parsonage & Co.—Further dividend of 4 per cent. on the ordinary shares, making 8 per cent. for 1897. £4,000 to reserve, and £2,557 carried forward.

Ebenezer Roberts & Sons, Limited.—Dividend at the rate of 6 per cent. per annum on the preference and ordinary shares for 1897.

Dundee Coal & Estates Company, Limited.—Quarterly dividend at the rate of 10 per cent.

Geldenhuis Estate & Gold Mining Company, Limited.—Fifty per cent. has been declared.

Associated Tea Estates of Ceylon.—Interim dividends for the period ending December, 1897, at the rate of 6 per cent. per annum on the preference shares, and 5 per cent. per annum on the ordinary shares have been declared.

Eastern Telegraph Company.—Interim dividend of 2s. 6d. per share on the ordinary shares.

African Steam Ship.—A dividend of 12s. per share for the six months ended December, 1897, making with the interim dividend, a total distribution of 16s. per share for the year.

BANKS.

Robinson South African.—Interim dividend of 2s. per share on the ordinary shares.

Agra.—Further dividend for 1897 at the rate of 4 per cent. per annum will be payable on April 1.

Anglo-Italian, Limited.—Dividend for the second of 1897 at the rate of 10 per cent. per annum, making, with the interim already paid, 7 per cent. for the year.

INSURANCE.

Manchester Fire.—Dividend and bonus making total for the year of 15 per cent.

RAILWAYS.

Buenos Ayres Western, Limited.—Interim dividend of 3s. 6d. per share, equal to a dividend at the rate of 3½ per cent. per annum on the ordinary share capital. Balance forward, £5,531.

Horncastle (Lincolnshire).—Dividend at the rate of 9 per cent. Balance forward, £237.

Wellington and Manawatu Railway Company.—Five per cent. for the year ended February 28.

Answers to Correspondents.

Questions about public securities, and on all points in company law, will be answered week by week, in the Review, on the following terms and conditions:—

A fee of five shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of five shillings must be sent to cover the cost of such letter, the fee then being ten shillings for one query only, and five shillings for every subsequent one in the same letter. While making this concession the Editor will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus:—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway?"

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The Editor has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market manipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The Editor further respectfully requests that merely speculative questions should as far as possible be avoided. He by no means sets himself up as a market prophet, and can only undertake to provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the Investors' Review, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

M.B.L. I think you might hold for the present, as there seems to be some chance of a recovery. Financially the position is exceedingly weak, but it seems probable that those interested will give support, if so you ought to have a more favourable opportunity of selling.

Next Week's Meetings.

Saturday, March 19.

Central London Ry. (spec.)	16, Great George-street, S.W., noon
Co-operative Insurance	Manchester, 3.30 p.m.

Monday, March 21.

Bodega	Winchester House, noon.
British Linen Co. Bank	Edinburgh, 1 p.m.
Crescens, Robinson & Co.	26-28, Newington Causeway, 1 p.m.
Jays	Swallow-place, W., 3 p.m.
Plate Steamship	14, Billiter-street, 11.30 a.m.
Scottish Alliance Insurance	Glasgow, noon.
South London Electric Supply	Winchester House, noon.

Tuesday, March 22.

J. Mandleberg & Co.	Manchester, noon.
London & Northern Assets	Cannon-street Hotel, 1 p.m.

Wednesday, March 23.

British Gas Light	11, George-yard, 12.30 p.m.
Indemnity Mutual Marine	Winchester House, noon.
Law Union and Crown Fire and Life	126, Chancery-lane, 1 p.m.

Thursday, March 24.

Agra Bank	Cannon-street Hotel, 12.30 p.m.
Antofagasta and Bolivia Railway	Winchester House, 3 p.m.
British American Land	40, Old Broad-street, 12.30 p.m.
British Bank of South America	2A, Moorgate-street, 12.30 p.m.
General and Commercial Investment Trust	Cannon-street Hotel, 12 noon.
Mauritius Land, Credit, and Agency Company	16, Rood-lane, 3.15 p.m.
North British Railway	Edinburgh, 12.30 p.m.
Priest, Marians, Bethell, Moss & Co.	50, St. Mary-Axe, 3 p.m.

Friday, March 25.

Atlas Assurance	Cheapside, noon.
Bolckow, Vaughan & Co.	Manchester, noon.
Clacton-on-Sea Pier	33, Walbrook, noon.

What is New Zealand afraid of? The Government has decided on greatly strengthening the military resources of the Colony. A field battery, of the most modern pattern, is to be established, and the volunteer force is to be greatly increased.

To Correspondents.

The Editor cannot undertake to return rejected communications. Letters from correspondents must, in every case, be authenticated by the name and address of the writer.

The Investors' Review.

The Week's Money Market.

Although the Money Market has been more agitated in the past few days than for a long time past, rates for day-to-day money and short loans have ruled easier than of late. At times no more than 2¼ per cent. could be obtained for day-to-day money, and since Monday the general charge has been 2¼ to 2¾ per cent., with the higher figure demanded for loans for a week. The very anxieties of the time have produced a moderation in rates, as the large discount operations undertaken at the Bank of England, part of which may have been prompted by precautionary motives, left the market with more money on its hands than it needed at the moment.

Discount rates at one time were very firm, and 3⅝ to 3½ per cent. was by no means an exceptional quotation, for the melting of two and three months' bank bills. To bid so high above the official minimum was clear evidence that the market, or a section of it, feared an advance in the Bank-rate, and, no doubt, if the political uncertainties lead to an outbreak of hostilities this feared movement will take place. Short of this extreme contingency the prospects of a rise are not very assured, and directly the political turmoil calmed down, the market fine discount rate subsided to about the official minimum. The decline was aided by the knowledge that the £3,325,000 of Treasury Bills maturing on April 4 will not be immediately renewed. Although of late maturing paper of this class has been found to be mainly held by Government departments, out of such a large repayment the market ought to obtain a fair amount of relief. Then, although Government disbursements have not yet commenced in earnest, the distribution of the Consol dividends is now near at hand. There is, therefore, prospect that the recent intolerable shortness of cash will be mitigated to a marked extent, but the gradual liquidation of indebtedness to the Bank of England will draw much of the money away again, unless supplies of gold and credits come in from abroad. Therefore, the tension is not likely to be slackened until the United States demand for gold has diminished. Nearly half a million was taken for that quarter in the week, and such a drain cannot be long ignored. There are signs that it may moderate, but being based upon political anxieties nothing is sure. Continental exchanges have moved still further in our favour, and there is little doubt that if they are maintained at their present level for any time, gold will drift to us from that quarter.

Nothing in the Bank return published yesterday supported an advance in the Bank rate. The large business the Bank did during the week has made little change in its totals. Borrowings by the market have increased £556,904, making the total of "other" securities £35,816,210, so of this money £483,456 has been added to "other" deposits. Government deposits are also larger by £257,188 at £18,979,353, which is about the largest total ever attained, so that the looked-for dispersal of treasury balances has not yet begun. Part of the £435,000 in gold withdrawn for export has been replaced by coin returned from circulation, so that the net decrease in the Bank's stock of bullion is only £279,425. The balance of the loss has been more than compensated for by the return of notes likewise, and the net result is an increase of £37,585 in the Banking reserve, which now stands at £23,717,099. A small amount, £165,555, has been added to Government securities. Adding this to the increase in the "other" securities, the Bank has paid out £702,000 in all against security, and the market has, as we have said, retained £483,000 of it—a poor sum for its necessities, but this should be the last week of extreme poverty.

SILVER.

A sharp recovery has been experienced in this market during the week, and the price for bars on the spot has advanced 1/16d. to 25⅛d. per ounce. The "forward" quotation, however, has not moved so briskly, being only 1/16d. higher, at 25⅛d. per ounce. A recovery on the Indian price of the metal to 67½ per 100 tolas, was the reason for the movement, and the increased demand in India is ascribed to anticipations as to the Budget statement by Sir J. Westland. It may, however, be due to mere closing of "bear" operations entered upon when the increased duty upon silver was first mooted. Even at the time we write the date of the Budget statement is not absolutely fixed, but the 21st still remains the most probable day, and it is further added that it will be "discussed" on the 28th, which means that some change in taxation will be proposed. The applications for Council drafts on Wednesday were on a moderate scale, and only 36 lacs were sold, the Council refusing about 12 lacs at low quotations. Great complaint is made about the state of trade at Bombay owing to the disturbed condition of the city from plague and other causes, and although this ought to be the busy season there the Bank of Bombay reported a considerble addition to its balances. Indian exchanges have therefore weakened materially, but Chinese rates have risen ⅛d. to ¼d. upon the improved price of silver.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7 and 8 Vict., cap. 32, for the Week ending on Wednesday, March 16, 1898.

Stock Market Notes and Comments.

Since we last wrote a calmer feeling has come to prevail on the Stock Exchange, but it would be too much to hope that it is an enduring feeling. Markets are just as ready to be scared again to-morrow as they were last week. Nothing essential is altered in their position, and the recovery in prices which took place in the first half of this week represents little more than the effect of repurchases by operators for the fall, who rush to buy back directly acute spasms of alarm are over.

Over and above all politlcal causes of disturbance we have to reckon with the position of the Money Market. As has been frequently pointed out in these columns this is uncertain enough and ticklish enough to wither up many kinds of speculation, and to put the values of many securities to a test they have not been subjected to for years. Were the minds of the public delivered from fears about Spain and the United States, about Turkey and Bulgaria, or Turkey and Armenia, or Russia and Armenia, or Russia and China, or Japan and Russia, or the Boers and Mr. Chamberlain, or Mr. Chamberlain and France, they would still be disturbed and rendered fearful by the probability that we shall have no cheap money this summer. It is not necessary to go over again the effects dearer money are sure to produce on the prices of public securities, but one point may again be emphasised. It is that buying of a kind will be stopped, should money grow, or keep, dear. We do not mean the small investment buying, that goes on more or less at all times and in all circumstances, but the large speculative buying. This is sure to be narrowed down to small dimensions, if money remains anything near 4 per cent. on Stock Exchange loans this summer. The pros-

pect, then, is one rather of markets frequently unsettled, and only occasionally calm, than of active dealings at advancing quotations. Many things will be put to the test should money not fall again below 3 per cent. in the next six months, and we do not think it will fall much, if at all, below that.

One considerable disturbing influence which must not be lost sight of is the practical extinction of the outside broker, or *coulissier*, in Paris. The Government of France seems to be determined upon this step, and has at its call a majority of the Chambers sufficient to allow it to effect its purpose. Therefore, a large displacement of capital will, in all probability, occur in the course of the present year, and a group of houses which has been instrumental in transacting nearly three-fourths of the business in stocks and shares done in Paris will be broken up and dispersed to other centres, carrying their capital with them. What effect this great upheaval may have on prices we cannot predict. It may be, almost certainly will be, a much smaller effect in the first instance than people would naturally suppose, because capital in its modern form is nearly as imponderable as electricity. It is not necessary for a stockbroker to have a "clearance sale" before he removes his business to fresh premises. The ejected *coulissier* can transfer his affairs and effects to Brussels, to Frankfort, to Antwerp, to Amsterdam, or to London, without being under any necessity to disturb markets by unloading his stock. With the prospect of ejectment before them it is not at all unlikely many Parisian firms have already placed their funds, and perhaps some of their securities, in other cities without causing any flutter on any stock exchange. But although no immediate effect is to be looked for, the more remote consequences of such a change as the French Ministry is now forcing through the Chambers must, we think, be of a hurtful kind.

It will be a bad thing for international stock dealings of all descriptions when the great market of Paris becomes in a manner a closed market. The volume of business done on it must be less as the result of this change, and it would not surprise us if the effect upon the dealings in French funds of all descriptions proved in the course of time to be disastrous enough to sensibly lower their prices. Often since the present French Republic was founded the outside brokers in Paris have rendered most valuable service to the established order of government, by sustaining the price of rentes in ticklish times, so that public confidence in the stability of republican institutions might not be impaired. Whether the Government will be able to do this when it has destroyed the great unlicensed market remains to be seen; but we should doubt it.

Quite a flurry upwards took place in Transvaal shares on Tuesday, and a smaller one in Rhodesian ones on Wednesday. No rational explanation of this has been forthcoming, and probably it requires none; for reason has long forsaken these sections of the Exchange. But the market, as we have always insisted, is held up by certain finance houses, trusts, and so on, who play with it as a tiger cub might with a kid. They can move quotations up when they please, and let them down equally when it suits them. This week's demonstration, therefore, was probably meant to show the public that nothing adverse was likely to arise from the murder of Mr. Woolf Joel, or that Cecil Rhodes is still a name to conjure with. Or it may have been the result of repurchases of "bears" put out some time ago with the purpose of raking in a little more money from the public, for said public still deals fatuously and infatuatedly to a small extent in South African shares. It is not, however, speculative buying on the part of the public which helps these large market operators so much at present as the selling of real holders, brought to agony point by the prolonged downward tendency of the market. Such unfortunate people keep throwing out their tens and twenties and fifties and hundreds of shares, always at dwindling prices, and the policy of the great operators is as far as possible to sell ahead of such. They put out extensive "bears" at any favourable chance and then wait until the continual droppings of small sales have brought prices down sufficiently to enable them to repurchase at a great profit to themselves what they had sold at higher quotations.

From past experience we should not be at all surprised to learn that the upward spurt of this week was nothing more than a preparation for a fresh "bear raid" of this very description. The moral still is, that this is a most dangerous market for any one of a speculative turn to touch on any terms. When prices are strong, holders of all South African shares, even the very best among them, should make it a point to be always selling out a little so as to escape in time. This counsel is the more suited to present circumstances because politics in South Africa are getting to a fermenting stage, a stage which may afford Mr. Chamberlain great scope for the exercise of his unrivalled talents in provocation.

We need not dwell on the position of other markets. That for American railroad securities must now continue feverish until the Cuban question is settled one way or another. Here, however, we should on the whole be disposed to buy on any fall, and assuredly no man who can hold what he has bought ought to sell while the intermittent fever prevails. But the effect supposing war does come between Spain and the United States, would at worst be transitory, in an adverse sense, and might be stimulating. Railways most certainly would not suffer by war in traffic or earnings, and they might gain; for, as a correspondent has pointed out, were the worst to come to the worst, and the Atlantic ports of the United States to be all blockaded by Spain, the trade of the country could still find ample outlet through the ports of Mexico and the Canadian Dominion. Moreover, the large additional expenditure now to be entered upon in strengthening the United States Navy must have a great effect in stimulating railway receipts. Therefore the public ought not to be disheartened or alarmed by the most gruesome rumours regarding the dispute between America and Spain, nor yet by downward plungings in markets. If people keep their heads cool and buy when the scaremonger is howling in his most lugubrious tones, they will gain by their coolness and decision in the long run.

The Week's Stock Markets.

After the excitement of last week, markets present quite a humdrum appearance, and the fortnightly settlement having been got through with only two small casualties, members have now settled down to face the nineteen-day account. The unsettled condition of the Paris Bourse tended to retard any very decided improvement here and it was not until Wednesday that a more cheerful tone, both at home and abroad, caused a general all-round recovery, which has since been maintained.

Home Government securities have kept remarkably steady, the movements in Consols being confined within narrow limits, but Indian Government stocks show a further decline. The hardening tendency of the money market has had the usual effect on Colonial Governments

issues, and all the senior securities of the leading Home railway companies have also shared in the fall.

In the Home Railway Market, business has been very quiet, with but few speculative transactions, the net result of the week's operations being that quotations in most instances show little change on balance. Midland deferred was very depressed on rumours of trouble among the employés, but a sharp rise on Wednesday wiped out the greater part of previous losses. North-Eastern and North-Western stocks were also pressed for sale, but have since recovered, the traffic returns showing substantial gains, especially in goods traffic. The Southern lines were adversely affected by what at first sight appeared to be poor traffics, but made up the lost ground before the close.

United States Railroad shares had a short period of firmness towards the close of last week, which gave place to a ridiculous panic in Wall-street on Saturday. Prices fell all of a heap for no particular reason, and as a specimen of the absurd rumours current in New York, one, to the effect that the German Emperor was going to help Spain retain Cuba, may be mentioned as a sample. Prices on this side did not entirely respond, but kept well above parity, and the tone soon became steadier on a renewal of Home purchases. Wall-street having once calmed down, soon began to send higher prices, the prospects of further arrivals of gold from Europe, and the absence of any additional war-like rumours, being quite sufficient to induce rapid "bear" coverings. The latest solution of the Cuban difficulty, viz., that America should raise a loan and buy Cuba outright, is hardly yet taken seriously, but the Government of Washington in taking this line would only follow its traditions, for it bought the State of Louisiana from France. Although not quite back to last week's level, there is no very serious shrinkage noticeable in the whole list, and the latest advices to hand, pointing to an early settlement of the North-Western rate war, caused a firm tone to prevail all through the list.

Canadian Pacific Railway shares were helped by a good traffic return, showing an increase of $129,000, but the bogey of more rate-cutting trouble again being raised caused a sharp reaction. Later advices, however, state that at the conference of the trans-continental roads, a sub-committee was appointed, which hopes to be able to report an agreement upon a basis of settlement by the end of the week. A recovery followed, and the price finally shows hardly any change on balance. Grand Trunk stocks, after several ups and downs, also wind up about where they stood last Thursday.

The market for Foreign Government securities has to a certain extent got the better of its fit of nervousness, and apart from the violent fluctuations in Spanish "Fours," prices have not moved to any appreciable extent in either direction. A favourable impression was created on the Continental Bourses by the speech made by Mr. Goschen on Friday last, but this soon wore off, and Paris operators did very little else but sell heavily for several days on end. The *coulisse*, being threatened with extinction, gave not the slightest support, although it is now hoped that the Senate may not ratify the decision of the Chamber on the Bourse reorganisation scheme. Certain rather heavy sales on Monday were attributed to a big failure at Lyons, and this was partly the cause of the extreme weakness of Spanish Four per Cents. The official announcement of the Delegate of the Government of Spain that the coupons will be paid as usual having removed that doubt, a sharp rally in the price soon followed, and the healthier tone apparent on the Continental Bourses has imparted quite a cheerful tone to the markets here. Italian Rente dropped earlier in the week in sympathy with other stocks, but buying orders have since come to hand from Berlin. Greek bonds keep very steady, and it is believed that Great Britain, France, and Russia will guarantee the whole of the new loan. The news of the postponement of the New Chinese issue tended to depress the price of existing loans for a time, but as it is now expected that the prospectus will certainly appear on Saturday or Monday, there has been a recovery to last week's level again. As regards South American descriptions the

principal activity has been in the Brazilian bonds, which show a partial recovery, although not yet amounting to half of the recent serious fall. The Rio exchange is slightly better, and the advertisements announcing the payment of the coupons as usual have duly appeared, while the rumour that the Brazilian Government contemplated a further issue of paper has not been credited. Argentine issues are a little firmer, the gold premium at Buenos Ayres being 5 or 6 points lower.

Foreign Railway stocks still continue on the down grade, and no support whatever seems forthcoming to give even the slightest semblance of steadiness to this section of the Stock Exchange. Traffic returns were fairly good, but the dividend announcement by the Buenos Ayres Western Company was decidedly disappointing. Mexican issues picked up a little owing to a rise in the price of silver, but changes are all in the adverse direction as compared with a week ago.

Among Miscellaneous securities, Gas Light "A" marks a big advance, on the passing through its first stage of the company's Bill for consolidating their various stocks. In Brewery issues Guinness has risen sharply, Allsopp is also higher after moving up and down on alternate days, and a steady rise has been going on in Daniell ordinary shares. Armstrong, Bolckow Vaughan, Vickers and Maxim shares have attracted attention; Hudson's Bay, Spiers & Pond debentures, and Russian Petroleum ordinary also register rises, but, on the other hand, South Metropolitan Gas, East London Water, Savoy Hotel, Clay Bockd ebentures, and several electric lighting companies' issues are lower.

Markets close the week with a firm tendency, with the exception of that for United States Railroad shares, which was weakened by the expected publication to-day (Friday) of the report on the *Maine* disaster, and Spanish four per cent. were also slightly weaker at the last for the same reason. Consols and Indian Government stocks left off with a firmer tone owing to the Bank rate being unaltered, and a demand for Home Railway Preference stocks for investment purposes was soon apparent after the decision of the Bank directors was known. A sharp rally also occurred in all Home Railway Ordinary stocks, and the list finally shows mostly rises on the week. Large buying orders from Montreal put up the prices of Canadian Pacific and Grand Trunk issues, and a demand also sprang up just at the last for Argentine and Mexican Railway stocks. West Australian mines close firm, and South African with an irregular tendency.

Mining and Finance Companies.

Realisations, chiefly on Continental account, caused a still further decline in the whole list of South African ventures, and the news of the murder of Mr. Woolf Joel, of course, tended to increase the general weakness. The poor Rand output was also a disappointment, although the falling off was attributed to the scarcity of native labour, and the fact that it was a short month. President Kruger's outspoken remarks in the Volksraad, especially his reference to troublesome times ahead, were followed by selling orders from the Cape, and prices slipped back a little further. On Tuesday there was a slight rally, which has nce grown rather more pronounced, professional upport being forthcoming, which was the means of putting up the price of Rand Mines, and one or two of the leading favourites. Satisfactory dividend announcements by the Crown Reefs, Heriot, and Geldenhuis companies, also encouraged operators for the rise. West Australian shares gave way under the influence of steady sales, but towards the close a partial recovery is apparent, and a little activity on the Adelaide Market is reported, after about three weeks' inanition. Among Indian shares the chief feature was the steady rise in Ooregum, otherwise there has been no disposition to enter on fresh commitments. Rio Tinto copper shares fell sharply during the earlier part of the week on heavy sales from Paris, where there has been an extensive reduction of accounts owing to the action against the *coulisse*, but, as in the case of all other mines, a firmer tone set in towards the close, and a further reduction in the visible supply of copper is again reported.

WATER TRUST, MINING, AND PUBLIC CRUSHING COMPANY OF WESTERN AUSTRALIA, LIMITED.

A correspondent writes to complain of having only just received a copy of the directors' report. Being a fairly large shareholder it certainly seems a matter requiring explanation, for the report is dated November 10, 1897, and was presented at a meeting of shareholders held ten days after. We can only suggest that our correspondent's name was missed in November, and that shareholders are now being whipped up again. After looking through the report it is easy to understand the diffidence of the directors in bringing it forward, for it contains the fateful word "reconstruction." Knowing little or nothing about the company's obscure history we have taken the trouble to look into it now, and curiosity was rewarded by finding it fairly interesting.

The company was formed in the autumn of 1895 to acquire water rights near the town of Northam, half a mile from the Government railway, and 295 miles from Coolgardie, together with sufficient freehold land for the erection of crushing and reduction works, also various mining properties, including the Golden Pig mine, comprising about sixty acres. The capital was £250,000 in £1 shares, of which 120,000 shares were taken by the vendor, and 80,000 were offered for subscription at par. The glories set forth in the prospectus were sufficiently brilliant to attract speculators on this side, for were they not told that the lagoon constituted the only permanent supply of fresh water within a radius of 200 miles from Southern Cross, and that the mining properties had been proved to contain payable reefs carrying from 8 dwt. to 2¼ oz. per ton? It was proposed to erect a large crushing plant to crush ore partly from the Golden Pig mines and partly for the public, and it was pointed out that the charges then made at Southern Cross and Coolgardie for crushing ore ranged from £3 to £5 per ton, whereas it was estimated the company could treat the ore, carriage included, for 5s. only, and make a substantial profit. Moreover, the Government offered the right of running private rolling stock on their railways for the transport of ore from Southern Cross to the company's proposed crushing mills, the Government supplying locomotives, fuel, and working staff, at 7s. per ton, and also the right of carrying back fresh water to the goldfields as a return loading at only 5s. per ton, the company guaranteeing a minimum traffic of 60,000 tons of ore and 30,000 tons of water per annum. Mr. J. R. Chaffey, reporting on the Golden Pig lease, estimated the average yield of the ore by battery treatment at 10 dwt. of gold per ton, which with "the enormous body of stone at hand, would give a steady and handsome profit." Finally, the working capital provided was considered ample to cover the cost of the installation of the company on a "sound and satisfactory basis."

Nothing seemed wanting, therefore, but to rush for the shares and wait for dividends. After a lapse of a couple of years, during which time shareholders, no doubt, built many castles in the air as to how the dividend money was accumulating, the directors brought forward their report for two years ended August 31 last, the profit and loss account showing that the expenditure had run away with £21,167 in earning £4,439. According to the balance-sheet, in addition to the £120,000 in shares given for the property, railway sidings had cost £2,733 net; land and buildings, £1,710;

and plant and machinery, £53,013. On the wonderful Golden Pig mine £8,826 had been spent, and the very remunerative amount of £11 9s. 8d. gold recovered. On another property, the New Victoria South, £7,399 had been spent, and £2,288 gold recovered, and on the Enterprise mine, £1,641 had been spent and £330 gold recovered. Various other items made up the total of £212,712. This meant that all the capital of £200,000, less £267 calls in arrear, had been used up, and hat a mortgage, sundry creditors, and a bank over-draft had come between expectant shareholders and profits. Therefore, an issue of debentures was offered the shareholders early last year, but it was not taken up. This sulky and ungenerous attitude of the shareholders in keeping the rest of their money for their own use or to help Bottomley, put the board in a bit of a fix, for they were unable to add plant to treat the tailings, without which mine-owners would not send their ore to the company's mill; the title-deeds of the property had to be lodged as security for the bank's overdraft, and a bill of sale had to be given on some new trucks ordered. Then the general manager at Northam found he had had enough of it, and took £500 to terminate his engagement, and the board in Western Australia was asked to resign, one member of it being allowed to join the London board, viz., Mr. Eugene Vanzetti, the original vendor of the mine to come. There never was a board of directors so plagued before. Nothing seemed to go right. Even the Government made their Menzies Railway terminus at Kalgoorlie, instead of Coolgardie, where it should have passed through the company's property; and, when asked to make a branch line, pleaded want of funds. Thus there was nothing left to do but to bring forward the inevitable reconstruction scheme, and to sell the undertaking to a company to be called the Northam Mills and Mining Company, Limited, with a nominal capital of £250,000 in £1 shares, upon which 16s. 6d. was credited as paid, leaving 3s. 6d. a share to be called up. This, if obtained, would have produced £35,000, of which £10,000 was required to satisfy existing liabilities. With the rest the necessary plant was to be purchased, as well as ores, so that by this time probably the company's treasury has again experience of a vacuum. Even if well supplied with money, we see small hope, for during the five months it was crushing last year the yield was only 14 dwt. to the ton, which would never mean anything for the shareholders in such a distant region and without cheap transport facilities. Our correspondent will not join the reconstruction, and thereby shows wisdom, for if there is a clear case of throwing good money after bad this seems one. In the circumstances, therefore, the grumbling about not receiving the report ought to be changed to a feeling of thankfulness. The misfortune lay in ever having seen the prospectus and believed in it.

A VIGOROUS RIVAL OF FRENGH RAILWAYS.

The great water highways, being owned by the State, are used by the public at very small cost in France. The sea and rivers are free to everybody, and the canals, although they, too, belong to the State, can be used with almost as little expense. Water transport in France is, in fact, a serious rival to the railways. During the past twenty years, owing to the increased adoption of machinery, and to the abolition of taxes on navigation, there has been a steady and constant improvement in water traffic, the only drawbacks being occasioned by unfavourable climatic conditions, and in that period the growth of internal navigation has been incomparably greater than that of the railways, showing an increase of 27 per cent. in the average distance of the merchandise carried by boats. The number of tons advanced by 80 per cent., whilst the increase for the railways was only 18 per cent. The canals of the north and east furnished the greater part of this increase, the prosperity of the iron and coal industries occasioning a traffic beyond all precedent. That between Paris on the one hand, and the North and Belgium on the other, represents a traffic which averages more than 3 million tons. The exchanges by water between the East and the North gave last year 1½ millions, so that the canal of Saint Quentin, which forms the common trunk of those two great systems, was the medium of transport for a mean of 4½ millions of tons of merchandise, and its locks have just been doubled. The Seine is the great medium by which the wheat from America and the wines from Spain and Italy reach Paris. The canals of the centre, whose improvement is much less than those in the North seem now to have taken an upward tendency.

This navigation or system is used mainly for importation, the goods carried by rivers and canals amounting to 41 per cent. of the general total received in France, whilst those sent from France in the same manner only reach 28 per cent. It plays a very important part, not only in the importation of wheat and wines landed at Rouen or at Hâvre, but even of coal, most of that sent from England and Belgium finding its way to the interior by water. Whilst the railways are compelled to conform to their fixed tariff, and are obliged to meet any demands which may be made upon them without overstepping the delay allowed by law, the tariff for transport by water is not fixed, and the navigation companies have no time limit as regards delivery.

The improvement in internal water transport is not a mere flash in the pan, and there seems no valid reason for believing that it will not be further developed. The introduction of electricity as motive power, the improvement in the boats, the end of the unfortunate engineers' strike in England, and, finally, the inability of the railways to cope with a larger traffic, are all very important elements which will lend powerful aid to the development of water carriage in the near future. The Paris Exhibition of 1900 will, temporarily at least, increase the transport to Paris of building material of all kinds. To take full advantage of this special demand, the railways will have to construct additional rolling stock and workshops, increase their staff and their depôts, and even make new lines in order to relieve those already overburdened with traffic. All this could not be done under a cost to each of the railway companies of from 130 to 150 million francs. This is a remarkable illustration of the exceptional position the river and canal traffic enjoys in its competition with the railways. The question of the extension of the canal system excites much interest in France. That country, which expended 15,000 million francs on its railways, and now complains that its system is inferior to that of other countries, is becoming tired of debates concerning the improvement of its water arteries, which form the second part of the great plan of public works. Several municipalities and Chambers of Commerce have offered the State to contribute a part of the necessary cost, and to lend the other part at very little interest, or even none at all. The Government has accepted several hundred millions. The Ministry has deposited some bills sanctioning this understanding, and Parliament, which has already voted the re-purchase of the "Canal du Midi," and another, is about to begin the solution of the problem. The construction of the canal "Paris Port de mer," from Rouen to Paris, which will cost six millions, the alteration of the bed of "La Loire," which will cost three-and-a-half millions, and the completion of other works referred to above, would greatly benefit the water interest; but it would be almost wholly at the expense of the railways, and would particularly injure the systems owned by the State and by the Ouest, Midi, and Orléans Companies. The merchant is, as a general rule, indifferent whether his goods are carried by train or by water, so long as they arrive safely; and the railways, unable to engage in a battle of tariffs with their adversary, look with dread on the dangerous position in which they will soon be placed by their powerful opponent, who will menace their receipts at the very moment when their expenses must be considerably increased.

The shares of the French railways have sensibly risen during the past year, and are still in great demand. In order to justify this rise it has been announced that an increase in the dividends of the companies will shortly take place. This announcement is not meant seriously, however, and English holders would act prudently in selling without hesitation at the present prices.

According to the British consular report upon Milan, the chief inspector there notifies that tuberculosis exists among the cows on the irrigated plains near Milan, to the extent of 26·30 per cent. No doubt, as our Consul says, the sanitary conditions of that district "leaves much to be desired." But how much of the milk of these diseased cows goes to make up Gorgonzola and Parmesan cheese? This is a question in which a good many of us are interested.

Will the Turks move? It is understood, so says a Paris telegram, that as soon as the British and French Governments have laid before their respective Parliaments the conditions for guaranteeing the Greek loan, a note will be presented to the Sultan, informing him that, on payment of the first instalment of the debt, he will be expected to carry out at once his share of the understanding to which he appended his signature. The succeeding instalments will be paid only after it has been ascertained that the evacuation of Greek territory proceeds. The Sultan, however, is ingenious in framing excuses for delay. Then will Russia join in the warning?

The strike movement in Bombay seems to have made an impression on the Governor. He has announced that search parties are to be abolished experimentally, and all suspicion cases of plague are to be reported by the head men of the various communities. There is to be no inspection of corpses or measures entailing delay in the performance of funeral rites.

American Customs' officers have received orders from the Treasury at Washington to assess countervailing duties on sugars imported from France.

MINING RETURNS.

Balmoral Main Reef.—For February, 2,015 oz.

Natal Collieries and Durban Coaling Station.—Output of coal in February, 3,100 tons.

New Zealand Crown.—Tons mined 1,300, tons crushed 1,511.

Sons of Gwalia.—For February: Crushed 960 tons, yield 1,139 oz. Tailings 23 dwts.

Regina (Canada).—For February: 510 tons milled, yielding 165 oz. gold.

Waitekauri.—£5,486 from 1,730 tons.

New Heriot.—Last month's crushing yielded 5,737 oz., profit £9,642.

Nigel.—Last month's crushing yielded: Battery 1,296 oz., cyanide 1,477 oz.

Mount Malcolm.—Cleaned up on March 5: 525 tons, crushed for 474 oz.

City and Suburban.—Last month's crushing yielded 9,678 oz., profit £15,451.

Block B Langlaagte Estate.—Mill: Ore crushed, 11,704 tons of 2,000 lb.; gold retorted, 2,982 oz. Tailings (cyanide process).—Tons treated, 6,300; gold recovered, 1,434 oz. Concentrates (cyanide process).—Tons treated, 156; gold recovered, 350 oz.

Bonanza.—From mill: crushed, 5,184 tons, obtained 4, 629 oz. of gold. From cyanide and slimes works—treated 5,036 tons, yielding 3,112 oz. Total, 7,741 oz.

Consolidated Main Reef.—Mill: 3,630 tons crushed, producing 1,586 oz. gold; cyanide: 2,880 tons treated, producing 323 oz. gold.

Consolidated Murchison.—Crushed 308 tons, obtained 320 oz. of gold.

Crown Reef.—Results for February: Crushed by mill, 13,192 tons; yield in smelted gold, 6,998 oz., from cyanide works 3,232 oz., and from slimes works 101 oz.

Gold Reefs of West Africa, Limited.—Crushed during February, 190 tons of ore, which have yielded about 314 oz. of gold.

Lake View Consols.—Clean up for February: Crushed, 4,583 tons: yield, 4,485 oz. 9 dwts. of gold; tailings assay 12 dwts. per ton. Cyanide returns: 4,057 tons treated yielded 2,690 oz. 17 dwt. of gold; tailings assay 2 dwt. 4 gr. per ton. Concentrates: 100 tons value 220 oz. of gold.

Langlaagte Estate.—Ore crushed, 15,388 tons of 2,000 lb.; gold retorted, 5,197 oz. Tailings (cyanide process): Tons treated, 11,700; gold recovered, 1,207 oz. Concentrates (Cyanide process): Tons treated, 536; gold recovered, 1,436 oz.

Langlaagte Star.—February: Ore crushed, 4,724 tons of 2,000 lb.; gold retorted, 2,468 oz. Tailings (cyanide process): Tons treated, 4,321; gold recovered, 956 oz.

North Randfontein.—For February: Ore crushed, 5,324 tons of 2,000 lb.; gold retorted, 1,341 oz. Tailings (cyanide process): Tons treated, 3,120; gold recovered, 463 oz. Concentrates (cyanide process): Tons treated, 70; gold recovered, 168 oz.

Ottos Kopje Diamond Mines.—3,410 loads washed during week ended March 10; 219 carats of diamonds won.

Porges Randfontein.—Ore crushed, 6,620 tons of 2,000 lb.; gold retorted, 2,399 oz. Tailings (cyanide process): Tons treated, 4,875; gold recovered, 743 oz. Concentrates (cyanide process): Tons treated, 110; gold recovered, 390 oz.

Robinson Randfontein.—Ore crushed, 4,014 tons of 2,000 lb.; gold retorted, 1,871 oz. Tailings (cyanide process): Tons treated, 3,300; gold recovered, 588 oz. Concentrates (cyanide process): Tons treated, 630; gold recovered, 167 oz.

Simmer and Jack.—During February—Crushed 24,550 tons, obtained 5,887 oz. of gold from mill; 200 oz. of gold by chlorination; and 3,000 oz. of gold from tailings by cyanide.

Weld Hercules.—Tons crushed, 216; produced, 125 oz. of gold.

West Rand, Limited.—Crushed, 3,407 tons; yielded, 1,061 oz.; cyanide treated, 2,668 tons; yielded, 723 oz.

Winter's Gold.—100 tons yielded 122 oz.

Witwatersrandt (Knight's).—Crushed, 14,700 tons; yielding, 4,038 oz.; 9,860 tons cyanide tailings treated, yielding 1,427 oz. gold.

Geldenhuis.—Results for February: Crushed, 15,840 tons; obtained from mill, 7,394 oz.; from concentrates by cyanide, 989 oz.; from tailings by cyanide, 2,144 oz.; from slimes by cyanide, 492 oz.; total, 10,019 oz.

Highland Chief.—Crushed, 225 tons; yield of retorted gold, 108 oz.

Pahang Corporation, Limited.—February returns: Jeram Lumpong mill, 1,115 tons of stone crushed, producing 70 tons of black tin. Jeram Batang mill: 625 tons of stone crushed, producing 10 tons of black tin.

Paarl Central.—Results for February: From mill—Crushed, 6,088 tons, yielding 1,617 oz. of gold. From cyanide works—treated, 4,530 tons, yielding 923 oz.

York.—4,356 tons were crushed in February, yielding 1,245 oz., while 3,915 tons of tailings gave 956 oz.

Victoria (Charters Towers).—275 tons crushed yielded 425 oz. gold.

Inverell Diamond Fields.—421 carats of diamonds from 43 loads washed by hand.

British Broken Hill Proprietary.—For fortnight ended March 10: 3,205 tons crude ore produced 483 tons concentrates, which contain 309 tons lead and 13,732 oz. silver.

Brilliant and St. George.—Crushed during the month: 2,240 tons for 3,313 oz. of gold.

Crown Deep.—Results for February: tons crushed by 160 stamps, 19,000; yield in smelted gold, 5,242 oz.; tons of sands and concentrates treated by cyanide, 16,670; yield, 4,827 oz.; tons of slimes treated, 3,500; yield, 179 oz.

Geldenhuis Deep.—Results for February: tons crushed by 180 stamps, 20,700; yield in smelted gold, 7,089 oz.; tons of sands and concentrates treated by cyanide, 14,920; yield, 3,796 oz.; tons of slime treated, 5,723; yield, 481 oz. Total, 11,366 oz.

Nourse Deep.—Results for February: tons crushed, 6,596; yield, 2,377 oz.; tons of sands and concentrates treated by cyanide, 4,991; yield, 2,267 oz. Total, 4,642 oz.

Rose Deep.—Results for February: tons crushed, 13,118; yield, 5,655 oz.; tons of sands and concentrates treated by cyanide, 10,031; yield in smelted gold, 3,005 oz. Total, 8,660 oz.

St. Agnes Gold Reefs.—Clean-up after crushing, 180 tons of quartz; gross yield, 149 oz.

Salisbury Gold Mining Company.—During January the mill crushed 5,440 tons of ore, which yielded 1,928 oz. 6 dwt. of gold; the cyanide works treated 3,066 tons of tailings, yielding 498 oz. 19 dwt. of gold.

Alaska Mexican.—February return: bullion shipment, $23,372; ore milled, 10,486 tons; sulphurets treated, 223 tons; bullion from sulphurets, $5,951.

Cavlloma Silver.—February production: 9,250 oz. ores, 11,750 oz. bullion.

Menzies Lady Sherry.—Crushed: 48 tons for 140 oz. from the 115-ft. level, 45 tons for 69 oz. from the 50-ft. level.

New Queen.—Result of crushing for past fortnight: No. 4 formation, 102 tons, yielding 40 oz. of gold; 1,220 ft. formation, 115 tons, yielding 101 oz. gold.

Waihi, Limited.—Bullion return for 25 days, £11,200 from 2,900 tons.

Wentworth Proprietary.—Four weeks' return: 610 tons of ore crushed, yielding 809 oz., and 2 tons rich crude ore have been shipped containing 131 oz.

Moodie's.—Tons crushed, 960; ounces obtained, 750.

Burbank's Birthday Gift.—Crushed, 460 tons; yield, 621 oz. free gold, exclusive of tailings.

Frank Smith Diamond.—5,700 loads washed, producing 200 cts. (value £375).

Transvaal Coal Trust.—Output for February 14,000 tons.

Cue 1 Gold Mine.—Crushed 790 tons, yielding 590 oz.; cleaned up plates, 615 oz.

New Zealand frozen meat is certainly not losing in popularity. Official statistics show that, while in the first half of last year, the total shipments were 43,593,102 lbs. of mutton and 2,129,140 lbs. of beef, in the second half of the year the amounts were 50,030,521 lbs. of mutton and 6,111,184 lbs.—increase of 16,437,419 lbs. in mutton and 6,111,184 lbs. in beef. There are enormous advances; but the company seem to expect a better trade still, for they have just ordered, it is said, four new steamers expressly designed for the transit of frozen meat.

Railway Traffic Returns.

Algeciras (Gibraltar) Railway.—Traffic for week ended March 5, Ps. 20,570; increase Ps. 3,710. Aggregate from July 1, Ps. 710,284; increase, Ps. 17,513.

Bengal Central Railway.—Traffic for week ending February 19, Rs. 18,424; decrease, Rs. 350. Total from January 1, Rs. 141,827; increase, Rs. 12,363.

Burma Railways.—Receipts for week ending February 12, Rs. 2,09,931; decrease, Rs. 54,355. Aggregate from January 1, Rs. 12,40,477; decrease, Rs. 2,57,085.

Great Western of Brazil Railway.—Traffic for week ending February 5, $36,643; increase, $8,848. Aggregate receipts to date $265,370; increase, $32,519.

Western of Santa Fe Railways.—Gross receipts for week ending March 5, $44,069; increase, $27,397.

Alcoy and Gandia Railway and Harbour Company.—Traffic for week, March 12:—Ps. 13,100, increase Ps. 100. Aggregate from January 1, Ps. 108,900, increase Ps. 10,850.

Mobile and Birmingham Railroad.—Traffic for third week of February, $9,302; increase, $3,427. Aggregate from July 1, $245,949; decrease, $6,116.

Villa Maria and Rufino Railway.—Traffic for week ending March 12; $5,595; increase, $480 Aggregate from January 1, $44,031, decrease $6,418.

West Flanders Railway.—Gross receipts for week ending March 13, £1,976; decrease, £73. Total from January 1, £22,040; increase, £612.

West of India Portuguese Railway.—Week ending February 19, Rs. 4,997; increase, Rs. 1,065.

Assam-Bengal Railway.—Traffic for week ended February 5, Rs. 20,929; decrease, Rs. 1,709. Aggregate from January 1, Rs. 1,21,901; increase, Rs. 7,057.

Quebec Central Railway.—Receipts for third week of February, $4,683; decrease $3,273. Aggregate from July 1, $39,404; decrease $6,428.

Bengal Dooars Railway.—Traffic receipts from January 1 to February 12, Rs. 20,280; decrease, Rs. 5,832.

H. H. The Nizam's Guaranteed State Railways.—Traffic receipts from January 1 to February 19. Rs. 538,968; increase, Rs. 6,172.

Rohilkund and Kumaon Railway.—Traffic receipts for week ending February 12, Rs. 4,532; decrease, Rs. 636. Aggregate from January 1, Rs. 31,524; decrease, Rs. 1,216.

Southern Mahratta Railway.—Receipts for week ended February 19, Rs. 1,03,513; decrease, Rs. 14,751.

Manila Railway.—Receipts for week ending March 12, $20,410; increase, $5,185. Aggregate from January 1, $192,287; increase, $48,585.

Cleator and Workington.—Gross receipts for the week ending March 12 amounted to £1,015, a decrease of £61. Total receipts from January 1, £10,086, a decrease of £698.

Cockermouth and Keswick Railway.—Receipts for week ending March 12, £798; increase, £78. Aggregate from January 1, £8,273; increase, £742.

Prices Quoted on the London Stock Exchange.

Throughout the INVESTORS' REVIEW middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the INVESTMENT INDEX published quarterly—January, April, July, and October—in connection with this REVIEW, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the REVIEW almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the INVESTORS' REVIEW any subscriber can follow for himself the movements of securities from week to week, and the INVESTMENT INDEX will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S.F. Snk.Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D.Stk., *debenture stock*; Pf., Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Ans., *annuities*; Cu. or Cm., *cumulative*; Gu or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Insc., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*.

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

The Investors' Review

EDITED BY A. J. WILSON.

Vol. I.—No. 12. New Series. FRIDAY, MARCH 25, 1898. [Registered as a Newspaper.] Price 6d. By post, 6½d

THE
LAW GUARANTEE AND TRUST SOCIETY, LIMITED.

Capital Subscribed	£1,000,000
do. Paid-up	£100,000
do. Uncalled	£900,000
Reserve Fund	£70,000

FIDELITY GUARANTEES,
On behalf of Managers, Secretaries, Clerks, Cashiers, Collectors, &c.

DEBENTURE INSURANCE.
The advantages of such Insurance are as follows:—
1. The Debentures being guaranteed by the Society can be placed at not less than par, thus saving discount.
2. A lower rate of interest is willingly accepted.
3. The Society acting as Trustee for Debenture Holders also adds to the Security.

MORTGAGE INSURANCE.

CONTINGENCY INSURANCE,
In respect of Defects in Title, Lost Documents, Missing Beneficiaries, Re-Marriage, Issue and Name and Arms Risks, &c.

LICENSE INSURANCE.
Mortgagees of Licensed Property should always insure in a substantial Insurance Society against loss they may sustain by depreciation in consequence of the license being lost.

TRUSTEESHIPS for Debenture Holders, and under Wills, Marriage Settlements, &c.

HEAD OFFICE:
49, CHANCERY LANE, LONDON.
CITY OFFICE:
56, MOORGATE STREET, E.C.

CALEDONIAN INSURANCE COMPANY.
The Oldest Scottish Insurance Office.
LIFE ASSURANCE WITH AND WITHOUT MEDICAL EXAMINATION ON EXCEPTIONALLY LIBERAL TERMS.

Example of the Company's Threefold Option Investment Policy.

Entrant at age 26 may secure in return for an Annual Premium of only £30 the following benefits—

A. An Assurance of £1,000, payable if death occur before age 65;
B. An Endowment of £2,000 on attainment of age 65; or in lieu of B. one of the following options:
C. A paid-up Assurance of £2,800, commencing at age 65; or,
D. An Annuity after 65 of £106 : 11 8,* with a paid-up Assurance of £1,400 commencing at 65; or
E. An Annuity after 65 of £213 : 3 : 4,* without any paid-up Assurance.

* The Annuities quoted are for males, and are dependent on the present prices being still in force when age 65 is reached.

Fire Insurance at moderate rates and on good security.

The Investors' Review.

A Romantic Indian Budget.

Telegraphic advices for some time back have been preparing the British public for an optimistic Budget statement. It has now made its appearance, and deserves to be carefully studied by the public-spirited citizens of the United Kingdom. In the Viceroy's summary of it we are informed that the deficit for the year closing on the 31st inst. will be 52,800,000 rupees, or about 30,000,000 more than the estimate put forward a year ago. This deficiency is accounted for by the cost of famine relief, which is put at almost 54,000,000 rupees, and the war expenditure of 36,400,000 rupees, not estimated at all in the Budget of March last. The famine expenditure is about 18,000,000 rupees larger than the first estimate, but the final general result will apparently be about 7,000,000 rupees better than the estimate of December last, owing to savings by a propped-up exchange, and the postponement of railway expenditure. Several sources of revenue are better than the estimates to the amount of 7,600,000 rupees, but the opium revenue fell off 5,700,000 rupees. It is impossible to say how far the figures may have been "adjusted" to produce this result. Even when we receive the full budget minute this may not be possible, so we may leave this statement as it stands, and turn to the Budget for the coming year, merely with the remark that if the famine has cost so little and involved so little loss of income, as Sir James Westland says, it is the cheapest calamity of the kind India has ever known. And the same statement applies to the cost of the Frontier war.

We believe neither. According to the telegram, the surplus estimated in the new Budget to accrue at the end of March, 1899, will be 8,900,000 rupees. We shall be delighted to congratulate the Government of India should that hope be realised, and it may be if India continues to borrow well. Only 105,700,000 rupees was spent from capital account by the State and company railways during the year now at its close, but the expenditure for the coming year is to be raised to 132,000,000 rupees, making about 238,000,000 rupees for the two years. As all this money will have in some way or other to be borrowed, it is easy to see that considerable stimulus will thus be given to the resources of the Government. In the meantime, a loan of £6,000,000 sterling, £2,640,000 of which represents new money, is to be raised in this country, and in addition a rupee loan for 30,000,000 is to be emitted in India, making together, say, £4,500,000 net to be added to the debt of the Indian Government during the coming year. Over and above this, we presume that the moneys to be raised by the various railway companies in pursuance of their policy of extension will also afford relief. The floating debt of £6,000,000 now outstanding in London is to be renewed, but no mention appears to be made of the six or seven millions sterling shortage on this year's Council drawings.

It will be noticed that, apart from the application of the blind eye to inconvenient unliquidated accounts, the whole question of the outcome of the Budget turns upon the rate of exchange. It appears that the rate realised on remittances made during the present year has been about 1s. 3⅜d. per rupee, and the Budget estimates are based upon the same average for the coming year. But, as has just been mentioned, about £7,000,000 of the Simla Government's English obligations were not drawn for this year at all. In the coming year they are to be drawn for to the full, or the admitted full. At least, so we gather from the announcement that the total of the drawings is to be £16,000,000. This, we presume, does not cover "stores," but represents merely the net obligations of the Government of India on its public debt, railway annuities, army charges, and so on. We are not, indeed, certain that £16,000,000 anything like covers all these, but for the present accept the statement as it stands, merely remarking that the Home charges on account of the army of India amounted in 1895-96 to fully £3,000,000, whereas the effective army charges set down in the Budget of March last as payable in England was little more than £1,000,000. As these charges steadily expand, we do not see how the money required to pay them can be a diminishing amount.

The important question, however, which is to be now discussed is the capacity of the Indian trade to bear the full £16,000,000, which will mean a payment out of the Indian treasuries of about 280,000,000 of rupees on the Government's own adopted exchange. Now, as we pointed out some weeks ago, the margin in the value of Indian exports over imports is frequently below this total, and tends to fall further below it the more Indian trade becomes hampered by an artificial exchange. In 1896-97 it fell to rather less than 240,000,000 of rupees, but take it at 370,000,000, which was the margin shown in favour of India by the trade of 1894-95, and still the full weight of the Indian Government Home charges is more than this trade can bear. For we must never forget that there are a variety of other remittances from India which must be taken into account in any estimate of its true economic position. A few weeks ago we summarised these, and, for the twentieth time or so, repeated the estimate that the aggregate of all charges, private and State, to be met every year in England out of the surplus exports of Indian produce could not be less than £30,000,000, or between 450,000,000 and 500,000,000 rupees, according as the exchange value of the rupee fluctuates. The foreign trade of India has not borne half this charge for any three years running this generation back. In that of the ten years between 1887-8 and 1896-7 inclusive, the excess of exports over imports fell nearly 25,000,000 rupees short of covering acknowledged Government drawings alone, if we include Government imports in the total. Leaving out these imports, which we know to be substantially always paid for with borrowed money, and dealing with the trading figures alone, the excess of the exports for the whole of these ten years only overtopped the total amount of the Indian Council's drafts upon Indian Treasuries by about 3,000,000 rupees. That is to say, in reality, India has had to give the entire value of her exports over imports to cover the Home obligations of her Government.

It is clearly hopeless under such an economic condition for the Government of India to hope to maintain an average rate of exchange of 1s. 3⅜d. per rupee, now when the trade of the country has been disorganised by the currency bounties; and the consequence of its attempt to draw up to £16,000,000 in the coming year must be a fall in the exchange, unless the borrowings of the State, or of its guaranteed railway companies, are largely augmented in order to create an artificial credit for India in London. This is the actual position, and in face of it it is worse than folly for Indian officials to persist in imagining that they can control the rate of exchange in spite of economic laws, common sense, and past experience. India has one source, and one alone, out of which to meet the enormous obligations laid upon her in England by her British rulers, and that source is the excess value of her exports over that of her imports. Unless this excess could be increased beyond any precedent, India must continue to live by loans, and when loans are no longer possible cannot fail to suspend payment. This is as plain as that two and two make four.

At the end of the Viceroy's telegram we have a jubilant paragraph, setting forth how wonderfully India has prospered during the past twenty years. We quote it here, as it may be interesting to refer back to one of these days when the dreams of the romancer are over:

"So far as revenue goes we have, even after charging off Rx.13,660,000 spent from revenue account on construction of rail ways, more than paid our way, including all expenditure on war, special defence works, and famine. So far as capital transactions go, we have raised under various conditions, and spent upon railway and irrigation works, harbour works and docks, municipal projects, and agricultural improvements, a sum equal, at 1s. 4d. per rupee, to Rx.198,820,000, and we are, after all this expenditure, better off by Rx.500,000 per annum than before we undertook it. Moreover, it must be remembered, this view is concerned with direct financial returns only, and omits any consideration of the effect of all this expenditure on development of revenue and of its economic and administrative aspects." These results and the signs of early recovery from the disasters of famine, plague, and war are used to repeat and enforce Sir J. Strachey's deprecation of assistance from the English Exchequer.

It is impossible to test in detail such figures as are here quoted. They are, indeed, purely fanciful, but

some facts contained in the statistics of India deserve to be considered against them, and among the most striking of these, as bearing upon the prosperity of the natives under our rule, are the figures relating to what we may call, in Irish language, the "evictions" of the Indian agricultural population from their holdings. These figures are both startling and melancholy. Between 1882 and 1887 the total number of "compulsory transfers of real property" in British India never amounted in any one year to 1,000,000. The total was 756,780 in 1882, and 948,513 in 1887, according to one "Statistical Abstract"; according to another and later, the total in 1887-8 was 1,230,089. This had risen to 1,469,936 in 1890-91, to 1,729,850 in 1891-92, to 1,793,406 in 1893-94, to 1,817,767 in 1895-96, the latest year for which we have the returns. In the year just preceding, it had been a few thousands higher still. Voluntary transfers of the same kind of property also increased during the same period, but not at the same ratio. Assuming the figures for 1882 to be correct, the increase shown in 1895-96 over that year was fully 140 per cent. Surely this is a most important testimony to the increasing poverty of the people of the country under our rule. Grant that the revenues have been maintained, and that the State has done everything claimed in the passage just quoted, the fact remains that the evidence of distress among the people as the result of this success steadily accumulates. It could not be otherwise.

The people of India have been subjected for more than a generation to a forcing process nourished by liberal appeals to the money-lender. Had the great works of which the British administration boasts been created by economy, and paid for out of husbanded income, then, indeed, the Indian people would have had cause to rejoice in our rule. The reverse of this, however, has been the course pursued. Every description of extravagance has been committed without let or hindrance from home. On needless frontier wars alone, as Colonel Hanna has pointed out in his admirable little book entitled "Backwards or Forwards?"—wars on the north-west frontier, including those of Afghanistan, including the permanent increase they have necessitated in the British Army of occupation, and the cost of the wasteful railway lines they have caused us to build—have been spent at India's charges between 1878 and 1896 no less than 714,850,480 rupees. In the same period the home charges of the Simla Government have increased by £8,000,000 per annum. The cost of the police in India has nearly doubled, the cost of the army has risen more than one-third, and the cost of the political departments has more than doubled—all within the same period. Through none of this frightful waste have the Indian people benefited to the extent of one single rupee, outside the wages paid to the additional troops and to the swarms of workmen who have secured employment in strategic railway and useless fortification building at the expense of the cultivators—mainly at the expense of the patient and industrious population of the Ganges Valley. Why will not the civil officials in India look at the matter from this common-sense point of view instead of trudging around in a vicious circle, dreaming of imaginary rates of exchange, cooking up fancy statements to show how "prosperous" the country is, with their eyes wholly shut to the bottomless abyss towards which they are hurrying the empire, themselves and England?

American Life Office Investments.—1.

We are now going to deal with a branch of this subject which is of the highest importance to those who invest in American Life policies. If the securities invested in by such of these concerns as do business in this country are of a first-class description, then, whatever objection we may take to their methods, one danger of the future would be mitigated, if not removed: the danger of their some day ceasing to meet their engagements. On their more current business it must not be forgotten that they still have, thanks to their high charges, considerable margin, and were the reduced bonuses they now promise to pay to disappear altogether this margin would be somewhat enlarged. The "bonus" is not of the essence of the contract. Deduct what is occasionally paid in this way, and these American offices could still flourish in waste and continue to bring out their balance-sheets every year so as to display large surpluses.

But all and every device would fail if these offices placed their funds in poor or bad securities. Now, they are obliged to publish each year in the State of New York a detailed list of their holdings in all kinds of securities, and we have this statement for the year 1896 before us. It may at once be stated that they do not strike us altogether favourably, but there is a difference in the position of the three concerns with which we are dealing which ought to be first of all emphasised. The best office of the three is undoubtedly the New York Life. To begin with this appears to be the only one of the three which grants advances on its own policies, assigned to it as security. Out of its total invested assets of $107,570,593, nearly $6,000,000 are represented by such loans. Then the New York Life also holds more United States Government bonds than either of the other two, and the rest of its money is, on the whole, well placed amongst the highest or better class of United States railroad bonds. Also, this company is an extensive holder of foreign government securities, and, speaking broadly, has distributed the bulk of the money thus invested in those which may be regarded as of the best class. The small amount placed by it in such securities as Argentine, Brazilian, or Cuban bonds would not affect its stability in the slightest were the entire amount to turn out a dead loss. So far as we have been able to judge from the list this company has avoided speculative stocks to an extent which deserves to be emphasised and commended. But it must also be pointed out that a considerable proportion of its investments are of a description which would be difficult to realise, on any call upon the company for an immediate large sum in cash. The securities may be good to hold, but they are not particularly marketable. A large amount of money, for example, has been placed by the company in the divisional and main line bonds of Chicago, Milwaukee, and St. Paul Railroad, the Chicago and North-Western Railroad, and in the Missouri Pacific, the New York, Lake Erie and Western first and improvement mortgages, the Northern Pacific terminal bonds, and in the Sanitary District of Chicago bonds. Also this company holds a good deal of preferred and common stocks, not only of railways, but in banks and trust companies. On the whole, however, there is little to object to in its investment list, for policy-holders in the United States

at any rate, and if we had nothing else against it we should let it alone.

Turning to the other two companies, we come into a decidedly more speculative atmosphere. Both the Equitable of the United States and the Mutual of New York concerns, for example, are large lenders upon the Wall-street Stock Exchange, and possibly on other American Stock Exchanges. The one had lent out in this way $11,723,700 at the date of the last return, and the other $11,091,525, or considerably over £2,000,000 in each case. Of course, they have security for these advances, but it does not strike us that the security is in all cases first class. The Equitable, for instance, had lent $250,000 upon $125,000 stock of the National Bank of Denver. To be sure, its statistical compiler placed the market value of this stock at $312,500 when the return was drawn up, but the security was not first-class even so. Another $800,000 was lent on the security of Western Union Telegraph stock, Baltimore and Ohio railroad stock, and Baltimore and Ohio South-Western 4½ per cent. bonds, with other smaller items. The large amount of $3,258,000 had been advanced against deposits of Louisville, Cincinnati, and Lexington 4½ per cent.—the principal item—together with Great Northern Collateral Trust "fours" and preferred stock, Northern Pacific General Lien 3 per cents., Southern Railway of Georgia guaranteed stock, Cairo, Arkansas, and Texas 7 per cent. bonds, Guaranty Trust stock, Atchison, Topeka and Santa Fé notes.

The list of pledges held by the Mutual Company is even more diversified, not to say ragged, and comprises a great number of securities of which we never heard in this country. They may not be the worse on that account, but we may notice that $350,000 has been advanced against debentures of the Frank Jones Brewing Company, whose par value is $824,985, and whose market value at the time of the return was $494,991. Another $900,000 has been lent against a deposit of $1,080,000 in 5 per cent. first bonds of the Broadway Realty Company. Most of the other loans were in much smaller amounts, which is following a wise principle, and the security held against them was of all kinds, good and perhaps not good. Thus $600,000 was lent on Louisville and Nashville 4 per cent. unified bonds, par value $990,000, market value $773,000; $775,000 on Western Union Telegraph stock and Fairmont, Morganstown, and Pittsburgh Railroad 4½ per cent. bonds, this latter being a dependency of the at present bankrupt Baltimore and Ohio Railroad; $400,000 on South and North Alabama Railroad consolidated 5 per cents. and Pensacola and Atlantic Railroad 6 per cent. guaranteed "firsts" (the former a poor concern, the latter a small limb of the Louisville and Nashville); and $500,000 on New Jersey Central stock and Delaware and Lackawanna "half stock." At the date of the list the market value of the portions of these two stocks held by the company was $5,000 below the amount of the loan.

We cannot proceed further with this analysis this week for want of space, but shall resume it in a proximate number. In the meantime, we should like to know what the Equitable of the United States office means by advertising its British Branch as a separate and, as it were, self-contained concern? We cannot find that its British provided funds are invested here. They certainly are not in anybody's control here as trustees.

The Moods of the City and their Danger.

How changing they are! One day, all feathers displayed, we are ruffling it like heroes, and the next creeping about with gloomy faces. Just at present the inclination is to be out of temper with everything and everybody; so much so that the hottest of fire-eating—at a safe distance—jingoes is comparatively quiet, and the opinion can be heard tentatively expressed in unexpected quarters that after all it may not be such good fun to play conquering hero among savages, wherever any such are left and to be got at. Nay, the heresy has been broached that it might be foolish to go slaying our neighbours the French for the sake of a strip, or strips, of African soil which may never be of the slightest use to us. These, though, are extreme views and based on the stomach. You see all these wars and rumours of war are "spoiling business"—not merely the business of the company promoter and the stock and share jobber, important though these may as affording the means of livelihood, let alone fortune, to thousands in their tens—but all mercantile business as well. Trade is "slow" with many places, because of these agitations in favour of war now prevalent East, West, North, and South. Merchants are, therefore, growing impatient, bankers, in some cases, prudent, and commission agents and brokers hungry. Everybody wishes these disputes might have speedy end; curses delays with his whole heart.

Are we to conclude, then, that the end desired is universal peace? By no manner of means. The dissatisfaction and impatience now felt and expressed is far more likely to end in a clamour for war with some "Power" or other than in an earnest appeal for peace. What men are chafing over is doubt and uncertainty. If diplomacy, with its slow and labouring march, cannot solve doubt and clear the atmosphere, so that men may "see their way" to this, and the other undertaking, then the cry will arise for a solution by arbitrament of arms. This is our City mood at present, and it constitutes a real danger. So much warlike talk has been indulged in that the public mind is becoming habituated to the notion that by war alone can certain disputes be satisfactorily brought to an end. We see the effect of this same kind of instruction in the present temper of the United States people over Cuba. They do not want war with Spain, and never as a mass did want it. But their "Yellow" press, contractor and monopolist suborned, has so dinned the idea of war into their minds that they are now prepared, not merely to risk war, but to rate in their impatience those slow coaches like Mr. McKinley who are not prepared at once to declare it. A little more delay and such a mood may force war.

It is the same with us, and the pressure exercised by this heated, crude form of public opinion on the proceedings of Ministers of State and diplomatists becomes at times irresistable. However much men may in their hearts think that the Gold Coast Uplands are not worth fighting for, that the gift of them to France *en bloc* would be a snare and a curse to her, their exasperation has been excited to so great a degree by the haggling, the accusations of bad faith, the seeming obstinacy, and, above all, the prevarications, as they appear to us, of the French Government, that most of them—we speak of the City only—would shout with

joy were war to be declared within a week. Stagnation breeds recklessness of mind, and recklessness, stimulated by the truculent writings of the stay-at-home scribes, is almost ready to assume a blood-spilling and destructive turn. So many impending bankruptcies, too, so many financial rascalities of all degrees, could be buried away safely beneath the *débris* of a crisis produced by a big war, that the multitude of the conscienceless is on the side of strife, and it is a great multitude. Unquestionably the hour is anxious, the prospects dark. Yet we hope still, and shall go on hoping that counsels of peace will prevail, not in Africa only, but in China, where France is acting very foolishly for her own best interests, playing a game supposed to be Russia's, without resources of her own to profit by it even if it succeeded. It cannot succeed. Were France friendly and a free trader we might let her officials swagger and "claim" and clamour to their heart's content, jogging on our way in calmness. Protectionist, hostile in business and jealously exclusive as France is under her present *régime*, we dare not allow her even the semblance of success. That is our temper over the Chinese question, and Frenchmen cannot too soon know it. One step too far and our blood will up, beyond statesman's or anybody's power to still it again until torrents of it have dyed the earth. In favour of peace because we are sulky, "humpish," and out of temper? Not a bit of it.

The London and Westminster Contract Corporation, Limited.

Probably most of our readers have given but slight attention to the extraordinary story about this company which has been in part unfolded before Mr. Registrar Hood at the London Bankruptcy Court. It is worth more than passing attention, because it gives us an example of the purely highway robbery kind of finance, such as has not often been surpassed. Two American gentleman, it would appear, came over to this country some time ago, and, by some means or other, managed to connect themselves with one or two respectable people, perfectly innocent of business. Among others they laid hold of Sir James Linton, the well-known artist, and President of the Royal Institute of Painters in Water-Colours, a man of high respectability, and also, we should judge, of extreme simplicity of mind. By making skilful use of this gentleman's name, the pair succeeded in hatching a series of companies, the sole object of which is now seen to have been to abstract money from the British investor.

A leading spirit in the adventure was a Mr. Brotherton, and it was expected that he would appear and give evidence before the Registrar. He even engaged counsel to represent him, but at the last moment thought better of it, and is now said to have retired to his native country, following, in this respect, the example of his co-conspirator, Mr. Van Ee. The Official Receiver, therefore, Mr. Wheeler, had, as Mr. Spokes, one of the counsel, put it, to proceed to play Hamlet with the part of the Prince left out. Sir James Linton was called and made a very sad exhibition of himself. We do not wish to blame him for anything except excessive folly and trustfulness, but to a man in his position the reflections caused by the consequences produced by his guileless and fatuous trustfulness must be as poignantly bitter as if he had committed some crime. The particular company whose affairs were being investigated was by no means the first that the gentlemen from America had produced during their busy visit. Around it, supporting it, clothing it, giving it a serious look, was grouped quite a number of others, all perfectly shadowy in character. There was the British Exploration Company, and the Debenture and Share Trust Syndicate, both of which were simply *noms de guerre* for the said American gentlemen. Under these names they hatched, among other eggs, the London and Westminster Contract Corporation, which has a nice mouth-filling, respectable sort of name, with, ultimately, a nominal capital of £250,000, which was not an excessive capital if the ostensible business—to promote mining and industrial undertakings and to buy shares in such or generally to finance concerns in need of money—had been adhered to; but there was never anything to finance, any mine to handle, nor any real company to promote. It was mummery all through.

The various companies, or names of companies rather, under which Brotherton and Van Ee operated were pure creations of their exuberant faculty of inventiveness. From the first the nominal share capital was merely a few cyphers written down against each name. The mock companies bought each others' "shares," and played the game of finance and investment for a little time very prettily with nothing at all behind, until the British public had been drawn in to part with a considerable amount of its cash. This successfully accomplished, the whole thing collapsed like the pricked bubble it was.

Sir James Linton told the Registrar that he received £250 a year as chairman of the Contract Corporation, and had altogether obtained £435 in the shape of fees. Poor fellow, he sold his name and his respectable standing at a very low figure; but that he did it in ignorance we have not a doubt, and we can only hope that the punishment he has received for his silliness will act as a warning to others similarly tempted, and prevent many an honest man from besmirching himself for life by touching finance in any shape. Just see what this worthy artist lent himself to. Of the share capital of the "Debenture Share Trust"—another "B. & Van Ee" canvass shall we call it?—£15,000 out of £21,000, the total amount issued, was "held," to use the ordinary language, by the two worthies. The first prospectus of the L. & W. Contract Corporation, offered £50,000 shares to the public, and that simple public subscribed £36,000. Sir James Linton and the other directors of the "British Pioneers"—still another show thing—received an "option" to take up 2,000 shares of this corporation issue just for nothing at all. The success of this first flight whetted the appetites of the two Americans, and they proceeded to conduct various other curious enterprises, which it is not necessary for us to detail, all with the object of scooping up some of our money. In fact, the reader would get as bewildered as we do among numerous pretty names cropping up, all utilised for the purpose of extracting plunder. There was the "City of London Joint Stock Trust," among others, and the "British Exploration Company." The latter sold two "mining leases" to the Corporation, we gather, and the said Corporation, a few weeks later, parted with "half its interest" to the "City of London Joint Stock Trust," at an apparent profit. In this way, the Corporation was "making money." The whole

dealing was fictitious, of course, but on the strength of this purely "confidence trick" bargain, a dividend of 40 per cent. was paid on its then "capital." The said capital at that time actually, or presumedly, paid-up being only about £2,000 on which this 40 per cent. dividend meant an outlay of but £900. On the strength of this notable feat a second prospectus was issued in October, 1896, offering £100,000 worth of fresh £1 shares at 50 per cent. premium, and, of course, the 40 per cent. dividend was meant to do splendid duty in making this body attractive. So the game went on, the Corporation "buying" rubbishy shares from the Debenture and Share Trust, "contracting" to purchase patents relating to the Lee-Metford rifle—which patents somehow could not be quite got hold of—for what were, in the circumstances, enormous sums of money.

While this was going on Mr. Brotherton was busy "making a market" in the Corporation shares, which constituted the main "draw," through the board of the "British Pioneers," one of the many aliases. Having in a small way "made" this market, the additional shares were launched and a great effort made to trade them off. Happily, it never was particularly successful, although we believe the two merry fellows at the bottom of the illusion did succeed in extracting some £60,000 to £70,000 from the gullible investor. Behind the various concerns or labels there never was any genuine business of any description. It was hocus-pocus from first to last, and the company names used were simply Brotherton & Van Ee, disguised as "limited liability" companies. Thus the "City of London Joint Stock Trust," one of their names, was entitled to a "commission" on shares in the London and Westminster Contract Corporation, sold through its means, these shares being, of course, really Brotherton and Van Ee's bits of paper. And, on the strength of this kind of business, the "Trust" was made to show a profit, and a dividend of 20 per cent. was declared on its "capital," for the purpose of being utilised in the prospectus of the "Corporation." It only took £120 it seems to pay this dividend—the pair probably took it from one pocket and put it into the other—but the public did not know the hollowness of the entire affair, and could hardly be blamed for being taken in.

When shareholders discovered the character of the tricks by which they had been ensnared, it is to their credit that they combined together in order to bring the two perpetrators of the frauds to justice. We are afraid they will not succeed in doing this, and understand that a considerable portion, if not the whole, of the plunder the two men succeeded in laying hold of has been conveyed out of the country, so that neither the men nor the money they have stolen can be got at—unless they could be charged with some crime which would secure their extradition. Whether they get back their money or not, or whether they succeed in punishing these two scamps or not, they certainly deserve the thanks of the public for affording it an object-lesson in fraudulent company promotion, which ought to be exceedingly valuable if people would only take note of it and lay it to heart. These men from America only made a perfectly unscrupulous use of methods of business which are every day employed to palm off upon the public undertakings of all descriptions, from the most worthless even to the best. Company promotion has sunk to a state of degradation and uncleanness in the City of London such as was never paralleled before, and it makes the establishment of a genuine joint stock undertaking in any line of business almost impossible. Every support should be given to the official receiver to lay bare the uttermost depths of this particular piece of roguery were it only to help to bring about reforms.

Brightening Trade Prospects.

With all that there is to disturb the public mind and frighten the timid in China, in West Africa, in the United States and Spain, in India, not to speak of Crete, the mutterings of revolt in the Balkans, or the deadlock continued in Austria by the irreconcilable racial warriors, it would not have been surprising if trade at home and abroad had shown symptoms of decline rather than prosperity. It is not easy to account for it, but the fact is that trade is just now advancing by "leaps and bounds." There is scarcely a single complaint of too few orders; but a good many announcements that further contracts cannot be undertaken for early delivery. Traders and manufacturers seem alike to have made up their minds that, whatever may be the diplomatic troubles in the far East or the near East, in Cuba or West Africa, there will be no war, and so they devote themselves quietly to the development of their business. In Birmingham, indeed, such bellicose preparations as have been making in the United States have been utilised to bring "grist to the mill" there. Various Birmingham firms have busied themselves in "looking up" orders at Washington, and there is a confident anticipation of good business in that direction. Perhaps the most unexpected proof of rising prosperity is the extraordinary strength displayed at the March wool sales in London. Nothing exceptional was hoped for in that trade previous to the opening of these sales. In iron and steel, in shipbuilding, and other trades, even greater activity is shown. It seems probable that we are only now realising the full advantage derivable from the termination of the unfortunate engineers' strike.

It is, perhaps, in the iron and steel trade that the greatest activity is manifest. This is the case alike in Scotland, England, and America. The Scotch railway traffics have been going steadily up, and from the daily reports received from trade centres there, it seems reasonable to anticipate that the increase in traffics will continue for months to come. The pressure on the Scotch iron and steel trades has not for ten years been so great as it is now. Producers are working at their utmost stretch, and, of course, insist on full prices. Ironmasters can hardly deliver fast enough. A similar condition of affairs exists in America. Miners have received an advance in wages, and the output of pig-iron does not keep pace with the demand. Waterworks extensions are proving quite as serviceable in Birmingham as the war preparations in other countries. The local tube and pipe makers are extremely busy, and a contract for 6,000 tons of riveted steel pipes has just been placed with a local firm for the Birmingham Waterworks extensions. Larger contracts are under negotiation. Then the Nile railway extension adds to the demand for railway material and locomotives; and Birmingham has at present some big contracts in hand for the Midland and other home railways as well as for India. Engineers are also having a busy time with

machine tools and drilling and lifting appliances. Sheffield is equally busy. There seems to have been some anxiety as to the future of the armour-plate industry, though not on the part of those most deeply interested. The fact is that the manufacturers have been entirely remodelling their plant for the adoption of the Krupp system, and the full work of production will not be resumed until the new plant has been tested. Then the manufacturers declare they will be able to produce as much armour as is likely to be required by the English and foreign governments combined. Iron and steel makers in Sheffield are fully booked, and similar reports come from the other iron districts.

Shipbuilders on the Clyde and on the Tyne are rejoicing as well as iron and steel manufacturers. Since the first of this month, Clyde shipbuilders have booked orders for fully 50,000 tons gross of shipping. These include three new American liners—the Allan Line taking two steamers of 10,000 tons each, the Dominion Line one twin screw steamer, and the Cunard a couple of cargo boats 550 feet long. Of course, with all this trade activity, the coal business is beginning to look up, after rather a long period of indifferent dulness. But in this connection, difficulties have arisen in regard to the Welsh sliding scale. The workmen demanded better terms, and after a good deal of negotiation, the colliery proprietors have served notices upon 130,000 miners to terminate contracts at the end of the month. This, however, is described as a merely precautionary measure, and is not likely to be followed by suspension of work. Indeed, even without the sliding scale, the workmen do not seem to contemplate a strike, for at present prices, they appear to think they might almost be better without than with the scale. But with steam coal steadily rising, and the general demand as steadily increasing, we cannot imagine that either side can be willing to carry the dispute to extremities. In Barnsley 2,000 men have been on strike for six months; but other disputes are now being amicably arranged. This is no time for quarrelling in the coal or any trade.

The Corporation of Foreign Bondholders.

We have been engaged in a thankless task. It has been repeatedly stated by us that 545 members of the Corporation of Foreign Bondholders exist, and that their Council of twenty-one has by a surprise movement made ready to turn out all the rest of their co-proprietors. A careful investigation of the reports of the meetings held by the Corporation since 1880, reports collated from several different newspapers, make it clear to our mind that the permanent members have had the best of the encounter, and that the Council does not show to advantage. It has been more or less of a "pious fraud" from the first, and often a tool of the worst class of loan-monger or jobber in discredited bonds. One of the earliest discoveries made by members taking an intelligent interest in the Corporation's affairs has been that the money subscribed by them was applied in a different way from what they had proposed. Further the melancholy fact has to be recorded, that in proportion as the £100 subscribed by each member was paid back, with interest at 5 per cent. those who received the money, or a certain number of them, ceased thenceforth to take any interest in the Council's proceedings. Those alone who still were bondholders, as all had been at the beginning, discussed at each meeting how the interest of members could be kept alive so as to make sure that the Council should be controlled and bondholders consulted.

This study has made it completely evident that the purpose of those members, whose claims have been represented subsequently in a wholly different light, was an excellent one and thoroughly in the interests of their fellow bondholders. Mr. Jackson, Mr. Marriott, Mr. Staples, Mr. Costello and many others raised at successive meetings the question of the assets. Mr. Henderson was one of the first to do this, and Mr. Cohen and Mr. Bishop, each in turn, discussed the question, from the double point of view of the right of the permanent members to the estate of the Corporation and the means of assuring to the whole body an effectual control of the Council, inclusive of its dealings with the accounts in accordance with the articles of association. One or two individuals have, on occasion, referred to the assets on the basis of distribution by them among the members. Apart from this the one and only motive expressed has been to assure to the whole body an adequate representation of the holders of foreign bonds on the Council and on the committees more or less originated and guided, or played upon, by it.

Now we come to this precious Bill of Sir John Lubbock's. From time to time the suggestion has been made at meetings that a Bill should be drafted with a view to give to permanent members the possession of rights which the Council has ruled to be denied to them, by registration of the Corporation under limited liability. This, however, was an entirely different object from that sought under the Bill now before Parliament. The object of this is to evict the permanent members, and it is an object completely subversive of justice and fair play.

What has the Council ever done that it should serve itself heir to the entire property of the members of the Corporation? After having undertaken formally to render gratuitous services it has procured votes giving to itself the sum of £3,200 a year out of the income of the Corporation. It has ignored, and neglected or put off from time to time, every suggestion made by members for the satisfactory settlement of those questions which affect the position of the whole body. Not only so, but, instead of consulting their fellow members as proposed at several open meetings devoted to the subject of this Bill, the twenty-one men forming the Council, or an inner clique of them, have held secret conferences on the subject and systematically prevented the truth from leaking out. In fact, secrecy was a condition preliminary to being allowed to take any share in these conferences, which we are therefore justified in describing as hole and corner cabals for upright business men to be ashamed of.

Having gone about the matter in this furtive way, the men in the plot proceeded to spring their matured confiscation scheme upon the Corporation without even condescending to communicate the details of it, asking for proxies merely on the faith of their own assurance. By such proceedings the concoctors of the scheme of confiscation succeeded in obtaining the statutory majority, and carried their Bill by twelve votes. To this hour the great bulk of the members, we believe, have not seen this Bill.

Already attention has been directed by us, on more

than one occasion to the contemptible way in which the dealings in certificates of permanent membership have been carried on, and it is interesting to note, in connection therewith, that between February, 1896, when Mr. John Flemming proposed the committee to consider and report upon a plan of reorganisation, and the date when the Bill was finally brought to the vote, votes given to the Council at meetings of the Corporation have increased very nearly in proportion to the number of transfers passed. Does not this tend to prove that certificates have only been allowed to pass into the hands of Sir John Lubbock's friends and partisans? We think it does, and the question ought to be raised whether a searching examination should not now be made as to how these favourable votes were acquired; whether, for instance, the secretary of the Council has been occupied in canvassing executors and others to procure the sale of certificates from sources of which the Council has exclusive knowledge, and in preventing other independent purchasers from obtaining such certificates as were in the market. Should an inquiry demonstrate that this is what has been going on, the Council ought to be called to account for employing such very questionable means of securing votes. In any case, this body has secretly prepared a scheme of confiscation the reverse of the one Mr. John Flemming openly propounded in 1896, and it will be a public scandal if the Bill embodying it is allowed to pass through Parliament and become law. We do not believe for a moment that it can pass, if the light of publicity is kept shining upon it.

Economic and Financial Notes and Correspondence.

Vive L'Empereur!

Really the Colonial Secretary seems to be a little hard on those worthy gentlemen who have retired from active service as Colonial governors, and on the Press. Two such men have recently come home from abroad, namely Sir William des Vœux and Sir William Robinson, and both have been "interviewed" by enterprising journalists, to whom they have expressed frankly their opinions on the far Eastern question. In doing this they, we humbly think, performed a valuable public service, because we drudging, tax-distilling citizens have very little means of knowing anything about such a question—about any foreign or colonial question, in fact—unless men in authority communicate their opinions to us. It is useless to look for light to the Colonial Office, and even Blue Books, when they tardily appear, are often more calculated to darken knowledge than to increase it. But this kind of frankness, indulged in by men of knowledge and ripe experience, does not suit our high and mighty Colonial Secretary at all, and he has issued a circular warning, these gentlemen, his humble satraps, against a continuance of the—to his high imperial mind—most obnoxious practice. Surely the country will not endorse this hand-handed proceeding, or is it prepared to endorse anything, if so be that a big and costly war could be got up somewhere, for the benefit of the iron and brimstone trades, of the thousand and ten selfish interests that scent pelf in slaughter?

The Chinese Four-and-a-Half per. Cent. Loan.

It has been a failure so far as a public subscription goes, and the underwriters have had to stick to the larger part of it. The failure arose wholly from the changed conditions prevailing in the money market. Had the issue been made a month earlier in all probability there would have been a full public subscription, for the loan is a very fair security of the more speculative class. It no doubt stands behind the other loans China has had to emit, but as long as the present order of things prevails within that empire, the revenues assigned to this loan will be collected, after a little time, just as readily as those assigned for the service of the other loans now are. And if China is to be broken up none of the loans will be worth much. In one sense, though, this new loan is better fenced against damage than some of the others since Germans are interested in it to the extent of one half. They, at least, will not sit down tamely under the efforts of rivals to undermine the security.

In connection with the underwriting of this loan one bit of sharp dealing is the object of considerable animadversion. It appears, according to the story, that one firm which had underwritten a very large amount of it ignored the clause in the contract which forbade the sale, "direct or indirect," of any portion of it before allotment, so far as to sell to others the underwriting rights for a profit of one half of one per cent. By so doing operators were able to sell "bears" of the loan on the Stock Exchange, and then go and cover these sales by taking as much as they wanted of the amount the accommodating underwriters had to dispose of. Suppose a speculator sold £20,000 of the bonds at par, and went and subscribed for the same amount of the loan with the underwriters at 1½ discount. The result was a sure profit obtained at absolutely no risk. Of course, such a mode of doing business implied an absolute disregard of fairplay and honour, but we fear the thing happened just thus to the gain of the unscrupulous few. Those underwriters, on the other hand, who have honourably kept their bargain see all chance of immediate profit disappearing, as the scrip closed last night at 1¾ to 1½ discount and the market is spiritless and without support.

Indian Borrowings.

Sometimes a little light is afforded by a question in the House of Commons. Here is one put by the member for Cardiff and Lord George Hamilton's answer to it. We are sorry his lordship did not go further, but perhaps Mr. Maclean will push him on to tell the country what amount of foreign capital has been embarked in India, between 1860, say, and the present year, by (1) the State, (2) the guaranteed and other railways, and (3) private enterprise. The return might afford half-a-dozen India Office clerks a week's healthy employment and would be most useful in giving the public a means of knowing what the Indian people have to pay out to us every year. The quality of the "progress" they have made under our rule would also then become more apparent than it is now:—

Mr. Maclean asked the Secretary of State for India whether the deficit for the year 1897-98 announced in the Indian Budget, Rx. 5,280,000, includes or excludes the £4,000,000 sterling equivalent say to Rx. 6,000,000, borrowed in England, and applied in part payment of the Home charges for the year; and what are the total net amounts of the actual additions to the Debt of India in 1897-98,

and estimated to be added in 1898-99, without reckoning capital raised for expenditure on reproductive public works.

Lord G. Hamilton.—The deficit of Rx. 5,280,000 in 1897-98 is the excess of expenditure chargeable against revenue over the revenue of the year. It includes the interest charged in the year in respect of sterling debt incurred; but, in arriving at the amount of the deficit, the money raised by borrowing in the year is not reckoned as part of the revenue of the year. It is, however, included in the ways and means, out of which the deficit and capital expenditure have been met. 2. The total additions of the debt of India in 1897-98 and 1898-99 are estimated as follows:—In England, £11,112,600; in India, Rx. 5,424,900; but I am at present unable to say how much of this has been or will be applied to expenditure on reproductive public works until I get the full detailed accounts. The railway capital expenditure in both years was large.

Our Trade with the Far East.

Sir. Robert Giffen, in a letter to yesterday's *Times*, supplies a valuable correction to the exaggerated language used about this portion of our business by that enthusiastic Empire-stretcher, Mr. Colquhoun. He begins by quoting the figures in the latest "Statistical Abstract," to prove that the entire value of this trade, including that with the Dutch East Indies was, in 1896, £31,675,000. Of this total £11,721,000 represented our imports from, and £19,854,000 our exports to the Far East. Instead, therefore, of being "one-sixth" of our entire foreign trade, this total represents only about one twenty-fourth of it. Even this is not to be despised. It is, indeed, too valuable a portion of our business to lose, and what we keep insisting upon is that the great population of China alone ought to stimulate us to bring about a considerable increase in the volume of the business, both ways. Some further comparative statistics, compiled by Sir Robert Giffen, are interesting enough to be quoted entire:—

Comparing these figures, again, with our trade with British India, we find that our imports from India in 1896 amounted to £25,285,467, and our exports thereto to £30,841,551, making a total of £56,000,000, or nearly double our whole trade with the Far East. If we included Ceylon with India, these imports and exports would be increased by about £6,000,000, giving a total almost exactly double our trade with the Far East.

To give a further idea of the scale of our Far East trade with reference to our imports and exports generally, we may notice that our imports and exports with Russia amount to £34,000,000 or more than the whole of this Far East trade; with Germany to £61,000,000, or about double; with France to 70,000,000, or more than double; with the United States to £138,000,000, or more than four times; and with Australasia to £54,000,000, or one-and-a-half times the Far East trade. The Far East trade is thus important in its own place, but it has not the importance for us of other parts of our foreign trade.

Of course, there is a movement of bullion and specie to be reckoned as well as an import and export of merchandise, but the proportions of our trade with the Far East to our total trade would not be varied by including the bullion and specie.

It is also quite true that the Far East trades with other parts of the British Empire, especially with India, the exports of opium from India to China being a well-known fact. Our shipping interests in China and the Far East are also considerable, more in proportion to our total shipping, I should say, than the imports and exports are to our total trade. But recognising all this we must also recognise that for our import and export trade, as it is commonly understood, China and the Far East are not so very important. The most important countries for us are in truth those very rivals of whose tariffs and protectionist proceedings we have reason to complain, but with whom our trade nevertheless goes on, owing, I believe, to natural causes, and to our own free trade policy, which the protectionist policy of other nations is wholly unable to overcome.

In the concluding sentences of this extract we, needless to say, thoroughly agree, and it is because we do so that we believe it possible for a greater expansion in our trade with the Far East to be attainable than Sir Robert Giffen seems willing to allow. Our free trade policy ought to stand us in as good stead there as everywhere else, provided that we do not allow rivals to plant themselves down in the richest parts of the Chinese Empire and start "exclusive dealings" there for the benefit of their own, more or less, State-sustained manufacturers.

Western Australian Boasting.

Listen to Sir John Forrest, the Premier of the Colony, upon them. He had been "banqueting" at Menzies on the occasion of the opening of the new railway, plentifully borrowed for, and thus delivered himself:—

During the last two years railway connection had been established with Kalgurli, Kanowna, Boulder, and Menzies, and would be carried further if the prosperity of the mining industry warranted it. There was now, continued the Premier, a continuous line of 1,000 miles from Albany, and another for fifty miles to the goldfields at Coolgardie. The water scheme, which had been started, would, although costing £2,250,000 and £300,000 yearly to keep up, pay for itself within twenty years. The mines which were now worked at a loss would, with an increased water supply, yield profits. The gold production of the colony during January last had been greater than that of Victoria and Queensland combined. The annual trade amounted in value to £10,000,000. Seven years ago there was a population of 50,000, with a revenue of £400,000; at present the population was 160,000, with a revenue of £3,000,000. The colony was, however, capable of holding millions instead of this 160,000, inasmuch as it comprised one-third of Australia.

This is most enthralling progress in more senses than one. But what if Coolgardie should fail or "give out" soon? Then the water scheme and other fine public works might grow just a trifle burdensome. Gold is at its best a poor thing to rely on for permanent prosperity. It cannot be sown and reaped you see, and therefore Sir John's glowing anticipations should be well "salted" before swallowing.

"A New Irish Muddle."

The writer of the subjoined letter is perfectly justified in saying that the taxation muddle now to be created in Ireland is only a replica of the one already existing in England. Unquestionably, the tendency of recent Imperial finance has been to produce inextricable confusion in the relations between the State and local authorities, and, in producing this, to stimulate wasteful expenditure all over the country at the expense, in the long run, of those least able to meet it. And, as regards Ireland, we cannot do better than quote the words of Mr. Morley in the debate on the second reading of the New Local Government (Ireland) Bill:—

The end of this will be that the Land Commissioners will come round to adjudicate upon the rents of an estate which has been improved by county expenditure, which has come out of the pockets of the tenants, broadly speaking, and the landlord, who has contributed nothing to that expenditure, will himself reap the benefit by having his rents increased. This, in my judgment, unless I misread the Bill altogether, goes to the very root of the policy of the Bill and justifies me in saying boldly what I only hinted at on the occasion of the first reading, that the Bill does give the landlord much more—both in the shape of rent and exemption from contributions to local burdens—than we understood was to be given when we first had the Bill before us. The hon. member for South Tyrone, I recollect, once wrote that he would vote for a Bill for expropriating Lord Clanricarde. But the hon. member is now the partner in a Bill which, so far from expropriating gentlemen like Lord Clanricarde who so absolve themselves from all their social responsibilities, will in effect give a great boon to men of that stamp, and the more absentee they are and the more ready to relieve themselves from their social responsibilities, the greater will be the boon which will be conferred upon them.

While recognising the truth of a statement of this kind, and noting the tendency of all these contributions in aid to entangle the Imperial Treasury in obligations which must one day seriously embarrass it, at the same time that they afford no permanent or substantial relief whatever to either the ratepayer or the taxpayer, it must be frankly acknowledged that protest of any kind is absolutely useless. The nation is either unaware of the dangers lying ahead for it, and created by this dole and bribe system of finance, or it has become so apathetic through its prosperity that it does not care to what lengths in extravagance and in pledging its future resources its chosen representatives may go. In regard to this Irish Bill, nothing is really more amusing to a student of political movements than the readiness with which the Irish landlords accept its provisions for granting local self-government in exchange for the £730,000 to be put in their pockets, unless it be the eagerness with which "patriots" like Mr. Timothy Healy cry, "Take all the money ye want, yer honours! We make you most entirely welcome to it!" Probably such men see the prospect of a nice political cock-pit to be opened for themselves in the future, where they may crow their loudest, and quarrel their hardest, once the landlords have received their bribe and gone.

To the Editor.

Sir,—Is not what your correspondent calls "a new Irish muddle" merely an extension to Ireland of the English finance muddle? If the principle of the Agricultural Rates Act is good for England, why not for Ireland? The present Government have extended what Lord Farrer called in 1891 "the easy and cowardly plan of subsidising local bodies by doles from Imperial funds, ill selected, ill applied, and ill distributed—doles demoralising at once to the giver and to the receivers." I agree with your correspondent that the proposed dole will go to the people who want it least: a very large part will go to absentee landlords who never spend a penny, or do a day's duty in the districts from which they draw large and excessive rentals. The rest will ultimately find its way into the pockets of the landlords also, for the value of their land for rent or sale must depend on the amount of taxation to which it is subject.

If such a grant was needed in England in aid of distressed agriculture, it is far more needed in Ireland where rural taxation has been increasing year by year. There are some districts where the local taxation is equal to from 1s. 3d. to 1s. 2d. of the rental now obtainable. Another objection to the distribution of the grant is that it will go into the pockets of the classes who are always supporting increased Imperial expenditure, who clamour for ironclads, forward policies, and extension of the Empire. If England gets any benefit from the expenditure on these things, Ireland certainly does not, yet over £10,000,000 are collected in Ireland by the Imperial authorities.

The most immoral feature of all in this measure is the coupling the grant with the local government scheme, a most barefaced bribe to the landlords for accepting a measure, which they otherwise would oppose to the death: and making the people buy the privilege of local self-government, so long promised, and so long denied to them. This exemption of rental in Ireland from taxation is a curious contrast with the attempts made by the London County Council to make rentals, that now escape, liable for their fair proportion of the local rates, a reasonable principle that seems to receive the approval of the Moderates, as well as the Progressives.
—Your obedient servant, An Irishman.

West Indian Deficits.

Appended are some figures abstracted from the accounts of our West Indian possessions for the past two years. They reveal a net deficit for the whole period of £179,458, but the shortcoming for 1897 was less than half that of the previous year. This shows that the position is not so desperate as West Indians and Mr. Chamberlain would have us believe, and afford a strong argument against making grants, like the one just voted, a permanent charge on the home taxpayer. If they had any manliness or sense of shame, most Indian planters would never dream of asking for an annual alms, but they appear to have neither the one nor the other, still less any commercial enterprise. But if they are too lazy or careless to help themselves, what claim can they possibly have to slip their hands every year into our pockets?

The Waterways of Ireland.

The following extract from the speech made by Mr. James McCann, the chairman, at the last half-yearly meeting of the Grand Canal (Ireland) Company, raises a question of far greater importance to the future well-being of Ireland than many of those with which Parliament spends its time. Inland navigation has been too much neglected in all the three kingdoms, but nowhere is that neglect more glaring than in the sister island. Yet in a perfected and extended system of canals its need for cheap transit for heavy goods might be met over a wide area of the country, provided the waterways are created and maintained in complete independence of the railway companies, whose competitor and freight corrective they ought to be:—

Ireland seems to me to be the one great agricultural country in the world in which at the present day no attempt is made to utilise or improve the waterways which, rightly understood, could be made to benefit largely every interest in the country, particularly agricultural, which may be said to be our sole interest, and having studied the question closely, Ireland seems to me to be the country amongst all those I have named most suitable for development in this respect.

The unfailing supply of water possessed by our navigable rivers and canals; the absence of interruption to traffic by frost (the Grand Canal has not been closed by frost more than an average of a week in the year during the past 100 years; the number of ports we possess all round the coast, particularly on the eastern side; and the comparative proximity of the furthest navigable waterway to the nearest port appears to me to give by nature a position of superiority to this country for the development of canal traffic not possessed by any other country I know of. Moreover, horse traction and the labour in connection with it, should be cheap in Ireland. It may be said, however, that the country could be benefited in this way only in the immediate vicinity of these waterways.

Such is not the case, as under a properly arranged system canal traffic could be through booked at so many points with the railways, that the entire country could be made to feel the full benefit.

I will not weary you further with the general observations which do not strictly appertain to the business of our meeting. Having given a good deal of attention over a number of years to this question of the Irish carrying trade (I am a railway director as well

as a member of this Canal Board), I hold strong views in the direction indicated, and I wish to state these views on the off chance that they might, now or hereafter, lead to some action being taken in the interests of the country.

I am not sanguine, however, of any practical results; the great railway companies, directly and indirectly, dominate the commercial life of Ireland, and they are not favourable to canals and navigable rivers. It will also be found that the views of those who govern us are formed and directed by the opinions of the Boards of these great railway corporations, and there is no counteracting influence exercised by the public, who seem to be interested in other subjects which must certainly be more absorbing, but in my opinion not more practical, than this great question of the Irish carrying trade.

Allsopp Deferred Ordinary Stock.

We should not be surprised if it proves to be very much "deferred," and the Stock Exchange does well, perhaps, to be angry about the issue of it. Yet what could the directors do? To live, let alone to prosper, they had to buy "pubs" right and left as outlets for their fluids, and they could not for ever go on issuing debentures or debenture stocks to pay for these, because the paper could not be disposed of. Besides, to take this course would have meant slow suicide for the company, whose future is not too well assured at any time. Hence the device of creating a duplicate amount of ordinary stock (£1,100,000) to be issued in bits as the "pub" buying line in the business demanded. It is an ingenious device, and well calculated to bring the company more discredit than cash, but needs must. And should affairs prosper, under cash stimulants of this sort, until the old ordinary stock—henceforth to be the "preferred" ordinary, entitled to a maximum 7 per cent. dividend—becomes a stable investment security what scope for gambling might not lie in the new stuff! But will the money be forthcoming? That we cannot say. We should be sorry to find any of it, but then we never were among Allsopp stockholders, and cannot understand their enthusiasm.

Company Promotions and Libel Actions.

Scarcely a week passes without some incident which clearly shows the necessity for the interference of the Legislature with the promotion of companies. Libel actions, proceedings in the courts of bankruptcy and winding up, and prosecutions at the Old Bailey, all bear eloquent testimony for some legislative control. Some interesting facts relating to several concerns floated to secure a portion of the public's spare cash came to light in the libel action brought by that mighty hunter and explorer, Martin Thomas Kays against Mr. Hess of the *Critic*. That astute gentleman, knowing that the British investor preferred concessions to the skin of the lion, proceeded to acquire a small freehold estate of some 325 square miles in the wilds of Bechuanaland.

No less than five companies were promoted to take over from Kays and his partner the Khama Concession, namely the African Exploration Gold Mining and Estates Company, The Mines Contract Company, the African Landed Estates Company, the Setlagoli Gold and Demaraland Company, and last but not least Hutton's (Bechuanaland) Gold Reefs Development Company. There is no doubt, according to the first map which was issued with the prospectus, that this peculiar estate should have been brought to the public notice for show and exhibition purposes. Rivers ran up the mountains, and during the time that the various companies were being formed to take it over, it changed its position by some three degrees of longitude. Truly a wondrous property!

The Bottomley Trusts.

One gets rather tired of Mr. Bottomley, but we cannot help remarking that his two "gilt-edged" trusts—the West Australian Joint Stock Trust and the West Australian Loan and General—only pay their final dividends for last year in scrip. This is a very simple process which many must wish they were in a position to copy. How nice it would be if the grocer, the butcher, and the bootmaker could be paid by everybody in paper after the same style. Merely print upon a little piece of paper some fancy design, and there you have an instrument wherewith dividends and other pressing debts can be paid! If the world could be run upon this principle, what a fine time it would be for all those who do not produce; perhaps not so good, though, for those who do. Unfortunately, our matter of fact mind has never fallen in with these views, and the only commentary we can make upon the matter is that if this is the best attainable result for the two "gilt-edged"—should we not rather say gilded?—Bottomley beauties, the future of the poor West Australian Market Trust can only be described as something "painful and lingering."

Banking Hours.

The money article of the *Daily News* is well qualified to speak the inner mind of the banking clerk, but we are afraid that its half-thrown-out suggestion that the banks should open at 9.30 in the morning, instead of 9 o'clock, will fall upon barren ground. It might be all very well if the rule could be applied to the public offices of the City pure and simple, for there in the first hour of the day is, perhaps, one of comparative leisure—although much work even there must be done early; but a very different tale has to be reported from the suburbs. There the offices have a busy time between 9 and 9.30 in the morning, as their customers often call in on their way to business. The London and South-Western Bank a short time back, in opening an office at Richmond, followed its usual course as to the hour of opening, and upset the other banks in that "Sleepy Hollow," which had been accustomed to open at 10 in the morning. All kinds of dreadful prophecies have been uttered in regard to its boldness in the matter, but we venture to affirm that a few years hence all the banks at Richmond will open at 9 o'clock. The clerks can make it up, as Charles Lamb did at the India House, by going away the earlier.

A Strange Share.

In 1894 the British American Land Company obtained an Act whereby its 5,597 of £25 shares were divided into 5,597 "A" shares of £1 each, and 5,597 "B" of £24 each, the "A" shares to receive 25s. per annum as interest, and the "B" shares to receive no interest at all, but to be redeemed by purchases out of surplus revenue. In this way the shareholders were first to receive 5 per cent. upon their investment and the remainder of the net revenue was to go in redemption of capital. So far this arrangement has worked out satisfactorily, for since the Act has been put into force

1,088 "B" shares have been redeemed, at prices ranging from £6¼ per share downwards, and, in this way, £26,112 nominal of capital has been wiped out. The balance left over this year after paying the 25s. dividend is £4,000, which will permit of the redemption of about £13,000 nominal of "B" shares, at their present prices of £7 per share, bringing their total down to £95,000, valued at about £30,000 in the market.

As they bear no interest there will not be much inducement for outsiders to pay high prices for these shares, but if Canadian affairs continue hopeful, the holders will be inclined to refrain from surrendering them when the company comes in to bid, and so the price must gradually rise. To hold them is a strange sort of speculation in which the individual backs his own opinion as to the future of Canadian land. If all goes well, the most tenacious holders may obtain £24 per share for their "B" shares—above that figure the price cannot go as drawings would then take the place of bidding—but the loss of interest upon the money might easily take away much of the seeming profit, while, of course, a turn in the Canadian real estate market might indefinitely postpone re-payment.

The Division of Drapery Profits.

In our reports and balance-sheets we deal with three drapery companies, all working in London, and it is interesting to note the manner in which they have divided their profits. They draw up their accounts differently, so that it is impossible to say that "net profit" means exactly the same thing in each case, but we have endeavoured to make it as uniform as possible in the following table :—

	D. H. Evans & Co.	Jones & Higgins.	T. R. Roberts.
	£	£	£
Net profit	32,800	22,407	17,908
To Reserve	1,834	5,490	700
Debenture Redemption	835	—	—
Preference Dividend	4,800	—	1,740
Ordinary Dividend	14,400	12,350	7,980
Founders or Managers	6,000	3,250	2,812
Dividend	12 p.c.	9½ p.c.	10½ p.c.

A glance at the figures ought to satisfy anyone who understands business that the 9½ per cent. dividend of Jones & Higgins is far better secured than the higher distributions of the two other concerns, and a look into the balance-sheets shows that that concern is distinctly superior in every respect, although it pays a lower rate of dividend.

More about American Life Office Methods.

Subjoined is a plain-spoken note from the provinces on this subject, and plain-speaking is emphatically required. Within the last day or two we have ascertained that at least one agent of these alien institutions has been going about declaring that the hostility shown to them by the Investors' Review is due to the fact that they "have refused to give it their advertisements." The exact contrary is the truth, and we shall take care to make this plain in future. When this Review was started as a quarterly magazine in February, 1892, we decided to absolutely refuse the advertisements of all these concerns, and this decision has been adhered to throughout.

To the Editor.

March, 1898.

Sir,—I see the strong remarks you make in your Investors' Review of February 4 and March 11 about the Mutual of New York. This company nearly got me to insure with them, and did get a friend of mine for £1,300. I proposed a policy with them for £500, for which I was to pay an annual premium for twenty years of £20 14s. 7d., and upon this annual premium I was told I should get 3½ per cent. compound interest at the end of twenty years. They estimated the sum I should get at £571 7s. 1d. I worked out £20 14s. 7d. paid yearly at 3½ per cent. compound, and found it came to £606 14s. 8d., also at 3 per cent., which came out at £573 14s. 2d. The manager here and the agent were actually fools enough to assure me that £20 14s. 7d. paid yearly at 3½ per cent. compound came to £571 7s. 1d., and even when I proved it came to more, they said anyway it was over 3¼ per cent. They are getting a quantity of people to insure on the strength of leading men who have insured with them for large sums, and they told several friends and myself that they had one of our leading statesmen in for £50,000. It turns out that this statement is true to the extent of £20,000 only, *i.e.*, it is 60 per cent. lie. I am now sorry that I did not take note of more of the leading men they had upon their paper, so that I could write them. It looks to me as if they are working the country for all it is worth, and when they can drain it no more they will clear out.—Yours faithfully, H. O.

Critical Index to New Investments.

JOHNSON, MATTHEY & CO., LIMITED.

This company, which was formed in 1894 to carry on the business of assayers, refiners, and metallurgical chemists, of Hatton-garden, established upwards of a century ago, has a share capital of £900,000, which is all held by the late firm. There is now offered an issue of £250,000 4 per cent. mortgage debenture stock at 102 per cent.; it forms part of a total of £400,000, and is repayable by March, 1948, at par, but is redeemable at any time on six months' notice at 112 per cent. Interest due January and July. Imports of the precious metals into England are largely increasing, and it has become desirable to have command of an increased amount of money. Extra capital has hitherto been furnished by the directors, but for family reasons it is now considered preferable to provide it on a more permanent basis. The amount at present so under advance is £152,000. Assets are large and good, the total being £542,000, of which freehold properties represent £123,000; stock of gold, silver, platinum, &c., £263,843; cash, £70,000; and besides this there will be £98,000 net from the present issue, and there is £150,000 uncalled share capital. Figures of profits are not supplied, but Jarvis & Co., the accountants, say that average profits for past five years have been sufficient to pay the interest upon the debenture stock now to be issued, more than six times over, or, in other words, they may be said to have exceeded £60,000. It is a first-class business, evidently very profitable, and the large assets should make the debentures a good investment. Yet we cannot help wishing the information more complete. Why put a premium of 12 per cent. on the debentures if redeemed before the due date?

APLIN & BARRETT AND THE WESTERN COUNTIES CREAMERIES, LIMITED.

With this neat title a Company is formed, having Robarts, Lubbock & Co., Stuckey's, and the Wilts and Dorset as its bankers, to buy the old established business of Aplin & Barrett, cheddar cheese and butter merchants, of Yeovil, Somerset, with which is to be amalgamated the businesses of the Western Counties Creamery and of a sausage manufactory now carried on by Maynard's Pure Food Company. It seems a pity the sausage business is not included in the title. The capital is £100,000 in £1 shares, half ordinary and half 6 per cent. cumulative preference, of which 34,000 ordinary shares, with £28,000 in cash, are taken by the vendors. The cheese business is about half a century old, and the sausage business rather older, but the creamery only dates from 1888. Profits for 1896 are certified at £5,218, and for 1897 at £7,791, whereas the dividend on the preference shares will want only £3,000. Upon this showing, they would appear to be pretty safe, but it is quite a local affair, and Yeovil people will know more about it than the London market.

"FINANCIAL NEWS," LIMITED.

The company was originally registered early in 1885, and was reconstructed at the end of 1888 with a capital of £100,000, in £1 shares, half being ordinary and half 6 per cent. preference, and 48,358 shares of each class were issued as purchase money. Profits having increased, the undertaking is to be again reconstructed with a capital of £200,000, in £1 shares, 50,000 being ordinary and £150,000 5 per cent. cumulative preference. Purchase price this time is £200,000, including £100,000 in cash and all the ordinary shares, while the public have offered them 100,000 preference shares. Company acquires leasehold premises in Abchurch-lane, goodwill of paper and stock and book debts of vendor, together with a cash reserve fund of £30,000. The net profits for three years are certified to show an average of over £31,000 a year. How long will that continue when the present company-hatching fashion is at an end ?

OMNIBUS AND TRAMCAR CIGARETTE AUTOMATIC SUPPLY COMPANY, LIMITED.

If this company is floated, Louis Coen, the vendor, will be in luck. In the first place, he appoints himself managing director of the company ; he then sells to it the rights granted to him for seven years to supply cigarettes from boxes placed on the vehicles of the London General Omnibus, the Road Car, the North Metropolitan Tramways, and Tilling & Co., and also the patent rights of L. Coen's Improved Automatic Delivery Machines, 2,000 of which machines he contracts to supply. He also reserves an option to supply the cigarettes, and having made the future pretty comfortable for himself, he takes £85,000, including £55,000 in cash, for his contracts, his rights, and his 2,000 machines. From prince to peasant has apparently been studied, for the cigarettes will be supplied at prices of from one to four a penny, and the prospectus says it is anticipated that the two-a-penny and four-a-penny cigarettes will be sold by millions. Everyone is, in short, expected to smoke cigarettes, and it is added that the rent of 1s. per week per machine may even be provided by the 'bus companies' servants' purchases alone. Naturally, the success of the Sweetmeat Automatic Supply Company is brought forward, but this is not due to selling cigarettes. We see no greater prospect of this company earning much in the way of dividends on its capital of £100,000 in £1 shares than other similar companies had before they passed away.

COPPER ESTATES OF WESTERN AUSTRALIA, LIMITED.

For £60,000 in shares and £15,000 in cash, out of a capital of £100,000 in £1 shares, the company acquires the Wanerenooka Copper Mine, and an option to purchase other copper estates in the same neighbourhood situate near the township of Northampton, Western Australia, 34 miles north of the Port of Geraldton, the line from which runs to within half-a-mile of the properties. As far back as 1842, copper and lead lodes are said to have been opened up on the property, but the high cost of cartage, the gold discoveries offering greater inducements, and the low price of copper, suspended further development. Plant capable of raising 100 tons of ore per day is being erected, and on the basis of each ton containing 15 per cent. of copper, an output of 300 tons per week would result in a profit of £52,500 per annum. That such would prove the actual result may well be doubted, and it is an easy matter to build up a fine estimate with copper standing at over £50 per ton.

ATKINSONS' BREWERY, LIMITED.

Company takes over as a going concern Atkinsons', Limited, of the Ashton Park Brewery, Birmingham, to which is to be added 80 licensed houses. The business was started in 1878, and was sold to the old company in 1890. The capital subscribed and paid up was then only £60,000, and there was an issue of 5 per cent. debentures to the amount of £70,000. Farebrother, Ellis, & Co. now give an unsatisfactory certificate, as they often do, merely stating their opinion of the value of the brewery, licensed houses, and other properties to be acquired at the lump sum of £505,000, while other assets make up another £30,549. The share capital of the new company is £350,000, in 20,000 5 per cent. cumulative preference of £10 each, and 30,000 ordinary shares of £5 each. The former are offered at par, with an issue of £275,000 4 per cent. irredeemable first mortgage debenture stock, offered at 103. The preference and debenture stock interest will require £21,000, whereas the last three year's profits have been only £12,055, £15,730, and £19,150, without deduction for interest on debentures and loans, income-tax, or directors' fees. The purchase price for this choice gem is £625,000, in addition to the premium on the debenture issue, and the vendor, Thomas Edkins, would like to take £483,250 in cash. Of course much profit is expected from the new houses, much more in fact than from the old business itself, but the prospectus is rather an impudent production, and the concern should certainly be left alone.

THE SMELTING CORPORATION, LIMITED.

Applications are invited for 250,000 shares of £1 each, out of a total capital of £600,000, the vendors, the Burnham Syndicate, Limited, taking 350,000 shares, out of a total purchase price of £430,000 which is a promising sign. Company is formed to acquire from the Burnham Syndicate their business and patent rights for the treatment of refractory ores of silver, lead, zinc, gold, &c. A smelting plant has been at work at Swansea for nearly two years, but continuous operations did not commence until after January 31, 1897. A lease of a site on the Manchester Ship Canal is to be taken and plant erected at a cost of £90,000, and additions are to be made to the Swansea Works costing £10,000, so that the working capital left will be £60,000. The purchase price seems a very high figure to give mainly for patents, for there is nothing more to go upon than just a statement that during the eleven months ended December last, 10,872 tons of ore were treated at a smelting profit of £9,521, exclusive of profit to be obtained from the desilverising of the lead. It is true that a dividend of 20 per cent. is spoken of, and that the Right Hon. William Lidderdale is chairman of the board, but an investment in the shares seems, nevertheless, attended with a certain amount of risk.

COSTA RICA ELECTRIC LIGHT AND TRACTION COMPANY, LIMITED.

The object of this company is to supply electric light and electric traction in San José, the capital of Costa Rica, population 35,000 ; and to supply electric light in Cartago, population 18,000. The company takes over from vendor fully paid all the shares of the local company (capital £60,000) owning the existing electric light system in each of the two cities, the net income from the existing installations being £4,800. The share capital is £130,000, in £1 shares, and there is an issue of £130,000 5 per cent. first debentures in bonds at 90 per cent., interest on which is payable January and July. They are repayable at par in 1948, but can be redeemed at any time on six months' notice at 105 per cent. The vendor takes £107,000 in cash and the whole of the share capital. This leaves only £10,000 for working capital, which seems small enough. To meet the interest on the debentures, the revenue is not yet sufficient, and the share capital being of the same amount as the debenture issue, and wholly in the hands of the vendor, makes the security very thin.

ELECTRIC INSTALLATION COMPANY, LIMITED.

The object of this undertaking is to make installations of electric plant for lighting or other purposes in public institutions, hotels, factories, &c., on the hire-purchase system or on rental. Capital, £100,000 in £1 shares, all of which is offered for subscription. The initial outlay will thus be avoided, and the company proposes to supply customers finding their own power with a complete installation at a rental approximating the average yearly gas bill. The idea is not at all a bad one, and will no doubt be readily adopted by large firms, but we take it that some time will elapse before the company becomes a good dividend-payer.

Company Reports and Balance-Sheets.

*** *The Editor will be much obliged to the Secretaries of Joint Stock Companies if they would kindly forward copies of Reports and Balance-Sheets direct to the Office of* The Investors' Review, *Norfolk House, Norfolk-street, W.C., so as to insure prompt notice in these columns.*

Rio de Janeiro City Improvements Company.—It is useless to criticise the results of last year, as this company has just effected an arrangement with the Government whereby the accounts will be settled at a fair rate of exchange. The necessary measure passed both Chambers last December, but the Ministry of Public Works has not yet arranged the details of this important change. As it is the accounts for last year reflect the effect of an average working exchange of 7⅞d. as against a nominal exchange of 27d. After allowing for doubtful debts and loss in exchange the revenue was £127,611, and working expenses, debenture interest, and sinking fund charges, came to £128,800, leaving a loss of £1,155 on this account. In addition, £13,600 of debentures had to be redeemed, so that the company was £14,854 to the bad on the year. As £8,812 was brought in, the debit balance was only £6,041. This was written off the reserve, which will now stand at £68,058. Up to date

£187,200 of the debentures have been redeemed, and the amount outstanding is only £597,800. The company appears also to have substantial resources outside its reserve fund, so that if once the revenue was placed upon a fair basis, a change for the better ought to supervene. But, unfortunately, the revenue comes to a great extent directly from the Central Government, and, however, willing that institution may be to play the honest citizen, we are rather doubtful whether it has the power.

City Offices Company.—The revenue of this company improved last year, and, after meeting working charges, the net profit was £10,411 as against £9,594 in 1896. This allowed of a dividend of 12s. per £36 10s. paid share, as against 11s. per share for 1896, and 10s. per share for 1895. There has thus been a fair improvement in the dividends of this company, and further evidence that it has done well is set forth in the schedule of portions of properties unlet, which amounted at the end of last year to £505, as against £995 in 1896, and £1,125 in 1895. At the same time the interest charges have been reduced by dint of rearrangements, so that they practically rest upon a 3½ per cent. basis. It may therefore be assumed that the profits of last year are pretty well the best that can be looked for, and it will be a wise step if the board cuts off some of the redundant capital. The present dividend, well as it compares with former years, represents about 1¾ per cent. upon the paid-up capital, and this paltry return, combined with the £3 10s. per share of uncalled capital, renders the shares a poor investment. To recover the old capital is well-nigh beyond the range of hope, and to recognise this fact would lead to a healthier balance-sheet. As it is this account has improved of late years, but the properties must stand far above their intrinsic value.

Willans & Robinson, Limited.—After setting aside £5,277 for depreciation, the profits last half year, including £1,859 brought forward, were £16,053. A dividend at the rate of 8 per cent. per annum is proposed as against 7 per cent. in previous half-years. The sum of £2,000 is carried to Debenture Redemption Fund, and £1,500 to the reserve fund, leaving £2,012 to be carried forward. The reserve fund will then amount to £13,646, and the Debenture Redemption Fund to £6,000, all of which is separately invested. The properties appear to be carefully written down, and the trading balances are well in favour of the company.

Express Dairy Company.—This prosperous company made further progress last year, and without further addition to capital the net profit was £2,400 higher at £11,375. This enabled £1,316 to be written off expenditure on new branches, reducing that item in the balance-sheet to £1,593. The sum of £2,000 is placed to reserve, as against £1,000 last year, and the dividend is increased ½ per cent. to 6 per cent. The balance forward is then raised £465 to the substantial total of £3,936, and with the reserve of £8,000 forms a substantial backing to the company. Four more refreshment depôts have been opened in the year, all in the City, and the company has now more of these depôts than dairy branches. As the expenditure upon their foundation is practically taken out of revenue, the profits ought to further improve.

Direct Spanish Telegraph Company.—In the past year the revenue amounted to £27,575, or a decrease of £2,878 on 1896, but in that latter year the increase was nearly £5,000, so that progress on the whole continues. A part of the decline, too, is accounted for by the reductions of rates and the mode of counting the words in telegrams adopted at the Budapesth Conference, which came into force on July 1 last. Such improvements in the tariff are bound to lead to better business later on, although the present year, which will have the reductions in force for the whole twelve months, can hardly be expected to see the lost ground recovered. Ordinary working expenses were £223 higher, but there were no repairs to cable, while in the previous year the reserve fund had been repaid the amounts previously taken from it for revenue purposes in earlier years. Consequently after meeting all charges the net balance was £12,975, as against £10,818 in 1896. The usual sum of £5,000 was placed to reserve, and the dividends of 10 per cent. on the preference and 4 per cent. on the ordinary shares declared, leaving a balance of £2,489. It appears that in 1894, the construction of a new breakwater at Bilbao had caused the company to expend £3,514 in removing the shore-end of the Falmouth Bilbao Cable to a point outside the new breakwater. This sum has since been carried as an asset in the balance-sheet, but the Spanish courts having refused to make the Harbour authorities responsible for the amount, the board has decided to write it off. Accordingly the balance of £2,489 is used for this purpose, and the remaining £1,025 is taken from reserve, and will be repaid to it out of the revenue of future years. The reserve amounts now to £44,769, and is wholly invested in high class securities, the interest upon which goes directly to this fund. As the cost of cables, land lines and stations only comes to £141,847, this is a good percentage, especially as a Debenture Redemption Fund of £4,062 has already been accumulated towards the extinction of the £30,000 of 4½ per cent. debentures.

Sunnygama (Ceylon) Tea Estates Company.—Although this company had forty-three more acres of old tea than in 1896, the out-turn fell off 41,000 lb., owing to an unfavourable season. A rather better average was obtained for the portion sold in London, but the gross revenue was £735 lower at £19,825, and expenditure was considerably higher owing to the advance in the value of the rupee, and so the net revenue was only £3,951 as against £6,213 in 1896. As this company has established no reserves, the only course was to reduce the dividend, and the ordinary shares, therefore, receive 6 per cent. as against 12 per cent. for 1896. To make matters worse the directors continue their old policy of adding the cost of new extensions and permanent buildings to capital, and, consequently, have issued £10,000 more of six per cent. preference shares, which with the £10,000 of 6 per cent. debentures, makes £25,000 of prior capital with a charge of £1,500 per annum. The outlook for the £50,000 of ordinary capital is, therefore, exceedingly black, unless the board alters its policy post-haste.

Ottoman Railway from Smyrna to Aidin.—In the past half-year this company earned £221,680, or £2,951 more than in the second half of 1896. Working expenses, however, rose still more rapidly, and the net profit of £131,455 was £2,905 less. Owing to a better result in the previous half-year a dividend of 22s. per share, or 5½ per cent., was declared, as against 16s. per share, or 4 per cent. for 1896, and £10,903 was carried forward, as against £12,502 a year ago. This reduction in the balance is rather rash, as the board states that receipts in the current half-year show a considerable decrease owing to the winter being exceptionally severe, and the Anatolian Railway is reported to be making great exertions to divert merchandise coming to the head of the company's line to its own system. Unfortunately the application of the company for an extension of the line has not yet been acceded to, although it is being vigorously pressed at Constantinople.

British American Land Company.—The boom which has been going on in Canada has had its influence upon the receipts of this company, and the net revenue for last year came to £12,473, or £2,619 above that of 1896. The "A" shares, therefore, received their maximum dividend of 25s. per share, and £4,000 was set aside to purchase "B" shares. The revenue of the year benefited from the disposal of 2¼ acres in Sherbrooke for the large sum of £3,393, mainly due to a sale of water-power to the Local Street Railway Company, and the company has also been fortunate in getting rid of some of its uncultivated land. As the "B" shares stand about £7 for the £24 share, the £4,000 of capital to purchase them should cancel about £13,000, and the share capital will then be reduced to about £100,000, against which assets to the amount of £138,000 will be held. Of this, £32,851 is represented by 105,696 acres of uncultivated land, £29,991 by land, buildings, &c. at Sherbrooke City, £49,361 by instalments due for land sold, and the balance is made up of investments, cash, and a saw mill. It is a very satisfactory statement, and the "B" shares may possibly rise in value, but as they bear no interest the inclination to buy them should not be carried to an extreme point.

The New Zealand Joint Stock and Land Corporation, Limited.—In their report for the year 1897, the directors state that the company had a prosperous year, and earned net profits amounting to £73,518 by their finance business, of which £53,013 has been realised in cash, the remainder being represented by profits on shares not yet sold, which seems to be rather an imprudent mode of reckoning things. However, out of the profits, interim dividends at the rate of 30 per cent. per annum have been paid between December 31, 1896, and June 30, 1897, and a final dividend at the same rate is now declared, making 30 per cent. for the year on the ordinary shares. Such a splendid return enables the founders' shares, amounting to £5,000, to receive £13,752 as their little slice, or a dividend of £2 15s. per £1 share, that is 275 per cent. We can guess pretty well what this brilliant finance will end in, and it is noticeable that the balance-sheet at the end of the year showed cash in hand amounting to only £1,906, while amongst the assets were advances upon security from account to account 31,000 shares valued at £60,500, and uncompleted ventures at cost £16,000. We need not criticise.

The Canadian Pacific Railway Company.—This company does not yet see fit to forward its annual report to the office of the *Investors' Review*, and therefore we are a week late in noticing it. It is a good report, and the company did an excellent and profitable business especially for the last eight months of the year. Gross earnings were $24,049,535, working expenses $13,745,759, and net earnings from the operation of the roads $10,303,776. To this various items of receipts from interest, wholly or partly received from subsidiary lines have to be added, making the entire net income $10,644,482. From this fixed charges to the amount of $6,783,367 have to be deducted, and after paying these and the preference stock dividend for the year, the ordinary stock has received an aggregate of 4 per cent. for the whole year, namely 1½ per cent. in October last and 2½ per cent. payable next week. After all these distributions have been met $897,088 is left to carry forward. Working expenses took 57·16 per cent of the gross earnings as compared with 60·80 per cent. in 1896. The report states that the company has already benefited, and expects still further to benefit, from the discovery of extraordinary deposits of gold in the Canadian Yukon territory. We fear this will be but a transitory source of prosperity, and the prospect opened up by the construction of a line of railway through the Crows' Nest Pass is much more encouraging to the hope of permanent benefit. In making this railway the Dominion Government is interested to the extent of $11,000 per mile, which is to be its contribution, apparently without compensation from the company, or return of any kind. In every direction the company is launching out with large capital expenditure, buying up little bits of line, acquiring charters of roads nobody but it could build or make good use of, and so on. Considerable prospective increases in the capital account are therefore to be expected, but if it be true that the coal deposits to be made accessible by the Crows' Nest Railway are of such an extraordinary character that the aggregate thickness of the beds in the immediate vicinity of the line exceeds 125 ft. in coal of excellent quality, and capable of furnishing superior coke, then the heaviest portion of its immediate fresh capital expenditure should amply justify itself in the course of time. Besides extending its land lines the company has bought steamers for some of the inland lakes, and to carry on traffic in the Pacific between Vancouver and Victoria and Yukon. All this kind of outlay for traffic has required capital outlay on rolling stock, besides the building of a great grain elevator at Owen Sound, and another at Fort-William. On the whole, however, the immediate

prospects of the company are better than we have known them to be for a long time back.

British Law Fire Insurance Company.—For the year 1897 this company received a net premium income of £57,256, being an increase of £2,126 on 1896. The net losses came to £29,768, being at the rate of 51·9 per cent. of the premium income. Expenses and commissions amounted to about £25,000, or almost 45 per cent. of the premium income, so that there was very little margin on the year's business. The company, however, received £3,670 from dividends and interest, and £854 as profit on the sale of investments. Adding these amounts to the small balance left on the current business, there was a sum of £3,101 available for distribution, and £4,000 of this has been placed to reserve raising it to £27,000. A dividend at the rate of 3 per cent. for the year is paid out of the balance, and £1,101 is left to carry forward. It is stated in the revenue account that a substantial amount of the management expenses, consisting mainly of directors' fees, has been given up, so that nothing is apparently wanting on the part of the management to make the business prosperous.

The Exploration Company.—The reports of this company are always of a meagre character, but this time there is a chastened spirit about the document that is well in consonance with the facts. For the whole year ended December 31 last, the gross profits amounted to £180,733, as against £147,924 for the six months and eleven days dealt with in the previous report. General expenses, directors' fees and percentages, and investigation expenses come to £36,941, and there is that first cloud, "the size of a man's hand," in the shape of £1,204 written off for depreciation. We wonder what this item will grow to when stock is taken later on. The balance of £158,254 is left, which permits of a dividend of 12½ per cent. as against 20 per cent. at the corresponding period last year. The sum of £20,754 is then carried forward, as compared with £14,744 at the end of 1896. The board speaks with confidence about their investments in the Central London Railway and two Electric Traction companies, and, no doubt, they will, with time, do well by those investments; but if the mining ventures of the concern account largely for the £1,353,197 of sundry investments in the balance-sheet, we rather pity shareholders their future prospects. It is, however, essentially a marketing company, and perhaps the unhealthy mines it created have only a sentimental interest to its board. Needless to say no lists of investment is furnished, so that there are no means of ascertaining how matters stand. We note premises have been written up a bit, but loans against security and both credit and debit balances are materially lower. After the dividend is paid the investments will represent about 80 per cent. of the assets, and the company is therefore more and more dependent upon their successful realisation.

Natal Land and Colonization Company.—Owing to a reduction in the land sales, as a consequence of the rinderpest plague, the revenue of this company was £779 less at £22,350. Interest charges were rather lower and so the net profit of £14,341 was only £387 below that of 1896. After paying preference dividend the ordinary shares received 3¼ per cent. or 4 per cent. more than for 1896, and £944 is carried forward. The reserve fund remains at £7,000, while the debenture and loan debt is a little lower at £43,150. The assets appear to be of a good character, the only item needing reduction being £2,559 for "fencing expenditure." The 385,728 acres of land, house and town properties, &c., valued at £422,063, ought to be well worth the book estimate if it is even only moderately well situated.

Bandarapala Ceylon Company.—This small tea company had 416 acres of tea in full bearing in 1897, as against 286 acres in 1896, or an increase of about 45 per cent. Yet owing to a lower price for tea and heavier working expenses, chiefly through the rise in the rupee, the net profit of £3,037 was £394 less than in 1896. The dividend of 10 per cent. is maintained, but only £295 is written off for depreciation, as against £500 a year ago, and the balance forward of £66, is £374 less. Considerable extensions are in progress, but the cost is all placed to capital, and consequently there is a considerable increase in the shares and debentures issued. The tiny reserve of £1,512 is invested outside.

The Imperial (Fire) Insurance Company.—The board of this company does not publish an annual report, and only circulates an abstract of its balance-sheet privately. This is an old habit and a pity, as the company has by no means anything to be ashamed of, although it did not do so well last year as in the two immediately preceding. Its 1897 premium income was £611,279, and of this £356,046 or 58·25 per cent. went to pay losses. Expenses of management, commissions, &c., took about £226,000 more, or almost 37 per cent. of the premiums, so that altogether 95·21 per cent. of the income of the year disappeared in losses and current working charges. Out of £611,279 received only £29,250 remained as profit at the year's end. To this has to be added nearly £56,000 received as interest, &c., making the entire available balance some £85,000. Of this, £10,000 odd is added to the general reserve, raising it to £675,110. The remainder is apparently absorbed in dividends on the paid-up capital of £300,000, amounting to 25 per cent. per annum, but these dividends will only be declared at the meeting of proprietors. Besides the general reserve there is a varying special reserve against unexpired notes amounting this time to £203,592. In 1896 the percentage of losses and expenses to premiums was 90·75, and in 1805, 90·49. Last year was therefore poor, but the company is rich and powerful.

Manchester Fire Assurance Company.—The net premiums received by this company in 1807, including those from the "America" Company of New York amounted to £850,600, or £3,120 more than in 1806. The combined losses, including full provision for all unsettled claims, came to £491,755, or say 57·8 per cent. of the net premium income. Expenses of all kinds, including home, foreign, and colonial taxes and agents' commissions, amounted to £297,000, or almost 35 per cent. of the premium income, so that altogether about 92 per cent. of that income was absorbed by the current outgoings of the year. Nevertheless, nearly £62,000 remained as net receipts to be added to the £24,359 received from interest, &c., on investments. Adding a balance of £17,102 from the "American" of New York account, the amount available for allocation is £103,215, out of which the directors paid an interim dividend of 2 per cent. per share last September, and they declare a further dividend at the same rate now, together with a bonus of 2s. per share, making in all 15 per cent. for the year. After making various other provisions and payments a balance of £47,609 is left to be added to the funds for the year. The capital and reserve funds now amount to £801,391, and have increased to this figure from £463,699 at December 31, 1892. The company's funds appear to be well invested.

Canada North-West Land Company, Limited.—The year 1897 has been more satisfactory for this company than the previous one, as it has sold nearly 39,000 acres, an increase of 18,000 acres over 1896. The average price received per acre was a little less, $5·40 against $5·69; expenses per acre, $0·15, a decrease of $0·06. Profit and loss shows a balance of $5,535 to the debit, compared with $21,300 in 1896. The directors speak hopefully of the present year, and may have reason to do so, but the thing is not fat at best.

The Bank of Africa did very well during the second half of last year all things considered. It made a profit of £43,466, compared with £39,571 in the corresponding half, of which £31,500 is used in paying a dividend of 6s. 3d. per share and a bonus of 1s. 3d. per share, being together at the rate of 12 per cent. per annum, as in 1896. The amount added to reserve is increased from £7,500 to £10,000, and the contribution to Pension Fund from £1,000 to £1,500, and there is still the larger balance of £9,326 to be carried forward. Reserve now stands at £325,000, or 65 per cent. of the paid-up capital, and the bank's securities have been increased by £23,000 to £424,326. Deposits at £3,905,000 are down £473,000, and on the assets side there is a corresponding reduction of £319,000 in loans and advances, but bills discounted show the satisfactory increase of £40,000 to £935,000. The steady progress of the bank's business has continued, though the announcement that the branches at Klerksdorp, Newcastle, and Roodepoort have been closed is not very cheering.

The London Bank of Mexico and South America did much better last year than in 1896, the profits reaching £64,404, including £10,907 brought forward, whereas in the preceding year the profits with a similar amount brought in were only £42,908. The dividend, however, is kept at 8s. per share for the year, or 8 per cent., £20,000 of the increased profit being added to reserve, which is raised to £170,000, against which investments in London amount to £192,000, being, somewhat strangely, nearly £30,000 less than a year ago. The directors have been able to sell at a satisfactory profit some of the bank's holding of shares in the Banco de Londres y Mexico, and this item now stands in the balance-sheet at £239,583. On the other hand, the amalgamation effected last June between the Lima branch and the Banco del Callao, has saddled the bank with £75,000 worth of shares in the new bank, the Banco del Peru y Londres, at least that is the figure they stand in the balance-sheet, as investments, at. Current accounts amount to £139,000, and bills payable to £232,000, while a year ago these items together amounted to £896,000. Cash has declined from £300,000 to £52,000, and loans and advances from £219,000 to £187,000. These movements do not denote expansion of business and the shares of the bank hardly seem of the best investment class. Sir Francis Evans has retired from the board after an association with the bank of seventeen years.

Central Uruguay Railway Company of Monte Video.—The interim report for the second half of last year is not as satisfactory as could be wished. Gross receipts were £18,444 less than in 1896, and the saving in expenses was only £6,753. The result of the working is a disposable balance of £30,138, of which £30,000 is used in paying an interim dividend at the rate of 3 per cent. per annum, or the same as was paid a year ago. Although the decrease in gross receipts was 11·05 per cent., the working expenses amounted to 51·71 per cent., against 49·95 per cent. In explanation of the poor result, it appears that passenger traffic suffered very severely during the first three months of the half-year from the revolution, while the maize harvest last season was almost completely destroyed by locusts, 3,714 tons only having been transported, as against 54,187 tons in the corresponding half-year. In giving 88 for the ordinary stock, the buyer at present gets a return of less than 1¾ per cent., which is far from attractive, but prospects of better times for Uruguay are much more hopeful—though, for how long? Much is hoped from Senor Cuestas, while as regards this company it appears that large areas have again been planted with maize, and the wheat harvest and wool clip have both been good, so that the outlook is considered to have materially improved.

Metropolitan Electric Supply Company.—The revenue of this company in the past year amounted to £138,267 as against £116,459 in 1896, and after meeting all expenses the net balance is £43,721, as compared with £34,191 a year ago. The sum of £15,000 was set aside for depreciation as against £12,000 in each of the two preceding years. Dividends amounting to 6 per cent. for the year or 1 per cent. more than for 1896 are proposed, and £1,774 is carried forward. The number of 8-candle power lamps supplied by the company increased from 308,000 to 360,000, and since the close of the year the number connected has risen to 374,000. After deducting £3,375, the depreciation account stands at £42,895, and the company has also had the benefit of £35,429 received as premiums upon new capital. Therefore, with £845,000 of capital it has spent £850,831 upon the undertaking, has £31,108 invested in high class securities, and has an additional £30,000 to its credit after settling all its trading liabilities. Truly the benefit of accumulations is

very apparent in these electric lighting concerns. Unfortunately the compauy has not settled with its founders shares, a matter of considerable importance now as these shares are entitled to half the surplus profits after 7 per cent. has been paid on the ordinary shares.

D. H. Evans & Co.—Each year sees the capital of this concern rise, but we are not too sure that the balance-sheet improves with age. The properties, stocks, and fixtures all continue to advance in value at a pace that does not make one feel too comfortable, and when we think of the £371,000 of share, debenture, and mortgage capital, the future must be feared. Last year, however, the company claimed to do well, although it was not generally a good year for bnsiness in this class of trade. Gross profit came to £89,569, and the board could not refrain from bringing into this account £2,452 received as premium upon new shares. After paying expenses and debenture interest, setting aside £3,488 for repairs, renewals, and depreciation, writing £487 off preliminary expenses, and putting £835 to debenture redemption, the balance of £31,975 remains. This allows of 12 per cent. being paid upon the ordinary shares, and £3 per share upon the founders' shares, £1,834 being placed to reserve, and £6,182 being carried forward. The reserve will then amount to £5,531, and the debenture redemption fund to £2,219.

T. R. Roberts, Limited.—Profits last year amounted to £16,209, after setting aside £1,844 for repairs, and £500 for depreciation. The ordinary shares receive 10⅛ per cent. in dividends, the management shares £2,627, and the sum of £1,001 is set aside towards redemption of leases, general reserve, and doubtful debts. The general reserve will then amount to £2,000, and the leasehold redemption fund to £1,701. The purchase of the freehold of a part of the property has been effected at a cost of £22,000, and preference shares will be issued to pay this amount.

Jones & Higgins, Limited.—The profits of this firm of general providers last year were £29,297, as against £28,954 in the preceding year. This allowed of £5,490 being carried to reserve, the declaration of dividends equal to 9½ per cent. upon the ordinary shares, the allotment of £3,250 to the directors and managers, and the carrying forward of £2,616. The reserve will now amount to £19,318 which is a large amount to have accumulated in the short time of this company's existence, and the prosperous state of the finances is shown by the fact that the whole of this is invested in securities. Trading liabilities, in fact, are a mere shadow. At the same time we should like to see a few more details in the profit and loss account, such as allowance for depreciation, repairs, and renewals. No trade secret would be divulged with the information, and as leasehold properties and fixtures, and loose plant form a considerable proportion of the assets, the matter is not of trifling importance. The dividend is ½ per cent. higher than last year, but shareholders should not look for any important increase, as profits have to be divided by three after 7 per cent. is paid in dividend, one-third going to the shareholders, one-third to the directors and managers, and one-third to reserve.

The Nundydroog Company, Limited.—In 1897 this Indian gold mine produced £211,397 worth of gold at a gross cost of £78,532, plus a royalty of £10,570 paid to the Mysore Government. Minor adjustments brought the net income to £123,551. This meant an increase of £43,772 in the receipts, and of £29,364 in the profits. From this depreciation, income-tax, &c., took £29,955, and out of the balances of £93,994 then left, three dividends, 2s. 6d. in July, 3s. in November, and 3s. in the present month, have been or will be paid, making in all 42½ per cent. for year, as against 32½ per cent. in 1896. Out of £25,795 spent on capital account during the year, no less than £23,579 was charged against the year's profit. A slight reduction of 22 grs. per ton in the yield of gold marked the operations of the year, but the proportion is still 1 oz. 1 dwt. per ton, and the condition of the company is altogether a satisfactory one, in spite of the trouble which arose in October last from water in the Deep Levels, a trouble overcome in January—increased pumping power.

The Buenos Ayres Western Railway Company has had a very bad time, the falling off in gross receipts for the second half of last year being no less than £64,232, or 18·12 per cent. A very trifling amount was saved in expenses, so the reduction in net profit was £60,881, or 31·54 per cent. This poor showing is due entirely to injury by locusts to the maize crop, as is shown by the fact that the decrease of 235,000 tons in the quantity of maize carried represents a loss in receipts of £64,136, which is almost exactly the difference in gross receipts. In spite of this the cost of working was 54·47 per cent., against 45·55 per cent. in 1896, although everything possible, it is said, was done to keep expenses down. The result is that the available balance is only £66,780, and the dividend has to be lowered from 6s. per share to 3s. 6d. per share, a balance of £5,530 being carried forward.

French Harvey Steel Company.—During 1897 this company received 308,007 francs from licensees an increase of 146,393 francs, the net profit amounted to 289,275. After payment of 5 per cent. to the legal reserve, 5 per cent. interest on the "social" shares, directors' fees, &c., there remained 254,094 francs, out of which 190,050 francs has been set aside for the amortisation of the "social" shares, and 63,350 francs distributed among the 4,950 founders' shares. According to the constitution of this company, its social shares will rank equally with the founders' when all their uncalled capital has been provided for out of profits and the cash paid on them returned. The directors state that they have still to collect a balance of 730,000 francs as royalties on orders received, but not complete during 1897. Further orders are expected this year, so this little company ought to do well.

The Produce Markets.

GRAIN.

The Wheat Market has been weak throughout the week. English buyers were especially reserved. Little or nothing was done at Mark-lane; but there is now a good Continental demand, which resulted on Wednesday in 3d. advance on white sorts. The following sales are reported;—The Alice A. Leigh, 20,320 qr., Walla-Walla, February 17, at 35s. 7½d.; the Howard D. Troop, 15,524 qr., November 13, at 37s.; the Pandeneira, 13,123 qr., November 12, at 37s.; and the Zinita, 11,000 qr., shipping or shipped, at 34s. For the arrived Californian, Olivebank, 38s. is asked, and for the Inveresk 38s. is bid. For November 38s. is offered and this price will buy December. A steamer of 13,000 qr., No. 1 Northern Spring, March-April 15, sold at 38s. Manitoba, April-May, is offered at 39s. Maize steady as a rule. Barley dull in early part of the week, and there was a decline of 3d. per bin. On Wednesday, however, the market showed more steadiness. Oats quiet with rather a downward tendency. Wheat options ½d. to ⅝d. up. At Liverpool, spot parcels in quiet demand, but steady. On Wednesday Red American futures on American advices gained ¼d. per cautel at the opening, but soon after lost half the advance. Market inactive at first, but strengthened later on a renewed Continental demand for cargoes. The market further improved on higher opening cables, but later advices being disappointing a quiet tone prevailed at the close, with values ½d. to ⅝d. per cental dearer.

COTTON.

There has been no particular movement in cotton during the week. The spot market has been quiet, with occasional spurts of activity, and an easy undertone. In American, at Liverpool, on Wednesday a fair business was done, but at slight concessions. Brazilian was quiet, and Surat neglected without change in values. Egyptians were in better demand at the recent reduction in prices. Futures opened 1 point lower owing to discouraging cable advices, and varied but little in the forenoon, business being dull until the last hour, when America again appeared as a seller, and caused a further slight recession, the close being quiet at 1 to 1½ point decline on the day. Reports from Manchester are all of almost unmitigated dulness, There has been a small trade for Calcutta, but no improvement for Bombay, while for China staples some orders are reported. Cloth prices, as a rule, are unchanged, and holders are confident. In New York there has been constant fluctuation, but on Wednesday the fall was considerable under "bear" hammering war rumours, and selling by both "bulls" and "bears." Towards the end a partial recovery took place. The Southern markets were weaker, with declines of ⅛d. at Galveston, Norfolk, and Memfliss.

WOOL.

The second series of colonial wool sale will close on April 1. The attendance of buyers continues large, and competition is strong and widespread. Messrs. Jacomb, Son & Co., in their yesterday's circular say:—"As regards merino wools, scoureds are in exceptional demand and show a rise of nearly 10 per cent. upon January rates, the advance being more particulary marked in the case of medium qualities. In greasy descriptions, notwithstanding the lack of support from representatives of the U.S.A., who were much in evidence for these last sales, the better classes rule now fully up to prices then current, with occasionally a fractional advance, medium and inferior sorts are 7½ per cent. dearer. Pieces and broken are most keenly competed for at the full advance. Cross-bred wools, which opened in not such strong demand as of late, have since somewhat improved; fine descriptions share in the advance noted for merinos to the extent of fully 5 per cent., medium sorts sell steadily at late rates, but coarse and lower qualities are about 5 per cent. under last auction currency. Lamb's wool, when free, meets slightly enhanced values, but burry and faulty such are sensibly in buyers' favour. Slipped parcels of cross-breds character are not in large supply and show but little change. Merinos reflect the better tone noticeable above. Cape and Natal wools have also shared in the improvement noticed in Australasian; better descriptions of grease are about 5 per cent. dearer, and medium to good scoureds are fully as dear as late sales with an occasional advantage to the seller."

METALS AND COAL.

Copper has continued strong throughout the week, several advances in price having taken place. On Wednesday, however, the improvement received a check, and a decline of 1s. 3d. took place early in the day. Some 750 tons sold, cash and end March, £51, the latter date and April 14, £51 1s. 3d., while three months was bought at £51 7s. 6d. and £51 6s. 3d. The tone became weaker in the afternoon, when another 200 tons changed hands in three months at £51 3s. 9d. and £51 5s., the market closing steady, with further sellers at the higher figure, which is a decline of 3s. 9d. on the day.

The activity in the Glasgow pig-iron market has been less during the last few days. Still, a good business has been done, and the outlook is excellent. On Wednesday not more than 10,000 tons changed hands. Prices remained steady. Rather a small business at Middlesbrough, but Birmingham cheerful, and the demand at Wolverhampton is well supported, new orders to hand equalling those near completion.

Small business in coal done in the London Exchange, but in the North and in Wales the business is large and extending. The trouble about the Welsh sliding scale looks somewhat gloomy, a deadlock having been produced by the refusal of the men to grant plenary powers for the settlement of the quarrel to their representatives, and the employers refusing to renew negociation unless the men's representatives had those powers. Official quotations in London are 15s. and 14s., usual terms in the pool, for Hetton Wallsend and Lyons respectively. Since Monday, 23 coal-laden vessels have been reported as arrived in the Thames. Inland trade was more or less unsatisfactory, some classes of coal being rather pressed for sale, while other descriptions remain steady. The business in steam coal does not present any new phase. Best West Yorkshire, 9s. 9d. to 10s.; Barnsley selected, 8s.; soft nuts, 6s. 6d.; Sheffield silkstones, 7s. 6d. to 8s.; best Derby black shale, 9s. to 9s. 3d.; North Derby Tupton, 7s. to 7s. 3d.; Erewash brights, 6s. 9d. to 7s. 9d.; nuts, 6s. 6d. to 7s. 6d.

SUGAR.

Little can be said about sugar. The dulness continues, especially in beet. Futures dull, and prices still in buyers' favour. Cane kinds quiet and unchanged.

Mr. Czarnikòw, in his yesterday's circular, thinks "there is no doubt that certain outside influences have had the effect of inducing greater caution, notwithstanding that statistically the position is not unfavourable, and is likely to improve as the year proceeds."

TEA AND COFFEE.

Spot market for coffee more active in the beginning than towards end of week. Sales at auction not so steady, except for finer qualities. Rates unchanged. Futures weak and inactive. Jamaica, 1s. to 2s. lower. Colombian chiefly bought in. East India, bold common greenish foxy to fine blue, 77s. to 108s.; low to good middling, 75s. to 91s. 6d.; smalls, 44s. 6d. to 69s. 6d.; peaberry, 94s. to 111s. Colombian, good small green mixed, 40s.; peaberry, 80s. 6d. Jamaica, fine ordinary green, 44s.; good to fine greenish, 30s. to 35s. September Santos sold at 28s. 9d.

There was brisker competition at the tea auctions both on Tuesday and Wednesday. On the latter day 4,000 packages Indian, and 500 Java were sold, and previous prices fully maintained. Terminal market for China and for Indian quiet and unchanged. Good common black Congou: March, 4⅞d.; April, 4⅞d.; May, 4⅞d.; June, 4⅞d. Indian—Type 1: March, 7d.; April 7 1/16d.; May, 7 1/16d. Indian—Type 2: March. 6⅛d.; April, 6⅛d.; May, 6⅛d. Ceylon, March, 7⅝d.

Next Week's Meetings.

Monday, March 28.

American Investment Trust ...	Cannon-street Hotel, noon.
Anglo-Austrian Bank	Vienna.
Bank of China and Japan	Cannon-street Hotel, noon.
Bournemouth and Poole Electric ...	Winchester House, 2 p.m.
Foreign, American, and General Investment	Cannon-street Hotel, 1 p.m.
London Chamber of Commerce ...	Botolph House, 2.30 p.m.
Mersey Railway	Worcester House, 2 p.m.
Metropolitan Railway of Constantinople	1, Walbrook, noon.
United States Trust and Guarantee Corporation	Winchester House, 2 p.m.

Tuesday, March 29.

Alexander Thom & Co.	Dublin.
City Offices	34, Old Broad-street, 1 p.m.
Crédit Foncier of Mauritius... ...	Cannon-street Hotel, noon.
Direct Spanish Telegraph	Winchester House, 2 p.m.
Law Reversionary Interest... ...	24, Lincoln's Inn Fields, noon.
Leopoldina Railway	Winchester House, noon.
Metropolitan Electric Supply ...	Winchester House, noon.
Ottoman Railway (Smyrna to Aidin)	Winchester House, noon.
Rio de Janeiro City Improvements	Winchester House, 11.30 a.m.
Southend Waterworks	4, Great George-street, S.W., noon.
Tynemouth Gas	North Shields, 3 p.m.

Wednesday, March 30.

Bank of Africa	Cannon-street Hotel, 1 p.m.
Banque Internationale de Paris ...	Paris, 3.30 p.m.
British Shipowners Company ...	Liverpool, noon.
Canada Company	1, East India Avenue, 1.30 p.m.

E. London, + £26; Provincial, − £8; Southampton, − £15; Wolverhampton, − £12; Sunderland, + £1; Swansea, − £9.

Barcelona, − £179; Bordeaux, − £201; Calcutta, + £237.

Anglo-Argentine, week ending February 21, £230 increase; City of Buenos Ayres, week ending February 21, £508 increase.

Notice to Subscribers.

Complaints are continually reaching us that the Investors' Review cannot be obtained at this and the other railway bookstall, that it does not reach Scotch and Irish cities till Monday, and that it is not delivered in the City till Saturday morning.

We publish on Friday in time for the Review to be at all Metropolitan bookstalls by at latest 4 p.m., and we believe that it is there then, having no doubt that Messrs. W. H. Smith & Son do their best, but they have such a mass of papers to handle every day that a fresh one may well look almost like a personal enemy and be kept in short supply unless the reading public shows unmistakably that it is wanted. A little perseverance, therefore, in asking for the Investors' Review is all that should be required to remedy this defect.

All London newsagents can be in a position to distribute the paper on Friday afternoon if they please, and here also the only remedy is for subscribers to insist upon having it as soon as published. Arrangements have been made that all our direct City subscribers shall have their copies before 4 p.m. on Friday. As for the provinces, we can only say that the paper is delivered to the forwarding agents in ample time to be in every English and Scotch town, and in Dublin and Belfast, likewise, early on Saturday morning. Those despatched by post from this office can be delivered by the first London mail on Saturday in every part of the United Kingdom.

Cheques and Postal Orders should be made payable to Clement Wilson.

The Investors' Review can be obtained in Paris of Messrs. Boyveau et Chevillet, 22, Rue de la Banque.

ADVERTISEMENTS.

All Advertisements are received subject to approval, and should be sent in not later than 5 p.m. on Thursdays.

The advertisements of American Life Insurance Offices are rigorously excluded from the Investors' Review, and have been so since it commenced as a Quarterly Magazine in 1892.

For tariff and particulars of positions open apply to the Advertisement Manager, Norfolk House, Norfolk-street, W.C.

SUN LIFE
ASSURANCE SOCIETY.
ESTABLISHED 1810.

Funds in hand exceed £3,900,000.
Total Income exceeds £600,000.

The "Perfect Protection" Policy.
LIFE OR ENDOWMENT ASSURANCES
WITH

Relief from payment of Premiums during PERMANENT or temporary illness causing inability to attend to ordinary occupation for at least two consecutive months;

Suspension of payment of Premiums to meet policy-holders' pecuniary convenience;

Immediate payment of half the sum assured on disablement by total loss of eyesight or of two limbs;

AND

Special and attractive Bonus Scheme, providing large reductions or **total extinguishment of Premiums** payable after age 60.

THE "PERFECT PROTECTION" POLICY affords the most complete and suitable Assurance ever offered to professional and business men dependent upon their own exertions.

Apply for Prospectus giving full particulars to the General Manager.

CHIEF OFFICE:
63, THREADNEEDLE STREET, LONDON, E.C.

To Correspondents.

The Editor cannot undertake to return rejected communications. Letters from correspondents must, in every case, be authenticated by the name and address of the writer.

The Investors' Review.

The Week's Money Market.

The market has been better supplied with funds during the past seven days, partly because a little Japanese money has been released, and also because demands have been less. All loans falling due at the Bank of England were at first repaid, and only trifling sums have been borrowed from it within the last day or two, and from the India Council. The rate for day-to-day money has gradually weakened until 2 per cent. is about the general charge, while seven day market loans are quoted $2\frac{1}{4}$ to $2\frac{3}{4}$ per cent., a little harder latterly than earlier in the week.

Discount charges have also naturally eased to a slight extent, but the political uncertainties prevent any important movement. The outbreak once again of the warlike feeling in the United States has caused a relapse in the New York exchange, and the demand for gold on American account is therefore increased with the price of gold quoted 77s. $10\frac{3}{4}$d. to 77s. 11d. per ounce. The market, too, although less immediately dependent upon the Bank of England, is still poorly supplied with funds. End of the month requirements and the Stock Exchange settlement will probably cause the market to renew its borrowings on a considerable scale, and although the first week in April should see it receive a good deal of cash from the Government dividends, and the payment of maturing treasury Bills, the money cannot be called its own, as its debt to the Bank is so large. In any case, discount rates are likely to be maintained at about $2\frac{13}{16}$ to $2\frac{7}{8}$ per cent., and if New York renews its demands upon the stock of gold at the Bank, a revival of the former pressure may easily be experienced. Continental exchanges have fallen back a little during the week, but Paris continues to meet a proportion of the American demand. No important sums have come to our assistance from other quarters, but a few sovereigns have been shipped here from Vienna.

The Treasury Bills for £1,719,700 offered for tender on Wednesday were keenly competed for, the applications amounting to £13,681,000. The whole amount was allotted in twelve months' bills at an average rate of just $2\frac{5}{16}$ per cent. Such a rate should point to an easier market later on, but Treasury Bills and Consols are things by themselves, and each year they become less representative of the tendency in the Money and Stock Markets.

Yesterday's Bank return disclosed how illusory the superficial indications of ease in the Money Market really are. Instead of possessing a greater command over funds, the open market is really poorer, as is shown by the decrease of £1,270,291 in the "other" deposits now down to £35,002,265. The money thus lost to general use as banking credit has gone to pay off debt on "other" securities to the extent of £448,818, and to swell the Government balances by £638,871. These last are now at the altogether excessive total of £19,618,224 and cannot now long remain undepleted. "Other" securities stand at £35,367,392, a good £7,000,000 of which may be taken to represent the moneys the market, one way or another, has obtained from the Bank. The reserve of the Banking Department is lower by £201,811, at £23,515,288, although £141,000 in sovereigns came in from abroad in the course of the week. About £100,000 of this gold, however, went into circulation, together with £246,000 in notes, and this coming

week the movement in the same direction will still further temporarily reduce the reserve.

SILVER.

Once again we have a repetition of familiar conditions in this market. The "bear," although perhaps he may be right in his premises, has been too eager to grasp his profit, and so he finds himself an unwilling buyer in a market that is waiting for him to come and fulfil his contracts. The Indian Budget contained no reference to the currency problem at all, and although it has since transpired that a scheme is on foot to push the gold standard on a bit, the news is not definite enough to help the seller of silver who is short. Accordingly, the price of the metal has been put up against him, and the quotation for bars on the spot has risen $\frac{5}{16}$d. to 27$\frac{7}{16}$d. per ounce, but the forward quotation is only $\frac{1}{16}$d. higher, at 25$\frac{11}{16}$d. per ounce. At the same time, the Indian demand is better, as the fears about an increased duty have been in a measure allayed, and the price there has risen to 68 for both spot and forward, as against 66½ and 65½ respectively, a week ago. No steadiness, however, can be expected in the market until the intentions of the Indian Government are disclosed. The Budget was disappointing in one respect for the sum proposed to be drawn is £16,000,000, or £3,000,000 above the sum budgeted for a year ago. It had been hoped by the exchange market, that the whole of the borrowings would have been made on this side, and the news has caused the exchange to decline $\frac{3}{32}$d. to 1s. 3$\frac{3}{4}$d. Chinese rates have improved slightly in sympathy with silver, but buying is not possible at present prices.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7 and 8 Vict., cap. 32, for the Week ending on Wednesday, March 23, 1898.

Stock Market Notes and Comments.

These had better be brief this week, as there is really nothing fresh to say, and it is useless to labour again over the old story. The Stock Exchange is passing through a trying period of perplexity and lassitude. For investors this is not altogether an adverse condition. If they will select the securities they purchase carefully and buy moderately they may do well, although trying times appear to lie ahead for some considerable period. Still, this is a better time to buy than to sell, and unless where there are heavy commitments, sustained on credit, which have to be liquidated, and ought to be, we can advise no one to be a seller of proved securities in present circumstances.

One point which may again be referred to is the approaching destruction of the great open market in Paris. After a time this should have the effect of bringing a larger volume of business to the London Stock Exchange, but until the *coulisse* has liquidated its commitments, and transferred its business to Brussels or some other Continental centre, there will be a great want of activity in most of its favoured securities. We must be prepared for this and for a further decline in South African shares as a consequence. The public should pay no attention whatever to the puffs and prophesies of a coming "boom" in this department. The only shares in which a rising market may be still looked for are the few dealt in by the official brokers in Paris, the *agents de change*. Recruited as these will be by, perhaps, twenty of the strongest firms among the outside brokers, they may be powerful enough to raise the prices of Rand Mines, De Beers and Rio Tinto shares in particular, even above their present perilous elevation; but we should not advise people here to take any share in this operation. It will require to be liquidated one day, and we have seen the proud *parquet* of the Bourse humiliated by such a liquidation before now.

Another quarter in which activity, with expanding market and higher prices, may be looked for is that occupied by the shares of the iron, steel, and coal companies at home, which must benefit by the prodigious expenditure on ships of war which is now the fashion with us and with every great Power claiming to be civilised. Essentially this shipbuilding mania is a contractors' affair, and enormous sums of money will flow to mine owners and ironmasters as the consequence of it. Already the excitement has broken out in Sheffield, where the great armoured plate manufacturing firms are situated, and the shares in such companies as Cammell & Co., John Brown & Co., or Vickers' are on the ascendant. Those of many other related concerns ought also to go up in the natural order of things, and the wave of speculation may extend again to Home railway stocks, stagnant though these now are. If prudent people will take note of this movement, and keep their heads, they might be able, in some cases, to get enough out of the movement to pay their increased taxation for a year or two. To ask anybody seriously and deliberately to invest in such shares on the strength of a fashion which must pass away, if civilisation is to retain its foothold on this planet, and mankind to make progress towards something better than the art of mutual destruction, would be to give very irresponsible advice.

The settlement, which begins to-morrow with mining contangos, will again be a ticklish one, and we should not be at all surprised to behold trouble both in the "Kaffir Circus" and in the Australasian section. The latter is, in fact, liquidating, as we write, some weak account or another, in the shares of the London and Globe group principally, and there are a few tissue-paper "fortunes" to crumble around it before long. Stand clear, therefore; and, above all, no "averaging." That is fatal in such markets.

The Week's Stock Markets.

There is very little to be said about markets this week, and the tendency on the whole has been deadly dull, with few features of interest and little or no business. The strained condition of affairs between Spain and the United States has been the principal factor in bringing about the present state of affairs, added, of course, to the fact that the nineteen-day account is still dragging on. Consols have hardly moved all the week, Indian Government securities also remaining fairly steady; but rupee paper declined in sympathy with a weaker exchange, and several Indian railway stocks have also depreciated. The altered condition of the money market has caused a slight recovery in Colonial Government and Home Corporation issues. Bank of England stock is 3½ lower than a week ago.

Almost the only feature in the Home Railway market was a sudden jump of nearly 5 in Hull and Barnsley, due to a statement to the effect that a new arrangement had been made with the North-Eastern Company for the joint working of the Dock at Hull. This scheme apparently is not quite so favourable a one as was at first anticipated, and Hull and Barnsley stock promptly lost about half the previous rise. North-Eastern Consols were not much affected by the news, showing only

a slight rise, but other changes in the list are in the downward direction, the Scottish stocks being especially weak in spite of good traffic returns. The disastrous collision on the South-Eastern line at Lewisham caused a slight decline in the deferred stock of that company, but a satisfactory weekly return helped to restore the price to about the old level. Central London shares have again met with a fair amount of support, this being no doubt partly due to the news that Sir Henry Oakley is to be the new chairman. Midland stocks were depressed by sales, caused by the further trouble among the employés, and the other heavy lines were dull in sympathy.

As regards United States Railroad shares, the growing feeling of uneasiness owing to the delay in the appearance of the report of the Committee on the *Maine* disaster, has had a depressing effect, and prices, after advancing moderately for a time, eventually fell away upon the renewal of Home selling. A semi-official announcement states that the *Maine* report will now probably be published on Monday next, and pending the appearance of this momentous document, business has been confined within very narrow limits, and the final quotations are about the worst of the week. Canadian issues have declined in sympathy, and in the absence of fresh particulars regarding the rate war, prices have been marked down steadily day by day. A sub-committee of the Grand Trunk and the American roads interested in the rate-cutting war, is going to Montreal next week to meet the Canadian Pacific officials.

Business in the Foreign market was almost at a standstill for several days, and prices hardly moved. On Tuesday the tone hardened, but for a very brief period, and the next day saw a sharp break in Spanish "Fours" on heavy French selling, and a consequent relapse in most other leading counters. The Paris Bourse has been dull and uninteresting, although there was a slight increase in business quite at the beginning of the week, on rumours that the stocks not quoted in the *parquet* were going to be exempt from the yearly stamp duties, and that these duties were only to be paid on new issues. In the event of the re-organisation scheme being passed by the French Senate, it is thought that a considerable number of the *coulisse* firms will transfer their seat of operations to Brussels. Apart from the further serious fall in Spanish "Fours," there is no special feature in inter-Bourse stocks. Chinese issues were dull owing to the very poor applications for the new loan, but Greek bonds again show a slight improvement, and Egyptian Unified and Preference are higher. Turning to the South American section, Uruguay 3½ per cent. mark a rise, after being very depressed, and the ministerial crisis in Chile, where the members of the Cabinet have been dismissed, is responsible for the drop of several points in the various Chilian loans. Brazilian bonds weakened still more, owing to the unsettled financial outlook at Rio, and a rise in the gold premium at Buenos Ayres has caused a set-back in the Argentine group.

Changes in Foreign Railway stocks have again been in an adverse direction, the good traffic returns published by the Argentine lines having very little effect. Uruguayan Company's are again the exception, and show a further advance, but the rise in the price of silver made no impression on any of the Mexican Company's emissions.

Dealings have not been very numerous in the Miscellaneous market, apart from those in the few leading favourites, but there has been a slight increase in the volume of small investment business, and changes on the whole have been in favour of holders. The circular issued by the Allsopp board met with a good deal of adverse criticism, the proposal to issue an additional £1,100,000 in the shape of deferred shares for the purpose of purchasing more licensed houses, not meeting with approval. Allsopp Ordinary stock moved up several points, only to lose the advantage gained, and other brewery issues have remained inactive. The various firms of the Vickers & Maxim and Armstrong type have been getting big orders of late, and a considerable

appreciation in the value of their shares is apparent; but judging from the dismal report just issued by the Hotchkiss Company, misfortune still dogs the footsteps of that ill-fated concern. Satisfactory-looking reports by T. R. Roberts and several other kindred concerns has led to an inquiry for their shares, and there has also been active dealings at higher prices in Anglo-Argentine Tramways, Birmingham Vinegar, and William Cory Preference. On the other hand, Clay, Bock issues declined on the passing of the dividend; Indian tea companies have been pressed for sale; Hammond Meat Income stock marks a big decline, and a heavy fall has taken place in cycle companies' shares, Dunlop deferred being almost unsaleable. Welsbach issues are considerably lower, in spite of the satisfactory meeting.

The week closed amid depressing surroundings, and from Consols downwards there was an all-round decline in prices just at the last. Home Corporation issues were especially weak, and Home Railway stocks were also pressed for sale. A little support was forthcoming at one time for United States Railroad shares, but this soon died away, and Canadian Pacific and Grand Trunk issues closed almost at the worst points. Among Foreign Government bonds, Spanish "Fours" rallied a little towards the close on re-purchases from Paris, but the rest of the list shows nothing but falls, and the new Chinese loan was called 1⅛ discount. Rio Tinto Copper shares also left off below the highest price.

Mining and Finance Companies.

The South African market has presented the same dreary appearance this week as last, and falls again preponderate. De Beers diamond shares rallied sharply towards the last, and a few others followed to a lesser extent, but business has been on a very small scale, and purely professional. Western Australian shares have met with a little more support, but the few rises registered earlier in the week have been mostly lost again. Copper shares continue to find favour, and Rio Tinto is again considerably higher, a dividend of 25s. being looked for; but the Mount Lyell group was adversely affected by a poor return made by the parent company. Indian shares remain very firm, a number of satisfactory reports coming to hand, and the Nundydroog directors now state that the water in their mine is being gradually got under.

MINING RETURNS.

Londonderry.—320 tons crushed for yield of 477 oz. gold.

Wassau (Gold Coast).—587 tons of ore crushed yielded 745 ozs. bar gold.

Anglo Mexican for February):—Crushed 1,000 tons. $36,270 (U.S. gold).

Westralia and East Extension.—Crushed 1,675 tons: yield of smelted gold 1,104 ozs.

Great Boulder Proprietary.—For fortnight ended March 14: tons crushed 1,435, yield of gold 3,273 oz.

Ottos Kopje Diamond.—During week ended March 17, 8,357 loads washed for 242 carats of diamonds.

Bellevue Proprietary.—Clean up for fortnight ended March 12, 167 tons yielding 333 oz.

St. Augustin.—For week ended March 12, 3,418 loads yielded 93 carats.

Cuddingwarra.—Crushed 175 tons for 150 oz.

Anglo-Mexican.—Result from treatment of tailings by cyanide during February, $12,878 (United States gold); tons treated, 810.

Brilliant Block.—Crushed during the month, 1,214 tons of quartz for 534 oz. of gold.

Ivanhoe Gold Corporation.—Clean up March 15, 1,324 oz. of gold from 830 tons crushed.

Mount Lyell.—From February 10 to March 9 inclusive, a total quantity of 9,248 tons of ore has been treated, 8,427 tons from open cuts assaying before treatment—copper, 3·24 per cent.; silver, 4·24 oz. per ton; gold, ·239 oz. per ton; 821 tons from No. 4 Tunnel assaying before treatment—copper, 6·12 per cent.; silver, 6·51 oz. per ton; gold, ·059 oz. per ton. The converters have produced during the same period 313 tons blister copper, containing—copper, 309 tons; silver, 35,588 oz.; gold, 2,001 oz.

St. John del Roy.—Gold produce, March 1 to 11, £5,182; yield per ton, ·57 of an oz. troy.

Wealth of Nations.—Crushed during the last 14 days, 260 tons, the gross yield being 140 oz. of gold.

Hyderabad (Deccan).—The output of coal from the Singareni Collieries for the four weeks ended February 26, was 31,940 tons.

Houraki.—Crushed, 150 tons for 518 oz.

St. Augustin Diamond.—1,134 loads of mine ground washed, and 2,156 loads surface lumps; yield, 118 carats.

Victory (Charters Towers).—Crushing for fortnight from No. 3 shaft: 114 tons for 538 oz. of gold.

Lady Shenton.—Crushed, 630 tons; yield, 1,650 oz.; tailings, 19 dwts.

Consolidated Murchison.—Crushed 372 tons, obtained 391 oz.

Day Dawn Block and Wyndham.—Result of crushing for fortnight ending 19 inst.:—Tons crushed, 1,330; yielded, 1,272 oz.

Ouro Preto.—February return:—5,558 tons of ore produced 1,449 oz.

Palmarejo.—Return for February:—Crushed, 1,500 tons; panned, 1,150 tons; producing $29,000.

Queensland Menzies.—Crushed for fortnight, 100 tons for 641 oz.

Frank Smith Diamond.—5,200 loads washed producing 159 carats.

Leicester Consolidated Diamond.—Three week's return:—Loads washed from the mine, 10,750; from the floors, 12,025; carats produced, 503.

Melbourne Democrat.—Crushed 350 tons of ore for 240 oz. of gold.

New Australian Broken Hill Consols.—Fortnight's output:—2 tons 8 cwt. containing 9,300 oz. of silver.

Answers to Correspondents.

Questions about public securities, and on all points in company law, will be answered week by week, in the Review, on the following terms and conditions:—

A fee of five shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of five shillings must be sent to cover the cost of such letter, the fee then being ten shillings for one query only, and five shillings for every subsequent one in the same letter. While making this concession the Editor will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus:—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway?"

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The Editor has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market manipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The Editor further respectfully requests that merely speculative questions should as far as possible be avoided. He by no means sets himself up as a market prophet, and can only undertake to provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the Investors' Review, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

W. K.—I do not think you should sell. Traffics are very satisfactory, and the road has always earned its fixed charges. Its association with the Eastern system is as much to blame for the fall as anything. Better times are expected after the reorganisation of its neighbour. Given honest management, the system as a whole should do well, for it passes through important trade centres.

N. P. Y.—They have fallen in sympathy with the rest of the market. At their present price they seem high enough as they only return 10 per cent., without any allowance made for the life of the properties. In addition to the capital, which is a fair amount, there are debentures of about £100,000, to be repaid within five years. A great number of claims are owned and they are, it is true, not capitalised at a high figure, but many of them may prove utterly worthless. If the shares fall further they might be worth picking up as a speculative venture, but I do not think they are very tempting just now.

Y. F.—It is very difficult to say if it is right to average now or not. At the moment it would seem prudent to hold off. Traffics are not expanding to any extent, and working expenses are increasing. I think you will find the directors gave warning of this probable increase at the last meeting. I am inclined to think there is no hurry to buy, as there promises to be little activity in markets just yet. Should there be signs of quieter politics, and a more stable money market, you might purchase a little stock to assist in reducing the cost, but it will be a long time, I am afraid, before you will see a rise to the price you have paid.

THE PROPERTY MARKET.

An aggregate of £207,783 in the sales for last week, as contrasted with £66,578 for the corresponding week of last year, is certainly a very remarkable—almost unique—experience at the Mart. Yet it resulted from what may be called the ordinary run of business. No very exceptional lots were offered during the week, but there was a good and steady demand. The principal feature in the business on Friday was Messrs. Montagu & Robinson's sale of the freehold of 17, Finsbury-pavement, City, for £9,200—£10 per foot. A satisfactory price for the vendor, though a much better was obtained for a freehold in Gracechurch-street, with an area of 21,000 ft., for which £12 per foot was paid. Messrs. Baker & Sons dealt successfully with some copyhold and leasehold properties at Lambeth and Fulham, and other firms also contributed to the day's returns, which amounted to £16,370. Turning to yesterday week, the leading event was the sale by Messrs. H. E. Foster & Cranfield of a perpetual rent-charge of £1,600 per annum, arising from the estates of Castlehill and Ashgrove, Ayrshire, for which they obtained thirty years' purchase, or £48,000. Their periodical sale also comprised several important reversions, &c., the chief lots being:—The reversions to four one-sevenths of a trust fund of the estimated value of £41,000, life aged eighty-two, £18,400; the reversion to one-third of a trust estate, estimated value, £13,715, life aged seventy, £2,460; the reversion to one-third of a trust fund, estimated value £9,200, life aged fifty-four; also the contingent reversion to one-third of a trust estate, estimated value £3,500, lives aged fifty-four and twenty-four,

£1,275; freehold rent-charges of £44 7s. 4d. at Bradfield St. George, Suffolk, £1,050. Fifteen £10 shares (£7 paid) in the *Graphic* and *Daily Graphic* fetched £795, the total of the sale being £74,315.

Business at the Mart on Monday was only middling—the total of the day's sales amounting to £19,360. Messrs. Wriford & Dixons sold some freehold houses in Horn-terrace, St. Margaret's, for £3,000. The same auctioneers bought in a freehold residence in Gloucester-road, Teddington, enclosed in half an acre of ground, for which only £1,350 was offered. Another freehold residence, 45, Linden-gardens, Bayswater, offered by Messrs. E. and A. Swain, went for £2,250, and a third freehold, 233, East India Dock-road, changed hands at £1,400. There were various other freehold properties set up for sale on Monday, and were all disposed of at fair prices—one at Enfield, Lynton-Dene, by Mr. Alfred Richards, at £1,000; five freehold houses at Catford, offered by Messrs. S. Walker & Son, fetched £1,625; and another lot in Jutland-road, by the same firm, brought £2,235.

The principal event at the Mart on Tuesday—when the day's sales realised £33,162, was the sale by Messrs. Debenham, Tewson & Co., of a block of freehold property at Highbury Corner, covering an area of 22,356 ft., and including three shops and other buildings in Holloway-road, which realised the satisfactory price of £14,000. Messrs. Bean, Burnett & Eldridge sold, among other lots, freeholds in Dawson-place, Bayswater, and High-street, Ilford, and building plots at Sydenham. Messrs. Field & Sons disposed of some free- and leasehold properties in the south of London at good figures, and bricks and mortar were freely dealt in by other firms. At the Mason's Hall Tavern on Tuesday, the licensed house known as "The Princess of Wales," in John-road, Wandsworth, held for fifty-nine years at an annual rent of £100, was sold by Messrs. Adams & Glover for £17,520.

Wednesday's total at the Mart amounted to £63,810, and contained some important lots. Messrs. Douglas Young & Co. sold a freehold building estate of about 17¼ acres in Fortis Green-road, Muswell Hill, for £17,600, and the freehold of the Bell public-house in Old Bailey, City, for £13,300. Messrs. Thurgood & Martin were also very successful with several lots of freehold building land at Wimbledon, a block in Trinity-road, &c., a little over eleven acres in extent, changing hands at £13,500, and another block in Queen's-road, &c., covering an area of 4 acres 2 roods 4 poles, making £6,200. Messrs. Edwin Fox & Bousfield offered for sale a freehold property known as St. John's House, Clerkenwell-road, having a superficial area of about 11,300 feet, let on lease for a term, of which four and a half years are unexpired, at an annual rent of £1,058. The property went at the very satisfactory price of £15,700. The remaining lots were of minor importance, but the competition was on the whole considerable.

A conference was held on Wednesday at the Mansion House, when a resolution was unanimously passed urging upon Government the purchase of the Crystal Palace. It was urged that the Commissioners of the International Exhibition of 1851 had in their possession £200,000, which might be appropriated for the purchase of the Palace. It was mentioned that if £750,000 were forthcoming there would be no difficulty about the acquisition of the property.

CANADA'S MINERAL OUTPUT.

The advance summary showing the mineral production of Canada in 1897 bears out our recent remarks on the mining activity, and the potentialities of the country. The value of all minerals obtained is given as $28,789,173 compared with $22,609,825 in 1896, being an increase of $6,179,348. Nearly the whole of this net increase occurs under the head of metals, which total $13,996,234 against $8,055,945 in 1896, or an increase of $5,940,289. And among metals, gold is an easy first with $6,190,000 against $2,780,086, increase 122·6 per cent., being followed by silver with $3,322,905 against $2,149,503, increase 54·6 per cent.; copper, $1,501,660, against $1,021,960, increase 46·9 per cent.; nickel, $1,399,176, against $1,188,990, increase 17·7 per cent.; and lead, $1,396,853, against $721,159, increase 93·7 per cent. These percentage increases are estimated on the basis of value only; in quantity, silver rose by 73·4 per cent., lead by 61·2 per cent., and copper by 41·6 per cent. Iron is the only metal which has fallen away, the production being 71,451 tons, worth $178,716, against 91,906 tons, worth $191,557—that is to say, a decrease of 22·3 per cent. in quantity, and 6·7 per cent. in value. The increase in gold is attributed to the progress of mining in the Klondyke region and in the Trail Creek, and other districts of British Columbia; in silver and lead to British Columbia alone; and in copper partly to this province and partly to the development of the copper-nickel mattes of Sudbury, Ontario. Among non-metals there has been no particular change; the output of coal has increased slightly, and the output of petroleum has diminished slightly. It is to be noted that coal accounted for 25·31 per cent. of last year's total production, against 31·94 per cent. in 1896; gold for 21·50 per cent., against 12·30 per cent.; and silver for 11·54 per cent., against 9·50 per cent.

NOTICES.

Messrs. Campion & Co. announce that they have taken into partnership Mr. Horace Quare. The style and title of the firm will remain as heretofore.

Messrs. W. I. Carr, Sons & Todd announce that they are taking into partnership Mr. Harold Denison Arbuthnot, who has been with them for some years. The style of the firm will remain unchanged.

The Hon. Mr. Justice Grantham has been elected a director of the Equity and Law Life Assurance Society, in the room of the Rt. Hon. Sir Edward Kay, deceased.
